"We have 4.600 laborers at work now between San Francisco and Salt Lake City," said Engineer H. M. McCartney yesterday. "The line is 924 miles in length, and there is a stretch of 326 miles from Deeth, in Nevada, west-ward to the California state line which the graders will probably get to work on within the next three weeks. That will close the gap and complete the ac-tual grading for the main line. Work is humming. We have a big camp of graders at Oroville and another at Bekwith. On the Utah end of the road the track is already laid from Salt Lake City westward \$3 miles to what is called the great mud desert. That is called the great mud desert. That desert is 100 miles long, and when the mud is dry the surface is as smooth as linoleum, and it looks like brown linoleum. It would make the finest automobile race course in the world. But when it is wet it is another thing, and that is one of the difficulties of laying the track. "When the contract is let for the

s26-mile gap from Deeth westward there will be plenty of work for thou-sands of men. If we could get the men we could put 10,000 more to work on the road tomorrow. The contract-ors pay the men from \$2.25 to \$2.75 a day and the men board themselves. No, we have no surveying partles out, ex-cept on the main line. No surveying is being done up the coast toward Humboldt.

LAUGHED AT FIRST. But Changed His Mind on Investigation.

It often seems ridiculous what a sim ple thing can do in shaping our lives. We do certain things because our fathers before us did, and don't stop to think that we might be better for

a change. A man tells how he changed from coffee to Postum Food Coffee and the remarkable difference it made in him. "I have been a heavy coffee-drinker
