MINING, BUSINESS AND STOCKS.

BIG BUSINESS WAS RECORDED

Many Stocks Were Active With Prices Tobogganing.

DALY-WEST MUCH STRONGER

Other Issues Generally Sold Lower — Market Condition Shows Dependence on Outside Trading.

Much activity was displayed on the mining exchange this morning and many stocks were dealt in. The trading was generally on a falling market and with few exceptions the entire list sold off from the opening figures. The transactions recorded involved 32,725 shares and $30,439.

Daly West was one feature of the session and displayed considerable strength on quite heavy buying. The stock sold as high as $49.75. Con. Mercur sold down to 1.91 and Utah traded at 50.

California and May Day displayed considerable firmness in the face of large selling orders and Wabash took the toboggan and landed with sales at 1.98.

On the open board Lower Mammoth was in demand and from 1.39½ climbed to 1.42, with sales of only 700 shares. Cliforna showed improvement and Daly Judge traded at 9.90. Hawkeye-McHenry at 90; New York at 60; and Comstock at 1.20 participated, and the session closed on the following market:

In every town in Utah, Idaho and Wyoming, an honest, energetic boy to sell the SATURDAY NEWS. Good commissions paid. Reference required. Write us for particulars.

THOMPSON PLANS.

New Park City Company After Daly-Judge Shaft Equipment.

It was stated today on good authority that the newly organized Thompson Mining company, in order to hasten work on the property, is dickering for the Daly Judge shaft equipment which is no longer in use, the latter company, now being operated through the Anchor tunnel.

With the Daly-Judge plant, which is located only a few hundred feet away, the Thompson could rapidly get things on a business basis.

Speaking of the property this morning one of the directors of the company stated that the indications for the making of a mine on the ground are extremely favorable and every effort will be made to prove up the group.

ALICE BEING EQUIPPED.

Famous Mine in Which Salt Lakers Are Interested Looking Well.

For some time it has been known in this city that the Alice mine at Walkersvills, Montana, has been steadily improving, but the active pushing of development has been delayed by the lack of power consequent to the burning down of the old power house.

The equipment for the new power plant has now arrived and the Butte Intermountain has the following to say about the property.

"When the power house of the famous old Alice mine in Walkerville burned to the ground a short time ago, preparations were at once made to rebuild the destroyed sections. Heavy machinery has been purchased and is now being set in place.

"The Alice mine is one of the oldest and most famous silver mines in this vicinity. For some time past it has been running light-handed, but if the heavy machinery now being installed is to be taken as evidence, it is the intention to increase the working force as soon as the new power house can be completed, which should be in about two months."

PROVIDING FOR WATER.

Novel Method is Being Tried in Summit County, Colorado.

The Mining Reporter of Denver has the following paragraph concerning a method now being tried for inexpensive storage of water for use during the dry season:

Novel methods of accomplishing an object are always interesting, and one of the latest ones will be put in operation this winter in Summit county, Colo. Water for placer works has been very scant this season, and to provide against such a state of affairs next year, one large placer company proposes to flood an area of about a square mile and allow the water to freeze. By repeated floodings, successive layers of ice will be added, until by next spring an artificial glacier will be the result. The thawing of this glacier during the summer months, will furnish them the necessary water, even if the drouth should prove as serious as during the season just passed. This is the first time that this plan has been tried in this country, and if it proves successful itw ill be largely adopted. It recommends itself, as no large dam is required and the consequent dangers of a dam in a stream subject to sudden rains is obviated also. While it is not likely that next season there will be as inadequate a water supply as during 1902, yet plans of this kind, looking forward to possible contingencies are what make mining operations a success, even under adverse circumstances.

COMING COPPER CAMP.

That is What is Predicted for New District in Nevada.

Lewis H. Taylor, Jr., was among the early arrivals at the Knutsford this morning. Mr. Taylor's home city is Philadelphia, to which he is en route from Nevada, in which state he has been a visitor for the past month. He is one of the heaviest of the eastern mining operators, and has spent his time in the west almost entirely in going over the various properties in which he is interested. The past two weeks of his stay in Nevada was pent at Copper Flats, which is a new copper camp recently opened in White Pine county. He is deeply interested in lands in the camp, and says that he is certain to develop into one of the greatest copper countries in the world. The development work already done proves that the ledges are not only great but they are continuous, and he is of the opinion that there will be great shipments of ore from the district in the near future.

When asked about politics in Nevada, Mr. Taylor said that the present election bids fair to prove the most exciting one in the history of the state. Things are already warm, and are fast becoming hot. The outcome is entirely in doubt, and it is this which adds interest to the fight. Mr. Taylor will only spend a few days in the city, when he will take up his journey to the east.

MINING NOTES.

One car of Mammoth ore will be marketed on controls obtained this afternoon.

Five carloads of fine Ben Butler ore willbe marketed on controls to be obtained today.

The total business transacted on the mining exchange yesterday involved 62,920 shares and $49,104.

Mgr. Higginbotham of the White Rocks placer mine at Elko, Nev., is again a visitor in this city.

Ore and bullion settlements in this city yesterday, as reported by McCornick & Co., amounted to $70,500.

Eagle & Blue Bell dump ore to the extent of five carloads will be forwarded to the Bingham smelter today.

Ed. F. Frendenthal of the Manhattan and E. and F. properties at Pioche arrived in the city from camp yesterday and leaves for Milford tonight.

Mgr. A. J. Bettles of the Newhouse interests has gone to Denver, presumably to meet Samuel Newhouse, who is reported to be there.

The Taylor & Brunton management reports the following shipments as having been sampled: Six cars of ore from Tintic and five from Bingham.

The great Honorine tunnel is progressing nicely and is already about 1,700 feet towards its destination. At the 2,700 foot mark the tunnel will be intersepted by an air shaft.

MARKET FELT OPTIMISTIC.

Coal Strike News Caused a Buoyant Feeling.

STOCKS MADE ADVANCES.

Coalers Showed No More Strength Than Others—Small Offerings Caused Slow Sagging.

New York, Oct. 14.—The announcement of the coal operators that they would submit the question at issue with the miners to a board of arbitration, created an optimistic feeling in Wall street this morning which was reflected in a buoyant stock market. Enormous blocks of the various stocks were bought at the opening, causing general advances of a point or two and ranging up about 3 points in a few instances. The coalers as a group did not display relatively any more strength than other stocks, though the buying in of them was of larger proportions than the remainder of the list. The market at London showed a pronounced strength in buying orders from this side, and foreign houses bought various international stocks at the start. Traders who purchased heavily yesterday afternoon when rumors were current of an imminent settlement of the coal strike were ready to take their profits on the opening bulge and fed the general demand freely.

The market sagged slowly on very small offerings until the general advances had been largely reduced to fractions and wholly wiped out in some of the coalers, industrials and trans-continental stocks. Bear traders were inclined to make capital out of the scarcity of buying orders and put out some short lines in the most active stocks. The coal situation being much improved on the developments over night, consideration of the money situation again became prominent, owing to the heavy syndicate payments which had to be met during the week. Call money loaned at from 10 to 15 per cent and was in active demand. Toward midday the stock market began to improve and there was a rise to the best by St. Paul, Pennsylvania, Union Pacific and Brooklyn Transit. The entire list showed improvement but did not generally recover to the opening level. Great Northern pfd. advanced 8 points. The market for bonds was firm at noon.

Fluctuations were very narrow during the noon hour, and trading was intensely dull. The tone, however, continued strong, and some of the leading stocks sold higher than in the forenoon, particularly Pennsylvania and Sugar.

MONEY AND BONDS.

Money on call strong, at 10@11 per cent. Prime mercantile paper 8 per cent. Sterling exchange fairly steady, with actual business in banker's bills at 4.85.625@4.85.75 for demand, and at 4.82.50@4.82.75 for 60 days. Posted rates 4.83½@4.86½. Commercial bills 4.81.75@4.82.25.

Mexican dollars, 46¼.

Government bonds, easier. Ref. 2s, reg. and coupon, 109½; 3s, reg., 107¾; do., coupon, 108¾; new 4s, reg. and coupon, 137¼; old 4s, reg. and coupon, 110¾; 5s, reg. and coupon, 105¼.

Bar silver, 50.

SUGAR.

Sugar—Raw nominal. Fair refining 3; centrifugal, 96 test, 3½; molasses sugar, 2¾; refined, steady; crushed, 5.15; powdered, 4.75; granulated, 4.65.

COFFEE.

Coffee—Quiet. No. 7 Rio 5⅝.

LIVE STOCK.

CHICAGO.

Chicago, Oct. 14.—Cattle—Receipts, 4,500, including 1,000 westerns. Steady. Good to prime steers 7.40@8.30; poor to medium 3.75@7.25; stockers and feeders 2.25@4.90; cows 1.50@4.75; heifers 2.25@5.50; canners 1.50@2.50; bulls 2.25@4.75; calves 3.75@5.25; Texas fed steers 3.00@4.00; western steers 3.75@7.00.

Hogs—Receipts today 10,000; tomorrow, 16,000; left over, 2,000; 5c@10c higher. Mixed and butchers 6.85@7.45; good to choice heavy 7.00@7.60; rough heavy 6.40@6.95; light 6.40@7.25; bulk of sales 6.85@7.05.

Sheep — Receipts, 30,000. Steady. Lambs steady. Good to choice wethers 3.40@4.00; fair to choice mixed 2.25@3.40; western sheep 2.50@3.65; native lambs 3.50@5.75; western lambs 3.75@5.30.

Eggs—Receipts, 10,700 packages, irregular; state and Penna., 22@24; western candled, 21½@23.

Elgin, Ill., Oct. 13.—Butter advanced 1c on the board of trade today. There were no offerings and the market was declared firm at 23½c. The sales of the week were 548,000 pounds.

NEW PROCESS OF REFINING OIL.

The great problem with oil producers in the Beaumont oil field has been how to separate the illuminating properties of the oil found there from the asphalt and sulphur that is found in the product. This difficulty, however, has been overcome at last and there is a far brighter future for Beaumont oil, and all other oil of the same characteristics, than there has ever been.

An apparatus, so simple and so inexpensive, has been perfected in San Antonio by Prof. Anton Graf, late of Georgetown, Mass., associated with Dr. F. Z. Neddin, that it overcomes the difficulties heretofore regarded as insurmountable.

A description of the apparatus cannot well be given without cuts, but in the separation of the oil from the asphalt, which is the base of the Beaumont product, the first purpose is to prevent the asphalt from coming in contact with the iron body of any vessel in which it is distilled, when the iron body is exposed to the fire, because that crustates the deposit on the lower plates which are in contact with the fire. To prevent this Prof. Graf has invented a still that is operated without fire in the following manner:

The air is superheated by pumping it through coils which are heated by a special apparatus that he has patented, and from these coils the air goes into a reservoir or accumulator, where it becomes charged with a high degree of oxygen, and it is then forced from the accumulator into a digestor through four or more pipes. The digestor is built in such a manner that there is no possibility of any sediment or corrustation.

The pipe from the digestor leads into a precipitation tower in which are a number of shelves over which the water comes down in sheets, forming a solid sheet extending from wall to wall of the tower, preventing the vapor from escaping. The vapor here is actually hot; through the cold water it will be digested and partly from a vacuum which facilitates the precipitation of vapor and then flows in the form of liquid oil together with the water into a tank where the oil separates from the water. The clear white oil will be obtained by tapping the tank below the water level, letting the water out and leaving the oil in the tank.

Another part of the apparatus shows a superheater with coils of pipe constructed with return bands, and here the air is forced in on the highest coil of the layer, by advancing from the the upper to the lowest coil, which are the most exposed to the fire. From there the air is forced through chemical apparatus, and from this apparatus to a digestor and from the digestor it issues in vapor into a pipe, thence to the water tower, thence to a trap and from the trap to a tank, where it is precipitated pure white oil.

The asphaltum or residuum left in the digestor has to be removed through an opening at the base of the same.

Saponifier.

Pennsylvania Saponifier is the original and old reliable Concentrated Lye for family soap making and general household uses. Beware of counterfeits. The success of this article has induced unprincipled parties to imitate it. None genuine unless Pennsylvania Salt Manufacturing Co., Philadelphia, is stamped on the lid.

Ask your grocer for it and take no other.
