MINING, BUSINESS AND STOCKS

MORNING SALES ABOUT AVERAGE

Colorado Mining active on a Declining Market—Selling Heavy.

PRICES ARE AT ROCK BOTTOM.

Seven Troughs Shows Some Activity And Holds About Even.

The sales during the morning session of the exchange were of average volume with no particular activity outside of Colorado Mining and Seven Troughs. The former started in on the open board at $2.70, but declined rapidly, closing at $2.55, sell at 30. Seven Troughs opened at 48 and closed at 45½, between 4,000 and 5,000 shares changing hands.

The general tone of the market was unchanged, but prices are for the most part at rock bottom, with no prospect of immediate change.

BROCK IS NOW OUT.

A. C. Lord Succeeds Him as President Of Tonopah & Goldfield.

Word was received in Goldfield a few days ago that at a meeting of the stockholders of the Tonopah Mining company at Philadelphia, R. H. Austin of Philadelphia, one of the largest stockholders of the concern, was elected president, vice John W. Brock. Mr. Brock had been succeeded as president of the Tonopah & Goldfield railroad some days ago by A. C. Lord, formerly of the Baltimore & Ohio railroad. Mr. Lord is also made an officer of the Tonopah Mining company.

Commenting upon this, the Goldfield Tribune says: "Thus ends a fight against the Brock regime that began some months ago. Those who have been reading the weekly letter from our New York representative, will recall the predictions made during the early fall that Brock would have to leave the presidency of the two large concerns. Stockholders could not understand, with both the mine and the railroad, the latter of which the mining company was a large owner, making such enormous profits, why dividends should be cut and the stock to decline in the market. Naturally they laid it to the Brock management, and Brock had to go.

"The change in management of both mine and railroad will be welcomed by Nevada people. They never have liked the Brock policy, and it is expected that the change will be for the better all around."

INSPECTS UTAH MINES.

F. Yamada, Japanese Mining Expert, Here for That Purpose.

F. Yamada, a Japanese mining engineer from Tokyo, is making an investigation of American mining methods, having arrived in this city yesterday to begin work in Utah. This morning he left for Park City to go through the mines there and upon his return from that camp will go to other camps over the state. Mr. Yamada made his first important stop in this country at Butte and from there he went to Anaconda.

He expresses himself as much impressed with the extensiveness of American mining operations, the size of the mills and smelters surprising him greatly. Mr. Yamada's trip will extend as far east as Denver and from there he will make his return trip as short as possible. The mine with which Mr. Yamada is identified in Japan produced 10,000 tons of refined copper last year, the price being regulated by the price in New York.

LEAD KING SHIPMENT.

Car of Ore of High Grade Galena in Market.

The second car load of ore shipped so far from the property of the Lead King Mining & Milling company reached the local market yesterday. The ore is a rich galena with substantial values in silver.

The property is located in White Pine county, about four miles from McGill in the Steptoe valley range of mountains.

BLACK HORSE IS LOOKING WELL

Several Strikes on Properties Recently and Much Interest Attracted.

WILL ERECT STAMP MILL.

Greenhorn Property Under Lease and Good Gold Values Being Obtained.

According to a letter recently received by Homer Hart at present in Blackhorse, that camp is apparently on the verge of a boom as the result of a series of strikes on some of the properties. Among the principal of these is a rich gold strike on the Hamilton property which lies between the San Pedro and the original Blackhorse mine.

The Hamilton is one of the oldest locations in the district but did not attract much attention until within the last year or so. The finding of the ore at this time establishes the continuity of the ore bodies which are being worked on both the San Pedro and the Blackhorse.

Mr. A. G. Burritt, who is heavily interested in the district, announced yesterday that arrangements for the erection of a mill to take care of the ores of the district were completed and work on the same was now going forward. The mill will contain four Nissen stamps and is so arranged that further stamps can be added as the properties warrant it.

Work, he says, is being carried on with good results on both the Ohona and the Nil Desperandum groups. On the latter a dead shaft is down a distance of 212 feet. This will be continued for another hundred feet or so and a crosscut run to tap the ledge at depth. So far the principal values obtained on the property have been gold and copper in placer formation.

One of the properties which is attracting much attention in the district according to Mr. Burritt is the Greenhorn group, owned by William Hamilton. Prior to a short time ago Mr. Burritt had this property for sale. Then came the discoveries, the matter of the sale was immediately taken out of his hands and at the present time there are four outfits working under leases on the ground and all doing well. The property contains a 12-inch vein and 200 foot squares are being let along the trend of this. The ore is said to show rich values in gold.

NO REDUCTION HERE.

Phelps-Dodge Interests Will Continue To Produce Copper as Heretofore.

Bisbee, Ariz., Nov. 13.—An emphatic denial regarding the reported intended refrenchment on the part of the Bisbee mines comes from the general manager of the Phelps-Dodge interests, who says: "We have no intention of reducing our forces in the mines at the present time, and do not look for any change in conditions that would bring about such a result." As a matter of fact, the position of southern Arizona operators is essentially stronger than the majority of those elsewhere. Even the development of new properties in many instances is going forward without interruption. From Mansfield comes the report that the station at the 350-foot level of the Sweet mine is approaching completion. At the Black Cap mine they are taking out good quantities of milling and shipping ore. At the 140-foot level the vein is over 30 feet in width, while the cross vein is over 15 feet in width. At this mine there still remain a number of other veins yet to be cross-cut. It is understood that the Mansfield company is soon to call for bids for the erection of its mill.

DREDGES DO GOOD WORK.

Cause Revolution in Mining Methods In Yukon Territory.

According to a recent dispatch from Dawson, Y. T., gold mining operations in that section are being revolutionized by the electrical dredge, capa le of handling 3,000 cubic yards of earth per day of 24 hours, and requiring but 13 men to keep it at work. One notable result has been that the individual prospector and placer miner have been driven to look for new fields of operations, as vast areas of gold-bearing lands are now controlled by dredging companies. Foremost among these are the Guggenheim interests and the Yukon Basin Gold Dredging company. The latter is said to have concessions on the Stewart and neighboring rivers of over 10,000 acres.

MORE SMELTERS CLOSE.

American Smelting and Refining Co. Curtailing Operations.

James A. Pollock & Co., furnish the following, received over their private wire: News bureau says—Earnings of American Smelting and Refining Co., must of necessity have been greatly reduced since the reduction of the price of copper from 25 to 12 cents. The treatment of custom ores on a falling market is always precarious and the successful handling of such business requires great ability as well as large capital. The company has both, but stockholders may never be fully informed as to the depreciation charges made necessary by the decline in the metal markets. The American Smelting and Refining Co., by reason of the money stringency, has largely suspended copper mining and smelting in both this country and Mexico. Its copper smelters in Mexico have been completely shut down, according to advices from that country. The reduction at the El Paso plant has been cut to the limit as is the case with its Pacific coast plants. While copper has gone from 25 to 12 cents, lead has declined from 6 to 4½ cents and silver has declined from 70¾ cents to 58½ cents and the American Smelting and Refining Co. is the largest producer of both lead and silver. This reduction in price has seriously affected earnings not only because of the losses in smelting operations but because mine owners restrict operations on a low metal market. The American Smelting and Refining Co. will output nearly 100,000,000 pounds of copper this year, all of which is from custom ores. A reduction in the common stock dividend in the American Smelting and Refining Co., from 8 to 6 per cent should therefore not be surprising. In fact, under conditions of mining industry and the money market, a 4 per cent dividend basis same as the Amalgamated should not be entirely unexpected.

BIG SALE REPORTED.

Nixon and Wingfield Said to Have Sold Control of Consolidated Mines.

Goldfield, Nev. 12.—It is reported in Goldfield that Senator Nixon and George Wingfield have given an option on their stock in the Consolidated mines company, amounting to 2,000,000 shares, to Barney Baruch and other wealthy New York operators, and that $600,000 has been paid on the deal. Color is lent to the story by the election to membership on the board of trustees of J. H. Mackenzie, a prominent mining engineer, who was formerly associated with John Hays Hammond, but who is said to have more recently represented the Guggenheims. Mr. Mackenzie is understood to be slated for managing director of the company.

Two dividends have been declared by subsidiary companies of the Consolidated, payable Nov. 25, one of 10 cents per share on 854,500 shares by the Red Top, and one for 30 cents per share on 710,000 shares by the Mohawk, the total amounting to $298,450, of which the greater part will be paid to the Consolidated company, which owns most of the stock.

RICH ORE SHIPPED.

Zenoli Company in Market With Car Of Good Values.

Car 24 containing a shipment of ore from the Zenoli property near Pallisade reached the local market yesterday. The ore is all that could be expected, the returns showing 168.55 ounces of silver, 4.1 per cent lead, 2.85 per cent copper 3.2 per cent zinc, and 7.2 per cent of iron.

The Zenoli property is one of the oldest and best known in the district. It does not appear to have every scored any particular success however, until the management came into the hands of W. M. Wantland, who at the present time, has charge of the company's destinies. Under his direction good progress has been made and while it is not officially so stated, it is not unlikely that a dividend will be declared in the near future.

BOSTON WIRES.

James A. Pollock & Company furnish the following from Boston, Mass., received over their private wire:

The directors of the North Butte Mining company are scheduled to meet the 20th of this month for action on the quarterly dividend. The Butte Coalition dividend is due for declaration about the same time. There is a basis for the assumption that both dividends will be passed, and while, of course, no definite statement can be made prior to the meeting of the directors, interests close to the management confidently assert that no dividends will be declared at this time. Both the North Butte Coalition companies three months ago declared a regular dividend of $2 and 50 cents respectively notwithstanding the price of copper had at that time shown a heavy decline from top prices.

Operations at each property for some time have been conducted at 25 per cent of normal and it is this restriction of output coupled with the unsatisfactory copper metal conditions which will govern the decision of the directors. North Butte has 400,000 shares at the highest price of $120 sold in the market for $48,000,000. The property at $37 per share for the stock is today selling for less than $15,000,000, considerably less than one-third of the high statue valuation.

Butte Coalition has 1,000,000 shares and sold as high as $45 per share or $45,000,000 for the property. Today it is selling for $14,000,000. The buying of both stocks during the past month has been better than the selling, especially in the case of North Butte. There is a feeling that considerable new buying will appear in the event that the North Butte dividend is passed on the ground that the worst that can happen will have transpired and the only developments from now on, must necessarily be of a favorable character.

In the holiday season replete with good things to eat, fine pastries are important, the lightest and best are made from
HUSLER'S FLOUR.

CONCENTRATES.

Supt. Moffat of the Newhouse Mines and Smelters corporation is spending a few days in the city on business.

J. M. Reynolds, manager of the Hecla company, is back from a satisfactory trip to the property in Beaver county.

Thomas Weir, manager of the Uto Copper company, returned last night from a tour of inspection of this Bingham property.

Word was received yesterday at the offices of the Nevada Superior Mining company to the effect that the new air compressor has been installed and is working satisfactorily.

One thousand seven hundred and fifty tons of ore for the month of October is the record of the Cliff mine in the Ophir district, according to figures recently compiled by Manager Grant Snyder.

M. D. McKane of the Blackhorse Phoenix Mining company left last evening for the scene of the company's operations in the Blackhorse mining district upon receipt of news of a strike of considerable magnitude on the company's property.

The regular monthly meeting of the board of directors of the Utah Mine of Fish Springs is scheduled for this afternoon, when should a quorum result, the customary monthly dividend of 3 cents per share will be posted. Recent reports from the mine are entirely favorable.

Your
Store May
Not Be
The
Biggest
One in its line in town; but if your ads are the brightest, and pluckiest and biggest of any store of your store's size in town, you will win—and the cashier of your bank will always have a cordial greeting for you.

DECLINES SMALL, CHANGES NARROW

Short Period of Resistance Followed by Much Selling of St. Paul and Steel Preferred.

PRESSURE BECAME GENERAL.

Soon After Midday Decline in Stocks Stopped, but Prices Sagged In Late Afternoon.

New York, Nov. 14.—The stock market was in a condition of lethargy when business began. Dealings were insignificant and price changes narrow and irregular. Pacific Coast showed a gain of 1, and Baltimore & Ohio ¾. U. S. Steel preferred declined ¾.

There was a brief period of resistance, in which Union Pacific and Reading were bid up a good fraction over yesterday's closing. Large selling orders then appeared in St. Paul, and U. S. Steel preferred and the sharp weakness of those stocks depressed the whole list in sympathy. General Electric declined 2, Louisville & Nashville 2½, St. Paul and U. S. Steel pfd. 1¾, Pennsylvania 1¼ and Union Pacific, Atchison, New York, Chicago & St. Louis second preferred, and American Smelting 1.

Pressure continued, but converged largely on U. S. Steel preferred, Pennsylvania and St. Paul. The principal declines were St. Paul 3, U. S. Steel preferred 2, General Electric 3½, Tennessee Copper 2, St Louis Southwestern pfd. 2¾, Illinois Central 1½, Great Northern ore certificates 1¾, and Reading, New York Central, Amalgamated Copper, U. S. Steel 1, American Cotton Oil, Westinghouse Electric and others a point.

Bonds were irregular.

The decline in stocks stopped shortly after midday, when the declarations of the regular dividends on Union Pacific and Southern Pacific were made. Union Pacific rebounded to a point over yesterday's closing and Southern Pacific a moderate fraction. Recoveries in other stocks also were substantial. The low level showed a loss of 4¾ in U. S. Rubber second preferred, 2½ in Sugar and 1¾ in St. Louis and San Francisco second pfd., 1½ in New York Central and 1 in Atchison pfd. and National Biscuit. Prices sagged again in the middle of the afternoon and Amalgamated Copper and American Sugar sold slightly lower than before. The rest of the list was better supported and ruled above the lowest.

LIVESTOCK.

CHICAGO.

Chicago, Nov. 14.—Cattle—Receipts 8,000; market week to 10c lower. Beeves ($3.40) cows 1.10@4.70; calves 5.25@7.25; Texans 3.10@3.90; stockers and feeders 2.20@4.30.

Sheep—Receipts 500; market slow. Yearlings 4.50@4.80; wethers 4.00@4.50; ewes 3.85@4.25; lambs 5.50@6.00.

WOOL

ST. LOUIS.

St. Louis, Nov. 14.—Wool steady. Territory and western mediums, 23@25; fine medium 20@22; fine 17@19.

PRODUCE.

CHICAGO.

Chicago, Nov. 14.—The wheat market opened weak today despite higher prices at Liverpool. The weakness of the New York stock market was the depressing influence. December opened ⅛ to ⅜ lower at 96 to 96¼ and sold at 95½.

The corn market was weak because of good weather thoughout the corn belt, lower cables and the weakness of wheat. December corn opened ⅛ to ¼ lower at 55½ to 55¾ and sold at 55.

Oats were dull and prices were easy, due to the weakness of wheat and corn. December corn opened ⅛ lower at 47 and sold at 46⅞.

The provisions market was easy, the weakness of the grain markets offsetting an advance in the price of live hogs. January lard was unchanged to 7½ lower at 8.07½@8.15. Ribs were 5c lower at 6.97½c. Pork was 25c lower at 12.90.

The low point for December wheat was 94⅝. Bullish news in the last half of the session caused a rally and December sold up to 96⅛. The close was strong with December ⅝@⅞ higher at 95⅞@96.

The low price of December corn was 54⅞. Prices rallied along with wheat, sending December up to 56¼. The close was steady with December ¼ lower at 55½.

Close: Wheat—December 95⅞@96; May 98⅝@⅞.

Corn—December 55½; May 56 @¼.

Oats—December 46⅞; May 49⅞.

Pork—January 12.90; May 12.90.

Lard—January 8.07½; May 8.05@8.07½.

Ribs—January 7.22½; May 7.20.

Rye—Cash 79@80.

Barley—Cash 38@60.

Timothy—Nov. 4.30.

Clover—No quotations.

SUGAR AN DCOFFEE.

New York, Nov. 14.—Sugar, raw, quiet; fair refining 3.30; centrifugal 96 test 3.80; molasses sugar 3.30.

Refined quiet; crushed 5.30; powdered 4.90; granulated 4.80.

Coffee dull. No. 7, Rio 8; No. 4, Santos 7¾.

EVAPORATED FRUITS.

New York, Nov. 14.—A better demand was reported in the market for evaporated apples for November delivery of prime fruit, but spot quotations are unchanged, with fancy quoted at 14c; choice 9¼@9¾c; prime at 8½@ 9c; and 1906 crop at 5@6½c.

There is a jobbing demand for spot prunes, with quotations ranging from 12c to 12½c for old and new crop Californians, and 6¼c to 7¾c for Oregons up to 30s and 40s.

Apricots are unchanged, 8c for choice, 22c for extra choice, and 22@24c for fancy.

Peaches continue steady, with choice quoted at 12@12½c; extra choice, 13½c; fancy at 13@13½c, and extra fancy at 14 @14½c.

Raisins are without material change. Loose muscatel at 7½@8¼c; seeded at 7¾@8c; and London layers at 1.75@1.85.

BUTTER AND EGGS.

Chicago, Nov. 14.—Butter steady, creamery 22@27, dairy 19@24.

Eggs steady at mark, cases included, 17@29½.
