The Walter A. Wood's Harvesting Machines are absolutely unequalled for strength. Durability, Easy Running and Simplicity. The above figures speak louder words of praise than anything we could possibly say They have entarged their factory so as to be able to fill increased rders for 1885.

The John Deere Plows have a world-wide reputation for excellence. The fact that Deere & Co. have the *largest* steel plow manufactory in the world is sufficient guaranty of the superiority of the goods they manufacture.

Russell & Co's Threshers, Engines and Saw Mills, are fast taking the lead, and in the near future will stand without a rival. A person that nas-ever used a Massilion Thresher will never use any other. Every Machine we have sold has given the most perfect satisfaction.

The Glipin Sulky Plow is the only single lever sulky plow made. The "Gilpin" to-day stands without a rival for strength, lightness of draught, simplicity and quality of work No person having any regard for horse flesh will purchase any other sulky plow after using the one-lever Gilpin.

The Gale Manufacturing Company spare no expense to make their Sulky Rake superior to any in the market. Call and examine their goods, and be convinced of the superiority of their Rakes also of their Chilled Plows.
