President Samuel McIntyre of the Mammoth Mining company has re-

It is reported some good copper ore has been encountered on the 700 level of the Star Con. mine in Tintic. energetic development, the output could be materially increased. I believe it a conservative statement when I say the present tonnage handled by the smeltcould be doubled in 12 months be after the Western Pacific is buil through the camps to the west of us. In the Clifton district Paul Roden house is developing a gold bearing property. The owners of the Lucy L. are carrying on a vigorous campaign there and are reported to have recent ly encountered auriferous ores con-taining sensational values. An up-raise is being made from the tunnel to connect with the shaft. A force of men is engaged at the M. R. Evans property and the leasers at the Midas mine are encouraged over the results they are getting. On the whole the outlook for the Deep Creek country never looked quite as promising as it does at the present time

can send in ore as soon as the trans-portation, facilities are provided. I know of one mine alone, that can be depended on for 500 tons a day; this is the Woodman property, acquired a number of years ago by the late Col. J. F. Woodman. Others might send in anywhere from 25 to 100 tons a day and, with a few months devoted to energetic development, the output could

ASKS FOR BIG DAMAGES.

Former Employe of Yampa Smelter Lost Three Fingers, Wants \$10,000.

The Yampa Smelting company was The Yampa Smelling company was made a defendant in two \$10,000 damage suits filed in the district court. Late yesterday afternoon Gest Triandos filed a complaint in which it is alleged through the negligence of the defendant the plaintiff suffered the loss of three fingers. The latter also alleges in his complaint that he was ordered by the foreman of the smeller one Nicoblas foreman of the smelter, one Nicholas Mills, to oil part of the machinery, It was the duty of the defendant, ar-

It was the duty of the defendant, ar-cording to complaint, to keep this ma-chinery revolving at a slow and steady rate while it was being oiled. Suddenly, he says, the muchinery was set in motion at full speed. Triandos was thrown down off the iron plate on which he was standing. His hand was caught between the revolving plate out caught between the revolving plate and the scraper. As a result, he says that he had to have three fingesr of that hand amputated.

ROAD TO ROOSEVELT.

Thunder Mountain Metropolis Can be Reached Without Difficulty.

J. B. Whitlock of the H. Y. mine arrived last evening from Roosevelt, came out in company with Lee Lis He by and it took them six days to make the trip, says the Boise Statesman. Leaving Roosevelt on Tuesday morning, they reached Reardon creek that night. Wednesday night they spent at John-son creek. The transfer was reached on Thursday night and Thunder City

turned from a trip to his Nevada ranch. He went out to Tintic today,

The ore and bullion settlements reported late yesterday were as follows: Crude ore and concentrates, \$72,500; base bullion, \$59,000; gold bars, \$13,000.

E. J. Waugh, formerly chief clerk in the office of Broker W. H. Tibbals, has secured a one-year lease on a promising claim in the Bullfrog, Nev.,/ district.

B. L. Cutler yesterday was awarded the contract to sink the shaft at the property of the St. George Copper com-pany, the location of which is in the Dugway district.

Fred A. Earls, general western repre-sentative of the Dearborn Drug and Chemical company of Chicago, with headquarters in Denver, is expected to arrive in the city tomorrow.

Peter Porter has returned from a trip to Ploche, Nev. While in that camp he looked over the Half Moon, Abe Lincoln, Mendah and other properties. He believes the camp is going to pick up.

A. L. Morris, at one time a familiar figure on Brokers' Row, came in from the northwest this morning. He is now located at Portland, Or. Morris first came into prominence in this city through his operations in Beaver coun-

D. J. Frew, secretary of the Holder-man Filter Tank company, left yester-day afternoon for the Golden Eagle mine, near Winnemucca, Nev., where a Holderman plant was recently in-stalled and is reported to be in success-ful operation. ful operation

At the Mt. Masonic mine at Park City last Monday, at a distance in the tun-nel of 625 feet, the lode vein was en-countered at a depth of 650 on the dip. The vein is a contact between lime and quartilite, and selected samples show values of 400 ounces silver and 14 per cent lead, George M, Hasson is super-intendent. Intendent.

A Boston publication says: The United States Mining company's divi-dend of 50 cents per share is payable Feb. 15 to stock of record Feb. 8. Books will be closed Feb. 4 to 15, both days fuclusive. No statement of earn-ings was given out. A director says: "The only statement to be given out is that of the dividend."

Alex Urdahi has returned from Roosevelt. The most important news brough by him is in the nature of further verification of the recent strike in the Grandau provide the second in the Standard property. He reports he made a visit to the mine a short time before leaving and found it all that has been represented by others. The strike, Mr. Urdahl says, shows a ledge some 60 feet thick. A stratum of clay was met with after penetrating the ore hody 60 feet.—Boise Statesman.

H. E. Reynolds brought to Council, last week, the first load of copper matter from the Ladd Metals companys smeller at Landore. On the day following the arrival of Mr. Reynolds, two more the arrival of Mr. Reynolds, two more loads were delivered at the railroad here, the three loads aggregating about six tons. The shipping of this consign-ment of copper marks a new era in the mining business of the Seven Devils district, as it proves that the Ladd Metals company has struck the keynote of success in smelling the refractory ores of that section. Mr. Reynolds M-forms us that the smelter is handling 60 tons of ore drily and has only enough ore to keep it busy for about six weeks, but, he says that several of the mines will now commence work on a larger will now commence work on a larger and more permanent basis since they have a ready sale for their product.--Council (Ida.) Advocate.

THE COLUMBUS CON. Much Interest Being Manifested in Next

Week's Meeting.

Considerable interest is being manifested in the coming annual stockhold-ers' meeting of the Columbus Consoli-dated Mining company, which is to take place in Tuesday of next week. At this meeting the policy of the company to be carried out in the future will be outlined.

Because no substantial results have yet been received, it is said some oppo-sition to the re-election of President and Mamager Tony Jacobson has de-veloped; but friends of the latter de-clare the insurgents will not muster up enough strength to make any ma-terial change in the present board terial change in the present board. Manager Jacobson has been confronted with a series of annoyances during with a series of annoyances during the past year; things have not come out entirely as he expected, and he has been just as sorely disappointed as have the other shareholders. The water shortage at the mill and power plant has interfered with progress materially by hindseing the operation of the mill by hindering the operation of the mill, which, since starting up in November, has not been run at any time to exceed one-third its capacity. These are con-ditions over which Manager Jacobson ditions over which Manager Jacobson has had no control, but this difficulty will soon be ended. The storm of to-day, and the last few days, will have a tendency to increase the flow of Little Cottonwood creek; but by the time an-other winter comes on the late difficul-tics scill be antically removed by mak-

other winter comes on the late difficul-ties will be entirely removed by mak-ing plans accordingly. In one thing the shareholders of the Columbus are united; and that is in the matter of obtaining the services of an A No. 1 mill man. Supt. Sherman of the Daly-West will probably be called into pensultation, which will be a good move, that will meet with universal ap-neoval for if the present plant conproval; for if the present plant con-tains any defects he is familiar enough with the Alta ores to soon find a rem-edy. Mr. Sherman has already made some experiments with the ores, which are not difficult to treat. Somes slimes occur, but not to any serious extent.

U. S. IMPROVEMENTS.

Boston Advices Say Company Will Build A Concentrator.

From a Boston source informa-tion has been received that the United tion has been received that the United States Mining company has in contem-plation the crection of a 200-top con-centrating mill during the present year. In fact, it is said the plans are now be-ing drawn for it, and therefore every-thing goes to indicate that the plant will be in the course of construction within a very short time. The location will probably be at a point somewhere near its smelter. Its smelter.

The Bingham mines of the company The Bingham mines of the company contain some ores that can be concen-trated advantageously and undoubted-ly this is among 'he plans to be per-sued by Manager Fitch in his campaign to place the properties of the United States upon a solid earning basis. Since

WESTERN MARKET LETTER.

Special Correspondence.

Kansas City, Mo., Jan. 30.-The cattle run last week was not heavy at all, but run last week was not heavy at all, but it consisted more largely of fed steers than usual, and they were of better quality. A few sales were at 35.60 and a great many at 35.25 to 35.50. Fed western steers sold up to 35.40, and the fair to good beef steers advanced 10 to 20 cents for the week. Medium to common cattle sold lower, however, and the mistake of taking cattle out and the mistake of taking cattle out of the feed lot too soon was again filus-trated in a good many cases. Best cows held steady, but other kinds sold lower. Receipts today are moderate here and elsewhere, and the market on

all kinds is strong to 10 cents higher It has been demonstrated half a dozer times since the holldays that any day when receipts are small, or there is a prospect of continued light receipts, as in case of a storm, prices immedi-ately jump up, and competition is keen among buyers. And besides, there is a gradual upward movement, and prices have now reached a point where eeders are making a little money. shipment of 18 cars of short hay fed cattle were here from Hotchkiss early cattle were here from Hotchess early in the week, that sold very well. The steers sold at \$3.70, and \$3.85, 650 to 950pounds, and cows around 1,000 pounds sold at \$3.15 to \$3.45. All around the cattle market may be called fairly healthy.

After Tuesday of last week the sheep After Tuesday of last week the sheep and lamb market broke badly, and by Friday it was hard to move anything. Prices had reached their pinnacle Mon-day, and even Tuesday sales were easily affected at the high plane, but buyers filled their orders, and then laid
