

styled 'Gold and Silver—their origin, and the amount extracted from all the countries of the known world, from the most remote times, till the year 1856.' The following particulars are interesting:—

The amount of gold and silver annually taken from the mines of Europe, including Russia, is 26,805 kilogrammes of the former (27-10 pounds to the kilogramme), and 161,444 kilogrammes of the latter, valued together at \$25,000,000.

In America, including California, the annual product is 169,834 kilogrammes of gold, and 735,180 kilogrammes of silver, worth, in all, \$146,000,000.

In Asia, the annual product is 2,700 kilogrammes of gold, and 110,000 of silver, amounting in value to \$22,000,000.

In Africa, no silver mines are wrought, and only 4,020 kilogrammes of gold are produced, valued at \$8,000,000.

Australia, too, yields no silver, but the annual product of gold amounts to 290,260 kilogrammes, valued at \$200,000,000.

Sum total in all parts of the world, 510,199 kilogrammes of gold, and 1,026,624 kilogrammes of silver, valued together at 1,988,000,000 francs, or over \$397,000,000. The whole sum extracted from the earliest times up to the present will amount to 15,314,653 kilogrammes of gold; and 254,410,170 of silver, worth together something more than 20,536,000,000.

The annual production of the precious metals at the present time is enormous. At the present rate, we gain more in fifty years than our ancestors did in fifty centuries. The annual increase of gold and silver for the period of three years ending 1851, more than doubled that of any previous year, amounting to 601,000,000 francs; and in the last four years, ending 1855, it has increased nearly 150 per cent., and now amounts to 1,592,631,651 francs, or \$318,526,350.

America has furnished more gold and silver—double the amount—than Europe, Africa, and Australia put together, and only \$20,000,000 less than Asia has furnished since the beginning of the world.—[Life Illustrated.]

**STRENGTH OF GUTTA-PERCHA.**—Some interesting experiments made in Boston, show an almost incredible strength in gutta-percha tubing, and its value above other materials for water pipes, etc., where power to resist great pressure is required. A pipe of half an inch diameter stood 370 pounds to the square inch, and burst at 390; a five-eighths inch pipe stood till 389 pounds of pressure to the square inch was applied; but a quarter inch pipe, made for soda fountains, stood uninjured 1,000 to the square inch.

**WASHING.**—Mrs. L. W. says:—"I send the following for your housekeepers' department; I have tried it the last four or five years. Whoever will soak clothes from 12 to 36 hours before washing them, will find that they can do without patent washing fluids, &c., and save nearly all the wear of clothes by rubbing, too. The clothes may be boiled without rubbing—any more than to rinse the loosened dirt."

**TO CLEAN PAINT.**—Smear a piece of flannel with common whiting, mixed to the consistency of common paste. Rub the surface to be cleaned briskly, and wash off with pure cold water. Grease spots and other filth can be removed and the paint will retain its brilliancy and beauty unimpaired.

Life is filled out with little items—so is this column—despite them not.

## HOME MANUFACTURED GOODS

Will be received for Sale and Exchange.

Manufacturers, take courage; all you want is a market for the products of your labor.

Farmers, be wise; watch the spirit of the Prophet, keep his counsel, and exchange your grain for home manufactures only, except such indispensable articles as have not as yet been manufactured in the Territory, and to meet those deficiencies, a considerable stock of States goods of a certain class will be kept on hand for a time.

It would be ridiculous to mention what class of Home Manufactures will be required for Sale, or what quantity; for the fact is, we want every article from a mouse trap to a steam-engine, and the quantity unlimited.

Good, fat beef CATTLE taken in exchange for Goods. The cattle are wanted in order to procure fat for the Soap Factory. Holders of stock, won't you assist in this important branch of Home Manufactures? Some have promised you will not; I say you will, for there are yet many righteous men in Israel.

Endeavor to communicate with me, and make your arrangements as early as possible. 28-3m W. E.

## NOTICE TO FARMERS.

THRASH your grain as soon as it is harvested. Past experience has proven to all, that wheat that is put up in a stack to stand until winter has been mostly destroyed by cattle and mice. Having selected and brought through a machine that is well adapted to the grain raised here, and having had long experience in the business, I hope to merit a liberal share of public patronage. Brethren in the adjoining valleys can see me at my residence on Big Cottonwood, or in the 12th ward in G. S. L. City.

As there has been much waste of grain by improper feeding of animals, I will be responsible for all unnecessary waste. 13-19 MILO ANDRUS.

N. B. All persons indebted to the late firm, will please call and settle their accounts and save costs.

Wheat and Flour will be received in payment. 30-1t L. S. & CO.
