# MAG NEILL OF UTAH COPPER

President of Big Bingham Company Sends Out His Annual Report to Shareholders.

SPEAKS OF LABOR SHORTAGE.

What Plant in Lower Birgham Should Do Under Normal Conditions.

Local shareholders of the Utah Copper company are in receipt of an advance copy of the annual report of President Charles M. MacNeill. The report covers the operations of the company during the period beginning July 1, 1905, and ending June 30, 1906. The following shows partially what the report contains:

"The original plant, located in Bingham canyon, has been operated, as during the first year, largely as an experiing the first year, largely as an experimental plant, in the endeavor to determine the best possible method to pursue in planning the new and larger plant at Garfield. Since the close of the fiscal year ending June 30, 1996, the Bingham plant has been completely remodeled, as a result of a long series of experiments, and in so far as it was possible in remodeling an old plant, it has been made similar in general plan of operation to the new Garfield plant. Active construction work was commenced early in the year in the erection of the first unit of the plant at Garfield.

tion of the first unit of the plant at Garfield.

"The almost unprecedented shortage in labor and the tremendous demand upon the steel machinery manufacturers, following the general prosperity of the country, have retarded the completion of the first unit. The first unit will, however, be completed and in operation by March, 1907, in the absence of further unforeseen delays. This first unit should produce 2,000,000 pounds of copper per month. The mill in Bingham canyon, operating in its perfect condition, as at present, should produce 500,000 pounds of copper monthly. The second unit of the Garfield plant should be completed by July, 1907. The operation of the second unit should result in an additional production of 2,000,000 pounds of copper monthly; equaling a total output thereafter of 4,500,000 pounds monthly.

occording to the state of copper mouthly; equaling a total output thereafter of 4.500,000 pounds monthly.

"The management has reason to predict the production of copper at a cost of 8 cents per pound, with the new plant at Garfield in full operation and the mine equipped to produce the tonnage necessary, in accordance with the plans of mine operations as at present outlined. Owing to the necessity of opening ground and the resulting difficulty in installing immediately steam shovels to the extent ultimately needed, the cost of mining for the first year or two will be somewhat excessive, as compared with the cost thereafter, when the full complement of steam shovels shall be operating under advantageous conditions. The development work has not yet disclosed the extent of the ore bodies; the apparent conditions, however, indicate a reserve which can scarcely be computed. The entire average continues to show a percentage of 2 per cent copper, which can safely be considered as being the average of the tonnage to be handled for years to come.

"The operation of the Bingham piant, heretofore referred to as the experimental plant, has been severely hampered by lack of proper railroad service; the present equipment of the Rio Grande Western railway. Bingham Canyon branch, being wholly inade-

Rio Grande Western railway, Bingham Canyon branch, being wholly inadequate to handle the tonnage needed for constant operation. The new line, now nearing completion, which is being built by the Rio Grande Western Railway company, chiefly for the accommoway company, chiefly for the accommodation of the business of the Utab Copper company and similar enterprises, will promptly handle, in accordance with contracts made, the tonnage necessary for both the Bingham and the Garfield plants.
"The Bingham plant, notwithstand-

"The Bingham plant, notwithstanding its use largely for experimental purposes during the year and serious delay resulting from poor railrond service, shows a net income of \$246,785.95. from which the interest on the issue of first mortgage 7 per cent bonds, amounting to \$52,500, the bonus of 5 per cent, or \$87,500, for compulsory retirement on this issue, taxes and extraordinary expenses amounting to \$6.142.66, a total of \$36,14286, has been deducted, leaving a net income for the year ending June 30, 1906, of \$150,643.29. The first bond issue of \$750,000 par value, bearing interest at the rate of 7 per cent, was retired upon July 1, 1906, necessitating a bonus of 5 per cent, or \$37,500, under its terms. The new issue of first mortgage 6 per cent bonds, aggre-500, under its terms. The new issue of first mortrage 6 per cent bonds, aggregating \$3.000.000, dates from January 1, 1906; \$1,740.000 of this amount was called prior to July 1, 1905, with the bajance available as needed for the general purposes of the company."

WORKING ON THE CRESCENT. Things Moving in This Southern Nevada Mining District.

Special Correspondence. Crescent, Nev., Jan. 19.—A carload of holsts for different mines in Crescent arrived at Nipton, Cal., several days ago. The Crescent-Searchlight, Supearrived at Nipton, Cal., several days ago. The Crescent-Searchlight, Superior-Nevada Wathens, Golden Crescent, and Oro Nevada all have machinery about to be installed. Considerable speculation has been rife in Crescent as to the identity of the parties that are bonding the Calavada group, situated three miles south of Crescent.

The Crescent townsite is laid out on an almost level plateau in the heart of the developing district west of the Searchlight valley and east of the Crescent hills. There is plenty of water available and the camp boasts of a fine public school, library and a camp two years old that has never had a setback in its career.

The Superior-Nevada is developing if

in its career.

The Superior-Nevada is developing its King Solomon mine, under the managemen of G. W. Huntington, and has 10 feet of ore of good grade exposed. The management is about to lestall the machinery necessary to sink to water level.

level. Supt. H. H. McClure is working two

shifts of miners on the estate of the Monte Cristo adjoining the Sareveport and Colorado properties.

The Searchight Gold Extraction company is sinking a shaft on the Jumbo group, with the intention of going straight down to water level. The values found on the surface of this property run very good and the managemen believes that it will encounter pay ore at depth.

men believes that it will encounter pay ore at depth.

The Ohio Mining company, operating south of Crescent, has one of the best prospects in the Crescent district. Specimen ore has been struck in the Crescent tunnel at a distance of 90 feet. Supt. Sherver has been working on the property for the past two years and has done upwards of 300 feet of work alone. The vein disclosed in the tunnel, is two feet in width.

The Pride of the West Group has been

The Pride of the West Group has been The Pride of the West Group has been purchased by the Nevada Crescent Mines company of Denver. This group consists of the Pride of the West, Pioneer, Butterknife, Edith, Nettle H, and the Legal Tender lode mining claims, situate three miles north of the Manager Stanish has been developing this corre oping this profe and has opened up some fine looking ore on the lead travelsing the Pride of the West claim.

C. N. White and associates are doing

extensive development work on the Comstock group of seven claims; Ex-celsior group adjoining the Double Standard of two claims; Florence Group on Calico hill of three claims, and Group on Calloo hill of three claims, and the Crescent Giant group south of Crescent. An immease lead of iron-stained quartz can be traced for 2,000 feet on the Comstock group, from which assays have been taken as high as \$58 in gold, silver and galena.

Systematic development work is pro-gressing on the Oro Nevada under the athervision of George H. Morrison This

stnervision of Geowe H. Morrison This property has opened up three feet of ore, and the management has been doing considerable work on this lead to ascertain the extent and value of this find. A shaft is being sunk on the vein and several pieces of specimen ore have been found in the course of the work.

#### ARIZONA MINING CASE.

S. Supreme Court Declares Verbal Agreements Don't Go.

Washington, Jan, 22 .- The supreme court of the United States has decided court of the United States has decided the cases of Crow vs. Trickey and Crow vs. Harmon, in viving the sale of the Pride of the West mine in Arizona. Crow brought the suit on a verbal contract to recover a commission of \$10,000 for the \$100,000 sale of the mine. At the time the purchaser failed to take the property, but subsequently took it by a private agreement with the owners. Today's opinion affirms the Arizona court's decision against Crow.

PLACERING IN NEVADA. l'onopah Parties Backing Enterprise In Humboldt County.

One of the greatest mining propositions ever launched in Humboldt county, says the Elko Free Press, is the one ty, says the Elko Free Press, is the one soon to be attempted by Tonopah and eastern capitalists, who plan to work the rich placer deposits in American canyon, about 45 miles south of Winnemucca, by collecting the waters of the different creeks on the eastern slope of the Humboldt range and conveying this water by means of a sigantic pipe line to the placer beds in American canyon. The plans embrace the purchase outright of the entire ranches and water rights of half a dozen ranch owners whose lands are watered by the streams flowing from the eastern slope of the range.

flowing from the eastern slope of the range.

The pipe line, as drawn up in the plans, will start from Stracenyon and skirting the edge of the hills, passes in turn Coyote canyon, Unionville canyon, Cottonwood canyon, Indian Creek canyon and Spring Valley canyon, and ends in American canyon.

J. W. Wenzel, now operating a placer mine in Spring Valley by means of a pipe line containing the waters of Indian creek and Spring Valley creek, is one of the promoters of the big scheme and is heavily interested in it.

To obtain the waters of the canyons named the promoters would first have to purchase the ranches which are watered by the streams of these canyons and with that idea agents of the company have been quietly obtaining options on the properties and having abstracts drawn up on a list of a dozen different ranches. The properties which it will be necessary to purchase are the ranch of Joseph Organ, situated on Star creek; the ranch of N. C. Frendensen on Coyote creek; the holdings of Charles Zimmershed on Unionville creek, and the ranch of Thomas T. Powell on Cottonwood creek.

The agents of the company have worked very quietly, so quietly in fact that few up to this time know of the givantic scheme in view.

The pipe line will be 28 miles in

girantic scheme in view.

The pine line will be 28 miles in length, extending as heretofore mentioned from Star creek to American canyon. It will be built of redwood and capable of holding a large head of water.

and capable of holding a large head of water.

In American canyon some of the largest specimens of pure gold ever found in Nevada have been discovered. The famous old canyon resembles a glgantic mole hill, where thousands have dug and panned for the placer deposits. The amount of gold that has been carried out of American canyon will never be known, for many came and mined and left with their treasure.

The new operations represent the ac-

The new operations represent the activity of the mining industry in Humboldt county, and the new and up-to-date methods which are supplanting the old style methods of mining.—Silver

# LOSS TO MINES WILL BE GREAT

Instances of How Coal and Car Shortage Has Affected Utah's Great Industry.

SMELTERS WERE HIT HARD.

While Mines and Mills Have Been Forced to Pun on Short Tonnage Or Close Down.

It would be difficult to estimate the losses that have been sustained by the various mining and smelting companies during the past few months as a result of the distressing coal shortage. It has been only under the most trying circumstances that the managers of the several smelting corporations have been able to keep their plants in operation and several times their supply of fuel on hand has been so low that a few hours of delay in making deliveries would have necessitated a complete shut down of the works of the American Smelting & Refining company at Murray and the Bingham Consolidated and United States plants at Bingham Junction. However, the management of these plants has been put to the necessity of running on short tonnage at various times by blowing out one, two or more furnaces, in order that production might not be entirely cut off. The new Garfield plant of the A. S. & R., as well as the Yampa Smelting company in lower Bingham have not fared so well: the former has been completely shut down for weeks at a time; while the latter is just getting under a head of steam again after the second shut down within 10 days which have been partly due to the fuel shortage and to the inability of the Copper Belt railroad to move ore from the mine to the plant with dispatch at a time when it has been most needed. For the same reasons, the big concentrating mill of the Utah Copper company, and the less portentious one of the Ohio Copper company, have been unable to keep up normal production. During December, the Utah Copper plant treated less than one-third the normal tonnage; while the Ohio Copper marketed less than two cars of concentrate per week. The foregoing are only a few instances of how the coal famine and shortage of railroad equipment have affected the mines and kindred industries of Bingham. The same condition prevails elsewhere. In Beaver county practically every mine of any consequence is either out of commission or partly so. The Cactus mill of the Newhouse Mines and Smelters corporation has been down several times this winter and at this writing not a wheel in that magnificent plant—one of the finest in the west—is now being turned. The management, however, has promise of relief in a few days. The new hotsting plant of the Frisco Contact mine near Frisco is ready to go into commission, but Manager Rohlfing has been unat various times by blowing out one, two or more furnaces, in order that

plant of the Frisco Contact mine near Frisco is ready to go into commission, but Manager Rohlfing has been unable to get coal.

In Tintic yesterday the May Day, Uncle Sam Con., Yankee Con. and Grand Central were out of business, because the fuel bins were empty. The Centennial Eureka, Swansea, Star Consolidated, Ajax and several others are said to be near the danger line. The superintendent of the Swansea reported last night that he had just about enough coal to keep up steam until tonight and unless something turns up today operations at that property will have to cease

unless something turns up today opera-tions at that property will have to cease until a supply reaches the mine.

The Consolidated Mercur company which was compelled to lay off several hundred men in December, has been successful in getting coal from a source which made deliveries to one of the sugar companies during the autumn months and has its mill running up to about capacity again.

about capacity again.

The big copper companies particularly have much to complain about during these days of 25 cent copper.

#### JUST A LITTLE LATE.

Washington, Jan. 22.-The Geological Washington, Jan. 22.—The Geological Survey announced yesterday that the total production of gold and silver in the United States for 1905, aggregated 60.365,342 fine ounces, with a valuation of \$122,402,678. Production of gold aggregated 4,265,742 fine ounces, value 388,180,700; an increase of \$7,716 over the previous year. Total production of silver was 56,101,600 fine ounces, value \$34,221,976; decrease 1,581,200 ounces in actual output.

STRIKE IN SEVEN TROUGHS.

Special Correspondence. Provo, Jan. 22.—The Fine Gold company in Seven Troughs, comprised of Provo business men, report a big strike

on their property.
TINTICS WERE LEADERS. Busy Sessions of the Mining Exchange

-Trading in Unlisted Stocks. This has been another good day for trading in mining stocks. The forenoon trading in mining stocks. The forenoon sales exceeded those of yesterday by about \$10,000. The Tintic stocks were again the leaders. Ajax, beginning at 38, sold up to 40 cents. Carisa did business at 60 cents, while Lower Mammoth advanced to 2.05. May Day opened strong, closing on a sale at 32 cents, Uncle Sam Consolidated went up to 49

## Idaho Sugar Stocks.

The prospects for holders of these stocks should be better every day. If you have a little spare money and want to invest, now is the best time, in my judgment, to buy. The present is not a good time to sell. If you wish to buy I can get you the stock you want at the market price. If you want to sell I will see to it that you are treated fairly and paid the fair market price at the hour your stock is sold.

#### PAPAL FINANCES.

In France Church Has Lost an Income Of \$8,000,000 a Year.

Rome, Jan. 22.—Vaticen officials, discussing conflicting reports as to papal financial resources, declare that in France the church has lost an income of \$8,000,000 a year; the needs of the propaganda are increasing constantly, while in all quarters the Peter's pence are diminishing.

"DRUNKENNESS"

## Cigarette and l'obacco Habits Cured by

## TRIB

"Big Lew" Foster (owner of many race horses and known all over the Pacific coast writes on July 10, 1902,

Pacific coast writes on July 10, 1902, and verifies the first letter on February 2, 1905. Read them:

"I was a slave to whiskey and cigarettes for 11 year, I commenced in June taking "TRIB." When I commenced I weighed 276 pounds, and was almost helpless. "TRIB" has surely cured me of both habits."

February 2, 1905, Mr. Foster writes again. Here it is. This is only one of the many letters we have—voluntarily sent to us:

"Please find draft for \$150. Send me one dozen treatments of TRIB." I took "TRIB" myself and never felt better in my life than I do now. I have gone down in weight to 195 pounds, and never think of using either liquor or tobacco any more. I know of 25 cures. You can get references from most of them if you care to write. I enclose names. Sincerely yours."

Investigate this remedy while we are offering you an absolute guarantee with every treatmnt.

Price \$12.50 per treatment.
