

UTAH APEX MINE.

6

## Bingham Company is Now Earning on Basis of \$75,000 Monthly.

Basis of \$75,000 Monthly. A Boston financial paper says of the Utah: This mime is now upon an earning basis of about \$75,000 per month. It is shipping 100 tons of ore per ady diect to the smelter and 200 tons per day to its mill. It is prepared to ship 50 tons of ore per day and its tramway has a capacity for handling such a tonnage, but, at the present time, every ton of its ore has to be teamed from the tramway, and 300 tons per day is about the present limit of the teaming ability. The railroad company has promised switching accommodations, but it will probably take some time yet to con-nect the railroad to the ore bins. The parvenue tunnel, which is seven by six feet, and next to the Mascot

to 150 tons a day. M. W. Ditto and H. W. Overpeck have gone to Chleago to place an order for the necessary machinery. John F. Brown is left in to place an order for machinery. John F. I charge of the property.

DIDN'T TELEPHONE SHEETS.

DIDN'T TELEPHONE SHEETS. "Now isn't it a fact that you tele-phoned to Chief Sheets to meet you at the corner of Third South and State streets and didn't you and Bell meet him there?" inquired Mr Loofbourow. "No sir," was the positive reply. "You have been very closely connect-el with Councilman Mulvey, the chair-man of the police committee, for some time, have you not" "Yes, sir." "And you have also been close to Chief of Police George Sheets, haven't you?"

"No, sir."

"Doesn't Sheets loaf around Mulvey's saloon and is closely in touch with Mul-

saloon and is closely in fouch with Mul-vey?" "No, sir; I know at that time Mulvey and Sheets had been enemies for seven months; the same as I had been to Sheets." "Why were they enemies?" "Mulvey was sore at Sheets because he would not allow the city to get the license due it from the gamblers." "Was Mulvey starting a gambling house, too?"

Done by Two or Three Persons. San Francisco, July 4.--Referring to the suit brought yesterday against the city in behalt of the proprietors of the Japanese been wrecked by a mob on May 23 Asst. City Atty. Baggett said: "The defense of the city will be that whatever injury was done to the property of the Japanese was done by two or three persons before a mob, in the sense of the law, had formed. The city will also claim that there was no riot, but will also claim that there was no riot, but will also claim that there ontention that the dam-age was done by a few persons before it was possible for a mob to have collected." United States Atty. Deviin has received a letter from Atty.-Gen. Bonaparte ask-ing him to make an investigation and re-port immediately on the action of the San Francisco officials in refusing to sonducted by Japanese. "He at once began the investigation and re-W. probably take some time yet to con-nect the railroad to the ore bins. The parvenue tunnel, which is seven by six feet, and, next to the Mascot tunnel of the Bingham company, the best tunnel in the Bingham camp, will be used as a working tunnel. It is now in the mountain 2,600 feet. It is planned to have this tunnel cut five bedded and five fissure veins. Two have already been struck, but the ground is so soft that work had to be suspended before definitely determining what veins they were. On the first vein they are in 68 feet, and it aver-aged 11 feet of fine galena copper ore. Sixty fest beyond this a fissure vein ws struck believed to be the Leonard fissure. It contained two feet of first class and five feet of second class ore. The management is now timbering the tunnel for 500 feet back to wherea

the tunnel for 500 feet back to where this ore was struck.

It is the belief of the Utah Apex management that Leonard fissure makes the Utah Consolidated ore. The management is now running an incline to connect the Andy with the Parvenue tunnel, a distance of 300 feet. Over \$500,000 in cash has to date been

expended on the Utah Apex properties in development and equipment. Of the present outstanding \$2,700,000 capital (540,000 shares) \$2,300,000 of stock was originally given in exchange for the properties

## IDAHO PLACERS.

## Significant Statement of State Inspector of Mines Regarding Them.

Boise, Ida., July 4.—The Idaho state inspector of mines in a recently issued report makes the following significant statement: "The enormous output of placer gold from the Boise basin was mostly derived from an area of about 15 miles from north to south by a max-imum width of 13 miles from cast to west which in commerciant to its size imum width of 13 miles from east to west, which, in comparison to its size, probably equals the output of any pia-cer field in the world." It is a well known fact that of all the placer lands in the basin those along Moore's creek in the vicinity of Jupiter mountain have yielded the most heavily. The Jupiter ledges, in fact, are generally acknowl-edged for be the source of the placer gold. The McKuley Gold Mines com-pany is now giving a practical demon-stration of this matter by running a tunnel bore into the side of the mountunnel bore into the side of the m tain to tap the mineralized velocation depth. The mine superintendent re-ports the tunnel now in 77 feet and the necessary machinery installed and in running order for the future vigorous prosecution of the work.

## SMELTER SMOKE RIDDANCE.

## Suggestion Made by a Well Known California Engineer.

California Engineer.

ore-in those days regarded as worth-less-was so plentiful that it interfered with the successful treatment of the sil-ver and lead, and the camp was finally shut down, although it was said that as high as 45 per cent was obtained in lead and 75 ounces in silver was ob-tained to the ton, taken from the Fourth of July mine. The fall of silver had much to do with the closing down of the camp, which was one of the most promising in the state. Early in the '70's the camp was most promising as a producer of cliver. Sprucemont today is just as rich in silver and lead as it ever was, and the copper values underlying the district cannot be computed, not by me, anyway. The camp impresses me more favorably than any other I have seen in the district. It is of the same formation as that of Robinson district—lime, porphyry and iron. Por-phyry rhyolite dykes can be easily traced on the surface for many miles. In the good old days when copper was not so valuable as a metal as it has since become, and when it was found to be regarded as a drawback to the not so valuable as a metal as it has since become, and when it was found to be regarded as a drawback to the camp--a disadantage. Every old dump in the district, every pile of dirt and every prospect hole sunk shows copper in great quantities, from the size of a grain of wheat to chunks weighing 200 pounds.

## MUST PAY LICENSE.

## Idaho Will Exact Fee From Mining Companies Hereafter.

At the late session of the Idaho state egislature, a law was enacted taxing all mining companies with an annual license fee, which is based on the amount of capital stock of the corpora-tion. The followin statement has been received by the "News" from the sec-retary of state of Idaho:

The annual license fee required by law shall be paid in advance for the fiscal year, beginning July 1 of each year, and, in case new corporations are formed or enter the state during fiscal year, the first year's fee shall be pro-portionate to such fraction of a year,

## AT THE ONTARIO.

#### Pumps Installed and Unwatering of Mine to Begin at Once.

Superintendent George Ames of the Ontario Mining company of Park City is in the city today, to spend the Fourth at home. To a "News" representa-tive Mr. Ames stated this afternoon, that never the stated this afternoon, that preparations are now almost com-plete for the beginning of the task of plete for the beginning of the task of unwatering the mine by means of pumps, in order to facilitate the open-ing of the big drain tunnel at Park City. Mr. Ames is confident that this method of proordure will not only prove an effectual as well as speedy method of relieving the congested situation at Park City, which was brought about by the caving in of this avenue a little over two years ago. over two years ago.

## DIVIDENDS TOMORROW.

# Newhouse Directors Scheduled to Meet In New York. The directors of the Newhouse Mines & Smelters corporation are scheduled to meet in New York tomorrow, at which it is expected the initial dividend of that corportion will be posted. Just what the amount will be is a little un-certain, but the prevailing opinion seems to be that it will on the basis of 50 cents a share quarterly and that the disbursement will come in September. During the month of June the New-house formany shipped approximately 900 tons of crue ore to the smelter, while the mill handled an average of between The directors of the Newhouse Mines the mill handled an average of between 800 and 900 tons daily, from which produced a little more than 1,000,000 pounds of copper.

## BINGHAM CONSOLIDATED.

Another Story Out Regarding Location of Proposed Smelter. DAIRY PRODUCTS.

The Boston News Bureau has tained information to the effect that the Bingham Consolidated Mining & Smelt-ing company has purchased a large tract of land over on the west side of the Great Salt lake to be used as a the Great Salt lake to be used as a site for the proposed new smeller to be erected by that corporation. There is probably some basis for the truth of this statement. The Bingham Junction plant is certain to be abandoned and the probabilities are that Mr. Heinze will not move his center of smelting operations more than 100 miles from the site of the present plant.

The mill of the National Ozokerite ompany near Colton has been placed in mmission again. The landslide in American Fork can-ron has resiously interfered with the movement of ore from that district.

A good many members of the Sait Lake Stock & Mining exchange have gone into the canyons to remain until Sunday.

Mill Superintendent Fred Whittemore of the Columbus Consolidated, is down from Alta to stay over the Fourth with his family.

Yesterday's sales of the mining ex-change amounted to the transfer of 75.718 shares, representing a valuation of 125 condition of \$77,296.70.

hourow

Attorney King objected to the ques-tion and it was not answered. Donaldson insisted on telling the jury about the charge mentioned but Judge Armstrong refused to allow him

to do so. Several more questions were asked just before court adjourned for the day. It is quite likely that the case will be concluded and will go to the increase Friday evening jury on Friday evening

METCALF IN SAN FRANCISCO. San Francisco, July 4.-Secy. of the Navy Victor Metcalf and Mrs. Metcalf arrived in Oakland from Washington at 2:30 o'clock this morning. They went immediately to the home of Mrs. Met-calf's mother, Mrs. J. H. Nicholson. Secy. Metcalf denied that he had come west in connection with the Japanese question. "I have not come to the coast on official business," said he. "I have come home for a short vacation-just a little rest."

He at once began the investigation and will make his report as soon as possible.

## SMALL WITHDRAWS ORDER.

SMALL WITHDRAWS ORDER. San Francisco, July 4.—President S. J. Small of the Telegraphers' union, it is stated, has temporarily withdrawn the order given the operators in another city, believed to have been to go on strike within the next few days. President Small, it is said, has telegraphed the union which he had mailed orders to walk out, to take no action until further advised. This action, it is believed, was taken by the national president of the tel-escaphers' organization pending the ar-rival at Chicago of Labor Commissioner Neill from Washington, and the outcome of his efforts there to prevent a general strike. It is taken as an indication that despite the apparent hopeless deadlock between the telegraph companies and the relegraphers, the chance of a compromise of the local trouble is not entirely dis-sipated.

TILDEN AND GRAHAM.

ateri

Chicago, July 4.-The jury in the case of the Steel Ball company, two members of which corporation, William K. Tilden and Chauncey L. Graham, were accused of participating in the wrecking of the Milwankee Avenue State bank, of which Paul O. Stensiand was president, reported disagreement today and were discharged.

FIRE IN BATTLE CREEK, MICH.

Battle Creek, Mich., July 4.—The main building of the Toasted Corn Fiakes com-pany's plant, was destroyed by fire today. Loss \$75,000. Three firemen were severely injured and a grand trunk railway lineman was killed by seizing a live wire while working among the debris.
