CORRESPONDENCE. OGDEN CITY, Feb. 17, 1918. Editors Deseret News:

The backbone of winter in this part of the country must surely now be broken. The weather is soft and mild, and although we have occasional wind squalls, and now and then we are visited with snow and rain, the sun and sun goes down, the rain and snow melt, and the latter soon disappears from the surface of the earth, leaving us abundance of mud and water pools.

The weather is so warm and so pleasant, and apparently few overcoats are needed. Our people appear to have regained, in a great measure, their usual cheerfulness, and notwithstanding the recent setback to our business, in consequence of the late advent of a cold wave, and the consequent disappearance of our trade matters seem to have revived somewhat, and our neighbors from the country roll into town with renewed confidence, to transact their business.

The day and Sabbath schools are all again in session, and each are well attended, although they are not so crowded as they were before the suspension. The season is advancing rapidly and some of the larger pupils are preparing for the spring work on their farms.

The Ogden Seminary is again in session under the conduct of Prof. L. F. Monch, assisted by Dr. Eccles. This institution has long and deservedly patronized. The professor's method of teaching the young men and young women of this county how to acquire useful knowledge is thorough, and simple, inductively he leads them, step by step, pausing whenever it is necessary to elucidate any point of any subject, and he is so conversant with the progress of the student, it would be a great benefit to this county, if we either had more such institutions or else a larger building, in which to convene the youth of both sexes, to be taught higher branches of education than are usually taught in our common or district schools.

If there is any dependence to be put in the signs of the times, meteorology, I may look for a general break up of the great snow which is many of our farmers will "put their hands to the plow" in the hopes of reaping a rich and abundant harvest in 1918. May their expectations be fully realized.

NEW ADVERTISEMENTS.

THE DAUSMAN & DRUMMOND Tobacco Company's CROSS BAR.

THIS 16 ounce arnyround is marked into 16 equal spaces (1x11) each space representing an ounce. It being justly divided, the consumer is satisfied with his allotment, and the retailer knows that he has given neither too much nor too little, as he is liable to go where the lump is, not so marked. This lump also renders it unnecessary for the retailer to have more than one package of Tobacco open at a time, as he can accurately cut any size lump needed from a 12 ounce lump down to a single thick pocket piece. It is the only plug of Tobacco marked for the benefit of the dealer and consumer. All others marked with tin, wood, leather, or other tags, or in any other manner are solely for the benefit of the manufacturer.

It saves interest, as a single package gives the dealer all the sizes he requires, it is not necessary to keep six or eight open at a time as is usually the case. The manufacturer is able to make a better chew in a pound lump than in a smaller one for the same money. No loss can accrue from change of styles or variation in prices. Most dealers know by bitter experience how great an advantage this is. It is manufactured with the utmost care and each plug is perfect in a chew and style.
