EMERY.

"Dry Farming" Has Its Drawback—Great Coal Fire Ds—Next Way to Clarify Water.

Special Correspondence.

Emery, Emery Co., April 25.—The dry farmers are beginning to find that the heavy storm here since last May, Ground has to be watered before it can be plowed and then it will be necessary to irrigate up. Still there is being quite a number of plows running and lots and more palms taken to have the plowing done well.

Hay is quite scarce and some of the farmers are having to buy of their more fortunate neighbors.

Stock has come out nearly through here for the season, there being but two or three head to be clipped yet. It is said the contractor for the clipping in the mountains is good but everything is dry and in bad shape.

This is a great coal country, the whole region seems to be one vast coal field, and spontaneous fires are found everywhere. At one point south of here there is a coal crocking 60 feet thick, and in the side of it there is a fire two feet of stone and then 28 feet more coal. In the side of the canyon southwest of here is a coal crack 15 feet deep that has an 18 feet vein of coal of a good quality. Some of the coal is being used with it in thought, make good coke.

CLARIFYING WATER.

The people of Emery have to contend with muddy water, and have a new and novel way of clarifying it. They take a bucket of this muddy water they put a spoonful of new milk, then stir it briskly and the sediment immediately begins to settle, and in a few minutes the water is clear. This separation can be seen taking place as soon as the milk is stirred into the water.

There is some talk of a road from here this fall winter and this spring, it has been a mile every other day and no rain.

QUEER COINCIDENCES.

[New York Telegraph.]

This is a little world in which we live and the people most overtaxed this are those who have experienced strange coincidences which seem almost impossible. Harry Houdini, the famous illusionist of the Cambridge university library, had a strange adventure in the Paris library, on his visit to Paris, for nearly a century and Mr. Houdini went over to see if he could discover it. Search was instituted and there was a strong pronunciation as to the part of the library where it would be found. He stood one day in one of the recesses of the library, describing its probable appearance to the Professor, giving the height, thickness and similar binding to this," said he, taking a book out of the shelf.

It was the missing book.

The stories of strange coincidences in the matter of lost and found property are legion. Two years ago a lady staying at Long Branch lost a gold ring with initials. A reward was offered and all the boys of the place rocked the whole coast in search of it. But it was never found. The next year the lady was at Long Branch again, and while sitting on the shore, was looking for the ring, or thinking of it, she turned it up accidentally with her parasol.

A woman out buying lost a jewled scarfpin, which she much valued. She went back and in the place of her journey, and as she had ridden twenty miles the pin was found. It seemed small, but, however, gave a notice of her loss to the police. On her return to Philadelphia a note was handed to her, she opened it and there was the pin. Another lady lost a pin, and, on discontinuing to discover the loss, found the pin sticking in the tire.

THE BEST IN THE WORLD.

We believe Chamberlain's Cough Remedy is the best in the world. A few weeks ago we suffered with a severe cold and a troublesome cough, and having read their advertisement in our own and other papers we purchased a bottle to see if it would effect us as it claimed it would, and before the bottle was more than half used, we felt that medicine cut for colds and coughs.—The Herald, Andersonville, Ind.

HOW GIRLS ARE SACRIFICED!

THE MODERN MINOTAUR.

Both Counsel and Comfort to a Friend's Timely Word.

There is nothing more beautiful in the whole range of created things than the girl just blossoming into womanhood. Pure here enhanced language, and enamored the world for imagery to delicately suggest her beauty. Her eyes are pink-tinted as shells, her hair is spun gold, her skin is alabaster, her neck is as the marble lacester is the lips have a tint as the blushes of the morning, her smile is like the glow of dawn on rose-capped lilies. All this and much more has been said in an attempt to do fair justice to some of the charms of budding womanhood, but their full force, or the indescribable charm of the whole, was reserved for the Divine people, Patriarch C. S. Cutler and Brothers Harmon, and Bishop H. M. Heaton made some good, pithy remarks. It was a time of rejoicing long to be remembered by all present. The young folks had a party at night, with good music.
