THE INFLUENZA.

The Plague Daily Spreading in Berlin and Throughout Germany.

JEWISH COLONIES IN SOUTH AMERICA.

Three Trains Piled Up Together.—Many Persons Reported Killed.

By Telegraph to the News.

INFLUENZA IN GERMANY

BERLIN, Dec. 4.—The epidemic of influenza which has been prevailing in this city for some time past, is daily spreading and the number of persons afflicted with the disease is now very large. It is estimated that over 6,000 persons in Berlin have been attacked with influenza since November 1st. The disease is pronounced a much more virulent type than that which prevailed here two years ago, and many deaths are reported. No whispered have been in ravages, but judicial and municipal affairs have been interfered with, owing to the illness of many of those connected with the various departments. A similar state of affairs exists in the different public offices. Even the railroad lines and other concerns having a large number of employes are seriously affected. The hospitals are crowded to their utmost capacity and from many parts of the country come reports of widespread suffering from the disease.

JEWISH COLONIES.

They Are Said to Prosper in the Argentine Republic.

WASHINGTON, Dec. 4.—The bureau of American republics is informed that the work installing the Jewish emigrants, sent to the Argentine republic by the munificence of Baron Hirsch, is being actively carried on. The Maurice colony in which Hebrews are being established has 200 families comfortably settled and engaged in the cultivation of the soil. One thousand additional families are reported to be on their way from Europe, and it is proposed to bring them, hereafter, at a rate of a thousand families a month.

Killed by the Explosion of Giant Powder.

TACOMA, Wash., Dec. 4.—At Eagle Gorge, 80½ miles east of here, a workman named Charles Rodgers was killed, and Henry O'Neil fatally wounded by the explosion of giant powder.

Another Blizzard.

ST. PAUL, Dec. 4.—A blizzard is raging throughout Minnesota. All trains running into Winnipeg are delayed. Threshing has stopped in the Dakotas, and it is feared the railroads will be blockaded.

Caused by an Open Switch.

WESTON, Mass., Dec. 4.—At 8 o'clock this morning a collision occurred between two freight trains and the Long Island express on the New York and New England railroad, at East Thompson. The accident was caused by an open switch. All three trains were piled up together. The engineer and fireman on one train were killed; one passenger on the Pullman car is reported burned to death, and many are injured. The cars almost immediately took fire and engines and doctors were summoned from adjoining points.

CAUGHT BY A DENSE FOG.

BOSTON, Dec. 4.—Assistant General Superintendent Grant, of the New York and New England Railroad says of the accident at East Thompson: "All we know at present is that both trains ran into an eastbound freight and the Long Island express into both, before they could be flagged. The only thing I can attribute the accident to is an unusually dense fog. East Thompson is about fifty-five miles from Boston. All the Boston hospitals have been notified by the New England road to hold themselves in readiness to accommodate a number of victims of the wreck. The railroad officials report many killed. One report says the number of killed is seven.

In Favor of Enlarged Use of Silver.

NEW YORK, Dec. 4.—A Washington special correspondent telegraphs thus: "The expression of Goschen, chancellor-exchequer, in favor of the enlarged use of silver by the Bank of England causes great satisfaction at the treasury department. It is regarded as a direct result of the efforts which Secretary Foster has been making to induce Englishmen and other American bankers to secure a candid consideration of the silver question by the European governments. Communications received at the treasury department indicate a strong feeling in France in favor of the enlargement of silver, which will probably receive fresh stimulus from the declaration of Goschen.

The Affairs of the Richmond Terminal Company.

NEW YORK, Dec. 4.—The committee appointed by the directors of the Richmond Terminal Company to examine its affairs and prepare a comprehensive plan of readjustment, has decided to do no further work until after the meeting of the stockholders next Monday. It is said that the floating debt of the companies in the Richmond Terminal is estimated at between $10,000,000 and $12,000,000. There is little doubt that the adjustment committee is convinced of the need of reducing the fresh funds by voluntary contributions. To avoid the dismemberment of the Terminal system it seems inevitable that sacrifices must be made by the stock and bondholders.

Our Southern Neighbors.

CITY OF MEXICO, Dec. 4.—The Brazilian government has decided to retain its legation here and President Peixoto has ordered Henry Alvim to remain at his post.

The minister of war says, Hernandez was arrested for insubordination, not for an attempt to enter into an alliance with Garcia, as reported from Brownsville, Tex.

Advices are received here from Honduras to the effect that the rebels in that republic are still in the retreat, but that they declare they will organize their force near the frontier.

Outraged and Killed.

MAHANOY CITY, Pa., Dec. 4.—The finding of Mrs. Agnes Lawrence's dead body near New Boston, and the mystery surrounding her death have caused much excitement here. The women had been outraged and killed.

Electric Club Reception.

NEW YORK, Dec. 4.—The electric club gave a reception last night in this city. E. Rosewater, editor of the Omaha Bee and president of the Old Time Telegraphers association, spoke on "The Government Telegraphs of Europe."

In the course of his address, he said our postal system cannot attain its full measure of success until the electric telegraph and long distance telephone have been made part of the postal business, with a pneumatic tube just as adjunct. As to the public, the great end of all is the cheapest.

[illegible] Chicago and New York should take a leaves from Mme. Rachel. She dined on Chicago because the people were so enthusiastic and generous to her. But when she talked to New York reporters with her hand on her heart as proof of her sincerity, she declared, "The only place in this country in which I feel at home is in this city, where the people more nearly resemble those of my own country." Oh, yes! With its streets so filthy that our sixteenth rate country towns in the Union would blush if exposed to it, New York is very like Paris, very.

We are to have a new article of food in the United States. It is the bulb of the sedge, usually known as the cattail flag. The flower of this plant is beautiful enough to give it a reason for being without anything else, but its bulbous roots are very edible, and the plant will grow in the open ground in the southern part of the Union. Florida farmers are already planting it by the acre. It propagates itself in great abundance. The edible tubers must first be boiled to rid it of the acrid, bitter tannic acid that lurks the bosom when the root is raw. After being thus boiled the tubers may be fried, roasted or baked with cream. It is entirely palatable and tastes somewhat like a potato, except that it is more nutritious. There was when the tomato was grown solely for ornament. Will a like fate overtake the beautiful and stately cattail in swamps in which the calla most delights to grow.
