

SPRING TRADING FAIRLY LAUNCHED

Bank Clearings Continue to
Creep Up and Prosperity
Is in Evidence.

PLENTY OF MONEY IN BANKS

Only the High Prices of Food Pro-
ducts Remain to Worry and
Cause Apprehension.

There have been no special events in local financial circles this week beyond the ripple caused by the starting of the new Peoples' bank at Bingham Junction. There is plenty of money in the local banks, just as there is in other western banks, and there is no reason to believe that the clearinghouse of irrigation and other enterprises at good rates of interest. The clearings continue to creep up, the increase on the 6th inst. being nearly \$700,000. Traces of the panic have almost disappeared, and only the high cost of food products remain to worry and cause apprehension.

Henry Clews in his circular letter says:

"The crops are already a matter of earnest solicitude for the country in great need of larger crops. We not only need them on behalf of our own people to give them an abundance of food at lower prices, but we also need them for the sake of stimulating exports. Our shipments of domestic produce for the last few months have been steadily declining, owing to relative scarcity and high prices. Meanwhile, our imports have continued to increase, partly because of a better demand for raw materials in domestic industry and partly owing to expected tariff increases. The result has been an increased unfavorable balance of trade, which accounts for the recent large outflow of gold. We have now returned practically all the \$10,000,000 of gold brought here after the panic. For the time being further large shipments are probably at an end, unless the Argentine circumstances the season for gold exports should be about over, but it remains to be seen what the effect will be of a continued adverse trade balance. Some important new security issues are in prospect for Union Pacific, Southern Pacific, St. Paul, N. Y. Central, Erie and several other important systems, which are likely to be in the market before long, and as considerable of these will be placed abroad the supply of finance bills consequent thereon should make up for any deficiency in our exports."

HARDWARE BRISK.
The hardware trade reports conditions so far this month as bright and encouraging, as the sales are far in excess of those of the two previous months. Large sized shipments of staples are being sent out, 75 per cent of them being spring goods. Tentative orders in this line had been placed late last year for many spring goods, but

S.S.S. CURES OLD SORES

If an old sore existed simply because the flesh was diseased at that particular spot, it would be an easy matter to apply some remedy directly to the place that would kill the germs; or the diseased flesh might be removed by a surgical operation and a cure effected. But the very fact that old sores resist every form of local or external treatment, and even return after being cut away, shows that back of them is a morbid cause which must be removed before a cure can result. Just as long as the pollution continues in the blood, the ulcer remains an open cesspool for the deposit of impurities which the circulation throws off. S.S.S. cures Old Sores by purifying the blood. It removes every trace of impurity and taint from the circulation, and thus completely does away with the cause. When S.S.S. has cleansed the blood, the sore begins to heal, and it is not a surface cure, but the healing process begins at the bottom; soon the diseased tissue, the inflammation leaves, and the place fills in with firm, healthy flesh. Under the purifying and tonic effects of S.S.S. the system is built up and those whose health has been impaired by the drain and worry of an old sore will be doubly benefited by its use. Book on Sores and Ulcers and any medical advice free to all who write.

THE SWIFT SPECIFIC CO., ATLANTA, GA.

with the certainty of prosperous times, the tentative orders are made a certainty. There is a strong demand for barbed wire, rope, household furnishings, particularly granite and tileware, while the call for fishing tackle is more than doubled. The call for tackle comes most from southern Idaho, where the fish and game laws are more liberal than in Utah. Lawn mowers are selling readily, so is garden hose and the various kinds of garden utensils. Collections are improving, the outlook in this line being far better than last month.

LUMBER OUTLOOK.

The lumber trade is reported rather muddled. The manufacturers on the coast are dissatisfied with the price they are getting, while at the same time the demand is increasing. Many mills have been idle, so that a considerable amount of raw material which they would like to ship at remunerative prices, there is an uneasiness in the retail trade, and a continuance of the price is predicted for the next 30 days. There is nothing doing this week in saws and shingles from the east.

WHOLESALE DRY GOODS.

The wholesale dry goods market has been quiet this week, though traveling

men report gratifying sales in goods for the fall trade. Cotton fabrics have not been in strong demand, though the indications point toward maintenance of present prices. Jobbers report that miscellaneous fabrics, silks, crepes, with some well known brand are receiving the attention given to them when orders are plentiful, and low grade fabrics accumulate largely in warehouses. The market for the better grades of chevilles, checks and plaids, is strong enough to prevent accumulations. Cotton duck does not improve in price, and the demand has been little more than general. Novelty goods, such as motorized, poplins and other specialties are selling well in wash goods. There is a demand for twilled face fabrics in fine yards interspersed with satin stripes. Knit goods are quiet, owing to lack of supply in light weights, and the market is very lax of desirable spring and summer knit underwear. But there is a steady demand for bathings, towels and light-weight hosiery is in greater demand and shorter supply than ever.

BUSINESS, REAL ESTATE AND BUILDING

Today the Consolidated Wagon & Machine Co. pays its quarterly dividend of 2 per cent amounting to \$30,000. At 2 p. m. today is the meeting of the Utah-Idaho Sugar Co., which is held annually. The report shows that the past season has been good, and the company is well able to continue its quarterly dividends of 18 per cent or 7 per cent per annum on the preferred stock.

Consolidated Wagon & Machine Co. and Utah-Idaho Sugar Co. preferred stocks have been the most largely dealt in during the week.

Building permits issued for the first nine days of April, 1909, \$216,650.
Building permits issued for the same period 1908, \$184,650.
Increase \$34,550.
Building Inspector A. B. Hirth is having a busy time this far this month in issuing building permits, and indications are that the record for the month will easily exceed that of last month. The figures up to last night were \$215,500, which means that in the first nine days

of this month more than half of the record total for last month has been reached. At the same rate the permits for the month would reach to over \$700,000.

The University Investment company filed its articles of incorporation yesterday with the county clerk. Its capital stock amounts to \$40,000, divided into shares of \$1 each. Of this amount 16,500 shares have been taken over in payment of the University dormitory and lot 5, block 25, plat 5, Salt Lake City survey. Charles B. Stewart is president; Fred A. Anderson, vice president, and A. H. Taylor, secretary and treasurer.

The Randolph Utility & Power company filed its articles of incorporation yesterday with the secretary of state. Its capital stock amounts to \$10,000, divided into shares of \$1 each. Of this amount 600 has been paid up and the remainder is set aside as treasury stock. The company will have offices at Randolph, Rich county, and the purpose of the organization is to furnish the surrounding country with power for private and public use. The officers are: John Kennedy, president; J. E. Stinson, vice president; A. E. Wing, secretary, and J. C. Gray, treasurer.

The Salt Lake Security and Trust company is building a number of cottages in Hamilton place. They are five-room dwellings of similar design, and costing about \$2,000 each. This week the company took out building permits for 16 of these. The cottages having an aggregate value of \$32,000.

Charles Olsen is getting out plans for the erection of a \$45,000 bungalow on Center street.

G. K. Smith is erecting a nine-room house on East First street. It will be two stories and cost \$3,500.

George W. Felt has accepted plans for a fine home on McClelland avenue, near Tenth South. It will contain 10 rooms and the interior finish will be largely of mahogany. The cost of the house is estimated at close to \$7,000.

Bids will be opened and the contract will be let on the 15th inst. for the erection of the new Holmes building on Second South and State streets. Contractors have been asked to figure on three stories and the basement, and to also give an estimate of the cost of a fourth floor. The dimensions of the building are 115 1/2 feet on Second South and 105 feet on State street. In the basement a cafe will be built which will be 7x10 1/2 feet. The specifications call for fire finish throughout, excepting the main entrance and lobby, where oak and marble will be used.

A heavy inquiry is reported concerning the auction sale which is to take place on the ground next Thursday, April 15, when lots in the new "Flat C" of Toole city will be offered for sale. The property belongs to the Toole Improvement company and is located about four miles from the site of the new smelter. The company also possesses good water rights and it anticipates that the new addition will have a population of upwards of 10,000 people when the smelter is in full blast. A special train will be run to Toole from Salt Lake on the morning of the 15th inst.

The plans for the splendid new residence of Colonel E. A. Wall, which is to be erected on South Temple street, have been completed and the architect is awaiting the arrival of the plans from the east when they will be submitted to him for approval. This done, it is expected that bids will be called for immediately and as early as possible in the season work will be started on construction.

Work has been started on the \$15,000 building for Dr. Paul H. Green of Toole City. The building will contain office rooms on the second story, and the ground floor will be arranged for stores. Ashton brothers of this city have the contract and it is said that the new building will make a very creditable showing in Toole.

The walls of the Vermont building on South Temple are all near the second story with the exception of part of the west wall which had to be torn out owing to some trouble with cement work which was being put in near the second floor.

Ashton brothers have started on the foundation of the Jenkins house on east First South, which will contain about 10 rooms and cost between \$7,000 and \$8,000. They are also finishing a building on Second South between Sixth and Seventh West containing four flats above and stores beneath; also two double houses on the west side.

At the cost of several thousand dollars the Church of Jesus Christ of Latter-day Saints has remodeled the old baptismal font and rooms in the tabernacle. The work is nearing completion.

The Deseret gymnasium makes an imposing structure now that the steel and iron frame is completed.

The McChrystal building on north Main is up to the first story.

A small force of men are engaged this week at the McIntyre building, north of McCormick bank, making preparations to continue the work on erection left by Contractor Vanderhorst of San Francisco.

The contract for the erection of the Commercial club building will be let, it is expected, on April 15. The building is to be erected on the corner of Exchange place and Cactus street, and will cost in the neighborhood of \$250,000.

"I'D RATHER DIE, DOCTOR,
than have my feet cut off," said M. L. Brigham, of Princeton, Ill., "but you'll die from gangrene, which had eaten away eight toes if you don't, said all doctors. Instead, he used Bucklen's Arnica Salve till wholly cured. Its cures of Eczema, Fever Sores, Boils, Burns and Piles astonish the world. 50c at Z. C. M. I. Drug Dept., 112 1/2 So. Main St., Salt Lake City."

QUIET WEEK IN REALTY MARKET

Sizeable Deals Have Been Few
In Number, Though Building Is Active.

HUMMING IN EXCHANGE PLACE

Concrete Work on Mining Exchange
Is Ready to Begin—Paving Preparations Being Started.

Real estate transactions of any size have been rather small in number during the week, but there is far from being any sign of weakness in the market. The building business has opened out well with the approach of fine weather. Never in the history of this city has the same activity been seen, and indications are that development before the year is out will show that the building boom, which has apparently struck Salt Lake, has only just begun.

A number of big buildings are contemplated, and under way, prominent among them being the huge Cover apartment house to be erected at the

Chicago and coast steamers on the St. Lawrence route, 30 and 31 Dearborn St., Chicago, Ill.

corner of A and South Temple streets at a cost of between \$200,000 and \$300,000. Preparations are now being made for the structure by tearing down the houses now on the ground. The same thing is being done at the corner of Second South and State for the Holmes building, and farther down State street the excavation is nearly completed for another building being erected by Gus Holmes. At the corner of State and Third South the foundation of the one-story Wick building is now being put in, and lumber and other material is on the ground. Farther down the street the walls of the American hotel building are well along to the first story. State street is manifestly the center of attraction just now in the building line.

On Main the most interesting thing in the tests that are being made of the ground on the old Walker property at the corner of Fourth South and Main street, it is said, to allow of accurate specifications being made for the foundation of the gigantic hotel which has been under consideration by Samuel Newhouse for some time past.

Things are humming around Exchange Place. Sidewalks are being put in around the Newhouse buildings the street is being graded for paving, the foundation of the Commercial club building is in and carpenters have just about completed all the mounds for the reinforced concrete foundation of the mining exchange. Other large buildings west of Main are progressing satisfactorily.

You Will Need an Oil Stove

When warm days and the kitchen fire make cooking a burden—then is the time to try a New Perfection Wick Blue Flame Oil Cook-Stove. Marvelous how this stove does away with kitchen discomforts—how cool it keeps the room in comparison with conditions when the coal fire was burning. The

NEW PERFECTION Wick Blue Flame Oil Cook-Stove

is the only oil stove built with a CABINET TOP for holding plates and keeping food hot after cooking. Also has useful drop shelves on which to stand the coffee pot or teapot after removing from burner. Fitted with two nickeled racks for towels. A marvel of comfort, simplicity and convenience. Made in three sizes—with or without Cabinet Top. If not with your dealer, write our nearest agency.

Just such a The Rayo Lamp as every one wants—handy enough for the parlor; strong enough for the kitchen, camp or cottage; bright enough for every occasion. If not with your dealer, write our nearest agency.

Stop coughing! Coughing rasps and tears. Stop it! Coughing prepares the throat and lungs for more trouble. Stop it! There is nothing so bad for a cough as coughing. Stop it! Ayer's Cherry Pectoral is a medicine for coughs and colds, a regular doctor's medicine. Use it! Ask your doctor if this is not good advice.

Say Mr. Investor!

We have been telling you about the opportunity of buying treasury stock of the

Sunnybrook Coal And Coke Co.

At 25c Per Share—Well, the allotment is almost gone. If you want to share in our Prosperity you must act now.

Our Property Holdings are over 800 Acres of Rich Coal Land in Carbon County and the Mine is Shipping Now.

This sale of stock is for the purpose of further equipping the property and increasing the output. The physical condition of the mines at this time warrant us in saying that this stock is NOW worth PAR. We mean by this that for every share of stock issued there is ONE DOLLAR'S worth of property back of it. When the added equipment is installed and the shipments begin for the winter, the stock WILL GO to par. This alone will make you a net profit of 75 cents per share. With the payment of the first dividend, it will be much higher.

Our main tunnel No. 1 vein has opened up thousands of tons of coal, and we are now shipping to Salt Lake. This being the nearest mine to Salt Lake City gives us the advantage of a close market for all the coal we can produce.

Experts pronounce our coal of the highest quality, and consumers who have used it will use no other.

One dealer in Goldfield, Nevada, sold Sunnybrook coal last winter at \$18 per ton, which was \$3 more than asked for any other coal. There is a reason for this; that reason is that our coal gave heat, lasted longer and contained less ash than any other coal.

The company has no difficulty in disposing of its product—the difficulty lies in producing enough coal for the demand, which is not possible with the present equipment.

Shipments of only 250 tons daily is sufficient to pay dividends of 18 per cent on the issued stock. We want to maintain shipments of 1,000 daily. It is for the purpose of adding this necessary equipment that this stock is placed on the market at 25 CENTS PER SHARE. You can buy in any amount from 100 shares up; preferably not more than 1,000 shares to one person as a large list of stockholders makes a large list of consumers.

This IS NOT a speculation, but an INVESTMENT. We advise IMMEDIATE purchase of this stock, for this offer will not stand very long, the allotment being small, it will be taken quickly.

The officers of the company are among the most successful and best known business men of the city. You can feel safe when associated with them in any business.

OFFICERS
W. S. McCORMICK, President GEO. W. MORGAN, Vice-President O. G. SNOW, Secy.
RODNEY T. BADGER, Treasurer P. W. GORMAN, Director. J. G. POTTS, Director.

Call at the company's offices and see this coal and get full information regarding the property. A postal addressed to the company will bring you the information by mail.
