#### Will Run on Star Ores.

The final cleanup of the Star trial run has been completed at the mill billty of recourse to the state courts. and it has been determined that about ?? a ton can be saved on the grade of ore which has been tested. After paying about hair that amount for treatment at the mill, there is not a sufficient surplus left to pay other expenses and net a profit to the company with the present facilities for transportation. However, there are

large bodies of a higher grade of ore in the nine, which is hard to handle without a crusher. If a crusher is put in at the mine and the railroad is exterded, thus cutting down the expense of handling, the Star towgrade ores can be profitably handled at the Mam-moth mill,-Mammoth Record.
