MINING STOCK BUSINESS LIGHT

Market Going to Pieces and Future Hard to Fathom.

SALES ON THE EXCHANGES

Reached 30,950 Shares for $5,719.12 —Proceedings in Detail on Each Board.

TODAY'S METALS:
SILVER 63
LEAD $4.25
CASTING COPPER, 16¾

Mining stock business is still light, with figures lighter. On both boards today the sales were 29,329 shares for $5,703.12, of these the Salt Lakers sold 16,400 for $1,541.32, while Utah brokers disposed of 9,400 for the sum of $1,244.35. The market is going to pieces and the future is hard, indeed, to fathom.

DISCUSTING CONDITION.

Stock Matter is Terrible, the Road to Sale at a Rapid Pace.

The mining public generally are becoming disgusted with the condition of the stock market. Each day sees a gradual falling off in the amount of business done, to say nothing of the shrinkage in values that is quickly reducing stocks to a complete nonentity. On the Salt Lake board today the same conditions obtained, and prices were cut right and left, while business was confined to a small number of securities.

Daly was an important seller at $1.48, while Grover-Marion commanded considerable attention and sold from 55 to 60½ cents a share, a total of 1,500 going at these figures. Lower Mammoth continued weak and went at $1.38, and Star Consolidated dropped to 89½ and was followed by Sunshine for which $1.60 was paid. Eagle and Blue Bell was mentioned at 11½ and Joe Bowers sold at 14½.

The closing figures were as follows:

BINGHAM GOLD PLACER.

Dull in This Afternoon at 24 Cents—Other Transactions.

The first board sale of Bingham Gold Placer was made on the Utah board this afternoon, 200 shares being at 24 cents a share. The call produced sales at 24 and 24½ for 1,000 and 500 respectively. Some time ago, at 25 cents, Dalton took most of the Placer shares selling at this figure. Chloride Point traded heavily today, the price, while Four Aces went at 22 and Daly at 47½.

Figures were posted as follows:

DEEP CREEK MINES TAKE ON NEW LIFE

Travel Heavy to All Parts of the Camp.

BUTTE MINES ARE BOOMING.

Contract on the Sea Swan—Preparing an Onslaught—Porter's New Strike—Miscellaneous.

A northbound list in from Deep Creek reports that camp more active than for a good number of years, and says that travel to the mines there is fairly intensive. The Miles, says he, is in splendid condition, and the thousands of tons of high-grade ore in sight with a new strike in the Lucky May incline. At the same end of Deep Creek the Bee, are working a good force and taking out considerable ore, while Joe Avery and others have recently gone out to resume on the Jennings Bryan, an old Dugway prospect. At the Gold Hill, in which Prescott Woodman of the Continental Estate is interested, fellows are quite pooling the continuous of a mile, but in other portions of the camp, there is gratifying activity, which would be greatly stimulated by the building of the much-promised railroad.

The party, whose name is withheld for good and sufficient reasons, reports great excitement in Dolly Varden, Nevada, where recent copper discoveries have stirred up the populace to an extent unknown since the days of Comstock days. All told, says he, the West is making a great record in the history of mining.

BUTTE IS BOOMING.

Flow of Copper Has a Bewildering Effect—Smelter Improvements.

James W. Neill, manager of properties owned by the United States Mining company at Bingham, came down from Montana this afternoon and is now stopping from Butte, whither his knowledge of mining affairs generally called him ten days ago as an expert witness in a case against the Montana Ore Purchasing company. The hearing is still on, and it is thought that he brought him home earlier than expected, but nevertheless he is glad to be home, although he has to return within the next twenty days.

"Butte is booming," said Mr. Neill, when seen by a "News" reporter. "The high price of copper has stimulated work in every direction, and all mines are commencing to run during night and day, with scarcely sufficient intermission for lunch. The arrival, yesterday, in Butte, of Mr. Porter, in company with the Montana Ore Purchasing company has found it necessary to double the capacity of the smelter, an improvement that will make it capable of producing 7,000,000 pounds of copper every month. This work is now going on and will be pushed with all possible speed, as the company is in sore need of better capacity."

Mr. Neill reports a big fire yesterday afternoon on the St. Lawrence shaft, one of the Anaconda group. Parties in the vicinity of the greater part of the shaft was built up of steel and therefore the conflagration was not as disastrous as it might have been. However, it did considerable damage, burning to a crisp every inch of wood in the entire working. Profiting by past experience in this direction, most of the companies operating in Butte are adopting steel gallows frames, brick engine houses, etc., so that in future results of fire will not be so dire as heretofore. The Anaconda company is making extensive improvements in its operation, and is starting in extensive mills and smelters at Anaconda as fast as possible.

Mr. Neill, who is known as professor in Butte, was the cause of quite a touch of high life, so to speak, and will make a most enviable record of prominence during the coming year. Salt Lake and Utah are highly spoken of there, and many of the best ore producers are coming down and spend a few days here.

Mr. Neill corrects a statement made in the "News" several days ago, that Samuel Newhouse credit for organizing the deal resulting in the sale of the Old Dominion to Boston and New York capitalists, and that Mr. Newhouse is the man of Kimball. The credit for that deal, said Mr. Neill, belongs to F. H. Peabody and not to Mr. Newhouse, as quite generally supposed. Mr. Peabody on your case for this purpose, and is entitled to the credit. To him belongs the credit for bringing about the sale of these properties.

Preparing an Onslaught.

That the United States mines in Bingham, now operating between 10 and 15 per cent of their capacity, will be in the course of a few weeks, is the assurance given by Manager Neill, who says that the Bingham Prodigal, and other mines will immediately on the installation of the large compressing plant about to be shipped from Salt Lake, which plant are now equipped with a small compressor, which, however, is not sufficient to meet requirements for a full force. Mr. Neill is somewhat vexed over the somewhat of office fatigue, and is quite anxious to get back to camp. He is certain to get things in shape prior to the arrival of office fatigueists from the East, and, from the tone of his remarks, however, is very weight, the properties, one and all, bring in most excellent condition.

To Pack on Sea Swan Shaft.

The directors of the Sea Swan at Bingham, have recently let a contract for 400 feet of timbering, work to commence right away. This will take the shaft down to the 800-foot level and will place a large quantity of pulling at the stulls at the most likely looking place, which is, of course, perhaps the Roundup at Silver City, lying high on the hill, it is expected that a point will be reached the 400 foot level will be necessary to see how the ore bodies, and see the vein from adjacent by its immediate neighbors, for there is evidence of ore so drifting will be done, the others producing to keep right on with the work of the regular work. These Bingham's are coming of ultimate success in the development of this property.

Rich Gold Specimen Samples.

An exhibition of the ledge of Fish Springs to the Deep Creek country, seems to win in the office of the Utah-Sunset, south front of Mercantile block. It is a specimen of a gallery of rich samples from the Utah and Gulch mines, some of which carry values as high as 1,000 ounces in gold and silver, and most of the rest, while others run all the way from 40 to 1,000 ounces silver and at 40 to low values. The exhibition speaks volumes for the adaptability of this section and have to be seen to be fully appreciated.

Woodruff Home Again.

Dr. E. D. Woodruff, who represents Mr. Mercur, Tintic and Tuscarora, Nev., came in from the east last night with friends who toured with a reception altogether worthwhile of a beautiful outing. For the past six weeks the doctor, accompanied by his family, has been touring east and revelling in old home New Englandism. He visited his kinsfolk and had a merry, so much so that he returns full of renewed vigor, being able to resume his duties at the Mercur mines anew. While away the gentleman paid some little attention to mining machinery, and at an early opportunity he contacted with the Tuscarora Chief will make report looking to the thorough equipment of that property. The doctor reports fifteen eight in California mining circles.

EMERY'S NEW DISTRICT.

Travel Heavy to the New Copper Mines South of Ferron.

Special Correspondence.

Price, May 25.—The mining excitement in the district south of Ferron, Emery county, continues and the stage line to the south is crowded every day going out. Private rigs are hard to get at times, so great has been the demand of late. The new district is some twenty miles to the south of Ferron and from parties who have been on the ground it is believed has tremendous possibilities in copper. The ledges are heavily impregnated and propose to be the mecca of the new district be found considerable work the coming summer. The average ledge is twenty-five feet in width, which is said to be only one of a great number that are good, as are high as 12 per cent copper and small values in gold and silver.

PORTER'S RICH GOLD STRIKE.

Ore Assays $600 Per Ton and is Causing Much Excitement.

Special Correspondence.

Ogden, May 26.—Some time ago the announcement was made in the "News" of the location of a mining claim near Ogden by W. O. Porter, on Cripple Creek mines. The rock of gold-bearing quartz was alleged to be rich in the yellow metal. Mr. Porter sent samples of the quartz to Philip Schaats, an assayer, at Cripple Creek, for assay and determination of their value, and it is claimed that the returns gave over $600 gold per ton. The news of the find having reached Cripple Creek, caused the greatest excitement in each camp, and yesterday six miners from that rich gold camp arrived in Ogden and went out to Porter's claim, which is located a short distance east of the north end of the street car line and consists of a claim which is owned and has been worked by Ogden railroad men for several years. The location of the claim is not more than three and a half miles from the center of the city, and they are fully convinced that the samples were not those Wednesday and secured samples from Porter's claim, which they had assayed. The result was so satisfactory that they returned yesterday with the avowed intention of making locations. From time to time during the past year some rich float, showing free gold, has been found in the neighborhood of where the Porter claim is located, indicating the existence of a lode, and it seems probable that Mr. Porter has found it.

MINES AND MINING MEN.

The Aetna group in Idaho has a car of ore en route to the smelter.

The Northern Light shipment, mentioned in last evening's "News," was being sampled today.

The Taylor-Brigham sampler received ten cars from Tintic today and one from Stockton.

F. V. Farnsworth has returned from Bingham after looking after things at the Union & Lark.

A. E. Hyde left for California last night to arrange for the shipping of Utah gravel to that state.

The work of installing a new hoist is going on at the Swansea. Meanwhile, operations are suspended.

E. G. Lemon of the New Mammoth at Park City, reports the mine and prospects look progressing nicely.

Will Griffiths, the newly appointed manager of the Colonel group near Milford, left for the property last night.

It is reported that an Ogden syndicate has been formed to develop the ore set in the Ridge Extension at Marysvale.

Contractor Blackburn, just in from Tintic, reports a new discovery of ore in the Blue Bird Extension and says the miners are now drifting on the ledge.

George Dern came in from Mercur last night. He reports halloos going through the old camp at the time of his leave daily, and says a shipment will be made about the first.

The place at the Giant Golden Gate, Mercur, has been removed to the Champion at Silver City, and will be used in connection with the development of that property.

Frank Wilson, who spent yesterday at Bingham, says the Highland Boy is shipping seven cars of ore daily to the new smelter, being materially assisted in this by the operation of the tramway.

Hartwig A. Cohen arrived from the East late yesterday afternoon. He stated to a "News" reporter this morning that he would go out to Bingham in a day or so. How long he would remain in those parts he hardly knew.

About June 1st the Highland Boy company will occupy offices in the fourth floor of the Dooly building, the rooms formerly occupied by the Pennsylvania Lead company. Messrs. Newhouse and Weir will conduct business from the old stand.

MARKET REPORTS

NEW YORK MARKETS.

New York, May 26.—The advance in yesterday's market and the strength of Amerbame in London this morning brought buyers to the market and prices generally advanced a sharp fraction. Consolidated Gas was mentioned as a vulnerable point by the bear faction and the price was pressed down a points. Other leading speculities sagged in sympathy. The railways lost but the newest fractions. Additional decline occurred in some stocks, particularly Consolidated Gas, which marked $1.22½.

Metropolitan Street Railway also fell away 4 points. The market generally steadied and became dull. A good demand prevailed for railroad mortgages with the issues selling but shade per in favor.

SUGAR.

New York, May 26.—Sugar, raw, firm; fair refining, 4½; centrifugal, 96 test, 4½; molasses sugar, 4c.

Refined, firm; crushed, 5¾; powdered, 5¼; granulated, 5⅛.

MONEY.

New York, May 26.—Money on call nominally 2½ per cent.
