LIVELY DAY IN THE PIT

Bullion-Beck Appears and Four Aces Experiences a Boom.

COLD RUSH TO BULL RUN IN NEVADA.

Discovery of Free Finger Veins Carrying Heavy Values—Testing Mines Samples—Ore from Duck Creek.

Bullion-Beck came out of the falling place today and in the pit there down 10 cents at $3.90 a share, while the stock remained in good demand at $3.90, with no further offerings under $3.90. From a business standpoint the day was a hard success and when business ceased and the lunch bell rang there remained the exhibit of four closed as a record of 11,000 shares sold, this with a selling value of $2,300.

Activity in Four Aces was rife and nine shares changed hands at figures ranging from 4½ to 4¾ cents a share. Grover Mattie was fairly firm but did no business while Great Control had power enough but could not to had under $1.16. Mammoth gained a few points over yesterday's figures and sold at $1.85, and Mercur remained about stationary, the bid standing at $2.12 as against offers at $2.25. Cardiff remained a good position and fluctuated with a offer at 56 cents, while sunshine hoisted one a half thousand at 20½ cents.

The struggle for stocks selected brought out but one sale. This was Scott Sapphire, which held down for thirty at $1.25, and was sought after at $1.31. Dower moved up a little and had a bid of $1.41, while Dunkel was bid for at $2.75, and Gladstone and Alpha the same. Yellow Jacket wanted a 25 cents. Yellow was well thought of, but super had no offers at $1.50, and Bonanza Tailed to get together.

The closing figures were as follows:

Scrofula to Consumption.

Any one predisposed to Scrofula can never be healthy and vigorous. This taint in the blood naturally drifts into Consumption. Being such a deep-seated blood disease, Swift's Specific is the only known cure for Scrofula, because it is the only remedy which can reach the disease.

Scrofula appeared on the head of my little granddaughter when only five months old. Shortly after breaking out it spread rapidly all over her body. The doctor said we would lose all on the slightest touch, and the other that would take the skin off with it. We tried numerous of the vaunted remedies for the disease without benefit. Finally we gave up in despair, and we feared the child would be a cripple for life. We saw a book on the blood advertisement from the Swift Specific Company, which we read and concluded, as it could do no harm, to try it. We noticed a good change in the child after the first bottle was taken, and we gave it to their opinion that the child was on the road to health. We continued to use the Swift's Specific until we were satisfied that the child was cured
