MINING, BUSINESS AND STOCKS

PROSPEROUS CAMP OF MANHATTAN

Ten Hoisting Plants in Operation With Eight Others In Transit.

NEW MILLS TO BE ERECTED.

Site Selected for One of Them Near Central—Round Mountain Mines to Be Equipped With Stamps.

Special Correspondence.

Manhattan, Nev., June 23.—Never before in the brief but record-establishing history of Manhattan has mining activity been as pronounced as at present, and never before were the mines and prospects being developed as advantageously. As depth is gained the ledges are maintaining their gold grade and are making into sulphides, a condition which proves beyond question the permanency of both the veins and their precious metal values.

Every property in the camp which is being actively worked is showing marked improvement. The period of comparative inactivity which followed the withdrawal of San Francisco capital after the earthquake and fire in that city of April 18, has been counteracted by an influx of money from the east and middle west and normal mining conditions again prevail.

There is not a mining operator or investor in the camp whose confidence in its future is lukewarm, but in contradistinction each is imbued with a spirit of optimism founded upon recent developments at the various properties. One of the very best evidences of the faith which mining men have in the Manhattan district is demonstrated by the numerous plants of machinery which have been or are now being installed on the different estates.

Operations at the Pine Nut mine are being facilitated by means of a 50-horse power steam hoist, the Manhattan Consolidated people are utilizing one of like capacity with steam as the motive power, and at the Stray Dog a 20-horse power steam plant is in operation. The Jumping Jack management is furthering development by means of a 15-horsepower gasoline hoist, a gasoline hoist of 25-horsepower supplies motive power at the Indian Camp; two 15-horsepower gasoline hoists are being utilized at the Union No. 9, and gasoline hoists, each of 15-horsepower, are in use on the Little Grey and Mustang. There are likewise in transit to the camp gasoline hoists of 15-horsepower each for the following named properties: The Manhattan Standard, Seyler-Humphrey, Manhattan Buffalo, Stray Dog, Consolidated Extension, Manhattan Mining and Wolfstone. A gasoline hoist of 25-horse power has also been ordered for the Sphinx estate in the Round Mountain section.

PLANTS IN OPERATION.

A comparison of the number of hoisting plants in operation in Manhattan within six months after the first discovery of gold with the number operated at Goldfield during the first year of its existence is somewhat interesting as it apparently indicates that the mining men of this section are more sanguine of future success than were those of Goldfield in the early days of that thriving mining metropolis.

At the close of the first twelvemonth of Goldfield's meteoric history hoists were in operation on the Combination, January, Florence, Portland and Jumbo, the latter property leading the list with two plants, making a total of six plants.

Six months after birth Manhattan has 10 hoisting plants in operation, with eight others in transit to the camp including the one billed to the Sphynx property at Round mountain. The record is one of which the residents of the district can well be proud, as it thoroughly demonstrates the confidence mining men in general have in this field.

MILLS GOING UP.

The camp is likewise to be supplied with milling facilities aside from the plants which several mining companies contemplate erecting for the treatment of their ores. The mill is to be equipped with Elspass rolls, having a capacity equal to 15 stamps, and will treat 40 tons of ore each 24 hours. Manhattan capital is behind the enterprise and an order for the machinery has been closed. A site has been secured in the vicinity of Central and by the time the machinery arrives everything will be in readiness for its installation.

A number of mining companies are also preparing to establish milling plants at their properties, included in the list being the Yellow Horse, Pine Nut, Buffalo, Consolidated Extension and Little Grey. The latter company's plant is to have a stamp capacity sufficient to handle its own and a large custom tonnage.

MILLS FOR ROUND MOUNTAIN.

In the Round Mountain section the Round Mountain Red Top company, in which R. L. Colburn, formerly of Salt Lake City, but now of Goldfield, is heavily interested, is preparing to install and operate a 10-stamp plant, the machinery for which has already been ordered. A single stamp plant is to also be erected for experimental purposes by the Round Mountain Mining company, owner of the famous Sunnyside group, scene of the original discovery in the Round Mountain country. Later it is the intention of the company to establish a large plant in which will be treated the entire production of the property, including the high grade shipping ores.

ON MINING EXCHANGE.

Daly Judge Opened in Good Tone—Big Sales of Uncle Sam.

The market for mining stocks opened in fairly good tone this morning. Daly Judge was particularly strong and did business at $12.50; but little Bell opened weak and sank to $10, the closing sale price. Lower Mammoth started out with a sale at 66 cents; it then moved down to 62, recovering on the open board and selling as high as 67 cents. Silver King, offered at $30 a share, found a taker. New York Bonanza of Park City stiffered slightly, while Uncle Sam Consolidated participated to the extent of 8,000 shares at 42 cents.

The closing quotations and sales were:

COPPER MINES OF MASON VALLEY

Walter C. Orem of the Nevada Copper Company Returns From Flying Business Trip.

COMES HOME AN OPTIMIST.

Tells About Shipment of High Grade Ore From Ludwig Property, Adjoining the Douglas.

Walter C. Orem, manager of the Utah Apex mine in Bingham and also connected in the same capacity with the Nevada Copper company, which has taken over the Douglas group of claims in the Mason Valley district, Nev., came in from the west last evening.

Mr. Orem made a flying trip to the Douglas property and has returned more convinced than ever that the Mason Valley region is going to come to the front with some of the biggest copper producers in the world. "I believe," said he to some visitors in his office this morning "that there will be built up in the vicinity of Yerrington, one of the great copper camps of the west. While of course we are pretty well satisfied that the Douglas is going to be a mine of great merit, it is by no means the only one; the camp will have several big mines, that in almost all of them where development work has been done, Salt Lake people are interested."

Mr. Orem brought with him some samples of ore from the Ludwig mine, an adjoining property which is identical in character to that being developed in the Douglas. The Ludwig company, Mr. Orem says, shipped out 20 carloads last week which averaged 26 per cent copper.

The Ludwig has produced some very fine specimen ore which has been sold in the east and used in the manufacture of ornamental jewelry.

LITTLE EDGAR COMPANY.

Articles of Incorporation Filed in Clerk's Office at Provo.

Provo, June 25.—The Little Edgar Mining company has filed articles of incorporation with the county clerk. The company is organized to do a general mining business, with Eureka as the place of the principal office. The capital stock is $25,000, divided into shares of the par value of 10 cents each, and is based on the valuation of the Grant group of claims in Tintic Mining district, owned by the company.

The officers and directors are John T. O'Brien, president; Clara Gustaldi, vice president; James A. O'Brien, secretary and managing director; Jere Driscoll, treasurer; Jesse O'Brien.

IN FROM DEEP CREEK.

New Tunnel to be Run on the Polar Star Property.

E. D. Carmon, superintendent of the Polar Star mine in the Clifton district, is in the city on a brief business trip and reports conditions very prosperous in that portion of the Deep Creek district.

Mr. Carmon says a new tunnel is to be driven on the Polar Star property, which will tap considerably deeper the ore bodies developed in the shaft. He says good reports are coming from the Gold Hill mine, which is being developed under the direction of Captain Duncan McVichie and the general belief prevails in camp that it is going to become a big producer of copper ore.

HORSE CREEK AND LA PLATA.

The shaft at the Farragut property in the North Tintic is now down about 90 feet and the owners believe that they will open up some good ore soon after passing the 100-foot level.

C. H. Valentine, a mining expert whose headquarters are in Denver, was the guest of W. W. Thompson and wife on Saturday and Sunday, having come up here while en route east from Nevada.

It is reported that the South Eureka and other adjoining property will form the basis of a big company to be incorporated for the purpose of developing this ground which adjoins the Centennial Eureka upon the south.

Supt. Robert Brown and Surveyor J. F. Smith of the Centennial Eureka mine, Herbert Hopes and B. N. C. Stott, drove out to West Tintic on Wednesday for the purpose of inspecting the Prairie Bell company's property, in which they are interested. Work is still being carried on in the tunnel under the direction of Joseph Burrows.

Secy. George W. Riter of the Eureka Hill company came out from Salt Lake on Wednesday evening and spent a couple of days looking after affairs at the mine. The leasers now at work in the mine are nearly all taking out a nice grade of ore, and when the company settles with them each month it means many thousands of dollars are put into circulation right here in Eureka.

George H. Radman of Sioux City, Ia., W. H. Keen of Chicago and Supt. Curtis of the American Flag mine at Park City were in Eureka on Monday, and in company with superintendent William Mathews and Capt. Hugho Deprezin visited the West Mammoth property upon which a shaft is now being sunk. The gentlemen were highly elated with the manner in which Superintendent Mathews is carrying on the development work and went away feeling that the property will soon be changed from a prospect to a paying mine.

The work of putting in a switch to the site of the new compressor plant of the Yankee Consolidated mine near Homansville is now under way and but a short time will be required to complete the job. As soon as the spur is finished the machinery for the plant, which is now upon the road, will be hurried to the ground and installed. There has been some delay in the delivery of pipe which is to connect the compressor with the mine, but a tracer has been sent out after the shipment and it will probably arrive within the next few days. The excavating for the new machinery was started during the week and Secy. L. A. Amsden, who was at the mine on Tuesday, says that no time will be lost in getting the new plant installed.—Eureka Reporter.

LEAD ORE NEAR MONROE.

Richfield citizens have been pretty well worked up during the past week over the strike of a big body of lead ore a few miles south of Monroe.

In driving a tunnel into the mountains to develop a water supply for the Edward Nazer farm the workmen encountered a large vein. It is eight feet wide and some of it is almost pure galena. They have not been able to decide whether it is only a shoot, a pocket or a regular ledge. A force of men is still at work and have gone several feet into it and it looks very much like a permanent ledge. If it proves to be a vein of any value it will be a big thing, as the regular county road runs right by it, and the ore can be easily loaded for the cars.

MR WEIR HOME.

Developments at Ohio Copper Progressing Satisfactorily.

Thomas Weir has returned from the east, where he has been for several weeks on business. Asked concerning the deal said to be on for the placing of a block of bonds for the Ohio Copper company, Mr. Weir declared there was nothing to give out at this time any further than that the campaign of development at the mine, he had been informed, was progressing very satisfactorily. "I went over the property before I went east, and directed that development be executed in certain places in the mine," said Mr. Weir, "and I am glad to learn that the response has been fully up to expectations. I am satisfied that the Ohio is a big mine, that there are some extensive bodies of low grade ore there. This preliminary work is being done to determine what kind of equipment the property should have in the future. We would not want to go to the expense of putting in a hoisting plant, for instance, of certain capacity and find out later that one much larger could be used to advantage. It will probably take us 30 days to determine these things so that plans for the future may be outlined.

TINTIC MINING NOTES.

The scenes of activity this week have been Horse creek and La Plata, says the Fairview (Nev.) Miner. Strikes have been made in both of these places, and each has created quite a stir here in camp, particularly the one at Horse creek. At the head of Horse creek the word comes that ore has been found carrying gold, silver and copper, the values from which are reputed to be over $1,000. A small-sized rush left camp for the creek as soon as the word reached here, and the new camp of Wender was practically deserted when the news of the find reached that place. The country around Horse creek is pretty well staked now, and the rush of prospectors who have gone there in the past few days will add considerably to the number of locations. Certain it is that this section will be thoroughly prospected.

La Plata again comes forward with startling news of the new find. The strike at that place was meant to be hushed up, but in some way the news of the find leaked out, and quite a few have left for the scene of the reported discovery.

NEED OF CORUNDUM.

Never in the history of the abrasive industry has the time been more opportune for the development of corundum properties than at present when there is a scarcity of emery ore.

During 1905 the production of corundum and emery in the United States, according to Mr. Joseph Hyde Pratt, who has written a report on the production of abrasive materials for the United States geological survey, amounted to 2,126 short tons, valued at $61,464, as compared with 1,916 short tons, valued at $56,985 in 1904, an increase of 210 tons in quantity and of $4,479 in value. The corundum mined was from North Carolina and Montana and the emery from New York and Massachusetts.

The Greek and Turkish deposits are not furnishing the grade of emery that is desired, nor the quantity, and this has also been true during the past year of the emery mines in this country. The Canadian corundum deposits supply to some extent the demand for corundum, but there is still a large enough market to warrant the working of deposits in this country.

The importation of corundum and emery into the United Staes is still largely in excess of the home production. In 1905 these imports were valued at $347,425 against $260,424, the value of 1904.

ARTICLES AMENDED.

An amendment to the articles of incorporation of the La Sallel Minera company of Ogden was filed in the secretary of state's office today by which the capital stock of the company is increased from $100,000 to $500,000, divided into shares of the par value of $1 each.

CONCENTRATES.

Managing Director Catrow of the Ohio Copper company has returned from a trip to Nevada.

Broker E. M. West spent Sunday looking through some of the mines in the Tintic district.

Earl S. Ridge, a well known Manhattan broker, passed through the state yesterday, enroute to Kansas City.

Capt. Henry Stern, president of the Yampa Smelting company, is scheduled to arrive from the east on an early train.

The directors of the Sacramento Gold Mining company have posted the usual dividend of $5,000, payable on July 1.

Lorin Morrison of the Indian Queen mine in Beaver county is in the city again. A shipment of ore from this property is at the samplers.

William Belcher of Boston and who is extensively interested in the Bald Eulte and Eglanol mines in Montana, will reach the city tomorrow.

A. B. Frenzel of Denver has been in this state in search of ores carrying rare metals. Mr. Frenzel was in the city Saturday on his way home.

A car of ore from the Mystic Shrine mine of Bingham is in today's market.

The Consolidated Mercur dividend of $25,000 is being sent out to shareholders today.

Cashier John M. Hayes of the Utah Copper company has gone on his vacation. He left for the east yesterday and expects to go up into the copper regions of Michigan before returning.

Fred Lyon, manager of the mines and smelter of the United States Smelting, Refining & Mining company, has arrived from the west and will look over the Garfield smelter before returning west.

Henry Amigo, a former Salt Laker, who has been fortunate in his Nevada mining ventures and is now in the brokerage busines in Manhattan, is in the city enroute home from the east. He will leave for the west tomorrow.

A message received in this city late Saturday afternoon announced the death at Sioux City, Ia., of E. D. Waterman, a former well known broker o. this city. Mr. Waterman underwent an operation for appendicitis a week ago.

A San Francisco dispatch says: What is said to be the largest order of the kind ever placed has been received by the Risdon Iron works from the Utah Copper company. It is for the construction of 1,200 concentrators, the amount involved being about $200,000.

One hundred De Forest Wireless stock at $2.00. Must be sold at once, so give us a bid. E. M. West & Co., Tel. 165. 327 D. F. Walker block.

STOCKS WITHOUT ANY ANIMATION

Prices Were Lower Than Saturday's Closing With Free Selling in Evidence.

WERE SOME HEAVY DECLINES.

Support Caused Slight Rally But Could Not Stop Downward Tendency.

New York, June 25.—Prices of stocks at the opening today started weak at a lower range with free selling in evidence in various quarters of the list. Southern Pacific was the sole exception to the weakness with a small fractional gain. Anaconda fell 4 points and Great Northern preferred 2.

The market showed the same general characteristics that it did most of last week. After a lower opening the market rallied and got back to where it started. Today's fluctuations were affected by the strength of St. Paul and Southern Pacific and the weakness of Brooklyn Transit. Realizing wiped out the 1 point rise in Southern Pacific and reduced St. Paul's rise of 1¼ by about half.

The action of the market was very irregular. The general level declined in sympathy with breaks in individual stocks but showed evidence of support at the declines. Interborough Metropolitan broke 3 points at a new record of 39¾ on reports of the call from syndicate members for a payment of 30 per cent of subscriptions. United States Reduction and Hocking Valley declined 2¼. Union Pacific, Reading, Kansas & Texas preferred, Texas & Pacific and Northwestern made 1 point decline. The market was showing the benefit of support and became dull. National Lead rose 1.

Bonds were heavy.

Pressure against the general market slackened although Reading was forced to 129¼. Reading subsequently recovered generally and there was a general stiffness elsewhere in which the coppers and local traction stocks were prominent. The market was on the decline again at 1 o'clock, with some of the important stocks selling at the lowest. Great Northern preferred ran off ½, Iowa Central preferred, Railway Steel ⅞, Carolina Chemical 1¾ and Sugar and United States Realty 1.

The dullness of the afternoon was enlivened by another drive against Metropolitan which forced it to 38¾. Supporting orders were put in and the price rallied a point, but another onslaught dropped it later to 38¾ or 4¾ below Saturday's closing. The preferred fell 1½. The general market was not affected much by the movement. International Pump gained 1 and Consolidated Gas 2.

LIVESTOCK.

CHICAGO.

Chicago, June 25.—Cattle—Receipts, 23,000; market steady to 10 cents higher. Beeves, 4.00@6.10; cows and heifers, 1.40@5.10; stockers and feeders, 2.65@4.50; Texans, 3.60@4.40; calves, 5.00@6.50.

Hogs—Receipts, 40,000; market best strong, others weak to 5 cents lower; estimated tomorrow, 22,000. Mixed and butchers, 6.25@6.37½; good heavy, 6.45@6.60; rough heavy, 6.30@6.35; lights, 6.25@6.55; pigs, 5.40@6.25; bulk of sales, 6.40@6.55.
