The speaker at the telderoscile erday was Elder Joseph W. McMurfin, of the first council of seventies, who presentated interestingly upon the gospel in it existed anelently and as restore) in faiter days. Strong paraliels were drawn hetween the experimore of the former-day saints and the Latiersday Salitte, and the grigin of come of the Propertural churches was briefly iraced. The story was told of the events reading up to and the rescontion of the grappi to the Prophet Joseph Smith, and the martyrdem was welted by Elder McMurrin in a very divid meaner.

ELDER J. W. M MURBIN.

The Latter-day Saints differ in many espects said Elder MeMurrin, from they religions dominiations. One of these differences in the belief that men and women who have never heard the law of sulvation as proclaimed by the long of God will yet have that orivit dge. and that none will suffer con the limit noise will suffer con-silver for failure to abey a law they have which of. GOSPEL MISUNDERSTOOD.

OOSPEL MISUNDERSTOOD. Though preached to the world for upwards of 76 years. Mornoalsm is videly alisandorstool and misrep-resouted. Some oppess it ignorably and some fight h wilfully. The speaker told of having once listened to a lecture by the noted English Freethinker, Charles H. Bradlaugh. upon invitation of a Mr. White was indo here very friendly to the eders inboring in Great Britain. Mr. Brad-laugh took for his theme the question. The Christianity a Persecuting Reil gion? But Elder McMurrin observed that no eci-tione was forthcoming that real Chris-tianity was in the least responsible for the estimes poken of had been commu-ted not because of Christianity, but for lack of it. Men and churches assum-lag to be Christians had done things in its name that were in direct contradis-tionetine to the treachings of the low?

They engaged about \$36,000,000 of geld for import, rushing forward cotion, wheat, copper, and other products to establish new credits abroad. Ameri-can securities were sold in great vor-ume to foreign investors at bargain prices. Arrangements were made to increase the bank nois circulation by using government bonds previously held as security for treasury deposits and substituting other collateral for the latter purpose.

Speculators bought by at premiums of 2 or 3 per paying in certified checks, in a cases wayrs were paid wholly or y in checks, which went to pay esticate the Same banks, assued-bar's checkes for one dollar, and mark T's checks for one dollar and up with a view to having them.go general circulation - a scheme craped the very edge of the law. in short, all the experiences of the unic of 1893 were repeated. SOME HISTORY QUOTED.

The causes that led to the action of Henry XIII to proclaiming himself head of the church in England were related by Elder McMurrin, as were also the eliconnetances leading up to the ex-combunication of Luther and other re-formers from the Catholic church. The ormers from the Catholle situation was simply this, observed the situation was simply this, observed the speaker, the true Church of Christ was or was not embodied in the Catholic church. If the question be answered in the affirmative, the reformers were guilty of wrongdoing in opposing the organization to which they had held nilegistice. If the Roman church was not the Church of Christ, it was beyond their power to make it so. A Luther their power to make it so. A Luther could not establish Christianity, and no one but Christ himself could. Elder McMurrin told the story of the appearance of the Father and the Son to the youth, Joseph Smith. In answer to his petition for divine light, and the tragedy that followed a few years later, after the Church of Jesus Christ bat been fromly re-catablished on earth was been firmly re-established on earth was recited. The principles and dostrines of the Church were dwelt upon by the peaker in a comprehensive manner.

THE CURRENCY FAMINE.

Review of the Stiering Events of the Pasi Month.

After the finnocial panic events followed the usual course. When the risk had passed the country found itself confronted with a variety of mont-veniences all naturing themselvest al-finately to a tearrity of currency. Un-day our child and onscientific monta-stary graters the rates on the hants had drained them of standard reserve monta. The derivative worth has nemoy. The depositoric would have notes, but there was no way of rabid-ly increasing the supply of notes to meet the emergency. Consequently the reserve money was drawn out and largely hourded to affe depond vanits, in case, and matterness. Every dol-lar so hidden away meant the destruc-tion of four dollars of basis credits. What was needed wag an acceptably what was needed was an acceptants circulating medium, in sufficient quan-tity to meet the daily needs of business at a time when the ordinary supply of money was to a great extent in hidiog Every device permissible under the laws was adopted, and in some cases
