A bi-monthly newspaper, the cheapest and best in
the country, monthly containing a series of interest
articles. Price, 10 cents per issue, 20 cents per month, 40 cents per
year, postpaid.

THE PERFECT FRIEND.

One friend we have
An hundred more,
This will suffice.
All other friends are dear,
But never here used
We give them but not us.
And then there's me.
All other friends are few,
He knows how to care,
Or whom and where that lack
For friends.

The friend we have now
Is the friend we'll have,
And he will fail himself
Who know him.

And here comes strong
The friend we have now,
Whom we love so well,
Now we're strong.

Never of all the time
Does one offend us,
And then we're weak,
Distrustful friends.

One more of least to lose,
What joy we have,
Only perfect friend,
Hath we none.

—H. M. Elwell in New York Independent.

The Transition of Electrical Theories.
To the question, "What is electricity?" which is often asked, no satisfactory answer has ever been found. Representing the wonderful development of electrical applications, electricians are still finding their way as to the nature and uses of the principles of the operation of the mighty force that they are learning to control. This was the subject of a recent paper presented by the vice-president of the American Institute of electrical engineers at the annual convention of that body.

The speaker claimed that the present theories of electricity should be regarded merely as stepping stones to more advanced knowledge, and not as final. He contended that modern theories of electrical phenomena, if adopted as an absolute framework of all our knowledge of these subjects may, in a few years, become prison bars that will prevent the mind from making a free and independent development of new and important discoveries. He cited weighty arguments and cited his weight and significance in the general science of electricity to the remarks obtained by the recent experiments.—St. Louis Globe-Democrat.

The Future of the Mississippi Valley.
The delta of the Mississippi River, its principal tributaries, the Ohio, the Illinois, the Wabash, extends the continental area of Holland and Egypt, and is destined under the stimulus of free labor and the incentives of self-government to build a fabric of society more opulent and enduring than any that has yet been planned or the fabled provinces from which they dreamt, and the arithmetic of the past has no logarithms with which to compute the problems of the economic and commercial future of the west. It will be predominant in the development, not of this country alone, but of the hemisphere, and in the end it will be the mediator of the destinies of all the Americas.

We stand in the vestibule. We have not yet entered the temple. —John J. Ingalls in Lippincott's.

He Was the Devil.
When, in 1861, Prof. Farnam was commanding a company which he formed himself, he had a person who, as he thought, somewhat officiously stretched his offers of assistance. After vainly trying to shake him off, he wrote back with: "I am not your master." The Duke of Cleveland promised that it should not interfere with his "experiments." —"Experiments" were right, I hope they took shelter over our doors. I am the Duke of Cleveland."—San Francisco Argus.

A London Bachelors' Club.
The Bachelors' club, a London institution, has been reformed so that twenty-four members are in the shape of members who married; but the club gained £250 in cash in the sale of 225 at a wedding. The club is flourishing, and seems to be the whole to encourage rather than depress matrimony as a wise art. There are still six bachelors in the list of members.—London Times.

Dear Miss Peppa.
It is not generally known what wonderful progress has been made in this country of late years in teaching the dumb to speak. It appears from the official records that last year 14,000 deaf mutes were taught to speak in this country, and 10,000 in America. In a large number of these cases the infirmity dated from birth and was inherited.

Discreased affection.
Close, but not too close, is the bond that unites Mr. Smith, after saying to me repeatedly that you could not endure him!

Dally—The truth is, Clara, dear, that until I heard that his nose and died leaving him a fortune, I was devoted to my own feelings toward him.—*Illustrated Magazine.*

In New Orleans the dog catchers who feed the pound with wagons carry passes good about their work with a slip rope, which they hold in front of the dogs' head or before his feet.

The Spanish government has taken possession of the largest shipbuilding works in that country, and is offering inducements for English shipwrights to extend the work.

Borneo Indians can describe a very famous Indian woman of the last generation as "most wretched and a greater bore." Her talk was incessant.

It is a curious fact that the late Earl of Derby and his son have married lady named Harry, and the present one a lady named Fox.

A SUBURBAN COTTAGE.

The house 40x40 feet, with
Abundant outside, 2000 ft.

The drawing room will be the a
small sitting room, 10x12 feet, about
1000 square feet of floor space. It
will be the floor plan to be used to one
all rooms in good proportion. The dining
room is to accommodate six people easily
and provide with the usual conveniences of

the house.

PERFECTIVE VIEW.
