NEW EXTRACTION PROCESS.

been revealed under the furnace test.

The vein is small at present, but it is the intention of the management to Tintic was reported today.

Powerful Magnets Take Out Magnetic Ore

and Leave the Gold. J. A. Ogden, who lives at Seventieth street and Woodland avenue, has discovered a new process for the ex-traction or separation of gold from pyritic ores, says the New York Journal. He has been working on his process for years and he has now per-fected it to such a degree that, by actual tests, he is able to treat 90 cent of the ores of the Black Hills. His process is so simple that it is a wonder the principle has not been put to work years ago. He has a small plant in successful operation near Deadwood, which is being visited by

mining men from all parts of the country Dr. Ogden has worked at his plant for a year or more, keeping his secret to himself. His process, briefly is this: He has a twenty horse-power engine a 150-light electric dynamo and a roast-The ore is pulverized to a fine mesh, fed on to the upper end of the long piece of sheet iron at an incline, under which a fire is built, and screened through an 80-mesh. The ore is then carried to the magnetic separator. The powdered ore drops on to a wide belt,

across which there are three narrow belts running at right angles. Above each narrow belt there is a powerful magaet, which is made alive by the electricity generated by the dynamo. The ore, which contains a large per cent of iron, passes along under the magnets, which quickly pick up every grain of Iron, drawing it against the belts which run crosswise with the wide belt. As soon as the iron is carried out of the magnetic field, a distance of ten inches from the wide beit, it is all dropped and falls into a bin. There is left on the wide belt nothing but sand and the gold or other values. The process is intended to take out of

the ore all the iron or other magnetic metals, which are usually a detriment to the successful reduction of the ore.

ELECTRO CYNADE PLANT. All Classes of Ores Except Lead to be

Treated on a Big Scale. A dispatch from Hot Springs, S. D. states that a new electro cyanide plant, with a capacity of 350 tons daily, will be ready March 1st. It will be the first test of the process on a large scale, the only previous test, a small one at Chicago, having been successful, All classes of ores except lead will be treat.

Gold Field of New South Wates.

A dispatch from Sydney, N. S. W., today, says the gold yield for 1899 in New South Wales was 509,418 ounces, an increase of 168,925 ounces over 1898.

ed.

Grand Gulch Shipment.

Special Correspondence. St. George, Utah, Dec. 31.—Yesterday 17,000 pounds of copper ore from the Grand Culch mine left here for Mo-dena and will be sent on to Salt Lake City. All the mines around St. George are showing up nicely.

BUYS TREASURY STOCK. California Parties Bay 50,000 Shares of

Chicago Mining Stock. check was received today by the Sait Lake parties who have secured the controlling interest in the Chicago mine in El Dorado county, Cal., in payment for 50,000 shares of the company's treas-

ury stock at something above its par value of 10 cents a share. California parties have made the purchase after a thorough investigation of the property, which, with the expert opinion already given to them is an added testimony to the Salt Lake men of the property's worth.

ADVANCE IN LEAD.

tie

It is reported that another ore chute been encountered on the 700 level of the Grand Central.

the Croesus mine at Hailey, Idaho.

A car of thirteen copper pigs, weigh-ing 60,154 pounds, have gone East from the Highland Boy smelter.

The Taylor-Brunton sampler reported today 5 cars of ore from Bingham, 3 from Frisco, 4 from Park City, 8 from Tintic and 1 from Idaho.

Henry Rice is credited with the pre diction that two mills and possibly a third will be crected in Stateline district during the present year.

The Prince of Wales, Bonnie Dundee, Alows and Portland claims at Detroit Springs, about 35 miles northwest from Oasis, are to be actively worked by the Detroit Mining company.

A meeting of the directors of the Ben Butler Mining company was scheduled for this afternoon. Routine matters will be the business of the board and incidentally the crection of a board. ing house.

A letter received by Henry Kohl from Terrace, on the U. P. raliway, states that the copper properties in that section are improving in appearance. Its distance from the railroad is all that keeps the dstrict back.

Fred E. Lerch, who is investigating the iron resources of southern Utah, states that the iron deposits are greater than he at first supposed. He estimates that 3,000,000 tons of ore is already blocked out.

The Nelson (B. C.) Tribune says the output of the mines of East and West Kootenay for the eleven months ending November 30th approximates in value \$5,500,000 in gold, silver, lead and copper. The total for the year will be in the neighborhood of \$6,000,000.

The Mercur reported at the rooms of the Consolidated Kansas City Smelting and Refining company today with a 900 pound batch of gold cyanides. A material increase in Mercur shipments is looked for in about six weeks, when it is thought the new tanks will be filled with leaching ore for the first time.

NEW YORK AND CHICAGO MARKETS

Letters and quotations furnished by B. H. Lawver & Co., Salt Lake City, New York, Jan. 2.-Stocks opened at fractional advances over Saturday's closing prices. The only stock which showed weakness was Brooklyn rapid transit, which opened one point off and sold down to 69. The internationals reflected the good feeling in London. and the investment buying here was a factor in making higher prices all around. Trading was quiet, for the most part, but prices were held up and advanced in some of the specialties materially. Sugar rose over seven points, Tennessee coal and iron 4, Federal steel 2, tobacco 2. Everything was strong throughout the entire session, with decided strength during the last hour. The close was fairly active, with prices well sustained and a show

No. 8-For Eureka, Payson, Heber, troller of the currency shows that at the close of business December 30, 1899, the total circulation of national bank notes was \$246,195,523, an increase for the year of \$2,460,418, and an increase for the month of \$2,435,275. The circu-lation based on United States bonds amounted to \$209,759,985, a decrease for the year of \$4,256,002 and an increase for the month of \$598,083. The circulation secured by lawful money was \$36,435,538, an increase for the year of \$6,716,320 and an increase for the month of \$1,837,182.

Gold, \$111,344.220. Silver, \$26.061.519. Minor coins, \$1,837,451. The coinage executed during December last amounted to \$9,711,884, as fol-Gold, \$7,469,952.

Silver, \$1,886,605. Minor coins, \$355,827.

COPPER IS HIGH

And Abandoned Mines Are Being Reopened.

Several of the largest abandoned copper mines in eastern Maine will again be operated. The Maine copper mines were in successful operation in 1879, and showed good profits while copper was quoted at 14 cents. The nilnes could also be operated on a paying basis with copper at 12 cents, but the crash came when the Wisconsin mines put down the price of copper to 8 cents. Now the copper is so high, it will be very profitable to mine it.

LAND OF MEDALS.

Frenchmen Cannot Hope to Escape Being Presented With One.

France is the land of the medal. Not taking into account the thirty odd military ones, all of which no soldier-and, owing to conscription, every French-man is one-has been able to dodge there are thirteen labor medals and some twelve awards of merit.

If you are a clerk, or have been em-ployed in a commercial house for thirty years, you get a medal. All government official, from doorkeeper to heads of departments, get a medal for being true to the republic. If you are a farmer-and any one who owns an acre of land calls himself one-you are decor-ated with the Order of the Leek. Crossing sweepers also have their own badge of good conduct.

Apropos of this they tell a story of a Frenchman who lay dying in Paris, yet, although he was dying of starvation, he seemed happy. His new friends, standing round his bed waiting for the end, asked the reason. "Ah!" he replied, "I have lived for

fifty-nine years without receiving one medal

Two days passed and still he lingered on the borderland. On the third, as he was fast sinking, a parcel came by post. It was from the Anti-Medal lety, and decorated him with its badge of membership made in bronze!

FIRST SCORE.

"Mary," said Mr. Thomas when a silence, fraught with unpleasant meaning, had followed his first altercation with his young wife. "Yes?" said Mary interrogatively.

"When a man and his wife have had a-a difference," said Mr. Thomas, with a judicial air, "and each considers the other at fault, which of the two do you think should make the first advance to-
