Winchell of the Rock Island Advises Illinois Legislature to Take Conservative Course.

HARM MAY BE DONE COUNTRY.

Five Hundred Bills in Fourteen States That One Way or Another Affect Railways.

Springfield, 111., March 27 .- President B. L. Winchell of the Rock Island railroad advised the railroad committees of the Illinois house and senate to be conservative in the matter of rafiroad legislation. If the judgment of legislators is influenced too much by the present outcry against railroads, asserted Mr. Winchell, measures might wastly be passed which would endanger the prosperity of the country.

Mr. Winchell was one of a number of prominent railroad officials conferring with the committees today on the subject of important measures pending in the assembly. The primary purpose of his address was to ask the committees to carefully study the situation before acting on the administration bill pro-viding that the state railroad and ware-house commission control the issuing of stocks and bonds by railroad cor-

house commission control the issuing of stocks and bonds by railroad cor-poration. "If an Illinois corporation," said Mr. Winchell, "serving in 14 or 15 different, states is obliged to secure permission in the state of Illinois for raising money to expand in Texas or Oklahoma, I am not sure that we can always know that those in charge of affairs in Illinois will be willing that we should raise the money. It is a subject so big it ought not be approached in any spirit of hur-ry-up, but be carefully investigated. There might easily be a tendency, will-ingly or unwillingly, to strangle the whole business of the whole country. "There are 500 bills in 14 states that we are interested in calculated to tell us what must be done. Some 70-odd of those have been introduced in Illi-nois, and I want to ask you if all the legislators in all of the 14 states really know the consequence of these 500 bills. I submit that 500 bills put through m a hurry and without clear idea of con-sequences might be a pretty serious thing at a fime when a great many peo-ple wonder whether we are on the up-grade. "I think a great many people in the

ple wonder whether we are on the up-grade commercially or on the down-grade. "I think a great many people in the country, and I think I may include the president of the United States, feel that too much agitation of certain questions is almost as bad for the country's in-terests as too much legislation. Some of our friends today will talk to you about so-called demurrage laws. I can only say in passing that I can imagine, if every state has its own demurrage law, that we are going to have a strange condition of affairs after those laws become operative. Any discrim-ination in shipments of rallroads will be a serious thing against the business of this country. I do not believe that we all can escape the responsibility for what happens in the next two or three years. I believe in the common sense of the people, that the legislators and railroad officials will rise to the emer-sency and that we will get through without a crisis. I am not sure we will get through, however, unless we are all very guarded in our actions for the next three months. I unge that we will not do anything that we will be sorry for one or two years hence." D. R. Willard, second vice president of the Chicago, Burlington & Quincy railroad, spoke against the passage of the reciprocal demurrage bill.

Hiland, vice president of the Chi-cago, Milwaukee & St. Paul railroad, in opposing the 2-cent fare bill, pra-duced figures to show the average pas-senger rate received by the railroad companies is lightly under 2 cents a rule.
