

# CROP REPORTS IN THE NEXT CENSUS

Experienced Men Will be Used in Gathering Agricultural Statistics.

LIVESTOCK IS INCLUDED.

Data Will Cover Wide Range of Subjects—Appointments to be Made in April.

(Special Correspondence.)

Washington, D. C., Sept. 25.—Forty-five thousand enumerators out of the estimated grand total of 65,000, will be engaged April 15 next, in gathering the required information concerning agriculture for the thirteenth decennial U. S. census. Director Durand purposes making every effort to secure progressive farmers and crop reporters for these places. His action is based upon the recommendations of Chief Statistician LeGrand Powers and the advisory board of special agents composed of professors of economics and farm experts who have been assisting in the formulation of the schedule of inquiries concerning farm operations and equipment. It is believed that the selection of this class of men, already familiar with statistical methods of securing data and reporting it in comprehensible form, will add greatly to the efficiency of the census and to the scientific value of the information obtained. Director Durand does not anticipate any difficulty in procuring enumerators of this kind as there are in every state of the Union hundreds of crop reporters acting for the department of agriculture, representatives of state boards of agriculture, etc.

The agricultural schedule which is to be placed in the hands of these enumerators is nearing completion by the census bureau. The advisory board who are acquainted with practical agriculture, its varying conditions, and who are active in their respective states in assisting the farmers to improve their farm methods, have been most earnest and no effort is being spared to make the schedule as simple as possible, and yet secure the greatest amount of important information concerning agriculture.

By means of the census schedule an effort will be made to secure an accurate statement of the total number of acres of land in the farms of the country, by states and counties; also the improved area, number, and size of farms. On account of the growing importance of tenancy in many parts of the country considerable information will be secured as to whether farms are operated by owners, tenants or hired managers. Information about the value of farm buildings, and other permanent improvements; and of the farm equipment, both machinery, im-

plements, and livestock, will be secured.

## CROP PRODUCTS.

An important part of the schedule will be that enabling a study of the crops and crop-products of 1909. The enumerators will ask about areas, quantities produced, and value of crops in the case of all the principal crops grown in all parts of the United States. This inquiry covers grains and seeds, hay and forage crops; and all important special crops such as fruits, nuts and vegetables, cotton, tobacco, rice, hemp, potatoes, broomcorn, etc. By-products, like flax straw for tow and twine, and such manufactured products as wine, cider and vinegar, dried fruits, sugar, syrup, etc., will not be overlooked by the questions in the schedule.

The inquiries concerning livestock and their stock products, also include cattle, work animals, sheep and goats, swine, poultry and bees. The facts as to the number and value of livestock at the time of the enumeration are to be secured in some detail, taking into consideration age, sex and use of animals. Furthermore, data will be secured relating to the number and value of each species of animal raised, purchased and sold; and the quantity and value of animal products, such as milk, cream, butter and cheese, wool, eggs, honey and wax.

A few special questions of a general nature may be included to secure valuable related information. Among these is one which will be made concerning the area and character of woodland in farms. There will be but one schedule for agriculture. There may be a small schedule for the enumeration of animals in cities. This will be carried by the city enumerators and it will cover horses, mules, cows, chickens, etc., housed in barns, stables, etc., in the cities. No attempt will be made to get the area of city gardens or vacant lot cultivation.

## THE POPE PLACES BAN ON MOVING PICTURES

A dispatch to the London Morning Leader from Rome says:

While as is well known the Roman Catholic clergy are not allowed to go to theaters, their attendance hitherto at cinematograph entertainments has not been questioned.

Today, however, the cardinal-vicar published the following decree: "It is among our duties to see that good habits prevail among the clergy and to protect their morality. Having ascertained that members of the regular and secular clergy attend cinematograph spectacles, many of which offend religion and morality, we inform the Holy Father, who authorized us to remind the clergy that they may not frequent theaters, and that they are particularly ordered not to attend cinematograph exhibitions of any kind."

"Any clergyman contravening this order will be liable to canonical punishment, including suspension from the celebration of mass and the divine offices."

## TESTIMONY AFTER FOUR YEARS.

Carlisle Center, N. Y., G. E. Burhans, writes: "About four years ago I wrote that I had been entirely cured of kidney trouble by taking two bottles of Foley's Kidney Remedy, and after four years I am again pleased to state that I have never had any return of those symptoms, and I am evidently cured to stay cured." Foley's Kidney Remedy will do the same for you. J. Hill Drug Co., "The Never Substitutes."

## NEXT WEEK IN HISTORY.

- SEPTEMBER 26.**  
1820—Daniel Boone, pioneer hunter, founder and defender of Kentucky, died; born 1734.
