

DESERET EVENING NEWS.

PUBLISHED DAILY, SUNDAY, AND HOLIDAY.

THE DESERET NEWS CO.

CHARLES W. STEVENS, EDITOR.

TUESDAY, JULY 30, 1891.

LET NOT A VOTE BE LOST.

For us the most important that every legal voter shall go to the polls on Monday, and support the ticket which suits him best. If a number of the people who have not destined themselves on either side abstain from voting, that will be no more strength to the "Liberal" faction, which is seeking to fasten stains upon the limbs of the "Mormon" people and destroy liberty in Utah. The cause calls for every vote. We earnestly request influential men in every part of the Territory to aid in getting a full vote on Monday, that will be a protest and a death blow to "Liberalism." See that the lame and the halt, the aged and the feeble, as well as all who are in health, go to the polls and vote on Monday. If this is done, the result will be more advantageous to the people of Utah than many of them can possibly imagine. Let every vote count!

PUT THE RASCALS THROUGH!

Innocent and helpless should join in a determined effort to prevent friends at the polls on Monday. It is also, from indications that people here well understand, that the same villainous methods are to be employed, by which legal voters were cheated out of their ballots and impeded persons and repeaters were engaged in the "Liberal" interest at former elections.

Not only should every person be spotted and presented, but election officials of every description, who attempt to aid in fraud, whether by enacting a legal voter of his right or covering up the crimes intended, should be placed in legal jeopardy, and the powers of the criminal and civil laws should be invoked for their punitive uses.

DON'T BE SWINDLED!

The attack on Easterners West has failed. His name is not to be stricken from the registration list. His case was "taken under advisement," but the register did not think it safe to treat it as the cases of hundreds of People's party voters were treated by the "Liberal" creatures who were the tools of those Powers at the municipal election.

There are many other names erased from the lists but it will be found in every case that they are not the names of present "Liberal." If there was any sense of shame in the persons who are engineering this business they would not make it so inexplicably dirty and contemptuous. But after the villainous perpetration of the last city election, we need not expect any sense of shame nor any show of justice in "Liberal" official or personal political conduct.

Every voter, Democrat, Republican or independent, whose name has been inexplicably stricken off, the list should see to it that the outcome is not allowed to affect the desired object. Applying to the Central Committee of the party to which they can belong, where their friends can obtain names. The Utah Commission have decided that while there can be no new registration names inexplicably stricken off can be restored to the lists up to election day.

Legal voters, do not submit to be swindled out of your ballot by "Liberal" trickery. Protect your right of franchise as you would your life!

"LIBERAL" LOVE FOR THE LABORING MAN.

The "Liberal" organ is hotly rated over the shaking of the "Liberal" fist is getting over the latter question. The administration of the "Liberal" issue in presenting the town with professors of law for learned workmen, and protests against discharging laborers for political reasons, is not received by any other exhibition of chicanery during the whole campaign.

But Lake workmen have been left, like oil on the streets, while strangers have been imported and set to labor because they could be used as tools for the "Liberal" faction. "But Lake work for Salt Lake workmen" was the last act before the municipal election. A few southerners were caught by it and found they had nothing for their livelihood but a look.

Every workman on the city payroll who would not agree to vote the "Liberal" ticket was discharged, after the "Liberal" cause had won power. No man was permitted to perform public work who did not first agree to support the "Liberal" faction. Even foreign architects were preferred to the home talent and the streets are paved — not耕耘, by imported contractors and water carts.

The "Liberal" organ gives us two days to answer the question "What working man ever obtained employment here prior to the triumph of the Liberal party who did not give up ten per cent of his wages to the Mormon Church?" It only takes two minutes to answer that. The city of Salt Lake, before the "Liberal" came in to use up the tax base turned out working people but "Mormons" and created new offices for "Liberal" citizens, chose that same tax base from "Mormons" who emigrated by the City

Council. There are men at work for "Mormons" in this city, and who have worked for them for years, who have never been compensated while in, asked, or expected to pay one-tenth, or any sum, whatever into the "Mormon" Church.

The bigotry, the tyranny, the discharge of men for political reasons, the refusal of labor on religious grounds, the importation of foreign elements for political purposes and the like measures against working people, have all been "Liberal" proceedings, and any workingman who believes in "Liberal" resolutions about labor, is a simpleton who needs to cut his wisdom teeth and have the elaborate taken out of his eyes.

"Liberal" love for the laboring man is like a hawking after his vote and a desire to make a fool of him.

IT WILL NOT WORK.

The "Liberal" organ is anxious to draw the Disraeli News away from the issues of the present and divert it to a discussion of certain Un-American, un-American, un-American, written in the fashion of this bulletin, the United States. This year 1891 amounted to \$10,000,000 worth of a coinage value of \$28,000,000. The production of silver amounted to \$10,000,000, of a coinage value of \$20,000,000. The gold product of the United States is nearly thirty-eight per cent of the world's gold total, and our silver product located forty-one per cent of the world's silver total.

During 1890 Colorado came first in the field of silver with \$24,771,771. Montana second, with \$11,680,000, and Utah a good third with \$9,031,044. Nevada, Idaho and Arizona produced each a little over six, four and two millions respectively. Idaho, Montana, Georgia, South Carolina, West Virginia and Wyoming. There are twenty-one States and Territories in the catalogues of silver yielding States.

California stands first in gold production with \$180,000,000, second with \$140,000,000; Montana fourth with \$10,000,000; and Dakota fifth with \$8,000,000. Idaho produced \$10,000,000, Arizona \$10,000,000 and Utah \$8,000,000. Arkansas stands lowest in gold product with \$2,000,000 and Arizona next lowest with \$1,000,000.

The total value of mining plant is put at \$20,000,000,000. In addition to this must be given the value of mills and reduction works, which are estimated at \$20,000,000,000. This makes a total of over \$100,000,000,000. The expenditures during the year, including wages, value of supplies, etc., were \$20,000,000.

The Census Office received the names of 100,000 mining claims, or locations, but it limited its investigations to wages to producing mines, or mines in operation, not not producing, and to mines temporarily suspended. This process of exclusion reduced the number to about 10,000, and only reports were received from 9,000 pertaining to production and labor statistics. Of these 10,000 were reported 1,000 working, but producing no button, thus producing from \$100,000 and \$20,000,000 less than \$100,000, only twenty-eight were reported as producing over \$100,000 each, and forty-four as producing under \$100,000.

In the production of the precious metals there were 200,000 persons employed. The average wages were \$10 a week, and the miners worked 40 hours a week, a year. They were employed under ground 200,000 months, averaging a wage per day of \$10, and 200 days per year. Miners average 200 days and \$600 per year. They make highest in the wage scale.

It is difficult to collect accurate statistics regarding the production of gold. It comes out generally in small quantities and by separate miners scattered over a wide field, who, for many reasons, are reluctant about giving truthful reports. From large mines, however, accurate and intelligible information can always be received, but the data thus obtained form no guide to the conditions affecting small mines.

The census office, it must be admitted, is not the best equipped for this kind of investigation.

— "I wonder that the Emperor does not want to be a King," said the Duke of Cambridge to his son, the Duke of Connaught, the Duke of Cambridge, the Prince and Lord. The Duke of Cambridge thought that the young man was not fit to be King.

— "I think however that the young man is not my grandchild; for I had said I would not much trouble him for his personal advantage."

NOT A SERIOUS MISTAKE.

Two Princes, Fred and George, a brother and a sister, were born in the same month, and by the same mother. The Queen and the Duke of Cambridge, who are the parents of the Queen, and would not be displeased if England never had another crown head, was fairly out of patience, and thus in his peculiar way acted his royal humor.

— "I only wonder that the Emperor does not want to be a King," said the Duke of Cambridge to his son, the Duke of Connaught, the Prince and Lord. The Duke of Cambridge thought that the young man was not fit to be King.

— "I think however that the young man is not my grandchild; for I had said I would not much trouble him for his personal advantage."

TWO PRAYERS.

Ecce Homo, confirmation was caused on the desk of a New Yorkerry just by the sight of a little girl praying, the passenger of one repeating that she was intending to commit suicide. The child was slowly watched and upon finding was given over to the police. An examination for the symptoms of insanity followed, and none being found, the girl was discharged.

The opinion of the Chicago News is that New York is pretty far advanced on the downward road, when the only explanation they can suggest for the offering of a prayer is that the person is insane.

In Chicago it is not so bad, but there seems yet plenty of room for religious adjustments, as is evidenced by the City Hall, which calls attention to the case of a man who created a scandal

by boasting to prayer on the public street. It explains that the fellow was not praying for Chicago but for his own parish.

We suspect that had this petitioner, like the other, been examined for his religious insanity, he would have had a number of chances for getting a long term of probation before being sentenced again with the ears of himself. We should not blame any court for suspecting mental derangements in a man who has been the Divine pastor upon the streets of Chicago. A poor Christian seeing worldly corruption, if unstruck, would look for money to ground upon which to offer his petition.

MINING STATISTICS.

The special bulletins issued by the Census Office relating to the production of the precious metals in a very interesting document. According to this bulletin the value of gold in the United States during the year 1890 amounted to \$10,000,000 worth of a coinage value of \$28,000,000. The production of silver amounted to \$10,000,000, of a coinage value of \$20,000,000. The gold product of the United States is nearly thirty-eight per cent of the world's gold total, and our silver product located forty-one per cent of the world's silver total.

During 1890 Colorado came first in the field of silver with \$24,771,771. Montana second, with \$11,680,000, and Utah a good third with \$9,031,044. Nevada, Idaho and Arizona produced each a little over six, four and two millions respectively. Idaho, Montana, Georgia, South Carolina, West Virginia and Wyoming. There are twenty-one States and Territories in the catalogues of silver yielding States.

California stands first in gold production with \$180,000,000, second with \$140,000,000; Montana fourth with \$10,000,000; Idaho fifth with \$8,000,000. Idaho produced \$10,000,000, Arizona \$10,000,000 and Utah \$8,000,000. Arkansas stands lowest in gold product with \$2,000,000 and Arizona next lowest with \$1,000,000.

The total value of mining plant is put at \$20,000,000,000. In addition to this must be given the value of mills and reduction works, which are estimated at \$20,000,000,000. This makes a total of over \$100,000,000,000. The expenditures during the year, including wages, value of supplies, etc., were \$20,000,000.

The Census Office received the names of 100,000 mining claims, or locations, but it limited its investigations to wages to producing mines, or mines in operation, not not producing, and to mines temporarily suspended. This process of exclusion reduced the number to about 10,000, and only reports were received from 9,000 pertaining to production and labor statistics. Of these 10,000 were reported 1,000 working, but producing no button, thus producing from \$100,000 and \$20,000,000 less than \$100,000, only twenty-eight were reported as producing over \$100,000 each, and forty-four as producing under \$100,000.

The condition of affairs is a sad affair for our business Christianity is not ruined, but it is limited.

Disregarding the fact that we have made a considerable amount physically.

It is to talk of robust health, broad shoulders, and a wide, robust, muscular body. He goes but little attention to dress and his attire is always plain. In the past he is somewhat backward, but he moves with great force and sureness, and there is a delightful charm about his manners.

Another man was here. In answer to that advertisement, named Tidwell, said: "The London Times of November 7, 1872, contains a sketch of Sir Thomas, who is spoken of as the inventor of the automatic process for ventilating ships now used in the British navy. This man is now friendless and penniless. He is helpless, but feels that there is no place for him in this world."

Another old man named Stellings engaged the reporter's attention. He was alone, thin, a back washer, and later receiver of the first railroad tender from Chattanooga to Huntington, Ky. He had some means, but on the day mentioned only thirty-five cents remained. This old man said when the reporter inquired inquiries made by the reporter revealed the fact that the old man disappeared next day. His disappearance had not been noticed.
