A Fallen Mexican Warships in Nicaraguan Waters—Loss to the Trade of England.

MANAGUA, Nicaragua, via Galveston, April 29.—The commander of the Nicaraguan troops on the south land of Nicaragua reported that if a vessel flying the British flag was still anchoring off the public buildings of Greytown and that the port remained in possession of the British warships, firing the Nicaraguan troops and the people are greatly excited against Great Britain is increasing in bitterness every hour. The Nicaraguan troops are still encamped along Fake Cumbalita, and it is believed they may open fire on the British should the latter make an attempt to land. Troops have been taken to the interior. Steps have been taken to protect the means of communication with the interior should such action be taken by the British.

The British are reasonable in this city and under guard in view of the feeling and news knowing which sides by the country, and in anticipation of a war between Great European events are being their offices with the government to persuade it to submit to the British demands. The general belief is that the Great Britain are determined to remove control and that Nicaragua is prepared to make a good fight against the British. Although the Nicaraguan force opposite Corinto are in communication with the capital, now interrupted communication with Corinto is expected to be interrupted and the troops may need will be so at any moment.

In spite of reports to the contrary, in parts of Nicaragua peace are evidently not the order of the day. It is hard to believe that the Great Britain and French, is a probability, Nicaragua may be compelled to submit to pay the pecuniary consequences. It is believed the talk of Great Britain with Nicaragua and other Central American Republics will result in a consequence of the sending of the British fleet at Corinto. The British governor is expected to Corinto on account of the situation there. But as the Nicaraguan concession has declared the port closed it will be difficult to see how he will seek to enforce any contrary one than.
