

Mical, in the fourth chapter, that in the last days many nations shall say: "Come ye, and let us go up to the mountain of the Lord, to the house of the God of Jacob; and he will teach us of his ways, and we will walk in his paths, for out of Zion shall go forth the law, and the word of the Lord from Jerusalem."

May God bless—not the wicked, not the ungodly, not those that blaspheme the name of the Lord, not those that fight against Zion—but all the true, pure hearted Latter-day Saints, in my prayer, in the name of Jesus, Amen.

CHICAGO, 14.—The latest returns from the agricultural districts tributary to this market, while very conflicting, seem to establish pretty clearly that in the whole Northwest the winter wheat crop is saved, in good order and with about the average yield; that the spring wheat crop is as a rule less to the acre than last year, but that an increased acreage will make the yield somewhat greater than that of 1870, provided the weather becomes a little more favorable. The alternations of extreme heat and drenching rains have jeopardized the crop in some sections, particularly in Minnesota and Wisconsin, but the latest advices indicate a prospect of more favorable and settled weather, and unless the prospects are changed spring wheat crop will be safely harvested within two or three weeks. Oats will not be as short as last year's yield, being large, and the safety of the crop is practically assured. The universal report respecting corn is that the acreage is largely increased. Its condition is excellent, and prospects for a good crop as good as ever before. The only exception is in the wet low lands, where the corn has been nearly flooded out. It is however, true that the crop is not quite so forward as in previous years, and some fears of an early and destructive frost are entertained.
