GREAT WAS THE GAME.

Police and Fire Departments Play Ball With a Vengeance.

It was a great baseball game which the fire and police departments disbled out to 2,000 spectators on the University campus last evening, but great as it was the men who do morning, afternoon and graveyard visit on the principal thoroughfares of Salt Lake went down to defeat, though they also went down to stay, so to speak, so intense was their enthusiasm and interest in the game which gave them a score of 16 runs as against 21 in the other fellows' team.

Captains Adams and Sullivan did all in their power to urge their men on, assuring them that the victory was theirs as the other team didn't know even the first principles of ball playing. Umpire Dunning did his work with good grace and nothing is to all not baseball games, his sympathies were sometimes quelled and the boys stayed by him lustily well and gave to the commissioner all the recognitions he could gently express. Pioneer Wilson of the police nine gave the opposition some good hot balls and the manner in which he twisted them kept the fire boys guessing as to how to get at them and send them out into the field where the amateurs were. Commissioner Noble was also there and did good work as a coacher on both sides while accidents were amply provided for in a good supply of arnica, salve, sticking plaster, bandages, sponges, oil, pills and other necessary requisites. It was a great game now one which you will go down in history as a specimen of the time ever recorded in baseball annals.

It is stated that Justice Wenger and Prosecutor Bishop will take the case to the supreme court, while Commissioner Noble will use Umpire Dunning for alleged incertitude in rendering his decisions. The game will give to the Jubilee fund about $300.

Returned Missionaries.

Elder Matthias Knudson of Lehi returned yesterday from the Norwegian mission field for which part of the country he left on June 19, 1895. He reports the mission prospering and the Elders enjoying their labors, with good treatment at the hands of the people among whom he has been laboring.

Elder Fred J. C. Danielson of Fairview, Sanpete county, also returned from the mission field yesterday. He has labored in Denmark and left for those parts Nov. 15, 1895. Elder Danielson reports Church matters prospering thereabouts, but his health has not been the same for nearly the while time of his absence.

Forest Dale Sociable.

The so-called Old Farmhouse in Forest Dale is a most idyllic spot, modestly veiling its grace under the verable trees, and surrounded by fragrant verdure. Last night, Friday, June 18, it was the scene of an enjoyable sociable arranged by the council of the 105th quorum of Seventy. It was the first reunion of the organization. Members and their ladies and some other friends were invited, and the purpose was stated to be the enjoyment of pleasant companionship in the spirit of brotherly love—a purpose which was fully accomplished, thanks to the excellent arrangements and the good spirit present.

At the appointed time the hall was well filled with the participants in the love-feast, and after singing and prayer, Bishop Jensen of Forest Dale welcomed the guests in a partly humorous and partly serious vein. Then Brother W. H. Thorsen, recently returned from a mission to the Sandwich Islands recounted Home, Sweet Home, with variations, on the violin and sang the hymn, O, My Father, in the Kanaka language. The words sounded strange but there was wonderful music and power in every syllable. Brother John H. Smith rendered the same hymn in English very feelingly.

After this the doors to an adjoining room were opened and the guests in twos went in place by the tables which were bright with cut flowers. Then ice cream, lemonade and cake were served, the good cheer brought out and conversation indulged in.

A varying program was afterwards entered out and the sociable closed with a good, old-fashioned dance.

To the managers of Forest Dale, and to the sisters, Mrs. Wm. Hansen, Miss Jensen, Mrs. John M. Cannon and Mrs. Summerhays as well as to the brethren of the council of the quorum credit is due for the success of the evening.

A New and Novel Gas Machine.

The Ransom Automatic Gas Machine, now being exhibited in this city at 153 West Second South street is attracting the attention of all who are interested in the cheaper light problem. It is claimed that this machine will enable every person to furnish light for his residence, or his business block, at the rate of about one cent for three and one-half hours for each burner of sixty candle power.

The machine is very simple in its construction.

It consists of an air chamber, a small air pump, a gasoline reservoir and a generator. It works automatically. You connect the machine with the waterworks or a tank above, only twelve pounds pressure being necessary. The water is turned on, enough flows through to start the machine and then is built sufficient gas in such a manner as to fill the generator. Then the flow is stopped up an automatic check. When the water is set in motion it forces the air pump attached to the gasoline reservoir and about two teaspoonfuls of gasoline are fixed in the generator and sprayed over 1,500 cubic inches of air. The process of gasoline and air passes into the generator and is ready for use. As soon as the generator is fixed, the machine shops, but by a simple automatic valve flows in work as soon as the gas is consumed, and again fills the generator. If the lights are not burning the machine will not operate.

The light produced is steady, very brilliant and three times as powerful as the ordinary incandescent light. A machine capable of running thirty lights requires a space of twenty-four by forty-two inches square and twelve and one-half feet high. No danger of fire is seen as all the machine and is in a boiler, with an engineer. The gas produced is also used for heating, cooking and heating gas engines.

This machine is destined to work a revolution in the method of lighting and fuel for residences and for whole blocks. In the event of this wonderful invention being extensively adopted by the citizens of Salt Lake he will show well one be placed upon the market and enable every man to have his own gas works in the basement of his home at a very small cost.

It is well worth the time to see this ingenious machine in the work as it exists at Mr. Ransom's hands. Mr. A. F. Barr and F. L. Kesler, who have charge of the exhibit, are very courteous in explaining the issues to all who call. They keep the machine running all day and until late in the evening.
