AGRICULTURAL SOCIETY.

Formal Full Opening of the Cache County Association.

All the Papers of the First Day's Session to Be by Leading Women—An Excellent Program.

The Cache County Agricultural Society will open its fall meetings on Saturday, Sept. 21, in the east basement of the tabernacle, at Logan. It is to be a Women's meeting. Every body is invited and every woman in the county should be present. The session will be held, one at 2 p. m. and one at 8 p. m. Come one and all and give the ladies a royal reception.

2 p. m.
Prayer by the chaplain.
Opening address by the president.
Paper—Adaptation of Silk Culture to the Women of Cache, by Mrs. C. Jones, of Logan.
Discussion.
Paper, The Season and Practice of Fruit Canning, by Mrs. Coray, of the Agricultural College.
Discussion.
Recess.
General business.

8 p. m.
Prayer by the chaplain.
Paper, The Training of Farmer Children, by Mrs. Sarah H. Taylor, of Logan.
Discussion.
Paper, Women in Horticulture, by Mrs. Ella J. McKinney, of Salt Lake City.
Discussion.
General business.

Such singing will be rendered.
The News will be very welcome.

A. A. MILES, President.

UTAH WEATHER AND CROPS.

Generally Favorable Report of Conditions Up to the Middle of September.

Weather crop bulletin of the Utah weather service, for week ending Monday, Sept. 16, 1895.

WEATHER.

The strongly unsettled conditions referred to in last week's bulletin have continued during the past seven days, except in a few localities of the northern portion where light showers fell and partly broke the prevailing drought. The section most favored was Box Elder county, where thirty-nine hundredths of an inch of rainfall was recorded during the week. In the vicinity of Morgan, Sanpete county, corn, beans and all other tender vegetation were slightly damaged by frost. The high winds which were of daily occurrence did considerable injury to orchards by blowing fruit off the trees, and besides interfered with harvesting and threshing operations.

CROPS.

Potatoes are maturing rapidly, corn is being cut, the second crop of lucern is about all in stack, sugar beets are being dug and shipped, and the grain harvest is practically finished. In many sections threshing has been completed, while in others the work is progressing satisfactorily. Generally, the grain is yielding well, but in some localities crops are somewhat light. Garden stuff is doing fine and the fruit crop is promising.

REMARKS OF CORRESPONDENTS.

Vernal—Harvest, with exception of corn and potatoes finished. Second crop of lucern stacked in fine condition. Some wheat fields yielded as high as 45 bushels per acre; corn hardening fine; fruit crop splendid.

Nephi—Threshing commenced; yield quite good. Still without frost, the 8th set for many years. Corn matured; potatoes doing well; good snow for another half crop of lucern—thirty cuttings.

Huntsville—A windy and cloudy week, but no rain, except a few sprinkles. Harvesting nearly done; threshing in progress.

Levan—The harvest, with the exception of potatoes and fruit is finished. Threshing in full blast. Windy and dusty. The driest September for years. Rain would be welcome.

Payson—Cutting and hauling corn; digging sugar beets; no frost; nights cool; windy every day last week.

Spanish Fork—Nine refreshing showers during the week; second cutting of lucern in progress, somewhat heavier than the first cutting; threshing in full blast; crops about an average.

Plymouth—The two weeks just ended have been fair for the maturing of crops; threshing nearly completed on dry farms; the forecast is for very blustery with light showers; some alfalfa being threshed, yield very light; second crop of lucern nearly up.

Paterson—We are busy threshing; wheat frosted and not up to the average. Oats turning out pretty well, also barley. Potatoes not up to the average. All kinds of crops have suffered by frosts, and very unfavorable season. Water is scarce and the range is very dry.

Pleasant Grove—Threshing nearly done; sugar beet harvest will soon commence; some are cutting corn.

Spring City—Grain harvest almost finished, and threshing in full blast. Most of second crop of lucern in stack; garden stuff looking fine; gathering corn.

Koosharem—Weather has been very windy and dry. Wind has hindered hay hauling considerably. Grain all cut now; very satisfactory harvest; grain good and good yield of hay.

Croydon—Very high wind all last week; no rain for a long time; cool nights. Most grain cut and in stack; fair crop; second crop of lucern mostly in stack; very light second crop. As near as I can learn potatoes will be only a fair crop.

Newton—Windy weather during week; no rain.

Washington—Farmers waiting for rain to plow for fall wheat. Pears, apples and peaches have been thinned of the trees in great quantities by the wind; a great deal of fruit is being dried here.

Fountain Green—Past week warm and slightly; crops of grain good; threshing machines running.

Moroni—The week has been warm in the extreme and dry and windy. A frost three nights; beans, corn and all tender vegetation was injured. The coming week will finish grain hauling. Threshing in full boot; fall grain is fine.

Monroe—Wind and dry weather the nature of the week. Tuesday machines had to stop threshing because of heavy winds.

Coalville—High winds during week; no rain. Grain all cut.

Lake Shore—The grain crop will soon be all threshed. Farmers busy digging and shipping sugar beets; the third crop of lucern will be cut soon. High winds 13th and 14th.

Harrisville—The week has been dry and blustry with a very slight rainfall. Grain all thrashed with an average yield of about 24 bushels of wheat and 30 bushels of oats to the acre, it being 11,000 bushels of wheat from 470 acres, and 4,700 bushels of oats from 120 acres. Only 364 bushels of barley was raised from 2 acres. The community numbers about 300 souls.

Hyrum—A slight sprinkling of rain on the 9th the rest of the week has been a continuation of the drought. Very windy, the sun obscured with dust somewhat. Grain, hay and second crop of lucern all are in good condition. Light frost on 15th. The burn of the threshing machines is nearly all day; grain plump and threshing out well.

Cornish—Dry weather with a very severe wind from the south which made it very disagreeable. Thrashing has begun this week and the crop throughout the valley are very light.

Logan—The weather continues dry. Considerable wind cutting the week. The Davis and Weber county canal has been dry several weeks. Pastures are nearly all done, and many people are feeding green. Threshing nearly all done. Corn being cut. Low mesa cattle will soon start migration.

Dewey ville—The 8th and 9th were cloudy, and the 12th, but no showers. Hitherto prevailed throughout the week blowing off a good deal of fruit. Potato crop will be light. 14 to the dry (or fall plowing) we need rain.

Box Elder—Thunder storm evening of 8th, with 0.2 of rain. Windy and cloudy most of the week. Corn is being cut.

Wellsville—A windy week. Grain all in the stack; threshing will begin next week. Fruit crop good; apples have not so many worms as last year.

Joseph—The week has been fine but rather windy, which stopped the cutting and hauling of hay.

Lewiston—The past week much cloudy and wind but no rain. Best digging in fall operations; yield pretty good.

Clarkston—The third crop of lucern has commenced to blossom and will soon be ready to cut. Corn that had been frozen during July and August is now being cut for fodder. The fruit crop is abundant and of a very fine quality, but as there is no demand for it, cannot be disposed of at any price.

J. H. RIGGS,
Observer Weather Bureau, Director.

SALT LAKE CITY, UTAH, September 17, 1895.

IDAHO WEATHER AND CROPS.

Idaho State Weather Service for the Week Ending Monday, September 16, 1895.

The past week has given cold and wet weather with killing frosts and freezing temperatures on several dates, damaging much of the garden truck which had escaped the frosts of the previous week; corn has suffered to some extent, as have also hops in the western section. In Latah county it has checked the ravages of the white butterfly and cabbage loses which had been a source of annoyance. High winds have been of frequent occurrence, and in portions of the western section they have broken down young trees and damaged haystacks to some extent. In some places large fruit has been blown from the trees.

Rain fell on several days during the week, causing the streams to rise and pastures and outside ranges to improve considerably. The gathering of hay and grain, of which a large amount is still in the fields, has been delayed somewhat by wet weather. The mountains in many places are covered with fresh snow.

Threshing is about completed in the southern portion of the State, in other sections operations are well under way and progressing fairly well. In parts of Boise county harvesting is not yet finished and no threshing has been done. Flax has turned out exceedingly well in Latah county.

Potatoes are maturing well. Corn is about ripe in Canyon county; in the extreme southern section about two weeks more of good weather will ripen corn and beans. Tomatoes are almost a failure in many places owing to late frosts. Grasshoppers have done much damage to gardens in the northern section.

Nearly all of the hay crop has been cut and is being stored as rapidly as the weather will permit.

Fruit is generally in good condition. In the southern section beans are reported to have done fairly well this season.

D. P. MCCALLUM,
Director.

CENTRAL OFFICE, Idaho Falls, Idaho, September 17, 1895.

AUGUST, 1895—TEMPERATURE.

The monthly mean temperature for the state was 65.8 degrees, a deficiency of 0.8 degrees from August of last year. The highest monthly mean was 75.1 degrees at Lewiston, and the lowest 54.4 at Warren. The highest temperature recorded in the state during the month was 105 degrees at Lewiston on the 2nd, and the lowest 24 at Hailey on the 8th, making an absolute temperature range of 81 degrees for the month. The greatest monthly range of temperature was at Hailey, 76 degrees, and the least 49 degrees at Atlanta.

PRECIPITATION.

The average monthly precipitation for the state was 0.25 inch, a deficiency of 0.22 inch from August, 1894. The greatest amount was at Grangeville, 1.09 inches, and the least 0 at American Falls, Kimberly and Murtaugh. The greatest amount in any 24 hour period was 0.80 inch at Warren on the 20th. There was an average of two days with rainfall during the month.

WEATHER.

Average number of clear days 10, partly cloudy 9 and cloudy 4.

WIND.

Prevailing direction, west. Average hourly velocity (from records at Grangeville and Idaho Falls) 7.4 miles; maximum velocity (at Idaho Falls) 40 miles per hour from the south on the 20th.

MISCELLANEOUS PHENOMENA.

Auroras—Fort Sherman, 10th; Hailey, 12th and 14th.

Halos—None.

Fogs—Clearwater, 8, 10, 11, 14, 16, 20, 21; Cottonwood, 8; Dalton, 8, 16; Hailey, 8; Moscow, 8, 10, 20; Murtaugh, 8, 16, 20; Nampa, 8; Orofino, 8, 10, 20; Salmon, 8, 10; Soldier, 10, 14; Swan Valley, 8, 10.

Hail—Birch Creek, 11; Paris, 14; Soldier, 20.

Solar halo—Soldier, 23.

Thunderstorms—Bonneville, 18, 27, 28; Clearwater, 12, 20; Dover, 6, 28; Fort Sherman, 20; Franklin, 6, 28, 29; Grangeville, 1, 28, 29, 30, 31; Hailey, 6, 25; Idaho City, 6, 28; Idaho Falls, 28; Lewiston, 6, 20; Nampa, 28, 30; Oakley, 23, 28, 29, 29; Soldier, 6, 21, 27, 28; Soldier, 8; Swan Valley, 18, 19, 20, 21, 22, 25, 27, 28; Warren, 28, 30.

NOTES.

The annual convention of the American Association of State Weather Services will be held at Indianapolis, Indiana, on October 16th and 17th, 1895. All voluntary observers and crop correspondents of the Idaho state weather service are cordially invited to be present.

SPRINGDALE ON THE VIRGEN.

Report of the Condition of that Ward Crops and Weather—A Fire.

SPRINGDALE, Sept. 8, 1895.

EDITOR DESERET NEWS:

As Springdale has not been represented in your valuable paper for many long years, perhaps it would be interesting to some of its readers to read something of our situation and prosperity. Our ward, which is presided over by Oliver D. Gifford as Bishop, and Thornton Hepworth and Isaac H. Langston as counselors, commenced at the forks of the Rio Virgen two miles above Rockville, a little place called Grafton, which contains four families; the name Northop was given by a brother of Captain Dan Jones, who was widely known by the Mormon Militia. It then extends two miles up the north fork to the meeting house, then continuing two miles further up the river to Oak creek, or as President McAllister named it, Grandmother's Tale is the end of the county road, so no other settlement can be reached by traveling up the river.

Springdale had enough of 23 families, as 120 souls. We have a Relief Society, presided over by Cecelia C. Gifford, who is nearly seventy years of age. We have a Sunday school every Sunday and a meeting every Sunday evening, which we all attend, considering the distance that some of the children have to travel.

Well, now for something else. We have had an unusually dry, scorching summer and fall, and the fall, though a little cooler, so far has given us no moisture. During the summer we had one quite destructive wind, and a more destructive waterspout or cloud burst. We believe we had the driest August, taken it all through, that I ever witnessed. Frequent rains through the summer in the tops of the mountains gave us a considerable annoyance with our dashes and tail water.

Yet with all these drawbacks we feel that we are blessed and have no cause to complain. Our crops have mostly been good, excepting tree fruit, some of which was cut off by the spring frosts, some by winds and some by worms. Yet some have an abundance of some fruit. The best of all is general good health, though at present we have one quite a bad case. Our Sunday meetings are well attended and the people as a general thing are full of the pure testimony of the Gospel. There is but little drinking, smoking or bad language used. Our children are free from the contaminating influences of the world. For all of these things we are thankful. This little place has one monopoly, he has to a fair of labor and two more will start this fall. There are no saloons, gambling dens, nor are we neither sheep men, cattle men, merchants nor bankers, and but very small farmers, and no market and consequently no money. We have the promise of a visit by Apostle Lyman Tuesday evening next.

One more circumstance and then I will close. On the night of the 3rd and 4th inst. the dwelling house of Squire Hepworth took fire and was discovered by a 16-year-old daughter who was sleeping up stairs with a sister of the same age. They hurried down stairs, the first having missed the step, fell and was somewhat bruised but not badly; but she informed the family who was sleeping out of doors with the rest of the family. The father saved the boy, but the house with all its contents was consumed.

SAMUEL H. GIFFORD.

TURNING GRAY AND THREATENED WITH BALDNESS

The Danger is Averted by Using AYER'S HAIR VIGOR

"Nearly forty years ago, after some weeks of sickness, my hair turned gray and began falling out so rapidly that I was threatened with immediate baldness. Hearing Ayer's Hair Vigor highly spoken of, I commenced using this preparation, and was so well satisfied with the result that I have never tried any other kind of dressing. It stopped the hair from falling out, stimulated a new growth of hair, and kept the scalp free from dandruff. Only in occasional application is now needed to keep my hair of good, natural color. I never hesitate to recommend any of Ayer's medicines to my friends."—Mrs. H. M. Hooper, Avon, Ills.

Ayer's Hair Vigor

PREPARED BY DR. J. C. AYER & CO., LOWELL, MASS., U. S. A.

Makes the Blood Pure

This is the secret of the cures by Hood's Sarsaparilla. Read this:

"I managed to write that I am now in perfect health and it half because Hood's Sarsaparilla is in my blood pure. My health broke down with trouble peculiar to women, my nerves were shattered and I had to take my bed. The physician said I must have rest or I should go into a decline. A neighbor told of my condition to Hood's Sarsaparilla and I resolved to try it. When I had taken a bottle I felt better, slept well and I am perfectly well and strong."

Subject to Attacks of Intense Nausea

While staying in the Delta (Mississippi Indians) last summer, E. T. Mangum, of Cairo, Ill., and Geo. Hughes, Wire Co., of St. Louis, suffered from malaria and became subject to attacks of chills-and-fever. The very instant when attacked he was relieved at once by magic, by using Chamberlain's Colic, Cholera and Diarrhoea Remedy. He says: "I regard it as the 'ne plus ultra' of medicines."
