postoffice building will be opened on Aug-

. In the meantime the discussion of the

8. In the meantime the discussion of the site of the building still continues. It is understood that the Methodist church has tendered its corner east of the Thatcher Bros,' bank. The location is an ideal one but the price asked is something over \$15,000, which in all probability will operate against the acceptance of the proposition. The Robbins corner opposite the courthouse is spoken of very favorably, and it is not improbable that it will be the one selected.

Work on the fire hall is being pushed and the walls are now going up rapidly.

Ogden, Aug. 6 .- Notwithstanding the many objections that have been raised by private individuals and by organizations of various kinds to the mayor affixing his signature to the franchise granted last week by the Ogden city council to the waterworks company, Mayor Conroy late Saturday afternoon signed the same, giving to the Ogden Waterworks company a 50 year franchise to maintain waterworks system in Ogden city. It is stated that the waterworks company consented to the clause providing for the placing of meters in houses and business houses to be stricken out and it was then the mayor signed the same, but it is expected the matter will be brought up before the council again tonight, and a public objection made

to the city fathers' action. BURGLARS CAUGHT.

Took Cash Register and Other Valuables From a Saloon.

Aug. 6 .- Two young Ogden, who give their names as Frank Thirl and Edward C. Newton, were placed under arrest early yesterday morning by Sergeant Chambers and Officer John Russell on the charge of stealing a cash register from Smyth's saloon which contained \$19.55 in cash and two gold watches. Mr. Smyth locked up his saloon about midnight Saturday uight. At 3 o'clock in the morning a man happened to go into the alley at the rear of the saloon, where he saw two men with a cash register trying to open it. He was observed watching the men and they sneaked out of the alley without opening the register. The man followed them to the corner of Lincoln avenue, where he met the officers and told them of the occur-tence and they placed the two men under arrest. The saloon was entered through a rear door by taking out pane of glass. A charge of burglary in the first degree may be placed against

JAMES P. LAW DEAD.

Atty, A. A. Law was summoned to Salt

Atty, A. A. Law was summoned to Salt Lake Saturday morning on account of the death there of his brother James F. Law, who died from the effects of an operation performed for the removal of a growth in his ear. Mr. Law is well known in this city, and has resided in this valley for over Ξ years. The remains will be brought from Salt Lake and interred at Paradise where the family reside. Mr. Law was about 40 years of age and unmarried.

STAKE CONFERENCE.

STAKE CONFERENCE. The quarterly conference of the Cache stake is in session here today. At the presthood meeting Saturday evenlng Jas. A. Leishman was released from the High Council and sustained as a Patriarch: Joseph E. Wilson and H. E. Hancey we'r also released from the High Council, the former on account of his dutics as stake clerk. M. J. Ballard, Joseph R. Morrell and W. W. Roundy were selected to fill the vacancies in the High Council. A bal-lot was taken to obtain the choice of the priesthood of a stake president.

NEPHI. ANOTHER PIONEER CALLED. Mrs. Sarab C. Tranter Closes Honored

Carcer at 78.

Nephi, Juab Co., Aug. 4 .- Sarah C. Tranter passed away today at noon after being confined to her bed for several months past. The cause of death was paralysis. Mrs. Tranter was been in Belfast, Ireland, some 78 years ago. She joined the Church in 1850, and emigrated to Utah two years isso, and emigrated to than two years later. Shortly after her arrival she was married to Thos. Traiter at Nephi where they made their home and raised a large family. Mr. Tran-ter died many years ago leaving his helpmeet to rear the family. Two sons and four daughters with a

nost of grandchildren survive her. She was a consistent Latter-day Saint. Fu-neral services will be held in the ward meetinghouse Monday, Aug. 6. San Francisco and Salt Lake papers please copy.

ETNA, CANADA. SAD BEREAVEMENT.

Death of Young Mother-Youth Drowned in Big Bow River.

Special Correspondence. Ætna, Alberta, Canada, July 27 July 24, Pioneer day, was celebrated in royal style by the saints of Ætna and surrounding country. An excellent pro gram was rendered in the ward house in the forenoon and sports were indulged in in the afternoon, with a

grand ball at night. July 25 the body of a young man of 20, Matt. Clifford, was brought home for interment in the Ætna cemetery. Young Clifford was a favorite among his companions. All the speakers re ferred in the highest terms to his goodness. He was drowned July 15 in the Big Bow river, several hundred miles north of Ætna. His body was not recovered until seven days after, when it was washed upon a sandbar in the stream 15 miles below the place of drowning. His parents, brother and sisters keenly feel the loss, and have the sympathy of all who know them The only remaining brother of the de ceased was accidentally shot in the thigh the day after Matt, was drowned July 26 the remains of Mrs. Sarah M. Cox Olsen were brought from the Beazer ward for burlal in the Ætna cemetery, where several of her children are burled. Mrs. Olsen was formerly presiters. dent of the Young Ladies' Mutual o tance and received severe bruises. He and his party, however, went to Salt Lakt on No. 3. She loved and was belowed and belowed and was belowe She loved and was beloved of all. Her record was pure and good. She was 35 years of age and leaves her aged parents, a husband and seven children, including a month-old babe, to mourn her death.

Crop prospects are good. A hafistorm passed over Ætna July 17 and did some damage in the way of trimming down gardens, etc.

The colors of vegitation are intensified by strong sunlight and a certain degree of coolness, as we see in the redness of northern apples and the deep thats of Alpine plants, and other conditions—such as the composition of the soil—have an influence. A recent attempt to color flowers artificialby chemicals added to the soil has been recorded by Henry Kraemner. Aluminum sulphate and potassium sul-phate deepened the color of yellow roses, and tended to streak the petals of the white carnation with red, and ammonium sulphate, aluminum sul-phate, iron citrate and citric, acid brought out white streaks on scarlet carnations. The effects were too slight, however, to promise commercial im-Dortance.

can be made by the new process for I about five-sixth as great as that of light, these being the Betra rays, while there are also Alpha rays-much larger, \$40 or less. The saving is even greater with larger sizes, and it is believed that, instead of having reached the Lut having only one-eighteenth of the speed of fight. M. Holzmuller has now tried to give a definite idea of what this action means. He has made cal-culations from observed facts, and there show that a first a subhighest possible limits, lenses can now made three times as large as any yet produced.

In "Telekino," his new wireless method of transmitting power, Senor Torres Quevado uses a Branly coherer. which, when struck by the electric wave, causes an electromagnet to oscillate, and the vibrations affect an escapement which advances one tooth at each vibration. He has not only steered a crewless boat from shore, but has increased and slackened the speed at will. The trials are claimed to have been perfectly successful, and it is urged that the principle shi be valuable in life saving apparatus as well as for directing torpedoes. The motor cultivator of Prof. T.

Hudson Beare, a Scottish mechani-cian, is designed to do all the work of preparing the ground for seed at one operation. It can be driven at three times the speed of the ordinary plow, and each trip covers three times the breadth of the usual furrow, and well pulverizes the ground. By a simple pulverizes the ground. By a simple attachment the sowing also can be done at the same time,

FUNERAL OF JAS. C. SNYDER. There was a good attendance of rela. tives and friends at the funeral ser-vices held yesterday in the Taber-nacle over the remains of James C. Suyder. The following speakers ad-dressed the congregation, speaking words of consolation to the relatives and in praise of the noble useful life of the departed: Elders A. S. Booth, S. Jones, Andrew Watson, Bishop L. S. Nelson, Elder John G. Jones, Prest, David John and Elder J. E. Booth, The fourth ward choir rendered beau-

tiful vocal selections. The pall bearers were selected from the many men in this city who have labored with the deceased in the build-ing business and were: T. H. Cluff, L. L. Nelson, J. F. Halladay, John Al-len, L. G. Holdaway and Wm. Meldrum.

STARE PRIESTHOOD.

At the priesthood meeting held Saturday President John reported the visit of himself and President Holbrook to the Pleasant Valley wards to hold ward conferences Saturday and Sun-day last, and that there had found conditions generally favorable in these wards.

Elder B. Y. Smith of the Thistle Branch and Bishop J. Frank Bring-hurst of Springville Second ward gave reports of their wards, and addresses on matters of interest to the priesthood affecting their duties generally, mads by Prests, John, Keeler and Holbrook, Parley Jeusen of Provo, was ustained for ordination to the office of Elder.

A NARROW ESCAPE.

Saturday night about 1 o'clock learge Clinger of Lake View and anther young man left town to go home When they had arrived at the railroad bridge they sat down on the roadway and went to sleep. After some time a freight train passed, going north, and woke one of them up. The other, George, was struck on the head and remained unconscious for about an hour, and when he came to, both young men walked back to Provo. They met Sher-iff Harmon, about 5 o'clock, and re-ported that a train had come along and punctured George's head and stolen their bloyde. The trainmen on the freight, which disturbed the sleepers, found the bloycle on the cowcatcher when the train arrived at Prospect, and some of them started back to look for the man who was supposed to own the wheel, expecting to find him dead or along the track, and when they found the place where the boys habeen sleeping, and noticed blood on the end of the ties, they were sure some-one had been killed and notified Sheriff Harmon, who started out to investi-gale. Clinger is not seriously burt, the

to have been inflicted by the wheels when it was picked up by the fender. The wheel is in good condition. GARDEN CITY NOTES

was stabled by George Ferre on the 24th, has recovered sufficiently to be able to leave the hospital and go to his

The drug stores were open yesterday the first Sunday for about a month the druggists being permitted by spec-fal arrangements with the city councilicense committee to sell druggists' sun-dries, which the ordinance forbids. The druggists claim it does not pay them to open Sundays just to fill prescriptions and sell other medicines, and since the ordinance limiting Sunday sales to that went into effect have closed Sandays till yesterday. The ordinance will prob-ably be amended

The great carthquake catalogue of omte de Montessus de Ballore now

records 171,434 distinct shocks. The list confirms the already formed conclusions that earthquakes and volcanors are independent, and that the former are most abundant in recent elevations where the slopes are steen. est and longest. Nine-tenths of the shocks have originated in one or two per cent of the earth's surface. Almost all have been distributed along certain lines, of which the most important are the great girdle of the Pacific, the line running from the Sunda Islands through Arracan, the Himalayas, Caucasus, and Alps to the western Mediterranean, and another running from the Caucasus through central Asia to Lake Baikal.

Superstitious people formerly re-garded with awe the turning red at long intervals of Lake Moret in Swit-zerland. Botanists have now shown that the phenomenon is due to a plant which propagates every tenth year, and which, though very minute, grows se rapidly that the whole lake is soon turned crimson.

Strong evidence of a periodicity in the cereal crops of eastern England has been found by Dr. W. H. Shaw, director of the royal meatorological office, in the statistics for 1885 to 1905 A good year follows a bad one in very regular alternation, and a maximum average seems to be reached once in 11 years, with a minimum average at an intermediate period. In 1894, 1893 and 1898, for instance, the yield was abundant, while in 1895, 1895 and 1897 it was deficient. A year of greatest average was 1885, and 1896-11 years ater-was another; and in 1886 and 1897 low points were reached. Di Shaw has noticed that there is an in timate relation between the rainfall of the autumn months and the wheal harvest of the following year. From such considerations he computed that the eastern counties of England would produce 21.9 bushels of wheat per size in 1965, and the returns at the end of the sesion showed an actual reliated 22 bushels are seen

yield of 32 busicels per acre. Two languages have died out in modern Europe, according to Rev. W. S. Lach-Szyrma. In a recent paper to British archaeologists he doubted. whether anybody could fix the time or place when Prussian disappeared. for the death of a language may be a lingering and obscure one, but Corish seems to have passed away in its English home in quite recent times. The last Cornish drama hears date of 1611. A considerable Cornish literature is preserved in manuscript and printed works, and the language has left its impression in the places and families. A few luding the numerals, are still used by the miners

A remarkable hairball from the stomach of a young girl has been brought to notice by Prof. yon Bra-mann of Halle. She had a habit of swallowing ends bitten from her long hair, forming in time a bulky accum-ulation, though felt only as a slight pressure, and when the mass was re-moved by an operation it was found moved by an operation it was found to have shaped itself to the cavity, like a cast in a mold. Iron tonicy had changed the light color to black.

The glass lens has been brought to a diameter of about five feet for as-tronomical purposes, but when of such size the cost is tens of thousands of ollars and several years of time. The Hungarian chemist who has at last made a successful fluid lens claims that it equals the glass product in performance. It consists of two curved plates of thin and unusually hard glass, between which is hermetically ably be amended On August 25th there will be a meet-ing of the forest reserve, super-visors of the state held in the Provo office, Captain Jas. B. Adams of Wash-ington, D. C., will be present in his capacity as the special fiscal agent of the service, and Inspector R. E. Bene-dict will be back from his trip of inseared the nuto substance, and the

Less that it cost to make the cheapest of them; and less than Half the cost of the finer ones. Is it any wonder that this store has been the busiest spot in the state today?
