What is Eczema?

It is an itchy, burning, and itching of the skin almost beyond endurance.

It is thousands of pin-headed vesicles, filled with an acid fluid, ever forming, ever breaking, ever itching upon the raw sensitized skin.

No part of the human skin is exempt.

It breaks, disfigures and humiliates more than all other skin diseases combined.

Thousands suffer among its most numerous victims.

They are often born with it.

Shop and rest are out of the question.

Most remedies and the best physicians generally fail, even to relieve.

It is the most wonderful skin cure known.
