

Special Business Notices.

REAL Stoneware Jars for Pickles and Preserves. All sizes, not porous. LITTLE & ROUNDTREE.

THE INTENSE ITCHING caused by certain diseases of the skin is speedily allayed by Glenn's Sulphur Soap, which entirely removes every species of eruption, is perfectly safe, and far cleaner and more effective than any ointment.

Facts and Figures.
Every one of the more than 275,000 Charter Oak Stoves now in the hands of as many householders have proved eminently practicable, easily kept in order, doing all kinds of cooking quickly, cleanly and with great economy of fuel and labor.

Don't Slight Your Teeth.
Remember that upon their labor the health of the stomach depends. Keep them perfect, and in order to do so, manipulate them with a brush dipped in the fragrant SOZODONT, once or twice a day.

PAIN PAINT cures all pain. Pains in this city of its cure of rheumatism, diphtheria, colds, etc. To be had only at special agencies.

LYON'S KATHARON.
Lyon's Katharon is an invigorating tonic vegetable preparation, positively free from any mineral or deleterious substances. It is the most delightful of all hair dressing—cooling the head, allaying irritation, curing headache and throbbing temples, making the hair strong, fragrant, glossy and obedient to control, so cleanly to use that it will not soil the finest fabric, causing the hair to grow luxuriantly and beautifully, removing dandruff and pimples. No man or woman can become bald who will use the Lyon's Katharon properly.

What a beautiful lot of Baby Carriages and so very cheap at Dinwiddie's Furniture Store.
Geo. C. FERGUSON, watch maker, 11, First South St., a few doors east of Commercial St.

RED CANYON COAL. Still the old reliable \$6.75 per ton at the yard, \$7.50 delivered. NO EXTRA CHARGE FOR DELIVERY in different places. Full weight and quality of coal guaranteed. A letting and true friend for the rich and poor. Try it one and all. Orders always met with promptness and care. ROBERT SMITH, Agent, Office, 65 Main Street.

WARRANTED DEEDS.—most approved form. Quit Claim Deeds, Mining Deeds, Townsite Deeds, Leases, Official Bonds, Incorporation Bonds, and other Blanks.
HAGAN'S MAGNOLIA BALM. Is an unfailing prescription for a faultless complexion. Sallowiness, roughness, sunburn, moth patches, freckles, discoloration, dark spots, unwholesome paleness, tan, pimples, eruptions, redness and every other kind of blemish disappear like magic by the use of Hagan's Magnolia Balm. A few applications applied with a soft linen cloth will leave the delicate hues of refined beauty and youthful bloom. Its application cannot be detected and it is absolutely free from all possible harm, warranted purely a vegetable extract from the flowers of Southern France.

UNITED ORDER RULES.—Having had frequent enquiries for copies of the "Rules that should be observed by Members of the United Order" since the first edition of the same was all sold, we have lately printed an authorized edition on fine fancy colored paper, on a sheet 12 by 20 inches, suitable for framing or mounting on a stretcher and hanging up in the houses of the Saints. They can be had at this office, or mailed to any address for 10 cents per copy.

Local and Other Matters.

THERMOMETER 90 degrees F. in the shade at 1 p.m. to-day. Rather cloudy.

Henry Hall, there is a letter for you at this office.

Thunder.—There was considerable rumbling of thunder during last night.

Hot.—From four till six o'clock this morning the atmosphere was more hot and sultry than it had been the season before at that time of day.

Undershirts.—The party who lost three cotton undershirts can get them by calling upon Brother George Goddard, at the General Tithing Office.

Broke His Arm.—Yesterday Joseph Edwards, aged about seventeen years, son of Brother Charles Edwards, of the 11th Ward, had his arm accidentally broken.

Accident on the C. P.—On Thursday night about 11 o'clock, twenty-three freight cars were wrecked on the C. P. R. R., about two miles this side of Montello. The train had parted into three sections, one of which turned off the track, and the rest running into it. Sam. Stone, of Ogden, who was on his way home, was the only person injured, as far as we can learn. He had three ribs broken. The accident is a very expensive one for the company.—Ogden Junction, Aug. 5.

All About Politics.—Last evening a couple of young men were discussing election matters in a saloon, when a third party ended the wordy debate by planting a blow upon the nose of one of the contestants. This caused a stir, and the party struck to be put out. In his efforts to get inside to pay back the blow, with liberal interest, he smashed the door with his fists. The striker and the struck were arrested, the former being fined \$10, and the latter \$5, by Justice Pyper.

Wanted to Look Around.—This morning a couple of oxen attached to a wagon, standing just north of Z. C. M. I., became uneasy and moved off, when crash went the wagon box against a tree, damaging it and turning it up to an angle of forty-five. The brutes gazed stolidly at the large building for a moment and then took a line of march for the entrance, as if in search of their master, who was probably trading inside, and who had left a yard fodder with them. A young man signified his objection to their proceeding further in that direction by gesticulating violently with his white Panama and executing some clever gymnastic movements by suddenly throwing his feet upwards to the level of his head, and in the direction of the heads of the oxen, who finally succumbed to that kind of argument.

The Bible and Polygamy.—We have at this office, now ready for sale, a new and revised edition of the pamphlet, of over a hundred pages, "Does the Bible Sanction Polygamy," being a discussion that took place in the New Tabernacle, in this city, August 12th, 13th, and 14th, 1878, between Professor Orson Pratt, one of the Twelve Apostles of the Church of Jesus Christ of Latter-day Saints and Rev. Dr. J. P. Newman, then Chaplain of the United States Senate.

Besides the discussion there is an article, by Professor Pratt, on "Dr. Newman's Marginal Law," and the pamphlet also incorporates three sermons, on the subject of polygamy, delivered respectively by the late President George A. Smith, Elder Orson Pratt and Elder George Q. Cannon.

The work is in clear bold type, printed on good paper and enclosed in neat paper covers. Price 50 cents.
A Splendid Article.—Messrs. Morris & Evans have commenced, at their works, in the Fifth Ward, the manufacture of an article of brick that eclipses, in quality, anything that we have ever seen in this country, and we think a similar verdict will be given by all judges in the line who may take the trouble to examine them. The proprietors have named them the "adamantine brick." They are of a light yellowish color, and their peculiarly hard, stony character renders them very adaptable for foundations, pillars, pavements, etc., as well as being admirably suited for making substantial and durable walls. The process by which they are burned is similar to the fire-brick, in a close kiln, and they are about double the size of the ordinary brick. Specimens are at the warehouse of the firm.

A Terrible Fight with an Indian.—The Indian Supposed Fatal Wounded.—The following special to the News was received by Deseret Telegraph to-day.

"St. George, Aug. 8.
"About 2 o'clock this morning, an Indian from the Muddy, known as Captain Jack, broke into a co-operative store, and attempted to rob the cash till. James G. Bleak, Superintendent, who was sleeping in the store, got a light and went in. As soon as the Indian found he was discovered he attempted to escape by a window, and a terrible fight took place between him and Bleak. Neither had weapons and during the scuffle a large window light was broken, and Bleak was cut with the glass about the head and arms badly. The Indian was put all over the body, but he finally succeeded in escaping. In the meantime Bleak got hold of a gun, which he missed twice at the Indian, but the gun missed fire. The Indian was arrested soon after. When found he had blood almost to death, and will probably die from his wounds. Bleak's wounds are painful, but are not con-

Tremendous Storm.—For an hour or more this afternoon this city and vicinity were visited by an exceedingly heavy thunder, wind, and rain storm, with a little hail at first, lowering the temperature 30 degrees, the thermometer in the shade going down to 61 degrees. The heaviest storm we remember for a long time.

Several trees were blown down, a large one a short distance south of the Townsend House.

The Election.—So far as the returns have been received they show an unusually light vote polled at the election yesterday. Bingham, Silver, Sandy, Granite, Heriman and Little Cottonwood precincts had not yet been heard from this afternoon. From information received by letter, we are given to understand the number of votes polled at Bingham was in the neighborhood of two hundred, for the opposition.

Arizona.—Prescott correspondent of the San Bernardino Times says Arizona is dull, some are disappointed on account of the apparent failure of the crops, the rainfall having been unprecedentedly limited this season. There is also little money circulating in the Territory, and capitalists are shy over investing their means in mining. The "Boston Colony" are "busted," and are bringing suits against those who induced them to leave New England. Poor souls, what a shame to take them so far away from home!

Sunday School Union.—The attendance of superintendents and teachers, at the regular monthly meeting of the Sunday School Union, last night, was unusually large. The musical exercises, which were of an excellent character, were rendered by the 20th Ward choir, led by Brother John Daynes. During the meeting Brothers Samuel L. Evans and William Willies were appointed counselors to Brother George Goddard, the Assistant Superintendent of the Sunday School Union, and Brother Thomas C. Griggs was appointed treasurer of the organization.

Normal Institute.—The session resumed at 1 p.m., after recess, yesterday afternoon, when Prof. T. B. Lewis delivered his lecture on arithmetic, which was very able. He referred to the different methods of writing figures, numeration and notation. He condemned the two free use of text books, contending that teachers should rely to a considerable extent upon their individual ingenuity and resources.

Mr. Charles Wright lectured on Geography, illustrating the different methods taught by him. He was very happy and lucid in his illustrations, and promised before the close of the Institute to give some examples of his system. During a short recess Mr. Parsons amused those present by reciting, in good style, a comic song. At 3 p.m. Prof. Maeser commenced his lecture on "History," which he showed conclusively was a necessary branch in the common school, being inseparable from geography. He showed what auxiliary studies were necessary, the kinds of history that should be taught, and the best methods of teaching. The lecture was a most excellent one.

TUESDAY, AUG. 8th, 9 a.m.
Prof. Davis being still absent, Prof. M. H. Hardie was prevailed upon to take the subject of reading. The gentleman stated that he would not attempt to do more than give expression to a few reflections on the subject, but all were convinced before he had proceeded far that of such reflections the Institute could never tire. He treated primary and intermediate reading, merely, those being the principal grades in common schools. The A. B. C. Method, the Word Building Method were severally discussed, the latter being the favorite theory of the speaker. He advocated the use of small pupils in pronunciation, inflection, accentuation, and lastly in emphasis.

During the period for discussion remarks were made on the methods advanced, the word building system being generally advocated. A few minutes recess were allowed, during which the Institute was entertained by a very well rendered song from Miss McKay.

G. M. Ottinger was now introduced for the subject of drawing, and stated that he considered the art attainable by all; and by his happy illustrations convinced the Institute of that truth. His lecture of to-day was but a prelude to the one he will deliver to-morrow.

The meeting adjourned till 1 p.m.

The following were in attendance to-day in addition to those published yesterday—

Mary Williams, Joanna Gregory, Kate Gregory, W. H. Kenner, H. Ward, Clarissa Smith, Abram H. Cannon, Ella Hartwell, Mary Hartwell, Minnie Horne, Hattie Westover, Abigail Pratt, Salt Lake County; W. A. Noble, Cache County; Henry Roberts, Salt Lake County.

Our Country Contemporaries.

Ogden Junction, August 7.—Mr. Brown has received a telegram from Milwaukee, signed John Stark, Attorney and Vice-President of the Ogden Iron Manufacturing Company, stating that a settlement has been made with the Parkes factory, that the company will be clear of bankruptcy by the 15th inst.; and that it is all right for future action. The whole people in this vicinity will rejoice to see the company on its feet again, and to behold the smoke of the furnace rolling up from the company's works in this city.

F. Ward, Capt. F. Hamilton, and Mr. Wm. Campbell, private secretary to the earl. There are also two newspaper correspondents with the party, Mr. C. E. Horton of the Toronto Mail, and Mr. M. St. John of the Globe of the same place. The party will, on its return trip, stop a few days in Utah.

Mr. Alfred Hanson's little boy and Mrs. East's little girl, both four to six years old, were thrown from a buggy in Logan, Aug. 3, and cut and bruised about the face and head; no bones broken.

EDITORIAL NOTES.

An exchange says, "In Wilmington, Del., work was ordered by the city council several days ago to be resumed on the new reservoir, in answer to the demand of a mass meeting of working men for bread. There were no funds, and the men, after marching to the reservoir, were compelled to leave. Tuesday night another meeting was held, and a demand made, in the name of starving workmen, for bread. A committee of council promised to put on hundred men to work on Thursday (July 27) as long as the funds lasted."

Spurgeon says, "I have been a good deal up and down the world and I never did see either a perfect horse or a perfect man, and I never shall until ten Sundays come together. When a man says he is perfect look out for him. He is too good for this world and yet not good enough to be translated. It is safer to trade with a sinner than with a self-elected saint."

At the Leicester, England, assizes Mr. Justice Field sentenced Cornelius Asher, aged 77, a herbalist, to death for malpractice on a woman, and thereby causing her death. If that particular crime were punished by death in this country, there would not be so much of it as there is.

The lower house of the Texas legislature has passed a bill making drunkenness in an official sufficient cause for removal from office. What havoc such a rule would make among some "loyal" officials hereabout!

SPELLING REFORM.

The cautious suggestions of the American Philological Association.

The committee of the American Philological Association, appointed last year to consider the subject of reform in English spelling, submitted the following report at yesterday's meeting in this city. It was signed by all the members of the committee and adopted by the unanimous vote of the Association.

The true and sole office of alphabetic writing is faithfully and intelligently to represent spoken speech. So-called "historical" or "etymological" spellings are only a concession to the weakness of the reader.

2. The ideal of an alphabet is that every sound should have its own unvarying sign, and every sign should represent a sound.

3. An alphabet intended for use by a vast community need not attempt an exhaustive analysis of the elements of the human voice, or a representation of the nicest varieties of articulation; it may well leave room for the unavoidable play of individual and local pronunciation.

4. An ideal alphabet would seek to represent for its characters form, sound, and sense, and the sound, signified, and of which the resemblance should in some measure represent the similarities of the sounds. But for general practical use, there is no advantage in a system which aims to depict in detail the physical processes of utterance.

5. No language has ever had, or is likely to have, a perfect alphabet; and in changing and amending the mode of writing of a language already long written regard must necessarily be had to what is practically possible quite as much as to what is inherently desirable.

6. To prepare the way for such a change, the first step is to break down, by the combined influence of enlightened scholars and of practical educators, the immense and stubborn prejudice which regards the established modes of spelling almost as constituting the language, as having a sacred character, and as in themselves preferable to others. All agitation and all definite proposals of reform are to be welcomed so far as they work in this direction.

7. An altered orthography will be unavoidably offensive to those who are first called upon to use it, but any sensible and consistent new system will rapidly win the hearty preference of the mass of writers.

8. The Roman alphabet is so widely and firmly established in use among the leading civilized nations that it can not be displaced; and in using it to transcribe English, the efforts of scholars should be directed toward its use with uniformity, and in conformity with other nations.—New York Sun.
