NORTH MOUNTAIN MINE

Will Brown Says It Is Looking Better With Every Stroke.

THE MILL TURNING OUT CYANIDES.

Active Trading in the Pit Today—Notes of the La Sals—Rich Strike in Idaho—Miscellaneous.

Will S. Brown, manager for the North Mountain Mining and Milling company, came in from the rugged wilds of Nevada this morning, his face tanned and his general appearance indicating a stage of energetic out-door work in getting the company's affairs into shape for an active and thorough campaign of indefinite duration. That the mine and mill are in the exact state pictured by John Dern, on his recent return from the property, is the word given out by Mr. Brown, the gentleman stating that the mill under the superintendency of J. W. Stevens, is now working on fifty tons of ore daily with prospects of an early spurt to seventy-five tons, while the mine, in charge of Clarence Garland, formerly of Bingham, is looking better right along, work in its chambers demonstrating a happier state of affairs as it progresses. Mr. Brown says there is a good force employed and that 150 tons can be easily taken out every day. [illegible] 25-ton tanks on the property, and as their capacity is almost taxed to its utmost, it will be necessary to add two or three more, orders for which will be given before the gentleman proceeds eastward to his Nebraska home. The company expects to make a clean-up about the 15th.

Lying contiguous to the North Mountain mine on Cherry Creek, is the Star property, owned and operated by the Glasgow and Western Exploration company of which Otto Stalmann is manager. Mr. Brown says that at this property activity is rife, the mine and mill being kept in continuous operation, while steady shipments of concentrates are being made to the company's smelter at Golconda.

ACTIVE TRADING IN THE PIT.

Good Stocks Change Hands on the Exchange—Mercur Weak.

Four Aces opened the ball on the exchange today, the stock selling a little below 10 cents and remaining in good demand at 9, the closing bid thereafter. [illegible]

On the whole the day was one of activity and considerable trading was indulged in. Mammoth found itself gaining strength and sold quite freely at $1.75, while Mercur was the victim of a bear movement and went at $7.35 and $7.37½ on realizing orders. Northern Light went up several points and made transfers all the way from 6¼ to 7¼ cents, with the latter bid readily posted right up to the close of the call. Sacramento was weak and did no business, but there was a decided demand for Silver King, a stock which could have sold readily at $23.25 a share, although there were no offerings under $25.

Chloride Point took the initiative for stocks unlisted and did business at five figures. In this category Grand Central was a seller at $6.30 a share and South Swansea at $1.27, while Dexter handed out 300 shares at $1.15 and Little Pittsburg was active close to 3 cents. Swansea maintained its recent firmness and recorded a bid of $1.20 and Sunbeam, though doing no business, was in good demand at 11½ cents.

The closing figures were as follows:

LISTED STOCKS.

Stocks.	Bid.	Asked.
Anchor	[illegible]	1.00

RICH STRIKE IN IDAHO.

Two Feet of Good Stuff in the Nancy Hanks—The Poorman Mill.

The Florence, Idaho, Miner says that Messrs. Crab and McGlinchey, who have been doing development work on the Nancy Hanks, have struck two solid feet of chloride ore which assays 400 ounces silver and $12 gold.

Excavation for the Poorman mill is nearly completed and the framework will soon be erected. All the machinery will be delivered within the next thirty days, as freighters are under contract to have it here by July 1st. As everything will be in readiness for placing the machinery in position on its arrival it is probable that the stamps will be dropping on ore by July 15th.

The Lake Creek Placer company, operating near Warm Springs, is reported to be working day and night with about 20 men on the pay roll. As the ground was quite thoroughly opened last fall it is expected that this will prove a profitable season for the company. Mr. J. M. Venable, the experienced mining man, is in charge of the property.

Gold on Fiddle Creek.

S. A. Moor who returned the fore part of the week from an extensive trip on Salmon river, is quite enthusiastic over the recent placer gold discoveries made in the vicinity of Fiddle creek, and predicts that there will be important quartz strikes made in that locality this summer.—Florence, Idaho, Miner.

Visited Boise Hydraulic Interests.

John Lemoning of Pennsylvania and J. L. Kennedy and P. J. Quealy of Kemmerer, Wyo., left yesterday afternoon, after a visit to the property of the Upper Boise Hydraulic Company with General Manager Hood. Mr. [illegible] is the principal stockholder in the company. He expressed himself as being greatly pleased with his visit to this section, but he did not care to make any statement concerning his property. He spoke in very high terms of Boise and its people and stated he expected to again be a visitor to this section.—Boise Statesman.

MINING NEAR MAMMOTH.

To Resume Work on the Alaska—Grand Central Ore Bin.

The Mammoth Record says that work is soon to be resumed on the Alaska mine and will be vigorously pushed.

S. S. Jones has already made one shipment from that portion of the Utah mine which he has leased and another shipment is ready to be loaded.

Since air connections have been made between the Stock compressor and the Opex, the development on the Tennessee Relief, which is being worked through the Opex, is progressing very satisfactorily.

An excavation is now being made for an ore bin which is to be erected at the Grand Central mine. A chute will then be constructed to carry the ore from the bins to the wagons some distance below. This arrangement will avoid the necessity of the wagons making a trip up and down the steepest and roughest portion of the road.

NOTES OF THE LA SALS.

Mountains Now Open for Active Work—Indications are Encouraging.

We found in our trip to Mill creek basin this week, says the Grand Valley Times, that the La Sals were just losing their late covering of snow and the season for prospecting work was really open. The season is too far advanced to expect any more severe snow storms.

The twenty or more men camped in Mill creek basin were all apparently well satisfied with the result of their labors so far. A miners' meeting was held on last Saturday and the district named the La Sal Mountain Mining district and made to include the whole range.

We found Capt. Morrell busy preparing for the summer's work. It is his intention to commence an extensive tunnel under the Mammoth lode and he is preparing the ground for the start.

The D'Arcy brothers have located on the Middle mountain on a porphyry lead. They have a good showing at the top and are now running a heavy open crosscut through the slide at the bottom to try and uncover the lead at that point.

Messrs. Hayes, Wilson, Whitehead and Brady are located on a porphyry lead running from the divide between Miners' basin and Mill creek across the west end of the Middle mountain onto the slope on the south side of Mill creek. They have the logs cut for two cabins.

M. H. Darrow and party are at work on claims on the spur running west from Mill creek basin and have some very good looking ore in sight.

County Attorney Eddy visited Pinhook (El Monte) and Miners' basin this week. He reports that the arrastra will be at work on the ore from the Hepburn-Fowler properties in about ten days. The snow still lies quite deep in the basin but is rapidly disappearing.

The Brannon sawmill is being removed from Little Castle valley around the mountain to Paradox, where Brannon has taken a contract to saw for the smelter company in which Capt. Angell is interested, who are putting up a furnace, the machinery for which is now on the way in. H. D. Smith of Moab has taken a contract from the same company for constructing road and burning charcoal.

John H. Shafer went up yesterday a four horse wagon load of supplies for the mountains. Mr. Shafer has a force of men at work on his prospect on the upper mesa. This is the first prospecting work that has been done in that locality as it was generally thought to be too close to the sandstone formation, but the surface showing, made by Mr. Shafer, indicates [illegible] any point on the mountain as far prospected and the mesas will have more attention in the future.

C. H. Field and C. M. Maddy have established an assay office at the junction of the north forks of Mill creek. Their furnace and supplies went up yesterday. Mr. Field, who came in from Aspen last week and visited the mountains, is so well pleased with the prospects that he concluded to remain. Mill creek basin is the most central point in the mountains and wood roads and trails lead to it from all points and the location will be a great convenience to all working on the mountains.

Thomas Daly of the Lisbon Valley copper district visited Moab this week. He has not yet fully recovered from his late illness but is on the gain. The old gentleman is greatly elated over the prospects of a copper smelting plant in his district in the near future.

This One Has Ore.

Mr. Albert Lee of Paradise was in Logan on Saturday for the purpose of making a shipment of a ton of ore from the Northern Light mine east of Paradise, to the Sandy smelter. A former shipment gave very satisfactory results, and there is any amount of ore in sight.—Logan Journal.

Complaining of Greedy Prospectors.

Considerable complaint is heard from men who have been in Miner's basin by the great amount of staking that has been done about there by those who were first in this spring; that some have more claims to their credit than they can possibly do the work on and are thus shutting out the chance of [illegible] making discoveries. As to how much cause there is for such complaints we are unable to say, but it is a decidedly poor way to build up a mining camp for a few to cover all the ground in sight. One paying mine on the mountains assures the success of the district and raises the possible value of every claim, and the more there are doing development work the sooner is such a property to be brought out.—Grand Valley Times.

Dips and Spurs.

Silver, 58½; lead, $3.60.

The Horn Silver reported today with six cars of concentrates.

The Grand Central's stock books close on the 11th, two days before the payment of its initial dividend of $31,250.

It is expected that the Northern Light will report tomorrow with a shipment of 150 pounds of cyanides.

A chute of good grade milling ore, disclosing about 150 tons, has been opened up in the Northern Light on Lion Hill.

John Beck visited his saltpeter interests near Mill Creek today. Indications point to the claim becoming a good thing.

It is said that the lowest assays of the vein matter in the Eagle near Marysvale have been $25 gold and 21 ounces silver.

Grand Central will soon be found among the listed stocks on the exchange, the company having decided to place it there.

Lafayette Holbrook is to act as temporary manager of the Grand Central during a well earned vacation by Mr. Loose, the manager proper.

The Bullion-Beck is still shipping, but a cessation may come at almost any time, unless the smelters make more liberal rates for treatment.

Charles Van Alstine and Charles Crismon have been appointed by the directors of the Utah mine at Fish Springs to visit the property for inspection purposes.

The Buckeye at Mercur has elected the following board to serve during the ensuing year: George Westerfield, president; Isadore G. Meyer, vice president; J. — Gibson, treasurer; C. B. Marshal, secretary; Thomas Robinson.

Grangeville, Idaho, Free Press: The mill for the Iron Crown mine on Newsome creek is en route from Lewiston. It is a Kendall mill with 20 tons capacity in 24 hours and the outfit includes a concentrator. A. J. Lanterman of Cripple Creek, one of the owners, will manage the property.

Denver Post: Samuel Newhouse, who is the head of the United States Exploration company, the Newhouse Tunnel company of Colorado, and the Highland Boy Gold Mining company of Utah, is moving the office of the latter company to Salt Lake. A railroad is necessary to the successful operation of this enterprise, a corps of engineers are already making the preliminary survey, a smelter is being built and Mr. Newhouse finds his presence necessary to vigorous operation. The offices of the Colorado enterprises will remain in Denver.

During the thirty years life of the Calumet & Hecla copper mine, Lake Superior, $62,000,000 has been paid in dividends. The property was capitalized at 100,000 shares of a par value of $25 each. Now, the stock is quoted at $520 per share. The Homestake, South Dakota, has paid $[illegible] dividends; the Anaconda of Montana, $[illegible]. Of Idaho dividend-paying mines now in operation, the DeLamar leads the list with $2,250,000 to its credit, while Utah presents the Ontario with a record of $13,142,500, the Daly which is credited with $2,925,000, the Horn Silver with $5,125,000, the Bullion-Beck with $2,465,000 and numerous others with totals running considerably over a million.

THE WEEKLY CROP BULLETIN.

Report of Climate and Crop Service, Weather Bureau.

Weather in Utah the Past Week, and Reports from the State of the Condition of Crops.

Salt Lake City, Utah, June 6, 1898.

During the past week, ending June 6th, there was a marked change in the character of precipitation. There was a cessation of the frequent and almost continuous showers of the preceding five weeks. With exception of a snowstorm commencing on the afternoon of the 2nd and ending on the morning of the 3rd, during which .20 to .50 inches of precipitation occurred, there was practically no other precipitation. Cool weather continued with light frosts in some sections each night. On the morning of the 3rd and 4th a heavy frost occurred. The week terminated with most favorable weather conditions.

Cold and changeable weather has checked the growth of garden truck, corn and fruits, and the frosts which were general on the 3rd and 4th have done considerable damage to tender vines, peas, potatoes and possibly fruits. Fruit that escaped the frosts are now in bloom, and potatoes that were not showing above ground are safe. In some sections strawberries and gooseberries are ripening rapidly. Sugar beets are doing well; they are coming up with a good stand.

There is a good prospect for apples while plums will be scarce. Apple trees are coming into bloom. It is thought that the grain crop will come to maturity, and the berry be plump without the assistance of irrigation. On high lands the grain and grass are making a most pleasing growth. Lucern is being cut [illegible]. Warmer weather is needed to bring grasses to maturity. The prospects are excellent for large crops of cereals and hay.

EXTRACTS FROM REPORTS OF CORRESPONDENTS.

Garland—Wheat is still growing and looking well. The weather is still cool. The ground is wet. Lucern is very heavy. It is too cold for corn and vegetables.

Deweyville—The past week has been cold with light showers on the 2nd and 3rd. Snow fell on the hills on the 4th. Corn and garden vegetables are not growing much. Grain and lucern are doing well. Haying will soon commence.

Grouseville—Everything is growing well. Potato planting is nearly over.

Corine Junction—The weather was very changeable last week, cold but no frost. Light shower thunder storm and hail on Friday night.

Newton—Spring wheat is covering the ground. Lucern will soon be ready for cutting. Sugar beets are up. Gardens are backward.

Paradise—We have had one frost that slightly injured currants. Grain grass and lucern are growing nicely. Potatoes are planted and corn nearly so. Good prospects for apples. Plums are nearly a failure.

Logan—A cool cloudy week, no frost. Dry farm wheat looks well. Lucern is doing well and will be ready to cut in about ten days.

Hyde Park—Work on the beets was retarded by rain. Corn has rotted in the ground. Crops look fine on upper lands and yellow on low lands.

Benson—Grain and grasses are making good progress. Lucern will soon be ready to cut. The weather has been very changeable.

Woods Cross—Grain and grass are doing well; lucern is badly lodged. The weather has been very damaging to watermelons, cantaloupes, cucumbers, squash, beans and peppers, all of which are nearly a failure.

Grantsville—Strawberries are ripening rapidly. Lucern has commenced to cut. The hay crop will be large.

Ant—The wind last week was somewhat damaging to grain. June 3rd water from in ponds.

Tooele—The past week was favorable to all crops, strawberries are ripe; there is plenty of water and farmers expect a good crop of fruit, spraying is in progress.

Coyote—The weather has been fair for growing crops; we will have some plums and a few apples, currants and gooseberries if we do not get a late frost.

Parowan—Crops are growing nicely; early peas are beginning to bloom; potato planting is finished; plenty of water for irrigation.

Levan—Another cold rain and snowstorm on the 2nd made the thermometer fall to the freezing point; corn will have to be replanted; potatoes are coming up; tender vegetables have been nipped by frost.

Ranch—The weather has been very good for small grain; recent heavy winds have dried the ground rapidly.

Salpin—Tender vegetables have been nipped by the frost on the morning of the 3rd, but are looking well.

Holden—A light frost occurred on the morning of the 3rd, which failed to injure anything.

Hinckley—Frost injured tender vines Friday night.

Peterson—Grain on uplands is looking well; lucern is making a rapid growth.

Kingston—Everything is growing slowly; Friday night a heavy frost damaged potatoes, garden truck and fruit.

Henderson—High winds every day and frost every night; some damage has been done to lucern.

Hinckleyville—All crops look well; snow fell in the mountains on the 3rd.

Spring City—Small grain and grass are doing nicely; lucern is beginning to bud; frost night of 3rd killed potatoes, beans and squash, also injured corn and fruit.

Chester—Grain and hay look well; prospects are favorable for a large crop. A hard frost damaged almost everything on the morning of the 4th.

Mead—On the morning of the 4th frost cut the potato tops.

Fountain Green—Frost damaged fruit and gardens.

Manti—Hot south winds are warming and drying the ground; ground is in good condition; the alfalfa crop will be heavy.

Sigurd—Frost has nipped potato vines some and tender garden stuff; grain and grasses are doing well.

Plateau—Frost occurred nearly every night. Grass is doing well and grain that is up is doing well.

American Fork—Cold rains have retarded planting. Lucern is wanting sunshine to bring the blossoms out.

Lake Shore—Lucern is commencing to blossom; sugar beets look well and have a good stand. Garden truck doing well.

Salem—Prospects are good for excellent crop of small grain and lucern. Too much wet for the low land. Some will plant potatoes and corn over, the seed having rotted.

Santaquin—Some of the corn is up and some will have to be replanted.

Lehi—The highest temperature was 77 deg. lowest 41. Weather rather cold and windy.

Utorah—Strawberries and gooseberries are now in the market and being shipped in large quantities.

Huntsville—Grain on low lands looks sickly. Potato planting that was delayed on account of the storm is now about finished.

Harrisville—Weather is still unsettled, delaying the cutting of lucern, which is fully ripe. Grain will be plump and good without any irrigation.

Heber—Frost occurred every night. Injured potatoes and tender vines, very few peas are left. Pretty fair crops of apples and plums.

Pluto—Grain looks well. The ground is drying rapidly now.

Provo—Snow fell on the afternoon of the 2nd and morning of 3rd, weighting down shrub bushes to the ground. Some garden seeds have settled. Apple trees are in bloom and potatoes are up; strawberries are loaded with blossoms.

Payson—Heavy frost occurred Thursday and Friday nights, doing damage to beans, corn, potatoes and tomato vines. Some will have to be replanted. Lucern is ready to cut for hay.

J. H. SMITH,
Section Director.
Per F. M. BLANDFORD.

Seven Devils Railroad.

Frank Harris is up from Weiser, says the Boise Statesman. He says arrangements are being made to consolidate the Seven Devils railroad and river transportation interests and the prospect that the parties will be brought together. Mr. Wilkerson, the contractor, has just returned from Salt Lake, where a meeting of those interested was held, and Mr. Harris is of the opinion the plan was much advanced if not perfected by the meeting.

Chalmers Resigns His Position.

John Chalmers, the genial secretary of the fire department, has resigned his position, his health demanding that he seek quarters not so confining. Mr. Chalmers has been with the department for several years, his work giving perfect satisfaction and his affability and accommodating nature winning for him many friends, who will regret his leaving. L. M. Earl is mentioned as Mr. Chalmers's successor.

EXCURSION TO OGDEN.

Sunday, June 12th.

Via Oregon Short Line Railroad; round-trip only $1.00. Special train at 9.30 a. m., and special returning leaving Ogden 9.00 p. m.
