

LOWEST LEVEL ON RECORD.

Great Salt Lake is Rapidly Receding—Reached the Zero Mark.

THE LAKE'S FLUCTUATIONS.

Meager Precipitation and Irrigation are Reducing its Volume—Extract from Dr. Talmage's Book.

The public mind is being unusually interested these days in the very material fall of the Great Salt Lake. According to the records taken by Weather Director Murdoch, there has been a shrinkage of thirteen inches since the 1st of last September, and of 2 feet 8 inches since October 1, 1899.

This great shrinkage in the famous old body of salt water is exciting much speculation as to the cause of it, and the likelihood of its continuing.

Saturday Mr. Murdoch and Professor M. E. Jones went out to Kaysville, where they were amazed at the very perceptible recession of the water. The pavilion stands over dry land, and the faithful old gauge that has measured the lake level for fifty years, has ended the days of its usefulness. It can no longer reach the water, and the level of the lake therefore is down to zero. Mr. Murdoch found it necessary to improvise another gauge and set it out in the lake, and it will last until the water falls another foot, after which another gauge will be placed further out in the lake.

The other day a man went by team from the old Jeremy salt works to Antelope. He had forty bushels of wheat on his wagon, but he encountered no difficulty in reaching the water, and the soft earth. The bottom is very hard and the trip from the shore can be made to the island in about forty minutes on horseback or in a buggy. It is asserted that one could walk from the east shore of the lake to the island without getting his feet wet.

The records that are on file in the weather office, show that the lowest level to which the lake fell until the present, was in December, 1861, when it registered one foot. The highest level was in June, 1867, when it reached thirteen feet five inches. By 1874 the water had fallen six feet, and in 1883 dropped to five feet two inches. The water again rose in 1885, but since that time it has gradually fallen.

The remarkable shrinkage in the lake is generally ascribed to the meager precipitation and the utilizing of the water in the rivers for irrigation purposes.

Concerning the fluctuations of this historic body of water, Dr. James H. Talmage, the well known lake scientist, says in his interesting little book, "The Great Salt Lake, Present and Past," recently published by the Deseret News:

STATISTICAL AND GENERAL.

It is well known that an enclosed water body, such as a lake devoid of an outlet, is particularly sensitive to climatic changes. Such a lake rises and falls as evaporation increases or diminishes in relation to supply by precipitation. The variations in volume as shown by the shore-records of the Great Salt Lake are unusually large.

The fluctuations in surface area are even greater than would be expected from a study of the variable relations between supply and loss; and this fact is explained by the very gradual inclination of the shores. The entire valley is remarkable for its flatness, as any observer may see for himself if he will climb one of the hills in the vicinity of Salt Lake City; but even more striking is the small increase of water depth as one passes from the lake-shore outward.

A slight rise in the lake level results therefore in a great increase of water surface. As was pointed out by Stansbury, a rise of but a few feet would enable the lake to reclaim a large part of its former domain over what is now Great Salt Lake.

The writer has conversed with residents of towns near the shore who remember when the water's edge was, in place, two miles, beyond its present line; and the same people are able to point out the ruins of a small town, a mile inland from the present margin, marking the location of fields which were destroyed by the rising waters, and which are now left dry and barren.

We have of ready access two reliable maps of the lake, the latest of which recent variations in the water area may be demonstrated. The earlier of these is Stansbury's map, based on work done in 1849 and 1850, at which time the lake stood at the lowest level.

The second map, based on the work of Clarence King in connection with the field work of the Fortieth Parallel survey, dated 1869, when the water was approaching its maximum of recent times. According to the first of these, the lake covered 1,750 square miles; the second survey showed an area of 2,170 square miles.

As would be inferred from the foregoing facts, the average depth of the lake is subject to small and slow variations only. On the whole the lake is extremely shallow. In 1850 the greatest depth found was but 36 feet, and the average but 15 feet. Later, the lake rose 10 feet with a consequent increase of water area through the submergence of the flat shore-borders, but with an increase of average depth not exceeding 5 feet. The maximum depth observed at the highest stage was 45 feet. The average depth of the lake today is probably not more than 12 feet.

The fact that the lake is a closed water body with no out-flowing stream, would indicate the certainty of variations in its volume, and suggest the improbable chance of a constant balance between the supply furnished by precipitation, and the loss through evaporation.

For an undetermined period prior to 1850 or thereabouts, the Salt Lake had been steadily diminishing in volume. For ten or fifteen years after the time named the water continued with a tendency to rise, then it rose rapidly and reached its maximum height in the course of this increase of volume about 1872 or 1873. Although it is now sinking year by year, it has not yet reached its low level of 1850.

Antelope island, one of the land bodies of the lake, is connected by a bar with the delta of the Jordan river; this bar is now under water at a depth of 3 to 8 feet. Fremont records that on August 13, 1845, he rode across the bar to Antelope island, the water being in no part more than 5 feet in depth.

Fremont's "Memoirs," p. 431.

There is a well defined and regularly recurring annual oscillation of the lake, marked by a higher water level in May and June, and a low stage in the late summer months; but beside this, oscillations of wider duration are known to occur. A combination of these factors from many sources point to the fol-

lowing facts: they are presented in Gilbert's works.

From 1847 to 1850 the bar was very dry during the low stage of each winter, and in summer covered by not more than 20 inches of water. Then began a rise which continued until 1855 or 1856. At that time a horrid storm, with difficulty for days in winter, but all communication was by boat in summer. Then the water fell for a series of years, until in 1860 and 1861 the bar was again dry in winter. The spring of 1862 was marked by an unusual fall of rain and snow, whereby the streams were greatly flooded and the lake surface was raised several feet. In subsequent years the rise continued, until in 1865 the ford became impassable. According to Mr. Murdoch, the rise was somewhat rapid until 1868, from which date until the establishment of the gauges, there occurred only minor fluctuations.

A bar connecting Stansbury island with the mainland was dry in 1850. Since the rise of the lake in or about 1855, the bar has never been entirely above water, though at present it is fordable during the entire year. The islands have been used as hard grounds by the inhabitants of Salt Lake valley, and cattle being transferred from the shore or back during the low water periods. The Stansbury bar is 7 feet higher than the bar running to Antelope island.

These fluctuations, while surprisingly great when placed in comparison with ordinary lake oscillations, are trifling as compared with the great variations in volume which marked the stages of Bonneville history. We observe current changes actually in progress, while the variations of earlier times we can but picture in imagination.

PERSONAL.

Dr. F. J. Bancroft, chief of the medical staff of the Denver & Rio Grande, is numbered among the guests at the Knutsford.

Virgil Kelly, sheriff of Millard county, is in town today having arrived from Wyoming last night.

Charles T. Harte, managing editor of the Salt Lake Herald, is convalescing at St. Mark's hospital from a complication of ailments which necessitated several operations. Mr. Harte has been seriously ill for the last seven weeks but is now out of danger.

Deputy Sheriff Cronin, of Euroka, is among the latest arrivals at the Cullen.

Republican County Chairman J. A. Harwood and family, of Castle Gate, are guests at the White House.

Hardy Downing and E. B. Freeman, the two well-known professional cyclists, arrived from the East this morning and registered at the Cullen.

S. Kronberg, western representative of the Maurice Grand Opera Co., came to town from New York this morning and registered at the Knutsford.

A. C. Hatch of Heber is numbered among the guests at the White House.

Ralph D. Cole, of Findlay, Ohio, who is a representative to the legislature of that State, is in this city on a pleasure trip.

C. L. Schuck, railway editor of the Columbus Evening Dispatch, came to town this morning on a vacation and proceeded to take in the sights of the city.

HOTEL ARRIVALS.

The following names were registered at the leading hotels by 3 o'clock this afternoon:

Knutsford—A. A. Barber, Grand Rapids; George Martin Lowersberg, Louisville, Ky.; N. Clark, of City; Saml. B. Walton, M. G. Livingston, Pittsburgh; John R. Phillips, San Francisco; Geo. R. Colby, Boston; S. Kronberg, New York; E. R. Haffelinger, Philadelphia; C. W. Schwinde and wife, Chicago; H. Dingrall, St. Louis.

Kenyon—Harry M. Hirsch, Des Moines, Ia.; Wm. Harcombe, San Francisco; Elise Durst, Pine Bluff, Ark.; C. F. Mallett, San Francisco; Thos. Ryan, Kansas; Mrs. Andrews, Washington, D. C.; Henry Ables, South Omaha; A. L. Stevens, Council Bluffs; H. F. McMahon, Chicago; O. Herman, Denver; H. M. Meyers, Chicago; J. B. Kerr, St. Joe, Miss.

Cullen—Hardy Downing, San Jose, Cal.; H. B. Freeman, Portland, Ore.; Herman Kutzkay, Garvanza, Cal.; J. G. Langley, London; F. W. Cole, Goshen, C. L. Schuck, Columbus, O.; Ralph D. Cole, Findlay, O.

White House—Peter O'Connor, Cripple Creek, Colo.; Frank Eymon, Geo. D. Knuth, Rocky Springs, Wyo.; W. J. Clark, Grantville, Lake Sturgeon, Hawkins, Wyo.; A. C. Hatch, Heber; J. H. Cook, Laramie, Wyo.; John Bothwell and wife, Birmingham.

Walker—G. C. Hewitt, Colorado Springs; J. T. Miller and wife, George M. Dever, Holdridge, Neb.

GONE FOR A WEEK.

Twelve-Year-Old Son of Moroni Kimball Missing Nearly Two Long.

Moroni Kimball and wife of No. 48 east, First North street, are in great mental distress over the mysterious disappearance of their twelve-year-old son, who left home on Wednesday morning last to attend the Washington school. Since that time not a word of information has come to the family concerning the missing boy, though father and mother and other relatives and the police have been on the lookout for him.

Mr. Kimball said today that the lad was large for his age, and wore a dark suit, including knee trousers, and wore a soft brown hat. He also had a silver watch and chain. He says the boy has been away from home but twice in his life, and does not know, nor can he surmise what has now become of him. He said there had been no trouble of any kind, and that the boy had left home on that account. Any person who can give Mr. and Mrs. Kimball information regarding the boy will be conferring a great favor upon them.

"The Mill Cannot Grind with Water That's Past."

A fagged out, tearful little woman said this in telling her cares and weaknesses. Her friend encouraged by telling of a relative who was cured of just such troubles by Hood's Sarsaparilla. The little woman now has tears of joy, for she took Hood's, which put her blood in prime order, and she lives on the strength of the present instead of mourning about that of the past.

Told Her Friend—"After having gotten on my neck 42 years Hood's Sarsaparilla completely cured me. I was so glad I told friends about it and a lady in Wisconsin who read of my cure told me she also took Hood's for the same trouble and was cured. She thanked me." Mrs. Anna Sutherland, Kalamazoo, Mich.

Hood's Sarsaparilla
Never disappoints.

Hood's Pills cure liver bile, the most distressing and only cathartic to take with Sarsaparilla.

If sarsaparilla and the other vegetable ingredients that go into the best are good as a medicine, then Ayer's Sarsaparilla is good. If not, we are humbugs.

Your doctor will tell you which, because he can have the formula of Ayer's Sarsaparilla any time for the asking.

If you are tired, half sick, half well, if one day's work causes six days' sickness, get a bottle of the old Sarsaparilla. Get Ayer's, and insist on Ayer's when you want Sarsaparilla.

J. C. AYER COMPANY,

Practical Chemists, Lowell, Mass.

Ayer's Sarsaparilla
Ayer's Pills
Ayer's Hair Vigor
Ayer's Cherry Pectoral
Ayer's Catarrh
Ayer's Ointment

AMUSEMENTS.

The Prince of the World company are now in town; their last performance having been given in Ogden.

The "Standard" of that city gives them a most enthusiastic report, and says that few companies that have appeared there are entitled to more praise. The entire presentation will be given at the Theater tonight.

The season at the Grand opens this evening with a presentation of "That Man." The box office is now open daily except from 1 to 3 p. m. Barlow's minstrels show the last three nights of the week.

THEY SWINDLED PUBLIC.

Police are Looking for Agents of the Chicago Art College.

The police are looking for some young men who have been representing themselves to be agents of the Chicago Art college. The young men, referred to have been canvassing the city with the proposition of making a life sized painted portrait of any picture if the person desiring the picture would purchase a frame. First of all a payment was made, and then the picture was shown. In this way several "orders" were obtained but the "agents" forgot to show up with the frames or return the money advanced. The police are working on the case and hope to land the perpetrators of the fraud.

WAS A UTAH MAN.

The funeral of Robert J. Weil took place yesterday afternoon. The interment was at Mount Moriah cemetery. The deceased leaves two brothers, Edwin, of Butte, Mont., and Hugh G. Weil, of Joseph City, Utah. The funeral was private—Butte Miner.

POSTOFFICE CHANGES.

[SPECIAL TO THE "NEWS."]—Alfred L. Robinson, of Park City, Utah, has been appointed to a position in the postoffice department.

The postoffice at Wellington and Woodruff will become domestic money order offices on October 1st.

The postoffice at Clatskanie, Ore., has been discontinued; mail to Mercer.

NEWSPAPER MAN DEAD.

Phil. A. Jullien of Montana Succumbs to Heart Disease.

Butte, Mont., Sept. 24.—Phil A. Jullien, coroner of Silver Bow county, and one of the best known of the old-time newspaper men of the country, died suddenly this morning of heart disease. He was a native of Washington, D. C., and 56 years of age. He worked on the Washington Republican in the early days of that paper and on other papers at the capital. He had been in the newspapers in Montana for about fifteen years.

New York Business Failure.

New York, Sept. 24.—Announcement was made today of the suspension on the stock exchange of Egbert Mills & Co.

At the office of Mr. Mills, it was said that the suspension had been caused by the failure of customers to put up additional margins on demand. Mr. Mills estimated that his customers had been long of the market in steel and iron shares. Mr. Mills placed his liabilities at \$250,000 with enough assets to cover.

Swindling Consul Sentenced.

Hamburg, Sept. 24.—Leon Bard, a former United States consul here, was sentenced today to fifteen months' imprisonment for misappropriating \$25,000 marks, part of an inheritance which he received for two American women.

With Transatlantic Liners.

New York, Sept. 24.—Arrived: Aller, from Bremen.

Liverpool, Sept. 24.—Arrived: Etruria, New York; Roman, Baltimore.

DIED.

EVANS.—In Salt Lake City, Utah, September 23rd, 1890, Chas. E. Dow, the 5-year-old son of William E. and Lucy Oakley Evans. Croup was the cause of death.

Funeral will be held from the family residence, No. 945 Lake street, tomorrow afternoon, beginning at 2 o'clock.

LEVORSEN.—Dreyfus Edvard Lorenzen, son of Carl M. and Alvina Esmussen Levorsen, died in Draper, Salt Lake county, Sept. 23, 1899, aged 9 months and 9 days.

Bikuben and Skandinavian Sterne please copy.

SENATOR CLARK IS NOT COMING.

Promoter of Los Angeles Line Delayed in New York.

MEET IN CHICAGO FRIDAY.

J. Ross Clark, George B. Leighton, E. T. Gibson, R. C. Kerns, Thomas Kearns and Others to Leave.

Senator W. A. Clark, who is the chief promoter of the proposed Salt Lake-Los Angeles road, will not come to this city this week as scheduled, to meet with the citizens and outline a plan of the project for their benefit.

Senator W. A. Clark, who is the chief promoter of the proposed Salt Lake-Los Angeles road, will not come to this city this week as scheduled, to meet with the citizens and outline a plan of the project for their benefit.
