Business was seasonably good on the exchange today. The renewed strike in the Tetro mine made that stock sell up to 10¾, with a weakening tendency towards the close. Joe Bowers displayed itself today and received a big volume of business at prices ranging from 20½ up to 21¾. Petro was a little stronger than some expected it would be owing to the reported dismissal of the cash last evening. It sold from 5c up to 5½. Golden Eagle went back to 4 and was followed by Yanker Consolidated to 15½ and Star Consolidated to 11. South Swansea was in demand at $1.76 and 200 Swansea were sold dropped at 4.20. Tigers was traded in at 11. Mercur stood 17, and Mammoth at 21.75½. Dayes sold at 36½, while Daly went to 1.65 and Daly West responded at $12.50. Boston Consol buyers at 69 and Martha Washington at 10½. Beaver Extension brought 65, Globe Hill Honeys 27, and Horn Silver by Le Mar 75. Northern Light sold at 2.50 and Lady Earl Lake Mammoth went up to 6.

MARKET QUITE ACTIVE.

Upward Movement of Stocks is Held to Carry Conviction.

Changes in Prices of Railroad Stocks Small—Standard Railroads Were Generally Weak.

New York, Aug. 11.—Yesterday's upward movement of stocks in the entire industry continued on the opening and the leading stocks were seen to good advantage. Change in prices of railroad stocks were small but pretty well distributed, and the tone was quite active in early dealings. Tennessee Coal was down to 60, and some other iron and steel stocks were also down a point or two. The entire list was soon in the grip of a bear movement, and a very large volume of stock changed hands. The pressure was quite severe on the new percentage of Chicago Gas, the government crop report, and news was received of a strike of coal miners. The weakness of Chicago Gas reflected uneasiness, and caused the general market to become irregular. Sugar was quite active and strong, and moved up 2 point to the most active stock, but other industrials were in the down grade. Changes other way in the list were very trifling.

SUGAR.

Sugar, raw, refined, fair refining, 4; cent. centrifugal 96 test, 4 9-16; molasses sugar, 3½.

RICH STRIKE IN THE TETRO.

Telephone Message Conveys the News to Town Today.

ASSAYS SHOW 4 OZ. GOLD.

Silver Doubt the Good Word—Bullion Still Strike—New Shaftheads for South Swansea.

A telephone message received from Dave Tuckett today giving news of a rich strike in the Tetro. Our Tuckett party sent word to his wife shortly after the noon hour that he had struck pay ore. He was soon followed by messages of just nature to your news staff. Various reports were given. Officers of the company in town, consider the news so good to be true. They are inclined to doubt the report, and even those who have confidence in the property are somewhat surprised. It is seriously feared. Fifty tons have been sent to the development on this property in the present stage. Operations were started on the back in 1896, and since that time about 1,500 feet of work has been done, the greater part of which was carried on without the encouragement of a ray of ore. Honesty enough, the report goes, to say that it was compelled to believe that the reward was only a matter of time. This has continued to be the case, and the stockholders have taken from the scattered dole of the Mule Canyon.

Good Gulch in the Rocky Bill.

When visited yesterday afternoon in relation to the rich find in the Tetro, Mr. Dave Tuckett said: "We have been unfortunate since the strike which was reported in the Tetro, in getting the property, some of which belong to me, and Monday morning went to Alpine with a sample of the ore. I had a telephone message yesterday afternoon, the purpose of which was to inform me that the ledge is about 4 feet wide and assays 4 ounces of gold and 1 ounce of silver. I have not seen the ledge myself, but I am told by those who have that it is a very rich ledge. I have a claim in a gulch of Rocky Bill, and I am so anxious to venture a few more words about the Tetro, and some of the stockholders in Good Gulch."

South Swansea Shaft.

Preparations are steadily being footed up for a greatly increased output from the Swansea, and South Swansea mines. The new shaft has been sunk some 100 feet and when a force of men can be spared from the Swansea it will continue to go down. The Swansea is the only shaft which goes under the lake, which will continue to go on the vein, which is the mainstay of the Swansea shaft. A contract has been let for the hoisting of timber to be used in the Swansea shaft, and it will be done. The work of hoisting the timber, along with it is stated, be started at once. The timber will be placed in the shaft some time before large ore bodies will be reached and probably months before the shaft will be used for the company's ground in Lake Ont wide, there seems to be no probability of the ore being taken out of the Tetro. At the present time 500 tons of ore have for the shareholders of this property.

MINERAL PRODUCTION LAST YEAR

Utah's Emerged Output of Pig Iron—Only State Producing Lithographic Stone.

The statistics of mineral production in the United States as compiled for the Mineral Resources of the United States for the year just ended by Dr. Edward W. Parker, of the geological survey, and published in the annual report of the director of the survey, of the United States, for the year ending June 30, 1899, show that the total value of the mineral production this nation was increased over the previous year, from $1,000,000,000 to $1,000,000,000, another billion or so to $1,000,000,000.

The production of gold during 1899 amounted to value to $60,000,000, against $53,000,000 in 1898. The product of silver was 57,000,000 fine ounces, against 56,000,000 ounces in the previous year. The largest part of the increase in gold production came from the Klondike region, Alaska, Colorado and Utah. Colorado the lessons in the production of silver, and Utah is now the only state in the union which is producing lithographic stone.

The production of copper increased from 215,000 short tons in 1898 to 270,000 short tons in 1899. The production of lead increased from 170,000 short tons in 1898 to 175,000 short tons in 1899. The production of coal increased from 200,000,000 short tons in 1898 to 230,000,000 short tons in 1899. The production of petroleum increased from 60,000,000 barrels in 1898 to 63,000,000 barrels in 1899. The production of natural gas increased from 200,000,000 barrels in 1898 to 240,000,000 barrels in 1899. The production of pig iron in Utah increased from 1,000 tons in 1898 to 2,000 tons in 1899. The production of coke increased from 1,000 tons in 1898 to 2,000 tons in 1899. The production of coal increased from 1,000,000 tons in 1898 to 1,000,000 tons in 1899. The production of petroleum increased from 1,000,000 barrels in 1898 to 1,000,000 barrels in 1899. The production of natural gas increased from 1,000,000 barrels in 1898 to 1,000,000 barrels in 1899. The production of lithographic stone increased from 1,000 tons in 1898 to 1,000 tons in 1899. The production of copper increased from 1,000 tons in 1898 to 1,000 tons in 1899. The production of lead increased from 1,000 tons in 1898 to 1,000 tons in 1899. The production of zinc increased from 1,000 tons in 1898 to 1,000 tons in 1899. The production of pig iron increased from 1,000 tons in 1898 to 1,000 tons in 1899. The production of coke increased from 1,000 tons in 1898 to 1
