

MINING, BUSINESS AND STOCKS

SALT LAKE ROUTE
AFTER TONNAGE

Representatives of Railroad Visit
Erickson and West Tintic Dis-
trict for Reconnaissance.

SUNDAY TO BE OBSERVED.

New Practice About to be in Vogue
At Centennial Eureka—Mam-
moth Shipments.

Special Correspondence.

Eureka, Feb. 14.—There is a report
current throughout the district that
representatives of the San Pedro Rail-
way company have been looking over
parts of the West Tintic, Erickson and
Deep Creek mining districts recently,
with the view in mind of ascertaining
the amount of ore available for ship-
ment in case a railroad should be built
into that section. It will be remem-
bered that a survey was run out into
the Erickson district from Tintic Junction
by that company last spring.

General Manager C. E. Allen was at
the Centennial Eureka mine Wednes-
day. He found everything in splendid
condition and the usual force keeping
the output of the property up to about 50
carloads each week. It has been learned
that employees will be allowed a lay-
off every Sunday commencing in March
and that their wages will be raised to
where they were before the recent re-
duction. Machine men and timbermen
will receive \$3.25 per day, miners \$3.00
and truckers \$2.75. This will be good
news to the Centennial Eureka em-
ployees. Some of the Tintic mines, par-
ticularly those which "Uncle" Jesse
Knight presides over, have allowed
employees every Sunday off. It is claimed
that by so doing more work can be
obtained from the men, and it is cer-
tainly more satisfactory to them.

Seely, George W. Ritter spent Tuesday
and Wednesday at the Eureka Hill.
This mine is one of the busiest prop-
erties in the district at this time, and a
great amount of ore is being shipped
out. The work is being carried on en-
tirely by leasers, nearly all of them
reporting as doing well.

It is learned from Mammoth that the
Mammoth Mining company will soon
begin the shipment of ore to the smel-
ter. The United States company will
handle the product of the Mammoth
company, and shipments will resume
within a week and not later than two
weeks. The mine has been operating
the usual force right along, and con-
sequently there is a great amount of ore
piled up on the dumps. There are thou-
sands of tons of this rich ore piled in
the ore bins and other places at the
mine. When shipments are taken up
again there will be a continual
stream en route to the smelter. The
Mammoth company has another ship-
ment of its rich gold ore sacked and
ready to be marketed. It is quietly
tipped off that this car is even richer
than the one which brought the com-
pany over \$100,000 a few months ago.

OF MINING EXCHANGE.
Trading This Week Has Been Dull—
Today's Quotations.

The week on the mining exchange
has not seen very animated trading in
stocks. There has been a tendency
towards lower prices and generally a
single one of the list has escaped end-
ing up with a shrinkage to its credit.
The market was not exceptional and the
total sales of both the regular and open
board calls only footed up to a little
more than \$10,000, representing the
value of the stocks transferred.

The closing quotations and sales today
were:

SEVER CONSOLIDATED.

Gold Mountain Company is in a Bad
Way Financially.

Charles Lammerdsdorf was up from
Richfield yesterday on business in con-
nection with the Sever Consolidated
revelship. The company has out-
standing obligations amounting to al-
most \$250,000 but as Mr. Lammerdsdorf
holds a first mortgage on the properties
he is not particularly concerned about
the purchase price, his claim, takes
precedence. One of the largest creditors
is the Salt Lake Hardware company
which has a claim aggregating close
to \$50,000 for mill and mine equipment
supplied; while there is owing for la-
bor, Mr. Lammerdsdorf says, some-
where near \$18,000.

As security for the loan is in hard straits
and will be necessary for shareholders
to put up some pretty stiff assessments
if they expect to place the com-
pany on its feet again. It seems more
probable that they will be sold for the
benefit of creditors.

JUAB OIL FIELD.

The management of the Juab Oil com-
pany expects to begin drilling for oil in
the Juab field early next month. This
company is presently placed an order for
a drilling machine and equipment costing
about \$7,000.

MINING PROPERTY INVOLVED.

Mary J. Stringham today filed a suit
in the district court against Ammon
Stringham, Thomas Stringham, Clarence
Stringham, Francis H. Stringham,
Richard Connery, G. D. Schlip, H.
Wright, the Utah Copper company,
Bingham Consolidated Mining & Smel-
ting company, B. B. & C. Spencer
company and the Rio Grande Western
Railroad company, to recover posses-
sion of certain placer mining claims,
houses, improvements, etc., situated in
section 18, township 3 south, range 2
west, Salt Lake meridian.

WANT SMELTER LOCATION.

Tintic Commercial Club Working for
Independent Plant.

Special Correspondence.
Eureka, Feb. 14.—The Tintic Com-
mercial club is endeavoring to influence
in an endeavor to have the proposed
independent smelter plant erected in
the Tintic valley, and at a meeting of
the club a resolution was drawn up
providing that the Tintic Mines
Owners' association. The resolution
outlines some of the several reasons
why the smelter should be erected in
this valley.

BUTTE COALITION AFFAIRS.

(Pollock Special Wire.)

Boston, Feb. 15.—There has been no
production from the mines of the Butte
Coalition Co. since last November. Ex-
ploration and development, however,
are proceeding actively, and at a
recent meeting of the directors it was
voted to appropriate \$30,000 per month
for exploration purposes.

The directors meet for dividend ac-
count on Tuesday next. When the
company resumes operations, its mines
will be in a position to supply close
to 3,000 tons of ore daily, which com-
pares with 1,000 to 1,500 tons that were
being hoisted before the shut-down.

SALT LAKE BANK CLEARINGS

DAILY LOG
REPORT IS ISSUED

Receipts from All Sources Last
Year More Than Half Mil-
lion Dollars.

STATEMENT OF MANAGER.

Costs of Operation Mentioned—New
Electric Haulage System
Installed.

The annual report of the Daily Log
Mining company covering the opera-
tions of that corporation during the
year 1907, was released today and the
exhibit shows the receipts from all
sources to have been \$504,175, with the
total expenditures footing up \$456,583.31. In this connection it may be
stated that at the beginning of the year
there was a cash balance on hand
amounting to \$269,038.37, which, after
making the foregoing additions and de-
ductions, left a balance in the treasury
on Dec. 31 of \$137,595.84.

The company received from the sale
of ores, \$492,790.14, which sum is made
up from the following items: Concen-
trate sales, \$289,812.16; crude ore, \$154,275.33; iron middlings, \$48,148.30; zinc
middlings, \$340.33. The Grassell Chem-
ical company, with whom the company
has contracted a large tonnage of zinc
middlings made an advance of \$5,750
and there was received for interest ac-
count, \$5,635. The heaviest item of ex-
pense was for labor and salaries
amounting to \$176,391.87.

The total cost of mining, milling and
marketing 7,614 tons of ore is figured
at \$4.85 per ton, or a total of \$374,469.99.
In his statement, General Manager
G. W. Lambourne says:

"The operation of the properties of
your company during the past year has
not turned out to be as profitable as we
had hoped for, but I am glad to say
that this has not been through the lack
of effort on the part of those entrusted
with the company's affairs or the hand-
ling of the mine and mill. On account
of the unusual volume of surface work
that commenced to bother early in the
summer we were compelled to abandon
work and extraction of ore on the 1,500
foot level for a period covering nearly
four months. This, as well as the fall-
ing off in the production of sulphur and
a failure to find a market for our
zinc ore, decided our directors, at a
meeting in June, to suspend the pay-
ment of dividends and hold a substan-
tial reserve in the treasury for gen-
eral prospecting an exploratory work.
Dividends Nos. 1 and 2 called for the
disbursement of \$224,850."

Mr. Lambourne, in referring to the
matter of listing the stock of the com-
pany on the eastern exchanges, has
been previously planned, states that
practically all the necessary steps had
to be taken when the slump came on
and thereupon the directors deemed
it inadvisable to go on with the propo-
sition pending more favorable action.
The company is endeavoring to erect a
new plant being erected by the
Grassell chemical company, pending com-
pletion, and will probably be placed in
commission next month and will start
off handling about 50 tons a day. Mr.
Lambourne said that 15,000 tons of zinc
middlings from the mill awaiting treat-
ment.

The readers of this paper will be
pleased to learn that there is at least
one dreaded disease that science has
been able to cure in all its stages, and
that is Catarrh. Hall's Catarrh Cure is
the only positive cure now known to
the medical fraternity. Catarrh being
a constitutional disease, requires a con-
stitutional treatment. Hall's Catarrh
Cure is taken internally, acting direct-
ly upon the blood and mucous surfaces
of the system, thereby destroying the
foundation of the disease and giving
the patient strength by building up the
constitution and assisting nature in
doing its work. The proprietors have
so far sold in its curative power
that they offer One Hundred Dollars for
any case that it fails to cure. Send for
list of testimonials.
