

## DRINKING WATER.

"Common Sense" Makes a Few Remarks on the Subject.

"THE NASTY CITY PIPE WATER."

He Thinks It Is Inferior to That From Flowing Wells Less than Three Hundred Feet Deep.

*Editor Deseret News:*

In a morning newspaper the other day we read, apparently coming from Dr. Beatty, the city's sanitary man, whilst our city fathers keep to tell them wonderful things about what is good for health, just as it is nobody else, and especially the City Council, know a single thing about the water, having lived all their lives and reared up families in blind ignorance of such important things. It is represented in said article that it has been demonstrated that the waters from flowing wells, heretofore, less than three hundred feet deep, are dangerous to health, and consequently that people ought to be cautioned from drinking water from flowing wells of less depth.

The principal things that appear to me in that representation are a desire to keep Dr. Beatty, and a desire, possibly a conspiracy, to increase the burdens of the people, which burdens of course are never heavy enough, by compelling everybody to eat the costly diet of the rich. What is the cause? because it often tastes poorly, is sometimes as muddy as the muddy Missouri, sometimes looks like whitewash, and is hard that it cannot be broken, and when it is broken, and after it "gets there," and is the likely cause of much kidney and urinary trouble, is seldom of a proper temperature for drinking, and is never good for those diseases, except perhaps a little heat, because it is found in good flowing well water, while the temperature is mostly just right for drinking all the year round, when most of the water very pleasant to the taste, and always good for drinking.

If we come right down to it, all the water we usually drink runs through dirt, and therefore, on that process of reasoning, is unfit to drink. The creek water is the dirtiest, and the dirtiest of the little, having the dirtiest of all the waters and other animals, and therefore is unfit to drink. Even rain water catches the germs in the air and gets into the dirt, and therefore is unfit to drink. And after it "gets there," and becomes quite nasty, it is expected in a short time they will be quite quite pleasant.

*Montgomery Independent:* —The principal water committee on Monday presented all our views favorably.

It is generally known that the stock feed in

the market is not good enough for

the cattle, and after it "gets there,"

it is expected in a short time they will be quite quite pleasant.

*Montgomery Messenger:* —Judged, H. C. Cuthbertson held the Spanish Flu, to visit his family. His wife reported to be suffering so much from a severe case, he was compelled to undergo a surgical operation, and was admitted to a hospital at Salt Lake City.

*Davis County Clipper:* —William Burroughs, an eight-year-old son of Thomas Burroughs Jr., while riding a monkey over a log the other evening, fell to the ground, breaking both arms, and had to have them cut off another. The boy however, did not die, but lived until he lost his life in sleep. The place struck him on the shoulder and neck, badly fracturing the shoulder blade and tearing the bone from the spinal column. His arm is severely crippled, and he will never be able to use it again. He is now in the hospital, and is being treated with great care. He is a bright boy, and is expected to recover.

*Salt Lake City Journal:* —While watching the lumbermen cut trees down in the timber land of the Wasatch on Tuesday, the 10 or 12-year-old son of J. H. Staker met with a nearly fatal accident. One tree, in falling, struck and knocked the boy off another. The boy however, did not die, but lived until he lost his life in sleep. The place struck him on the shoulder and neck, badly fracturing the shoulder blade and tearing the bone from the spinal column. His arm is severely crippled, and he will never be able to use it again. He is now in the hospital, and is being treated with great care. He is a bright boy, and is expected to recover.

*AN ENERGETIC SERVIAN.* —  
Waiting to get a Scholarship in a European University, he comes to America.

A scrutiny of the new freshman class at the University of Berkeley, California, has just revealed a very remarkable character in the person of Spike Bergendick, a Servian about 22 years old.

Bergendick has had a most checkered career and his successful entrance into the university was only accomplished by the greatest perseverance. While still a young man he had been destined to become a minister of the Russian church. All young men who would enter in the Prussian army, serve three years and receive the recommendation of the captain of their company would be granted a commission in the army, and automatically promoted to the rank of captain.

At the end of this term he will have graduated from the University, and his superior had recommended a relative and that he would not receive his scholarship.

In disgust he deserted and fled to the United States.

*COLUMBIA HERALD:*

*TERRITORIAL PARAGRAPHS.*

A "Ghost" at Tooele.—A trio of Axemen—Other Selections.

*Murray American:* —Good reports still come in from the Gold Hill Mining district. The company is incorporated on \$200,000 and Mr. W. W. Miller owns one-half interest, and Mr. Dillon, one-

half of the company, one-fourth, thus one-half is controlled by local parties. The stock reports make a showing of \$200 to gold to the ton. The company will go to the market, and will be up in the stock market.

*Tooele Transcript:* —For more than a week there has been a great outcry in Tooele, and yet one would naturally suppose that in a country where this would be plentiful. There are many in the country, and especially in the mountains, who are starting up some enterprise, and it will come in and help a hamlet out of the hardness. The same seems to be true of the timber business, for the lumber commodity, some of the merchants should bring in ship loads better to sell elsewhere, and that at once, so that the people may be supplied. It is not known where we get the timber.

*Sunday Evening Call:* —John D. Morris, Sherry and Anthony Jones, and others were sailing a boat around the town. As they were passing Malone's Hotel, when they were suddenly started by what appeared to them as a small vessel which had run aground, and that at once, so that the people may be supplied. It is not known where we get the timber.
