# LOWER MAMMOTH AT DOLLAR MARK

Makes a Sensation on the Stock Exchange.

A HEAVY DAY'S TRADING.

Daly-West and Star Con. are a Little Off-The Market on the Whole is Weaker.

On the Salt Lake Stock Exchange this morning Lower Mammoth, which has been forging ahead for the past week, reached the dollar mark, the first time the stock has reached that figure since the big boom three years ago. The trading opened on this stock at the figures quoter yesterday, a sale of 100 shares being effected at those figures. From that time on to the close of the call on the stock it raised, jumping by leaps and bounds until a gain of nearly 20 cents per share had been recorded, the stock being wanted at the end at \$1.02. In all 8,050 shares of this stock participated in the trading. The other sensation on the board was the drop of Daly-West which fell off nearly 50 cents per share from yesterday's quotations, over 200 shares changing hands at figures around

Star Consolidated is still on the tobogan slide and fell off a few points though the trading in this security was comparatively slight, only something over 2,000 shares participating. After a long spell of quietness Ajax again opened the ball, but falling off slightly, when it entered the trading list and handed out 2,300 shares at from 68 to 70 cents per share. Sacramento is becoming active but the figures remarks about the same as at vesterday's main about the same as at yesterday's call. Among the non-sellers May Day call. Among the honesers is holding showed up weaker. Dexter is holding its own with \$1.30 bid. Swansea has recovered its decline and was wanted at \$3.90 with holders asking \$4.05. South Swansea was off color and was bid for below the dollar mark. Upon the whole the tendency of stocks were lower, figures at the close ruling as

## A NEW MILL.

A Dry Process Concentrator for the May Day.

A contract has been let for a new concentration at the May Day. The plant will consist of four concentrators of twenty tons enpacity each. The mill by what is known us the dry process

of New York from Beice City, Idaho has the following to say of idaho min-

ing properties one of the coming properties of Art-zona. It is a noise with high grade copper ore in sight, and development work will undoubtedly show it more

The Red Cloud, on the gold helt near Hailey, has produced tion, on worth of gold this year, and there are a num-

Is on a seam 10 to 12 inches wide that shows high grade galena running bet-der than \$100 in all values.

An Eric Shipment.

The Eric mine in Markham Gulch, Bingham, is in with a shipment of Palmer, the lessee of the mine ery much pleased with the showing he has made in the mine since taking hold of it. He says that the one is ineasing in value and the body proves to he very much larger than was exthe output from now on and a larger force of men will be put to work.

Activity at the Overland.

Manager G. A. Duncan of the Overand returned last evening from a few ays' stay at the mine, and brings up a interesting budget of news.

Work is progressing finely on the mill. The cyanide tanks are all boiled and the work of riveting is progressing finely. Six new ore bins of large capacity have been built and everything is being put into shape for the opening as fast as a force of 25 men on do so. Mr. Duncan says that the nteness of getting the material on the round. He says there is nothing beng left undone to make it possible to un the plant to the full capacity, hich is 500 tens per day.

### Is Free From Debt.

The Boston News Bureau is speaking of the Highland Boy says: It is ex-pected by the best informed copper people connected with the Utah Condated company that the ores in this one, besides their previous metal valwill ultimately go about 41/2 per ent in copper. It is expected also that dividends can

be begun next year at the rate of \$4 per share per annum upon the company's stock. The company should enter the new year not only free of debt, but with a handsome balance to the credit of income, and quartely divilends can be begun early in the year. The net earnings are expected to be

at least \$100,000 per month, beginning Jan. 1. This is figured from a producon of 1,060,000 pounds per month, and 10 cents per pound profit is justified considering the precious metal values

It is believed that the Utah Consolidated will be the largest source of new copper supply in the United States next to the Increased output of the Mentana Ore Producing com-

### MINING NOTES.

Fred E. Dern has gone out to Tintic. J. A. Jacobson of the Ben Butler is in Blngham today. Six carloads of Swansea ore was re-

ported this morning. One carload of Montezuma was on the

market this morning. Secretary Hancock of the Centennial Eureka is at the property today.

Mr. Thos, Weir, who has been in St. Louis, will be back again tomorrow.

The Silver Shield came forward today with a three-car shipment of ore. Manager Bamberger of the Daly West will return from Park City this evening.

Harry Spence is making arrangements spend the winter on the Homestake at Alta,

W. F. Snyder has gone to Stateline to look after some of his interests at that camp.

The Highland Boy smelter has just turned out a carload of copper bullion. The car lot weighed 60,110 pounds.

Messrs, Busbeck and Pearson of the Sliver Bow mine have gone to Tintic today to inspect the property. Frank V. Lamb of Blackfoot, Idaho.

who lately has struck it rich on the beach near Nome, is in the city. Five Utah mines during the present month will hand out to their stock-

holders \$228,500 in dividends.

Mr. Samuel Newhouse's stay in the east will be of short duration. He will return from New York in a few days and make his headquarters in Salt Lake for some time to come. Boise Statesman: The Pittsburg Mi-

ning company is the name of a Utah corporation that has just filed its arti-cles with the Secretary of State. Its capital stock is \$500,000 and its princi-pal place of business is Salt Lake. Henry E. Heath of Gray, Bingham county, is designated as the agent in this State. Bolse Statesman: Work has begun

Boise Statesman: Work has begun on the Confederate mine at Quartzburg. This is an adjoining property to the Gold Hill, owned by Robert Grayson of San Francisco. It was worked to the 250-foot level some yeors ago, but operations now are not so deep, owing to water. They are drifting on the ledge and getting elegant ore, and indeed from this mine there has come deed from this mine there has come much of the richest rock ever found in the Basin country. Its resump means considerable to Quartzburg Its resumption is understood from good authority that Henry L. Woodburn, assistant manager for the War Eagle company, has secured a bond on the Confederate.

### WARD ENTERTAINMENTS.

immummi Next Wednesday evening the charity nelpers of the Twentieth ward will open grand fair and festival, which will reain open for three nights, Wednesday, Thursday and Friday, Dec. 12th. Each evening an excellent musical

program will be rendered before the pening of the booths.

One of the features of the fair, in which much interest is being manifested, is a voting contest for the most popular lady and gentleman in the ward. Ballot boxes will be opened next Monday morning at all the stores of the ward, and the contest will be carried on until Friday at 9 p. in., Dec. 14th.

The third and last performance of the cantata "Esther" was presented to a good sized audience in the Elevnew enth ward last night, and well de-The served all that has been said in its praise. Mention has been made of some of the characters who have so ably contributed to the success of the ers and will be run on the percentage production, but no part is more deplan. The process to be used is a new one, and requires no water, being run than that of the gracious and queenly by what is known as the control of the process of the proces oy what is known as the dry process of concentrating.

A correspondent of the Mining News of New York from File Mining News of Mining News of State of Mining News of M unaffected presence, left her listeners nothing to wish for unless it was that she had had a little more to do in the way of solo work. Her able support in the title role has certainly done much in reflecting credit upon the or-

# MANACER LOOSE IS A WITNESS.

Thinks the Ore Bodies are Pipes and Not Veins.

HOLBROOK ON THE STAND.

Cross-Examination of Expert Wilson and Testimony of Harkness, an Expert Miner, at the Trial.

At the Grand Central-Mammoth trial at Nephi yesterday, Manager Loose and President Holbrook were upon the stand testifying on behalf of the defense. The Grand Central expert, W. W. Wilson, who was on the stand Wednesday, was cross-examined at length by Mr. John M. Zane. The witness said that the apex of the Mammoth vein ascended from the apex cave on the south of lot 38, and then descended to the Cunningham stope, the top of the stope being higher than the apex cave.

The highest point on the Buterfly stope he fixed as the apex in the Grand Central. On the 700 level the apex was fixed to the roof of the stope. The witness then traced the apex from the apex cave on lot 33 to the 700 Grand Central level, and thence to the top of the Butterfly stope near the 500 level. He stated that from the Cunningham level to the 700 level the vein dipped 651/2 degrees in-to the earth. His testimony regarding the cross-section between co-ordenate lines 5.800 and 5,900 was the same as given previously by Mr. Bert

M. K. Harkness, an expert miner, was the next to take the stand. The wit-ness said that after a careful inspec-tion he found no veins north of the Cunningham stope. He attached no im-portance to the iron stained limestone. He said that the ground was barren on Corn-the various levels north, stating that 36%@%. ore was rarely encountered.

Mr. Harkness went through continu-ous stoping, he said, from the Butterfly stope in the Grand Central to the Apex tunnel on the south line of lot He gave the strike of the ore bodles beginning at the Apex tunnel, run-ning through the Butterfly stope, as northern, northwesterly and northerly Upon cross-examination Mr. Harkness denied strongly that he had ever admitted to Mr. Samuel McIntyre that the apex could be traced to the Mammoth

President Holbrook of the Grand Central then took the stand. He stated that the output of the mine had been \$1,400,000, of which \$530,000 had been paid out in dividends. Referring to a conver-sation with Samuel and William McIntyre Mr. Holbrook said that it was agreed between them that the side lines of the two properties should be respected. In February of the same year, 1898 atter was discussed again with the McIntyres and Mr. Cunningham The Mammoth people at that time had entered the Silveropolis, and Mr. Samuel McIntyre said he had never agreed butchers 4.65 74.87%; good to choice not to follow the ore.

Manager Loose followed and testified as a miner. He said that before the purchase of the Consort and Silveropolis mining claims for the Grand Central he had examined the ground thor-oughly, and came to the conclusion that the apex was south of the southerly end line of the Silveropolis extended. Upon cross-examination Mr. Loose said he did not consider the ore running through the Grand Central and Mam-moth a voin, but rather a pipe of ore in the limestone. He said he did not think a vein could exist without well defined foot wall and hanging wal He said that the dip of these pipes of ore had a generally eastern dip, though there was easterly dip in the Butterfly stope. He testified that the ore on the 1,600 level was east of that on the 950

# ACTIVE AND IRREGULAR.

Gains and Losses Were About Evenly Distributed Among Many Stocks.

Heavy Schling in Specialties-Offerings. Were Numerous but All Were Not Absorbed.

New York, Dec. 7.-The market pened active and very irregular. Changes were quite evenly distributed between gains and losses and in some cases were wide. In the railroad list stocks. Northern Pacific fell %. Analgamated Copper rose 1½, while Tennessee Coal fell with some violence 2½ points. A number of other specialties showed large fractional losses. A heavy selling movement in the special ties followed a 2 point break in Amal gamated Copper. Steel and Wire, Rub-ber, Consolidated Gas and Tobacco vielded 1 to 1% points. Scarcely any effect was produced on the railway list outside of New York Central and New Jersey Central, which fell 1 to 2% points respectively. Railroads then ame dull, but there was a good demand for special stocks. A rally of 1 to 1% in Tennessee Coal, Amalgamated Copper, Steel and Wire and Consolidated Gas strengthened the general market temporarily. At 11 o'clock weakness was quite general in the active railroads and new weak spots de-

eloped in specialties. The demand was not sufficient to aborb the free offerings of all classes of tooks and extreme losses ran to 24 coints in some of the specialties and a coint in Northern Pacific. Sugar was ealt in ex-dividend and the rally in from 123% to 124% and of two points Tennessee Coal was unavalling to ock the decline. Amalgamated Copr was forced down 3% from the top. Louis and San Francisco second referred advanced an extreme 2% to

Large purchases of Eric generals was the feature of the bond market. The price touched 80%, but the entire gain was lost in sympathy with the re-ac-The Erie securities recovered to about the high level. New York, Chicago & St. Louis second preferred St. Louis second preferred rose 3%. Hubber rallied 2%, and the preferred 2, but did not hold. Outside of these stocks the upward movement was moderate. The closing was moderately ac-

tive and heavy, with renewed weakness in the specialties.

# STOCKHOLDERS ARE HISSED

English Stockholders of Strattons Independence Vote " No Confidence."

John Hays Hammond Condemned as Manager of the Mine-The Meeting Broke Up in a Blot

London, Dec. 7,-The Strattons Independence mine shareholders today passed a vote of no confidence in the board of directors, after one of the stormlest city meetings on revord.

The directors were hissed and hooted and the words "scandalous" and "disgraceful" and accusations of fraud. were hurled groadcast.

The earl of Chesterfield, who presided, read a cablegram from John Hays Hammond, the American engineer, asking him to announce to the meeting that Mr. Hammond's connection with the mine dated from after the shortage of ore reserves was discovered. His lordship proceeded to say that a cable message received from State Geologist Rickard, of Colorado, dated October 20th, conveyed the first intimation of serious misrepresentation on the part of the old management in regard to the value of the ores. This was not published because it was vague was not published because it was tague and incomplete, but had the directors had any conception of the foreshad-owed discrepancy of \$12,000,000 as shown in the subsequent report of Mr. Hammond dated November 24th, they would certainly have made Mr. Rick-

ards' statement public. Mr. Rickards made a personal explanation at the meeting and a long and animated discussion, marked by wild disorder and much exaggeration, followed. Chaos reigned, amidst which the great mass of shareholders left. Lord Chesterfield then declared the report carried, though the meeting had previously voted to postpone it's consideration for two months.

### garananananananananananana LIVE STOCK CONVENTION.

munnmunnmunt Secretary Martin's dally mail is becoming larger every day, each and every letter being full of cheering news to the promoters of the fourth annual

convention. Five hundred "promotion" committees have been appointed, ranging in size from three to fifteen members, according to the size of the city. ommittees have been appointed in all the large towns between the Parfic coast and Ohio, and embrace all the live stock States. The duty of the committees is to spread advertising matter rehey are doing their work well and umerous newspapers throughout the and have published the official call in

Already the various railroad companies interested in the coming live stock convention here are talking in regard to special trains. In addition to the cheap fares and extra trains which will be run through for the occasion the Union Pacific, Burlington and several other big lines have signified their in-tention of having special cars with rail-road officials on the spot by the time the convention is called to order.

There will be a special train run from

while some fancy cattle from outside States will be an addition to the show which will essentially be the finest that has ever been held in Utah from the standpoint of pedigree stock. The Newcomb herd of Galloways, which se cured a first prize at the international show in Chicago this week, will b seen here, and it goes without saying that the fact that they were raised by Dr. McLean on his ranch at La Jara, Colo., will add interest to the occasion. The manager of the ranch D. E. Newcombe, has written to the doctor to the effect that he will be here with his famous calves, so the people here may expect a treat. As has al-ready been stated before the famous herd of John Sparks will be on hand, while the Herefords of Kirk Armour will, in all probability, be placed on exhibition at the same time.

In speaking about the McLean herd

In speaking about the McLean herd the Denver Times to hand has the fol-lowing to say:

"The dispatches say that Daniel E. Newcomb of La Jara, Colo., secured first prize in the range-bred calf class. His exhibit was a bunch of twenty Galleways that had been bred from registered bulls and high-grade cows. His competitors were from the largest His competitors were from the largest in the world that range in Wyoming and the Texas Panhandle, but the judges were unanimous in awarding them first premium. Besides this winning, these calves also took first and third prizes in competition with calves from Colorado and western Kansas and Nebraska, and sweepstakes in compe-tition with Texas, Colorado and Wyoning. His cash prizes amounted to

"Mr. Newcomb has been breeding Galloway cattle in the San Luls valley for about ten years. He has an ideal location for the purpose, and as he is a student of this particular breed, he is making a success of his enterprise. Hundreds of his products are spread over Colorado, Texas, Wyoming, Kan-sas and Nebraska and last year, after sas and Nebraska and last year, after his first prize winnings at the Denver range cattle show, where he swept ev-erything before him, he built up a paying trade in some of the States east of the Mississippi."

The citizens of the Utah metropolis

are awaking to the importance and magnitude of the approaching meeting of the National Live Stock association in that city, and the indications are now that the good people of that State are going to set a pace for hospitality to stockmen that will make other cities ufraid to tackle the job and hope to win out with credit, says the Omaha Journal-Stockman. All kinds of schemes are being planned to give the visiting stockmen a good time, and it has even been suggested that the waters from the hot springs be piped over to the lake and the salt waters thus heated to a point that will make bathing pleas-ant. The "Mormon" Church has con-tributed the use of the Tabernacle, one of the wonderful buildings of the world, and in this one evening will be given a grand concert. Backed by the great orand the musical talent for which Salt Lake is famous, this will be a rare treat. There will be one evening of opera by home talent, a grand reception opera by home talent, a grand reception at the Knutsford hetel, a smoker and Dutch lunch, a trip to the great mines at Park City, a trip to the beach at Salt Lake, a ball and numerous other attractions. All of these entertainments are not to laterfere with the regular business of the convention, so it will be seen that Sait Lake will be a busy buy them. place during the convention.

Committees are in charge of the work of finding plenty of accommodation for the visitors, so with the large hotel ac-commodations of the city, there will be

is no trouble whatever. The indications are that the attendance from the East will be unusually large, as parties are already being made up in several of the large cities. Omaha, Chicago, Kansas City, and St. Joseph will all send delegations, and Texas is going in a crowd large enough to fill a special train, if present plans are carried out. Denver xpects to be there in force, so Salt Lake may as well prepare for a crowd.

Things are booming out in Salt Lake City and big preparations are being made for the convention of cattlemen to be held in that city next month, says the Denver Stockman. Sait Lake people are determined that all who attend the meeting of the National Live Stock association in January shall go away singing the praises of Salt Lake City and her people. The meeting will be business, strictly business, for Secretary Martin has said so, but a few things will be rung in on the side that not interfere with the business of the convention, and at the same will make all who attend go home feeling glad that they went. Salt Lake people are determined to outdo the Texans and are getting up a program that will be hard to beat. Everybody there very much interested in working rd to make it a success. They will hard to make it a success. take cure of the crowd in excellent shape, and are preparing a program for their entertainment which will equal anything we have ever given in Denver even with the possible exception of the Barbacue, which now has a world's record. Their intention is to entertain the crowd at the theaters the first night; the second night there will be a concert by the Tabernacle choir. which everybody who is a stranger there will want to hear; on the third reception at the Knutsford with a counter attraction in the shape of a smoker

TO CURE A COLD IN ONE DAY At the regular monthly meeting of the Live Stock exchange, in Omaha, on Monday, there was a very large at-tendance. The matter of the selection nine delegates to the meeting of the National Live Stock association at Sal December 17th was set as the date for nominating officers for the ensuing year.

on some of the side streets of the city. Much interest is being worked up here

train. The Colorado Special, with her crack band, was one of the features of

the Fort Worth meeting, and prepara-tions are now under way to eclipse all

### ROYAL HOARDS TREASURES. Priceless Possessions of the Queen, the Czar and the Sultan.

Within the walls of two small rooms at Windsor castle is stored plate of gold and silver sufficiently valuable to make its owner a millionaire nearly twice over. A single gold dinner service for 150 guests is valued at £800.000; a gold peacock, whose body quivers in the radiance of hundreds of costly gems, is worth £40,000; a tiger's head of gold, with eyes and teeth of crystal, and a solid ingot of gold for its tongue; monster dishes, stands, flagons, shields, all of pure gold; rosewater fountains, fonts, enormous wine-coolers and punchbowls, exquisitely chased cups, each of which is a fortune in miniature, are all there in profusion. The queen's china is valued at more than £300,000, and a single dessert service of Sevres represents a cabinet min-

ister's income in perpetuity, while the very jeweis in her crown are worth a third of a million pounds. It is said that two alone among the countless contents of the Shah's treasure-house are worth all the queen's possessions, costly as they are.

One is a globe of gold, on which all the countries of the earth are marked with mosaics of gems-diamonds, rubies, sapphires, emeralds, and all the rarest of precious stones-to the num-ber of tens of thousands; while, as if this were not a sufficient display of riches, around the pedestal on which the globe stands are piled heaps of enormous gold coins, every one of which is worth £35. The value of this wonderful globe is £1,000,000. Near the globe there stands a glass

case two feet long and a foot and a half wide and high, which is nearly two-thirds full of the rarest pearls, care-fully selected for many centuries, and a single handful of which would be worth a king's ransom."

The Czar of Russia, too, has more treasures than even he can value. The

crowns alone of himself and his consort are said to be worth £3,000,000, and among the treasures of the Klemlin are rare jewels, every one of which is a history of itself, and gold and silver vessels so heavy that the strongest man connnot lift them. The value of the Kremlin treasures alone great that it would take an entire year's British revenue to purchase hem, assuming that it were possible to

The sultan's treasures are so valuable that if he were to take £1,000,000 from them every day for a month there the visitors, so with the large hotel accommodations of the city, there will be plenty of room for all who come. Like Denver, Salt Lake is so used to taking care of an army of tourists every year, that a little party of five or six hundred

bowls of solid gold full to the brim with pearls and other precious stones, gain plate which weighs many tons, and in fact, gold and jewels in aimost error that human art can fashion. extravagint and artistic Many of the native chiefs of insia

count their treasures, many handed down through countless centuries, in millions of pounds. Perhaps the richest of them all belong to the Gaekwars of Baroda, whose gems alone are valued at hearly £3,000,000. Among other treasures is a carpet made entirely of pearls and dia-monds, all cunningly matched and blended and valued at a third of a mil-

## lion pounds.-Tit Bits.
