WEATHER AND CROPS

Hot Days, Cool Nights and High Southerly Winds.

THE OUTLOOK FOR FRUIT GOOD.

Bulletin of the Utah Weather Service, For Week Ending Monday, Aug. 26 5, 1895.

Weather—Hot, dry days, moderately cool nights, high southerly winds and deficient precipitation were the prevailing characteristics of the weather during the past seven days. The precipitation during the week consisted of a few scattering showers which were too light and unevenly distributed for any permanent benefit to crops.

Crops—The weather during the week has been exceptionally fine for cutting, stacking and threshing and putting up hay. In many sections the bulk of the grain has been cut and threshed with results that are calculated to the farmer. Beets, corn and potatoes are reported in good condition, but require more moisture for proper development. The second cutting of lucern is in progress in all sections; the third cutting will be light on account of the prevailing drought and scarcity of water. The outlook for fruit continues good, although some of it has prematurely ripened and dropped from the trees. The high winds of the latter part of the week knocked many apples, peaches and plums from the trees in the northern portion of the Territory.

Remarks of Correspondents.

UINTAH COUNTY.

Vernal—Splendid harvest weather; alfalfa looks well and promises a large second cutting. Fruit of all kinds pretty scarce; tomatoes ripe and in a few days melons.

TOOELE COUNTY.

Tooele—Another dry, hot week. Lucern drying up fast, and fruit winning as we cannot get water to irrigate with; the drought is the most remarkable we have had for years at this time of year.

PIUTE COUNTY.

Kingston—Crops doing well; if frost will stay off long enough; the prospect is good.

WEBER COUNTY.

Harrisville—The week has been hot and dry. By carefully utilizing the water a third crop of lucern will be realized. Alkali seed damaged by grasshoppers. Grain threshing about half done with larger returns than expected, other crops ripening and promising.

KANE COUNTY.

Kanab—Grain most all cut and in stack and threshing commenced; pretty good yield; water looking out well; grapes and other fruit ripe; melons ripe.

WASATCH COUNTY.

Heber—Weather hot and dry; no rain yet. Grain dead ripe; threshers are unable to keep pace with the grain ripening; hay almost all stacked in good condition; second crop of alfalfa being cut; cucumbers and summer squash in market; potatoes have recruited from frost, will make about one-half crop; other crops good and heavy.

WEBER COUNTY.

Huntsville—Spring grain is ripening faster than the binders can get around to it. Straw is short in many places owing to the scarcity of water, but heads appear to be well filled.

Uintah—Corn is growing fast, will make a better crop than expected after the frost. The fruit crop is excellent and quality largely improved by spraying.

BOX ELDER COUNTY.

Box Elder—No rain, a fairly good growing week; corn and vines growing finely. A little rain would be acceptable. Threshing is vigorously pushed.

Plymouth—Good weather for ripening crops. A light shower on 22d, but not enough to do much good. Uintah county. Plaintiffs charge the defendant corporation with negligence and carelessness in failing to have said dust removed from the mine.

Stella Vaughn Monk has brought suit for divorce from Francis Vaughn, charging cruelty and failure to provide. The parties married April 25th, 1894.

Willard—Grain almost all cut; crop rather light; second crop of lucern looking fine; threshing will commence next week; corn and potatoes will be up to the average, also cane; plenty of fruit and plenty of water.

Ogden—Grain harvest progressing well; good crop.

Meadow—Grain all cut and mostly threshed in excellent condition; good average crop. Rain badly needed; dry winds have prevailed; corn and potatoes looking well; every prospect for good crops.

UTAH COUNTY.

Payson—Harvest shows an abundant yield in grain, average over fifty bushels to the acre of all kinds. Weather dry most scarce. High winds done great damage to fruit crops by knocking fruit off the trees.

Pleasant Grove—Weather still dry and warm; crops ripening fast; harvest is over except some late oats; threshing in full blast; dry weather damaging the third crop of lucern; windy weather.

Lake Shore—Threshing now in full blast, the grain crop is turning out the average yield; lucern seed soon ready for cutting; sampling sugar beets; other crops doing well.

Saratoga—According to public opinion here we had the hottest days of the year during the past week, although we have had cool nights. On an ay rage grain has turned out about cent better than last year, with quite an increase in acreage.

Lehi—The hot week dry and hot. Hay about all in; fruit ripening; some peanuts of scarcity of water; potatoes generally light.

WASHINGTON COUNTY.

Pinto—Ground very dry and water low; corn and potatoes doing well; harvesting is over now.
