Camps. That is the reason for the recent or-That is the reason for the recent or-der issued from the office of Genéral Manager Whitley of the local A. S. & R. offices, calling upon all customers, excepting the Tonopah Mining com-pany, to reduce their shipments 33-1-3 per cent. New shippers cannot even get a look in until the present congested state of affiairs is relieved. The only reason that the original Tonopak comreason that the original Tonopah com-pany is favored is because of the con-tract entered into with that corporation

pany is favored is because of the contract entered into with their corporation between months ago.
The Montana Tonopah company is not permitted to send out more than 30 tons of ore per day and this accounts for the decision of the directors of that company not to post a dividend at the recent meeting.
Down at the Murray plant of the A.
S & R. the yards are choked with ore. It is plied up everywhere, awaiting the ordeal of smelting at some future time. The company has many hondreds of thousands of dollars invested in ore, which will be tied up for some little time to come, simply because it has endeavored to take care of its patrons. It is no wonder that the Tonopah mine owners have been called to a halt for the time being.
But by next April at the latest, this congested state of the ore market will be rested.

congested state of the ore market will be relieved.

PARK CITY MINES.

Work Progressing at the Diamond-Nimrod Mine.

A new 25-borne power engine was re-ceived by the Daly-West company this week and will be placed in the small addition being built to handle the over-flow from the tailings mill. At the Southern Tier property de-velopment work is being done, and will foubtless be continued all winter, Con-ditions there are years encouracing and

ditions there are very encouraging, and the management is confident of "strik-ing it," sooner or later.

Sinking is going steadily ahead at the King Consolidated and no more water has been encountered so that trouble from this source during the winter is practically out of the question. The

and Mr. Fleiner expects to see his. rty listed among the Tintle shippers before long. The Black Jack property at Mam-

moth is looking better every day and a great deal of work is being done on the 1.300 and 1.400 foot levels. Uncle Knight is making a regular pro-of this old Tintic mine.

The North Mammoth property, owned The North Mainmoth property, owned by Capt. Hugo Deprezin, but now be-ling worked under loud and lease by Park City parties, has been reached through the upper workings of the Bul-lion-Beck mine. It took 200 feet of drifting through hard rock to accom-plish this by Supt William Matthews, who made splendid time. The present force on the North Mammoth will now diff. This property is rated high by the mining men of Eureka, being a close neighbor of the Centennial-Eure.

Messre, Jno. Hayes, David A, De-pue and William Ball are doing ex-ceedingly well with their lease on the ceedingly well with their lease on the Eurska Hill dump, having shipped four carloads of fine grade ore this month and before the close expect to market as much more. The gentlemen have also secured a lease in the mine. Work is to be started on the Brook-lyn-Eureka claims in North Tintic. Some Splendid showing have been taken from these claims and it is to be from these claims and it is to be hoped that work will be pushed until

a paying mine is developed. The Dove, Pelican and Stork claims, lying between the great producers-Grand Central and Cantennial-Eureka-is said to have passed into the posses-

sion of the latter company, The Burglar, Burglar Extension and Sunrise Mining claims, located in Eas Tintle district form the basis of an In

The Pioneer Mining ig near Alta, has taken in its wining near Aita, has taken in its whi-ter supplies. No matter how severe the winter may be, the men employed in the development of the mine will not want for anything. Other com-panies operating in the same district are also taking in provisions and sup-plies to last till next spring.

The war between Russia and Japan is probably responsible for the fact that the output of platinum in the United States increased from 110 ounces in 1903, valued at \$2,080, to 200 ounces, valued at \$4,160 in 1904. Owing to anxiety in refard to the fate of the platinum indus-fry in Russia, the price of platinum rose about 10 per cent during 1904.

It is a safe prediction that the mines of Alta will be provided with rail fai-cilities early next year. The tracks of the Rio Grande will probably be ex-tended to Tanner's flat, just above the Wasatch resort. The present output of the camp is anywhere from 2,000 to 2,500 tons per month, but if rail facili-ties were had, the output would be greater. greater.
