Tabernacle Meetings. — Elders Edward Hanham and John Nicholson and President D. H. Wells preached yesterday afternoon.

Entertainment.—The First Ward Amateur Dramatic Association purpose giving an entertainment on the evening of July 22nd at the First District School House.

Notice.—The Sunday School Superintendents, teachers and children, are requested to meet at the New Tabernacle, to-morrow evening (Tuesday), at half-past five o'clock, to practise the music for the forthcoming jubilee, to be held on the 24th inst. A full and punctual attendance is desired.

Theatre.—There was a larger audience at the Theatre on Saturday evening and the drama of the "Geneva Cross" was very well played, Miss Eytinge taking the part of "Gabrielle" in the same artistical style as on the night preceding.

On Wednesday evening Tony Pastor will appear with his famous variety troupe of talented artists and give one entertainment, which will consist of a programme that will contain something to suit everybody.

Inhuman.—On Saturday, a fellow named Whitberg, from Ophir, treated a mule, on which he was riding, in a most shameful manner, digging his spurs into the poor beasts' sides, tearing and lacerating them so that the blood streamed from the wounds. He was arrested, on a charge of cruelty to animals, and Justice Pyper fined him $10. Served him right.

The Coming Jubilee.—The committee of arrangements for the coming jubilee, to be given at the New Tabernacle, on July 24th, have nearly completed their programme of proceedings, which will consist of singing by the Sunday School children, a couple of brief addresses, representing the "Pioneer" and juvenile elements, anthems by the choir, organ solo, glees by a glee club, &c.

The Emigrants.—The following telegrams have been received by President Young—

OMAHA, July 15.

Prest. Brigham Young:

Sixteen car loads of your people left here this morning, for Salt Lake City.

THOS. L. KIMBALL.

ELK HORN, Neb.,
July 15, 1876.

Prest. Brigham Young—

We leave here to-day, all well, with 640 Saints, in two divisions.

N. C. FLYGARE.

It is probable the company will arrive to-morrow.

Nearly Sunstruck. — The other day a gentleman who was on his way to this city from Mill Creek, on horse-back, suddenly felt a peculiar and overpowering sensation creeping over him, and his senses were leaving him. Fortunately he was only a few rods from a creek, into which he plunged, the cool water immediately reviving him and causing him subsequently to break out in a profuse perspiration. The gentleman is of the opinion that the near presence of the water saved his life, as a few moments more and he would have been a victim of sunstroke.

Horrible Murder Near Panguitch.—The following special to the NEWS was received to-day.

PAROWAN, July 17th.

Editor Deseret News:

James B. Maxwell was shot and killed by Joe Wood, five miles north of Panguitch, yesterday, about 3:30 p. m. The cause of the trouble was that Joe Wood had four yearlings claimed by Jim Maxwell, who went to take them from Wood's corral. The latter's wife told Maxwell Wood was not at home, and had been gone three days. Maxwell then went towards the corral, when Joe Wood arose from where he was concealed and fired a charge of 19 buckshot and six navy balls. Maxwell was killed instantly, and fell about twelve feet from the bars of the corral. A coroner's inquest was held last night, the jury brought in a verdict of wilful murder.

Railroad Magnates.—The *Junction* announced yesterday that certain gentlemen managing the Union Pacific Railroad, would probably arrive in this city on that day. It seems, however, that most of the party went down to Denver, which will delay their arrival here until early next week.

Mr. S. H. H. Clark, superintendent of the road, was the only one of the party who came in last evening, and he departed east this morning, but will return with the entire party on Tuesday. We incline to believe that this visit of the party means business, and that kind of business which will prove beneficial to the interests of Utah in general, and Ogden in particular.—*Ogden Junction, July 13.*

The Arts of Peace.—The Indians who have located in the northwestern part of the Territory, toward Malad, are prospering in their labors. Three miles of canal, which will be sixteen miles in length when completed, have been finished. The dam at its head is a very substantial one, 500 hundred loads of rock having been used in its construction. At one point the canal has a cut thirty feet in depth. They have 80 acres of Fall wheat, averaging twenty bushels to the acre, and 80 acres of Spring wheat, which will average about sixteen bushels to the acre, besides six acres of potatoes, seven acres of corn and a considerable amount of various kinds of vegetables. This excellent result has been brought about this season without the aid of irrigation. The Indians have commenced to cut their grain, with a reaper, which they manage themselves. They have homesteaded about 7,500 acres of land in the vicinity of where they are located.

Great Loss in Bees.—The Prescot *Arizona Miner* of July 7 has the following, which may be worth the attention of our beekeepers—

"H. Gilbert, of San Diego county, arrived here on Saturday last with an empty wagon drawn by four animals. He started from home with twenty-four hives of bees for this market, and succeeded very well with them, letting them out each afternoon, when he could do so, at watering places, where they worked on such flowers as grew in that country; until he came to a place on the desert somewhere beyond Hardyville, when he encountered a luxuriant growth of milk weed and desert willow, upon which he allowed them to feed, and the next day they all died, evidently being poisoned by the flowers of one or the other, or both these noxious plants. The loss is a serious one to Mr. Gilbert, and will be quite discouraging to others who may contemplate bringing bees to this country."

Extraordinary Heat. — The extraordinary heat this season appears to be very general. In London the thermometer has been 96 in the shade for several days, causing numerous cases of sunstroke. Unusual in that country.

The Arizona Settlements.—We have perused a letter from Brother E. E. Jones, dated at Sunset Crossing, on the Little Colorado, to Brother Joseph Dean, of this City. He says the settlers are much in need of mechanics, having neither a carpenter nor a blacksmith among them. Brother Woods from the Fourteenth Ward, a generally handy man, does the carpenter work for the camp at present.

Social Ball.—There will be a social ball by the Wasatch Fire Engine Company No. 2, at Fuller's Hill, this evening. Tickets fifty cents. Full quadrille bands.

ANOTHER ESCAPE FROM THE PENITENTIARY.

Four More Convicts Take "French Leave."

About noon to-day Messrs. Geo. W. Crockwell and Frank Bassett were driving in the vicinity of the Penitentiary, and, in passing the south-east corner, they saw a couple of men standing upon the ground, outside, and another was upon the wall, holding a blanket, the end of which hung over on the inside, and some one was climbing up. The gentlemen named at once concluded that one of those incidents, which have become so monotonous of late, known as a "jail break," was in process. They immediately drove round to the gate and gave the alarm to the guards, but the prisoners did not allow the grass to grow under their feet; espying a man with a team hauling a load of shingles, the four desperadoes dexterously unhitched the horses, a couple of them got upon each horse, and off they went, setting their faces eastward, and this they accomplished before the guards got around to the southeast corner of the wall.

There being but one horse belonging to the prison, it was mounted by one of the guards, and he started off in pursuit, while a couple of his companions followed on foot.

The prisoners who escaped are the notorious desperado "Idaho bill," and that equally notorious highwayman and fighter, Jack Beegan, the same who killed Ned Doyle, in this city, some years since, Travers Harker, stage robber, and Kelly, the murderer of Van Valkenburg.

To the best of the knowledge of the guards the runaways are unarmed, and therefore their pursuers may get close enough to them to capture them.

On learning of this last escape a friend at our elbow said it looked very much as if the prisoners were being "let out on contract."

Messrs. Crockwell and Bassett brought the news of the affair to the Marshal's office within an hour after it happened, and we presume that steps have been taken by Marshal Nelson for the recovery of the prisoners.

The Little Colorado. — Farmers from the Little Colorado settlements report very favorably on their crops, but seem to feel somewhat the want of rain, which is unusually late this season. Bear must be plentiful in the mountains near these settlements, according to the statement of one who does not deviate much from the straight line of truth. Mr. Holden of the Little Colorado killed three, one day last week. The neighboring mountains are full of prospectors, and there is a California party that calls in here occasionally for supplies, that appears suspicious. The men look exceedingly wise as they weigh out their gold dust—gold dust found close by here, and which they seem to possess in very large quantities. The Mormons on the Little Colorado are working like beavers putting in crops. *Poco tiempo mas noticias.* — *Index, in Prescott Arizona Miner, July 7.*

The Indians Moving on Medicine Bow—50,000 Rounds of Ammunition and other Things Stored There—Fears For Their Safety.

OMAHA, 17.—Telegrams received here yesterday are to the effect that the Indians are moving on Medicine Bow, a station on the Union Pacific, almost due south from Fort Fetterman, supposed to be for the purpose of capturing or destroying the supplies which have been stored there recently in great quantities by the Government, there being fifty thousand rounds of ammunition among other things. A small force of Indians could seize and destroy these stores, as Medicine Bow is but a small station and the country round about sparsely settled. Their destruction at this time would seriously impede military operations against the Indians.

News has also been received here that many Indians are leaving the Spotted Tail and Red Cloud agencies for the purpose of joining Sitting Bull, and that Col. Merritt, now at Fort Laramie, has been directed by Sheridan to intercept them at once at all hazards.

Knott Does Not Intend to Press Bristow—Bristow's Friends Say he will not Change.

A dispatch from Washington says Mr. Knott does not intend to recall Bristow to press him any further with the questions about cabinet matters, though he may call him on other points. Bristow's friends say he will not change his course towards the committee on account of the President's letter; and they add that this question of answering committees of Congress was formally discussed in the cabinet, and the President and all the cabinet agreed that no answer should be made touching cabinet proceedings or conversations to any committee of Congress.

The Indian War—Movements of Troops.

LEAVENWORTH, Ks., 17.—Two artillery companies, recently stationed at Fort Leavenworth, have been ordered to the Indian country, and will depart for the scene of action immediately upon the arrival of some companies of the United States 10th Cavalry (colored) from Fort Sill, who have also been ordered to report to General Terry.

Part of the 4th United States Cavalry have been ordered to Fort Leavenworth to supply the place of the 5th Infantry, which departed last Wednesday for the Sioux country.

Wheat, Pottery, and a Skeleton Found in an Ancient Mound.

PAYSON CITY, July 11, 1876.

Editor Deseret News:

I have in my possession a new kind of wheat, found in a mound in the Payson farming field. I will give the particulars of how it was found. I was working at excavating a large mound, and when about five feet from the surface, my plow raked on a flat rock and it had a hollow sound. We stopped the team, cleared off the dirt and dug around it, and found it to be a stone box, solidly cemented together with potter's clay, and I believe it was air tight, and had the appearance of being put there hundreds of years ago. With considerable effort we succeded in breaking it open and found the box to contain about one quart of wheat. The wheat resembles the Chilian club wheat, only the grains are some larger.

There was a small portion of the wheat in the centre of the box that looked bright and sound, and all the balance seemed light and moldy. I picked out the best grains and planted it and it grew, and is now headed out and has a fair prospect of getting ripe.

Near this box we found a skeleton of a man, which measured six feet and seven inches. We carefully took away the dirt so as to preserve the skeleton whole. At the head and between the teeth we found a large stone pipe, weighing five ounces. We found many other articles of pottery ware, and some of them were very beautifully flowered, and the shape of many different animals pictured on them.

Respectfully yours,
AMASA POTTER.

ESTRAY NOTICE.
