A MAN

WHO IS UNACQUAINTED WITH THE GEOGRAPHY OF THIS COUNTRY, WILL SEE BY EXAMINING THIS MAP, THAT THE

CHICAGO, ROCK ISLAND & PACIFIC R'Y

By reason of its central position, close relation to principal lines East of Chicago and continuous lines at terminal points West, Northwest and Southwest—is the only true middle link in that transcontinental system which invites and facilitates travel and traffic in either direction between the Atlantic and Pacific.

The Rock Island main line and branches include Chicago, Joliet, Ottawa, La Salle, Peoria, Geneseo, Moline and Rock Island, in Illinois; Davenport, Muscatine, Washington, Fairfield, Ottumwa, Oskaloosa, West Liberty, Iowa City, Des Moines, Indianola, Winterset, Atlantic, Knoxville, Audubon, Harlan, Guthrie Centre and Council Bluffs, in Iowa; Gallatin, Trenton, St. Joseph, Cameron and Kansas City, in Missouri; Leavenworth and Atchison, in Kansas; Albert Lea, Minneapolis and St. Paul, in Minnesota; Watertown in Dakota, and hundreds of intermediate cities, towns and villages.

THE GREAT ROCK ISLAND ROUTE

Guarantees Speed, Comfort and Safety to those who travel over it. Its roadbed is thoroughly ballasted. Its track is of heavy steel. Its bridges are solid structures of stone and iron. Its rolling stock is perfect as human skill can make it. It has all the safety appliances that mechanical genius has invented and experience proved valuable. Its practical operation is conservative and methodical—its discipline strict and exacting. The luxury of its passenger accommodations is unequaled in the West—unsurpassed in the world.

ALL EXPRESS TRAINS between Chicago and the Missouri River consist of comfortable DAY COACHES, magnificent PULLMAN PALACE PARLOR and SLEEPING CARS, elegant DINING CARS providing excellent meals, and between Chicago, St. Joseph, Atchison and Kansas City—restful RECLINING CHAIR CARS.

THE FAMOUS ALBERT LEA ROUTE

Is the direct, favorite line between Chicago and Minneapolis and St. Paul. Over this route solid Fast Express Trains run daily to the summer resorts, picturesque localities and hunting and fishing grounds of Iowa and Minnesota. The rich wheat fields and grazing lands of interior Dakota are reached via Watertown.

A short desirable route, via Seneca and Kankakee, offers superior inducements to travelers between Cincinnati, Indianapolis, Lafayette and Council Bluffs, St. Joseph, Atchison, Leavenworth, Kansas City, Minneapolis, St. Paul and intermediate points.

All classes of patrons, especially families, ladies and children, receive from officials and employes of Rock Island trains protection, respectful courtesy and kindly attention.

For Tickets, Maps, Folders—obtainable at all principal Ticket Offices in the United States and Canada—or any desired information, address,

EVENING NEWS.

Saturday, - - May 28, 1887.

GOD'S MUSIC.

I left the daylight scene of toil
To light my pleasant evening lamp,
And gather from the world's turmoil
About the happy household camp.
Peace dwelt among us, as if God
Had spread his tender hand above
Our heads, and touched us with the rod
Of his divine and human love.

From out the far sweet depths of air,
I heard an untranslated song
Float softly and in cadence rare
The branches of the trees among.
Whence comest thou, O psalm of cheer?
I sometimes think it must have been
A message from the sweet, the clear
Soft sounding harpsi chord of Him,
Who led Judea's martyred hosts
Unto the veiled promised land,
Where angels of the Pentecost
Stood holding God by his right hand.

I could have sat forever there
Amid the stillness and my books,
With such sweet music in the air,
Half like the song of babbling brooks;
And yet more sweet than any note
E'er chanted by a mortal's lips,
Or murmered from a human throat,
My senses seemed in brief eclipse.

And yet I know it must have been
God's music drifted unto me,
Or else the song of Seraphims
Or some lost soul's last threnody.
I felt a better life within,
My heart grew nearer unto God,
I thought that I could love life's sin
And tread where His evangel trod.

Ah, sweet night hour, I woo you long;
I sit and watch the full moon rise,
And think perhaps that self same song
Will float again from yonder skies;
And yet it is enough to know
God's music once hath kissed my ears,
And taught my gratitude to flow
Starward in rear of holy tears.

FOLGER MC. KINSEY.

—St. Louis Magazine.

OLE BULL AND ERICSSON.

HOW THE GREAT VIOLINIST TOUCHED THE INVENTOR'S HEART WITH HIS MUSIC.

In conversation a few evenings ago a distinguished chemist and physician, who is also an enthusiastic and critical lover of music, told an interesting story about Ole Bull and John Ericsson, the great inventor.

It seems that they were friends in early life, but drifted apart and did not meet again until each had become famous. Bull had charmed the ear of admiring thousands all over the civilized world, while the part the great mechanician played in naval warfare during the rebellion roused the North to enthusiasm and startled the world.

Bull, happening to be in New York on a concert tour, determined to look up his old friend and renew the acquaintance. He found him in his workshop, surrounded by tools, machinery, designs, models, and materials used in mechanical construction, directing the labors of a corps of assistants.

When taking his leave Bull invited Ericsson to attend his concert that night. Ericssen, however, declined, saying he had no time to waste.

Their acquaintance being thus renewed, Bull continued to call on his old friend when visiting New York, and usually when taking his leave would ask Ericsson to attend his concert, but Ericsson always declined the invitation.

Upon one occasion Bull pressed him urgently, and said:

"If you do not come, I shall bring my violin here and play in your shop."

Ericsson replied gruffly:

"If you bring the thing here I shall smash it to pieces."

Here were two men the very opposite of each other. Bull an impulsive, romantic dreamer; Ericsson stern, thoughtful, practical, proving every movement with mathematical precision.

Bull's curiosity was aroused to know what effect music would have upon the grim, matter-of-fact man of squares and circles. So, taking his violin with him, he went to Ericsson's shop. He had removed the strings, screws and apron, so that the violin would appear to be in bad condition.

As he entered the shop, noticing a displeased expression on Ericsson's face, Bull called his attention to certain defects in the instrument, and, speaking of its construction, asked Ericsson about the scientific and acoustic properties involved in the grain of certain woods. From this he passed on to a discussion of sound-waves, tones, semi-tones, etc.

To illustrate his meaning, he replaced the strings, and improvising a few chords, drifted into a rich melody.

The workmen charmed, dropped their tools, and stood in silent wonder.

He played on and on, and when finally he ceased, Ericsson raised his bowed head, and, with moist eyes, said:

"Do not stop. Go on! Go on! I never knew until now what there was lacking in my life."

Bee Notes.

Foul brood among bees has been in some places a serious difficulty to beekeepers. But care and thoroughness can, in most cases, keep it out, or eradicate it when it appears. Some of our beekeepers who have had to contend with the disease tell us that salicylic acid or phenol, used according to their direction, is a sure cure.

In spring, the entrance of all hives should be contracted to suit the size of the colony, and make all tight and warm over the bees. Guard all the weak colonies very carefully, and contract the hive room to accommodate the size of the cluster of bees. Take away extra combs, but leave plenty of honey. During cold, windy days, discourage their flying by shading the entrance of the hives.

No business can succeed in the long run which does not give fair profit. Without going wild over the reports of the immense profits realized in a few instances from keeping bees, there seems no doubt that when taken up as a regular business, and intelligently pursued from year to year, it will pay a profit as large as most other callings. Possibly, for a few years th ose already in the business, and following it with energy, may make a larger profit than most rural industries give. But this will not continue long. Labor and capital will flow in this direction until profits are realized.

The modern improvements in beekeeping, including the movable comb hive, the honey extractor, comb foundation and the safe methods of wintering, make it a pursuit which may be indefinitely developed. Indeed it may be so followed that, from its wide diffusion over our country and from the value of its products, it may be truly called a great national industry. The products of some kinds of labor, for instance some branches of fruit-growing, are so perishable that they must be sold as soon as ready for market, and as they will bear transportation but a short distance the producer is put to a great disadvantage. The products of bee-keeping, honey and wax, may be kept an indefinite time and may be transported to all parts of the world.

A Boston sea captain, so says Hub gossip, visited Hawaii in 1820. He anchored his ship off Honolulu and had his masts and spars well varnished in honor of a royal visit which was expected. The King and Queen of the Sandwich Islands swam out to the ship in costumes scantier than seemed consistent with their high position. When they reached the vessel they showed their agility by climbing to the spars and perching thereon. Varnish, however, is no respector of person, and the royal pair had difficulty in leaving their lofty seats.

Cured sprained ankle with St. Jacobs Oil.—O. L. Kehrweider, Germantown, Pa.
