By Telegraph to the NEWS.

Whitelaw Reid.

NEW YORK, May 11.—The Union League Club last night attacked President Cleveland on his civil service reform record. The attack was in the shape of a report of the club's committee on political reform. It was signed by Whitelaw Reid and others. The committee says the mugwumps in 1884 were "allured by the expression which the democratic candidate encouraged, that he was born a reformer and raised up for the special purpose of completing this great work." The report gave statistics intended to prove that Cleveland has not kept his promise. Of 56,134 offices at his disposal the report says up to June 11th, 1887, when the last count in the interest of the republican party was made, Cleveland had himself filled 42,992 and up to date the estimate is that of the 56,134 men in office under executive appointment, when Cleveland went to Washington, 50,000 have been turned out. The committee declare removals made on the charge of offensive partisanship were brought about by mere pretext and partisanship. The report was adopted unanimously.

Ship Agents Arrested.

VIENNA, May 11.—By order of the minister of justice the chief Vienna agent of the Amador Steamship Company and another agent named Elchorn, who had charge of a batch of Hungarian peasants booked to America, were arrested today, charged with abducting men liable to military service and extorting money under false pretenses. The peasants have returned to their homes and the agents have been imprisoned and their papers seized.

Lord Salisbury on the Strength of England.

LONDON, May 11.—In the Lords today Vicount Harring asked what truth there was in the reports that England was in a defenceless condition, etc.

The Duke of Cambridge denied that the country was in immediate imminent danger, and said the government was fully alive to the importance of reforming and strengthening its defensive forces.

Lord Salisbury protested against the prevailing impression that because the government did not make showy speeches their vigilance slept. The government must practice the utmost reticence in such matters. Nothing could be more insane than to explain to all the world what England's strength was and the nature of the precautions she was taking. The fact was there had been a considerable increase of preparations in recent years. Since 1884 both the army and navy had been much strengthened. The army has been increased from 181,247 men of all arms to 212,470 men, while the expenditure for the navy had risen from £4,459,000 to £6,611,000. He complained that high military authorities were making statements against the government at public banquets, where they could not be answered. General Lord Wolseley, he said, had recently declared the reason the army and navy were not as strong as they ought to be was found in the system of government by a party, which was the cause of England's depriving English statesmen of manly honesty. General Wolseley ought to have made that statement in Parliament, where he could be answered.

In the Commons, Lord George Hamilton, first lord of the admiralty, was questioned regarding the report that the strength of the Russian squadron in the Pacific was superior to that of the English squadron in those waters. In reply he stated the Russian fleet consisted of one ironclad and four cruisers, and was not equal either in numbers or in strength to the British force on the China station alone.

Lord Salisbury's speech in the Lords this evening has caused a sensation in political and military circles. The attack upon General Lord Wolseley was wholly unexpected. The general opinion is Lord Wolseley will resign after replying to the premier.

The liberals are inclined to support Lord Wolseley's position, which is approved by all the military members of the Commons.

The *Standard* defends Gen. Wolseley. It says:

"He may air his anxieties before patriotic citizens without committing an extreme offense, but to confront and impeach in Parliament the government he serves would be an intelligible breach of sound tradition. Lord Salisbury's warmth was perhaps excusable, although not quite fair to General Wolseley or to the people, who are sick of eternal commonplaces and official optimism.

The Duke of Cambridge, General Lord Wolsley, General Sir Butler and other officers held a long private discussion in the war office today. It is reported that they decided to propose to Parliament to immediately place the first and second army corps on a war footing and issue magazine rifles to all regular troops; that a special committee be formed to attend to the stores necessary for field service and that a volunteer artillery corps be sent to Portsmouth to be drilled in the use of guns of large calibre.

The C. P. & U.P.

WASHINGTON, May 11.—The House committee on Pacific railroads today resolved to begin the consideration of the case of the Central Pacific Railroad next Friday. It was decided to take the bill already prepared and reported, to secure the repayment of the indebtedness to the government of the Union Pacific Railway Company as a basis of the bill to meet the case of the Central Pacific, incorporating such changes as the committee may see fit to make.

A Siberian Railroad.

ST. PETERSBURG, May 11.—The route of the Siberian Railway has been finally decided upon. The Pacific terminus will be at Vladivostock.

Scheme of the Santa Fe.

NEW YORK, May 11.—An evening paper prints a story crediting the Santa Fe Railroad Company with a scheme to purchase or lease the New York, Lake Erie & Western Railroad and thus have a grand transcontinental line under its own management. If the Erie people will not sell their road the Santa Fe Company have decided, the paper's authority says, to lease it and in the the event of their refusing to either sell or lease, the Santa Fe will immediately open a rate war and establish a five dollar fare between Kansas City and California points to compel other roads to combine against the Erie in favor of the Santa Fe Company's wishes.

BOSTON, May 11.—Secretary Manchester, of the Santa Fe Railroad, says the story that the company is trying to get control of the Erie is absolutely without truth.

The Cyclone in Indiana.

CHICAGO, May 11.—A cyclone of tremendous force swept over a portion of northern Indiana tonight. Telegraph wires throughout a considerable territory are prostrated, and the extent of it ravages can only be formed from a few scattered reports.

At Winslow Siding, on the Nickel Plate Railroad, a train of 16 freight cars was lifted from the track and distributed across the surrounding prairies.

At Wanatah a number of houses were unroofed. It was thought the city of Valparaiso lay in the path of the cyclone, and much alarm is felt.

A late dispatch says Valparaiso was not touched. The storm was deflected two miles from the south. Three hundred telegraph poles were leveled in the neighborhood.

A Disastrous Collision.

A belated train caused a disastrous collision on the Erie Road, near Bergen Hill Tunnel early this morning. The express ran into the rear of a local train. Ten persons were injured, two probably fatally. All the injured are residents of New Jersey. The engine of the express struck the rear car and passed almost half way through it and forced it into the car in front. Some passengers saw what was coming and jumped in time to save themselves injury. The engineer and fireman of the express jumped safely.

A Crime from Jealousy.

ATLANTA, Ga., May 11.—Rev George McDuffy (colored), was hanged today in Greensboro for the murder of Wm Cheney also colored. McDuffy, though married, was enamored of Sarah Haines, whom Cheney was courting. He waylaid the couple on their way from church and shot Cheney down.

An American Venice.

CHICAGO, May 11.—The *Times'* special from Galena says: The city of Galena has been transformed into an American Venice, and the novel spectacle of skiffs and barges as a means of transportation is now seen in all the business portion of the town except Main Street. On the east side of the latter thoroughfare the water in many places is up to the first floor and preparations are being made by those endangered to move into safer quarters.

Blaine and Cleveland.

CINCINNATI, O., May 11.—The *Enquirer* prints the opinions of the editors of leading republican and democratic papers of the United States, as to the candidates their respective parties will put in the field for President. Judge Gresham, Ben Harrison, Senator Sherman and other candidates have supporters, but almost all the editors think it will be the 1884 fight over again with Blaine and Cleveland.

Killed by Electricity.

NEW YORK, May 11.—T. H. Murray, an electric light lineman, was instantly killed on Broadway. He touched a bunch of wires supposed to be dead. The current was said to have been shut off, and was within reach of a number of employes. He was repairing wires.

Attempted Assassination of the Czar.

LONDON, May 11.—It is reported that at a recent parade of Russian troops of cavalry, a lieutenant named Timoferef made an attempt upon the life of the Czar. The lieutenant was about to fire at the Czar with a revolver, when another officer seized him by the arm and the weapon being discharged, the bullet entered his groin. Timoferef appeared insane.

A Michigan Flood.

LAWTON, Mich., May 11.—The dam at Hamilton went out with the flood and two million feet of logs in Hamilton lake went into Lake Michigan, carrying seventeen houses along the stream. The logs belonged to Pardee, Cook & Co. The life station had a narrow escape.

The Walking Contest.

NEW YORK, May 11.—At midnight the score stood: Littlewood, 527; Guerrero, 526; Harty, 504, Golden, 471; Noremac, 478; Hughes, 445, and Campana, 341. Littlewood is limping and Guerrero is gaining on him. Betting men are putting their money on the Mexican. Champion Albert says he will challenge the winner if he breaks the record, and it is understood Rowell wants to get in such a race.

Guerrero has apparently gone wrong. At 12:05 he went staggering around the track and fell at the Madison Square entrance. It is believed he has been drugged. His trainers deny anything of the kind, however. He walks along in a vague, wandering way, and continually rubs his head, as if he wanted to brush away some cloud that was gathering about him. He left the track at 12:12. His trainers say he was simply tired, and consequently lightheaded.

At 5 a.m. Littlewood had covered 537 miles, and was 11 miles ahead of the Mexican.

General Boulanger.

PARIS, May 11.—General Boulanger Count Dillon and Deputies Laguerre and Mayer have gone to Dunkirk.

A large crowd assembled at the railway station at Dunkirk to see General Boulanger. Upon alighting from the train he was received by his friends and supporters with shouts of "Vive Boulanger!" while others in the crowd hooted vigorously. A banquet was given in the evening in honor of the general. In replying to a toast to his health, he protested against the "brutality" shown by the government in depriving him of his sword, which he had no thought of using except as a safeguard of the honor of his country. "Without bragging," he said, "we know how to present to Europe the spectacle of a nation able to withstand all storms."

Daring Robbery.

PRATT, Kan., May 11.—The Pratt County National Bank was entered at noon today by thieves, and robbed of $4016, all in currency. The cashier's momentary absence enabled the thieves to effect an entrance by kicking a pane of glass out of the window.

The Cash Box Gone.

LEXINGTON, Ky., May 11.—William Riley of Chicago, a bookmaker, deposited his cash box in the Phœnix Hotel safe last night. The box contained about $8000. When Riley went for the box this morning it was gone. It is supposed to be the work of a sneak-thief.

Testing the Sunday Law.

CINCINNATI, May 11.—The first conviction under the Sunday liquor law, today is a test. Henry Murnsbrock, charged with keeping his saloon open on Sunday, was sentenced to ten days in the workhouse and $50 fine. The police will now rigidly enforce the law in all cases.

Two Blocks Burned.

HOT SPRINGS, May 12.—Nearly two blocks in the business part of this city and its gas works were destroyed by fire tonight. Loss, $150,000.

The Emperor.

BERLIN, May 12.—The Emperor continues to improve. He remained in his study until 8:30 p. m., when he again tried to walk about the room, and with better success. The periods of depression due to darkness, have been fewer in the last few days.

A deaf-mute living in Silesia has written to Dr. Mackenzie, offering to sacrifice his larynx, if it be possible to transfer it to the Emperor's throat. Dr. Mackenzie replies to the man that the loss of his life would neither help the Emperor nor benefit science.

The Telegraph in the Hands of the Government.

PHILADELPHIA, May 11. — General Master Workman Powderly in a letter addressed to the *Journal of United Labor* referring to the petitions of the Knights of Labor for government telegraph, which were presented to Congress some time ago and to the fact that no action had been taken on them, says:

It is now about time to ask of our members to begin to make inquiry as to why their Representatives remain inactive, so that it may become known before the next election who is to blame for the delay. Write to your senators and representatives and stir them up on the telegraph bill, call attention to the fact that one million citizens have affixed their signatures to petitions asking of them not to drink brandy and quarrel, but to act on the telegraph bill.

Lord Carnarvon's Ideas.

LONDON, May 11.—Lord Carnarvon explains the points of the proposed basis for Irish self-government briefly as follows: First, the supremacy of the crown and the Imperial Parliament; second, the control of the police and the appointment of the judiciary by the crown; third, the limitation of local taxation to prevent injustice; fourth, a reasonable satisfying of the people of Ulster; fifth, the whole to be preceeded by some land settlement.

To these Lord Carnarvon says must be added the separation of the legislative and executive functions. He details very fully the difficulties of such a scheme, but right or wrong, he says the scheme is utterly impossible now Gladstone having destroyed all chance of a reasonable settlement on such a basis.

Lord Carnarvon then deals with the crown colony idea in similar detail, and gives his opinion that though the plan is a difficult one, it is not impossible. He says his ideas are solely his own, and his late colleagues are in no way responsible for them.

WASHINGTON NEWS.

A General Law for the Erection of Postoffice Buildings.

WASHINGTON, May 11.—The House committee on postoffices today ordered a favorable report on Chairman Blount's bill to provide a general law for the erection of postoffice buildings. It provides for the appointment in the Postoffice Department of an architect and superintendent of construction at a salary of $4,000 per year, who shall, with the assistant supervising architect of the Treasury, prepare designs for postoffice buildings. The Postmaster-General is authorized in his discretion to construct postoffice buildings at any place at which the gross receipts for two years or more shall have exceeded $3,000 in each year. No building erected under the act shall cost more than $25,000. The sum of $2,000,000 is appropriated to be available during the current year to carry out the purposes of the bill. The number of towns which would be entitled to postoffice buildings under the provisions of the bill is placed at 1500, and it is estimated $35,000,000 would be required to supply them all with buildings.

TURPIE ENTITLED TO A SEAT.

The Senate committee on privileges and elections in the Turpie case came to the unanimous conclusion that the determination of the Indiana House of Representatives under the particular circumstances of this case, of the title of its members to their seats is conclusive upon the Senate, and therefore that the persons who voted in the election of Senator must be conclusively presumed to have been entitled to vote and consequently that Turpie must be held entitled to his seat.

BOND REDEMPTION.

The total amount of bonds purchased under the circular of April 17, including today's purchases is $18,088,000. Their cost to the government, including premiums, was $21,665,000. When the Secretary issued his offer to buy bonds, the treasury surplus, as stated in the official statement, was $105,255,000. Since then it has fluctuated between $110,000,000 and $102,000,000. According to the statement issued yesterday, it was $105,400,000, or slightly in excess of what it was when the buying of the bonds began, showing that the excess of receipts over expenditures during the period stated was greater by $175,000 than the amount expended up to yesterday in the purchase of bonds. It is understood that this apparent failure to reduce the surplus is considerable to do with the action of acting Secretary Thompson today in accepting over $7,000,000 worth of bonds at rates higher than had previously been paid. Today $127 was paid for 4 per cent bonds and $108 for 4½s. Heretofore $126.80 and $107.75 respectively were the highest prices paid. Secretary Fairchild is disposed to buy heavily, but it is intimated at the department that he will not go above today's rates, unless specially impelled thereto in the interests of the government.

THE MELBOURNE EXHIBITION.

The chief United States commissioner to the Melbourne International Exhibition and the secretary of the commission will sail from San Francisco for Melbourne May 31. The latter will continue to receive applications for space from those intending to exhibit goods. His address will be No. 1726 Pennsylvania Avenue, Washington until May 30, and after that "Care of United States Consul-General, Melbourne, Australia."

A BOUNTY OFFERED AN INVENTOR.

The House committee on ventilation today instructed Chairman Landes to report to the House a bill appropriating $150,000 to be paid as a bounty to Mr. A. De Bansett, of Chicago, when he shall have completed and successfully demonstrated the practicability of his invention of an air ship.

THE DESERT LAND ACT.

The Secretary of the interior today, in a letter to the Commissioner of the General Land Office, holds that the presence of a considerable growth of mesquite trees upon land does not exclude it from entry under the desert land act. This decision affects a large area in the southwest, and is the result of a petition signed by the governor and a large number of citizens of Arizona.

Southern Baptists.

RICHMOND, Va., May 4.—The annual session of the Southern Baptist Church began here today, with 745 delegates present. Prof. Lewis F. Ely, of Missouri, presided, President Mell having died since the last convention. The report of the home mission board describes its work as never before so prosperous. The needs of the board, however, are larger than ever. Work in Cuba must be largely increased, and that among the foreign and colored population of the South has just begun. The report of the board of foreign missions goes into details and describes the work as being in a gratifying state of progress.

BRIEF TELEGRAMS.

An Albany dispatch says the legislature adjourned today.

Gladstone has a slight attack of lumbago, and walks with the aid of a stick.

After sentence Dillon took an appeal, and the hearing was fixed for June 25th.

The fisheries treaty has passed both houses of the New Foundland Legislature.

A Paris dispatch says: A steamer sank in the Seine today and fourteen lives were lost.

Madrid dispatch: The Queen regent has quite recovered from her indisposition.

A Panama cablegram: P. M. Delvalle, contractor and agent, absconded last week. Liabilities estimated at $100,000.

The marriage of Prince Henry and Princess Irene of Hesse, will probably take place on the 24th instant.

Advices from Rio Janeiro state that the Brazilian Chamber of Deputies has passed a bill for the immediate abolition of slavery.

Ottawa, Ont., dispatch: Dr. E. S. Wiggins predicts an earthquake in California between now and October, saying it will move across the Pacific from Asia.

McLane, United States minister to France, will leave Havre today on the steamer *La Bretagne*, for New York. He will make a short stay in America.

Advices from Afghanistan say a Herat regiment had a fight recently with the Demshed tribe, which had petitioned for Russian protection. Many were killed on each side.

Antwerp dispatch: At the wool sales today there was a good attendance and an active demand, especially for Buenos Ayres. Although holders were firm there is no quotable change.

A London dispatch: In the house of Commons this afternoon Smith, government leader, said the statement that the government had decided to found and endow an Irish Catholic college was baseless.

The governor of New Zealand, at the opening of Parliament there yesterday, congratulated the members on the progress the colony had made. He said the Chinese immigration difficulty would continue to be a serious one until England and China could come to an agreement on the subject, but he was hopeful this would be accomplished before long.

The New York *World* will today publish an account of the exhibition of the perfected Edison phonograph. It says the experiments recounted and regarded as successful were those of the voice repeated from a telephone as well as a song and a cornet solo. Another interesting feature of the exhibition was that of talking into a transmitter, a type writer receiving and writing out the speech therefrom.

Winnipeg, Manitoba, dispatch: The galleries of the legislature were crowded today to hear the budget speech of Provincial Treasurer Jones. He described the condition in which the Norquay government left the treasury books. So wretched was the condition that it was difficult to say just what their discrepancies aggregated. They had paid for money at the rate of 10 per cent. Before leaving office the ministers had drawn their salaries up to the end of the month, defrauding the government out of $900. He estimated the total liability of the province at $263,683; assets, $4,279,223.

Continued on Fourth Page.

The Verdict Unanimous.

W. D. Sult, Druggist, Bippus, Ind. testifies: "I can recommend Electric Bitters as the very best remedy. Every bottle sold has given relief in every case. One man took six bottles, and was cured of Rheumatism of 10 years' standing." Abraham Hare, druggist, Bellville, Ohio, affirms: "The best selling medicine I have ever handled in my 20 years' experience, is Electric Bitters." Thousands of others have added their testimony, so that the verdict is unanimous that Electric Bitters do cure all diseases of the Liver, Kidneys or Blood. Only half a dollar a bottle at A. C. Smith & Co.'s Drug Store. (2)

A WOMAN'S DISCOVERY.

"Another wonderful discovery has been made and that too by a lady in this county. Disease fastened its clutches upon her and for seven years she withstood its severest tests, but her vital organs were undermined and death seemed imminent. For three months she coughed incessantly and could not sleep. She bought of us a bottle of Dr. King's New Discovery for Consumption and was so much relieved on taking first dose that she slept all night and with one bottle has been miraculously cured. Her name is Mrs. Luther Lutz." Thus write W. C. Hamrick & Co., of Shelby, N. C. Get a free trial bottle at A. C. Smith & Co.'s Drug Store. (2)
