PAY AND HOURS OF LABOR ON ISTHMUS

After Investigation Secy. Taft Promulgates Far-Reaching Decision Regarding Them.

CHANGES EFFECTIVE MAY. 1.

Old Regulations Should be Observed-Rate of Wages High Enough to Compensate for Greater Strain and Risk.

Washington, May 5 -- A far-reaching decision by Secy. Taft, affecting rates of pay, hours of lubor, etc., on the isthmus of Panama, following his recent personal investigation there, was made public at the White House today after being approved by President Roosevelt. The decision applies to steam shovel-men, construction lecomo. tive engineers and construction train conductors.

One of the grievances of the men was the putting into operation on April 1 of new regulations restricting leave of absence or leave on account of sickness. On this question the secretary says:

"The old regulations were advertised In the printed announcements sent out by the commission's agent to induce persons to go to the isthmus and enter the employ of the commission, so that every man who has come to the isthmus

every man who has come to the isthmus has come there with the understanding that the old regulations were to apply as part of his contract of service.

"It seems to me that good faith requires that the old regulations as to leave shall not be materially changed and shall remain as part of the contract of service of those now on the isthmus, and that while there are some provisions in the new regulations which would make for the more stringent enforcement of the government's rights and more certainly avoid possible fraud, they should not be made applicable to men who came to the isthmus under the old regulations."

Regarding summary dismissal without hearing or giving reasons which was complained of by the canal employes, Secy. Taft says that he has given his approval to the plan of Col. Goethals, whereby it is proposed to dispose of such cases through a committee consisting of one representative of the employe proposed for dismissal, one representing the foreman

consisting of the representative of the craft of the employe proposed for dismissal, one representing the foreman or higher official proposing discharge, and one representing the commission, final action to be taken by the commis-

the states, with the disadvantages which they have to bear in going to and living on the isthmus, I have reached the conclusion that the existing stanthe conclusion that the existing standard of pay is liberal and ought not to be increased except under some provision of reasonable increase applicable to all veteran employes of the commission who are paid by class rates. The isthmian shovel engineers are paid from 25 to 35 per cent higher than the average of those paid in the states, and this hy no means states all the difference. this by no means states all the differ-ence in favor of the isthmian terms of

EMPLOYMENT.

A steam shovel-man on the isthmus can count on 12 months' constant employment in a year, and steam shovelmen in the United States cannot expect to be employed more than nine months in the year. The rate of pay for steam shovel engineers in Alaska, as before stated, is said to be \$300 a month, but we can reasonably presume that the working there would hardly exceed six or seven months.

or seven months.
"Second, every shovel-man on the isthmus is entitled to six weeks' leave with pay as a vacation, so that he receives '12 months' pay for 10½ months' work

work.

"Third, steam shovel-men on the Isthmus work only eight hours a day,
where as many, though not all, of the
steam shovel-men in the United States
work 10 hours a day.

"Fourth, every employe of the isthmus is permitted, if he fails sick, to enjoy 20 days' sick leave with pay.

"Fifth, if the employe receives an injury during his work he is cutilled to
an additional 30 days' sick leave.

Other purples

QUARTERS.

"Sixth, every married man is entitled to furnished quarters for himself and family free, with modern plumbing conveniences, with water, fuel and light free; and a commissary which alms to sell all necessaries at cost to commission employes. The married quarters are generally in separate houses, Every bachelor is entitled to his furnished room free, accepter with light and room free, nogether with light and board at a nominal rate at the mess house or hotel. The cost of food and necessaries is almost what it is in enerern cities, or alightly higher.

high temperature makes the service on the isthmus less desirable than in the United States. But it is to be remarked that the original conditions of uchealth-fulness which exists when the original rate for shovel-men was fixed in 1904, have been greatly bettered that the yellow fever has been stamped out that the rate of death and sictions among Americans is recently by and that life on the isthmus is becoming more and more like that in the United States, and this improvement is certain to continue. The apportunity to visit the United States each year, if improved, is a gleat aid in maintaining health. It has been arged that service on the isthmus so undermines the health of the steam shovelman that he is affectly unfitted for work in the United States when he returns. I cannot agree with this yield. The health statistics and the general condition of the Americans on the isthmus refure the claims.

"It is also said with truth that service under the commission is attended with a possible risk of personal in-lary, due to negligence of superior of fivers, damages for which are not recoverable by the law from the commission, and such injuries as are due

A Weak

Seldom gets strong again without help. Awake or asleep, it never stops, and consequently has no period of rest or relaxation in which to regain lost vigor. You should avoid exertion, excitement and worry as much as possible, to relax the strain, and take Dr. Miles' Heart Cure, which is a heart tonic, to strengthen and restore vigor to the heart nerves and muscles. The symptoms of a weak heart are shortness of breath, palpitation, feeble or too rapid pulse, hungry spells, hot flashes, dizziness, smothering spells, pain

ziness, smothering spells, pain in heart or side, etc.

"I had been treated for heart disease by different physicians without any improvement. Finally my doctor informed me that there was little hope of my eyer being able to do a day's work again. About that time a gentleman ended upon me, and seld, 'I heard of your condition, and have cam, to tall you that Dr. Miles' Heart Cure saved my life, and I want you to try it.' I did so, end after a week or so I went to my physician and told him I had been taking Dr. Miles' Heart Cure. He examined the sand said, 'God bless Miles' Heart Cure, it has made you better in a few days than I ever expected to see you again. I am now well, having fully respande my health by the use of this remedy."

S. R. LANBING, Rensselaer, N. Y. Dr. Miles' Heart Cure is sold by your druggist, who will quarantee that the first bottle will benefit. If it falls he will refund your money.

Miles' Medical Co., Elkhart, Ind

Miles Medical Co., Elkhart, Ind

to the negligence of confractors in the United States entitle employes of the contractors to compensation.

WAGES.

"I am strongly of the opinion that the rate of wages on the isthmus, taken with the adventages that are enjoyed by the shovel-men on the isthmus under their terms of employistlimus under their terms of employment, are sufficiently in excess of the usual rates of wages in the United States fully to make up for the greater strain and risk on the employes on the Isthmus. There is a difference in favor of the isthmian flat rate of wages of from 25 to 35 per cent, while the certainty of 12 months' employment out of the year, the six weeks' leave with pay, together with free quarters, free fuel and free light and free medical attendance, carry the adventage of the isthmian rates of wages expressed in percentage easily to 75 per cent.

"There are not more than 70 steam shovel engineeers and not more than

consisting of one representative of the eraft of the employe proposed for dismissal, one representing the foreman or higher official proposing discharge, and one representing the commission, final action to be taken by the commission.

Secy. Taft next considers the case of steam shovelemen who applied for higher wages, as follows:

"Engineers from \$10 to \$300 permonth; crane men from \$185 to \$250 permonth; crane men from \$83.33 to \$110 permonth; firemen from \$83.33 to \$110 permonth."

In reaching the conclusion that the present rates of pay are liberal, hetters a large number of instances of wage scales paid by large construction firms in the United States from New York to San Francisco, and also in Alaska. He concludes that the complaint of this branch of the canal employers is not well founded.

"Upon the isthmus," he adds, "the conditions under which the different men work in respect to the character of material and the distance of the dumps are so different that it has been impossible to graduate the pay or offer bouses from high yardage. The only inserted is to fix a flat rate for the whole class.

"After giving the matter the consideration which its importance deserves and after weighing the comparative advantages which the isthmian canal shovel-men enjoy over their brothers in the states, with the disadvantages which the isthmian canal shovel-men enjoy over their brothers in the states, with the disadvantages which the existing standard of pay is liberal and ought not to be increased except under some rocal to the salaries of some of the United States. This will add 3 per cent of the engineers and not more than 70 steam shovel engineers and not more than 70 s

The petition of the construction lo-comotive engineers next is taken up-and after alluding to the fact that these men started at \$150, the sec-retary says that inasmuch as it seems to be conceded that they, as well as steam shovel engineers in the United States, receive about the same rate of pay, the salaries should be fixed at \$210 a month, the amount asked. Secy. Taft says the subject of over-time was the only point on which an Secy. Taft says the subject of over-time was the only point on which an agreement could not be reached be-tween the locomotive engineers, Mr. Stevens and Col. Goethals. Basis of an operating day on the isthmus, says Secy. Taft, is eight hours. But, says he, the construction locomotive engi-neers who work in connection with steam shovel-men "must necessarily, as do all engineers, report for duly one-half hour before starting from the yard and be engaged one hour in shift-

the morning and returning it in the evening to the yards."

The secretary maintains that this was the view of the locomotive engineers one year ago when by their street.

State of Utah, Office of the Secretary of State of the Alberta of the sendition, from which the fore-point statement has been prepared, and that the said company has in all other respects compiled with the laws of the state relating to insurance.

In textimony whereof, I have become to set my band and affixed the great seal of the State of Utah, this 16th dry of Appil, A. D. 1967.

(Stat)

C. S. TINGEY.

management they contracted that, including their reporting for duty, their day should be considered one of nine hours. From that position, he says, the engineers now withdraw and now ask overtime for a ninth hour in addition to their increase of \$30 a month. "The equality of wage between the locomotive engineers and the steam shovel engineers," says Secy, Taft, "is predicated on this necessary difference in the time required of the two classes of employes."

EIGHT-HOUR LAW.

As to the application of the eight-hour law to these men Mr. Tait says: 'In pressing their petition for ever-time pay for the additional hour they are engaged over the eight hours, the are engaged over the eight hours, the construction locomotive engineers seem to invoke the standard fixed by the federal eight-hour law. If the federal eight-hour law applies to them, then they can only be engaged eight hours. That law cannot be evaded or avoided when it has application by treating part of the regular time taken as overtime and paying a regular wage and then wage for overtime. The law is an absolute limit upon the regular hours of employment, and the oaly legitimate overtime which can be allowed and paid for when the eighthour is applicable is for the time consumed in meeting an emergency which could not be reasonably anticipated. Such is not the additional hour during which the locomotive engineers are Such is not the additional hour during which ithe locomotive engineers are necessarily and regularly engaged in running their engine and trains to the steam shovel in the morning and in taking them back to the yard at night. Therefore, the eight-hour law lends them no support for contention here." Secy. Taft approves as "a wise compromise a suggestion by Col. Goethals that the overtime should be added to the six weeks' lenve with pay to which each employe is entitled each year. The proposition of Mr. Stevens and Col. Goethals to increase the pay of construction train conductors from \$170 to \$190 a month. Secy. Taft thinks reasonable. They have asked for the same wages as the engineers, \$210. He holds that there is no ground for maintaining an equality between the wages

taining an equality between the wages of the two. The preparation needed to fit a man to be a construction train conductor," he remarked, "is much less than that needed to fit a man to be either a freight conductor or the engineer of a

struction train. For this reason the secretary says the increase from \$170 to \$190 is all that can be reasonably justified.

The various changes, by order of the president, become effective May 1.

PENNSYLVANIA CAPITOL SCANDAL CRIMINAL SUITS.

Pittsburg, May 5 .- Civil and criminal suits will be brought by Atty.-Gen. Todd against those responsible for the state capitol scandal. A complete list of the defendants will not be known until the inquiry is completed. The commission will hold no more public sessions until after the legislaure adjourns on May 16.

As the commission cannot finish its work in time to report to the present legislature, as provided in the resolution creating that body, the investigators will send a report to the general assembly, which will simply be an announcement that he inquiry is incomplete and a request that its time be extended indefinitely and that it be authorized to make its report to be authorized to make its report to

it be authorized to make its report to Gov. Stuart when ready.

The suits will be based on the testimony showing that the contractor collected from the state for 752 thermostats and installed only 363, and on the substitution of domestic for Baccarat glass and an inferior glass for Tiffany favrile.

The testimony also show that while

Tiffany favrile.

The testimony also show that while the more elaborate of the \$2,000,000 worth of lighting fixtures was to be mercurial gold, the bulk of those installed were merely lacquered, the latter process costing one-tenth the price of the former. All these fixtures were supplied to the state at a cost of \$4.85 "her pound."

were supplied to the state at a cost of \$4.85 "per pound."
Former Gov. Pennypacker, who was president of the board until he went out of office last January and was a party to all the furnishing contracts, issued a public statement last fall that not a dollar was misspent by fall that not a dollar was misspent by the board; that the building could not be duplicated for \$13,000,000; that no bill was finally settled until the article had been measured or weigh-ed, as schedule required, and that every bill was certified to by Huston and Shumaker as to its accuracy be-fore being paid.

fore being paid.

In view of the recent disclosures, the public is waiting Pennypacker's explanation of the board's action in approving and paying the bills.

STOP WOMAN AND CONSIDER

First, that almost every operation in our hospitals, performed upon women, becomes necessary because of neglect of such symptoms as Backache, Irregularities, Displacements, Pain in the Side, Dragging Sansations, Displaces and Sleeples. Sensations, Dizziness and Sleepless

Second, that Lydin E. Pinkham's Vegetable Compound, made from native roots and herbs, has cured more cases of female ills than any

other one medicine known. It reg-ulates, strengthens and restores women's health and is invaluable in ulates, strengthens and restores women's health and is invaluable in preparing women for child-birth and during the period of Change

Life.
Third, the great volume of unsolicited and grateful testimonials on file at the Pinkham Laboratory at Lynn, Mass., many of which are from time to time being published by special permission, give absolute evidence of the value of Lydia E. Pinkham's Vegetable Compound and Mrs. Pinkham's advice.

Lydia E. Pinkham's Vegetable Compound For more than 30 years has been curing Female Complaints, such as

Dragging Sensations, Weak Back, Falling and Displacements, Inflammation and Ulceration, and Organic Diseases, and it dissolves and expels Tumors at an early stage.

Mrs. Pinkham's Standing Invitation to Women

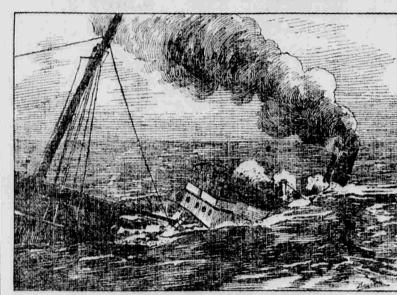

Women suffering from any form of female weakness are invited to lite Mrs. Pinkham, Lynn, Mass. for advice. She is the Mrs. Pinkham who has been advising sick women free of charge for more than twenty years, and before that she assisted her mother-in-law, Lydia E. Pinkham in advising. Thus she is especially well qualified to guide sick women back to health. Write today, don't wait until too late.

A SURVIVAL OF THE DARKER AGES.

The cut illustrates a method of punishment still legal in Delaware, although it has been abolished elsewhere in the United States. The whippings and imprisonment in the stocks are inflicted publicly, as was the custom former years, and any one who wishes may be a spectator. It is supposed to exert an exemplary influence on evildoers. The lash is laid on with no gentle hand, and it is a punishment dreaded greatly.

SNAPSHOT OF A VESSEL WHILE SINKING.

The picture is a reproduction of a photograph taken by M. W. Christie, a passenger on the steamer Geelong, which recently collided with the Norwegian steamer Frogner and sank her. The passengers of the ill fated ship were rescued by an English steamer, but the Frogner sank almost instantly.
