THE CATTLE CONVENTION CON CLUDED.

THE SWAIM COURT-MARTIAL. DISASTROUS EXPLOSION OF PIREWORKS, ETC.

Sr. Louis, 22.—The sixth day of the session of the National Cattlemeu's Convention began about 10.30 this

Convention began about 10.30 this morning.

The enairman of the committee on resolutions reported favorably the resolution with reference to the arid land lying between the 98th meridian and the Sierra Nevada mountains, urging a memorial to Congress for legislation permitting cattlemen to lease land in tracts suitable in size for grazing. The preamble to the resolutions sets forth that under the existing laws the tenure of ranchmen in that section cannot be made secure. Hence, ranchmen are not safe in proceeding with improvements which would result in doubling or trebling the wealth of the cattle interests, as it is not safe to sink wells, build reservoirs, or take other steps to redeem the land from uselessing in the land from uselessing the secure all rights to settlers under these laws. It is proposed, however, to except California, Nevada and Oregon from the provisions of the proposed act.

Judge Wallace, of Colorado, of the same committee, presented a minority report opposing the resolution, as a measure in the interest of large owners to the prejudice of small ones, and one that would work the substantial repeal of the homestead laws. The majority report was then adopted by a large majority.

An amendment was then passed by which the Territories of Idaho and Utah were exempted from the provisions of the resolution.

A resolution was introduced by Rain, of Missouri, urging a bureau, of animal industry to be put under the charge of expert veterinarians was adopted.

New York, 22. — Vice-Presidentelect Hendricks left this morning for

Cleveland.

On his return from Albany this evening, Vice-President-elect Hendricks said to an Associated Press reporter;

"Well, I've been to see the President, and he looks very well. Very well, indeed, for a man who has gone through so much fatigue as he has. Oh, we had a very nice time-quite informal, and I am very much impressed with Mr. Cleveland; more so than I was in my former interview with him, which was last summer, after I came from Saratoga. What do I think of the campaign? In my humble ludgment it has been the most remarkable ever fought for the Presidency."

"After Ohio, what did you think?"

"I know a good many felt shaky, but I was perfectly confident all through. Mr. Tilden's campaign was, no doubt, a splendidly organized one, but a spirit pervaded this one that from the outset meant success. I have only this more to say: If I stay here much longer, I shall be killed wilh kindness."

The following card is issued by Postmaster General Hatton:

The evening papers contain a dispatch dated Des Moines, purporting to give the substance of a letter written by P. Clarkson of Iowa, member of the National Republican Committee, in which he says that while I did not issue the order in regard to keeping open the New York Postofice on election day, the order was issued by my assistant, but by my order. This is wholly incorrect. No Officer of the Postofice department had any instructions from me in regard to the order affecting the New York Postofice on election day. Equalty incorrect is his statement that "the Democratic chairman called my attention to the law prohibiting the closing of office on election day." I never, to my knowledge, met Mr. Bar-LOOR BIL CLOTES, BRUGGETS, MATS, ETC. Wolfe, Patton & Co.

The latter refused to permit visitors to see the unfortunate man. The scase will be reported to the State officers, and the man will probably be removed to the asylum.

"Under the British flag," said an officer of the company to-day, "we could run these steamers at very considerable less cost, for the reason that now we are obliged to ship our men at American ports, and American labor is much higher than abroad." > FOREIGN. THE CONGO CONFERENCE. GERMAN ANNEXATION IN THE PACIFIC.

BERMAN TAXATION DISCUSSED. THE ADAMS-COLERIDGE SUIT.

Berlin, 22.—The German Government is credited with the Intention to annex several islands of the Pacific Ocean as well as part of New Guinea.

The North German Gazette makes a bitter attack upon the British extensions which have been made in the Pacific. It says the British High Commissioner recently inflicted a mock septence of eight days' imprisonment upon the pirates of the schooner Stanley, who plundered several German mercantile firms at the Laughion Islands, and who, after massacreing a number of the natives, took 100 of them as slaves to Greenland. The pretense of the Australians, says the Gazette, to humanity has no basis in fact, and Germany is bound to insist upon the immediate annexation of the unclaimed islands in New Guinea, if only for the purpose of protecting the natives from English barbarities.

SUNDAY NIGHTS DISPATCHES.

The Grand Opera House in St. Louis

Bestroyed by Fire.

Sr. Louis, 23.—The Grand Opera House, on Market Street, between Fifth and Sixth Streets, was burned this afternoon, entalling a loss of from \$125,000 to \$150,000. The fire broke out in the front part of the basement, ascended by the stairway to the roof and thence spread all over the building. In the course of three hours the beautiful theatre, with its hardsome decorations, valuable machinery, scenery and effects, was a mass of ruins; nothing being left but the bare walls. The Nat Goodwin Company was to open to-night and all their baggage was in the house, but the fire starting in the front part of the building gave the company ample time and they saved all their property. John W. Norton, manager, was not so fortunate, however, his entire personal wardrobe and valuable actor's library being in the front part of the building, was totally destroyed. Loss about \$7,000; insurance on the theatre about \$50,000.

The postoffice authorities in England have equipped a number of miniature wans to be worked by the ordinary tricycle mechanism. They are, like other vehicles of the postoffice administration, painted a bright red, and bear the inscription "parcel post." The tricycle vans are already found very economical and expeditious both in collecting and distributing in suburban districts, where the work is comparatively light.

A writer on the manufacture and use of the microscope corrects one of the common errors prevalent concerning its use, namely that the higher the power capable of being employed the more valuable the instrument—the fact being that equally satisfactory results are known to have been obtained with one of 3,000 diameters as of 100,000. The ordinary work for which a physician uses a microscope requires from 100 to 500 diameters only, while special work can be done with ease with from 2,000 to 5,000 diameters.

At Berlin, the railway regiment has lately formed a special balloon detachment, which is never weary of undertaking excursions in small balloons in order to ascertain the utility of airships in times of war. An aeronautical society has also been established junder the presidency of Dr. Angerstein. The other day the inventor of a new balloon astonished the neighborhood at Berlin by mounting his airy steed, which instead of the customary gondola, ventilator and anchor, possessed only a saddle, attached to which were two ballast bags and a pair of stirrups. In a gray jockey suit the inventor mounted his novel Pegasus, and arrived in due time, without the alightestimishap, at his destination.
