

## PELTIER TO ASK FOR NEW HEARING

Jury Found Him Guilty on Three  
Counts After a Long  
Debate.

### TWO COUNTS WERE IGNORED.

Defendant and Attorneys Much Sur-  
prised at Verdict and Claim  
New Trial Will Result.

J. C. Pelletier did not leave Salt Lake yesterday afternoon as he had hoped to. Instead his attorneys, Powers & Maroneaux, will be forced to continue the fight for his release, and will do so by moving for a new trial at the first available opportunity. Mr. Maroneaux stated to the "News" this morning that the grounds for the application would be insufficiency of evidence and misdirection to the jury. The verdict of the jury, brought in after six hours of debate, at 4:30 o'clock yesterday afternoon, was a great surprise to both Mr. Pelletier and his attorneys, and an attempt was made then to move a new trial, but it was ruled out of order until after the date for sentence had been fixed. The defense had submitted but little evidence in the full belief that the case of the prosecution was insufficient to convict, and Mr. Pelletier himself probably took the stand in his own behalf in the next trial. He told a story of what really happened in his Salt Lake adventures quite at variance with that of his one time hosts, and it will make interesting testimony if stated from the stand.

Of the five counts in the charge against Pelletier, the jury brought in a verdict finding him guilty on three. Judge Marshall ruled out one count, that of false impersonation with intent to defraud A. Fred Wey, proprietor of the Wilson, and the jury disregarded the count charging him with false impersonation with intent to defraud L. A. Dolan out of \$10. He was found guilty of false impersonation with intent to defraud Fire Chief W. H. Bywater on two counts, and with intent to defraud L. A. Dolan on one count.

During the long wait for the jury to come in, Pelletier laughed with the men in the marshal's office, and seemed perfectly at ease, but when the jury came in with a verdict of guilty, his face blanched for a moment, and he seemed about to break down, but he soon regained his composure, and his ever jovial expression. "A mistake has been made," he declared, "they have convicted an innocent man, who never in his life defrauded any man out of a cent, or ever took a dollar that was not his due."

In explanation of his dealings with Bywater, Mr. Pelletier declared that he was asked in so many words to get a railroad pass east for Bywater, and that he did so. He said that he carried a pocket full of railroad passes, most of them marked "ex-employee," and he states that he is in fact a friend of Senator Burrage as he indicated to Senator Smoot, and spent his boyhood in the same Michigan town where the senator and also Judge O. W. Powers spent their boyhood. He knew both of them as acquaintances, and he said that what he represented to Bywater was that he was in the secret service of the railroad, which he says is a fact, and merely mentioned Senator Burrage as an acquaintance.

When asked by Bywater to get him transportation to a fire chief's convention, he told him he could get him a pass east of the Missouri, and half that for the fare. He said that he gave him this half rate, \$35 was given him personally, and \$5 was sent to his hotel, and later the whole amount returned through Arthur Atwood, an old railroad conductor, who secured a receipt from it from Bywater. "I did not go to Bywater," declared Pelletier, "he came to me."

In regard to his bill at the Wilson, Mr. Pelletier denies the statement of A. Fred Wey that he did not pay them. "I paid \$27.50 to the hotel clerk at one time, and on the morning I left with my baggage I asked the clerk what I owed him. He said \$4, and I paid him that amount, throwing down a \$5 gold piece from which he handed me the change. I was in Salt Lake with my wife, and we were on our wedding trip. When they wanted me they had no difficulty in locating me because I had given Chief Bywater my El Paso address. Why I spent here four or five times as much money as these people stated I got from them, and what they accuse me of doing nobody but a child or a fool would do."

Herbina.

Will overcome indigestion and dyspepsia, regulate the bowels and cure liver and kidney complaints. It is the best blood purifier and invigorator in the world. It is purely vegetable, perfectly harmless, and should be used by all suffering from disease, you will use it if you are well.

R. N. Andrews, Editor and Mar. Cocoa and Rockledge News, Cocoa, Fla., writes: "I have used your Herbina in my family, and it did it a most excellent. Its effects upon myself have been a marked benefit. I recommend it unhesitatingly." Sold by Z. C. M. I. Drug Dept. B.

**SITES FOR STATE FARM.**

These in This County to be Inspected  
By Joint Committee.

A communication was received by the state board of land commissioners yesterday afternoon from the county commissioners of this county asking to have a date set for the committee which selects the site for the experiment farm to visit the lands offered by this county. As the committee was in Weber county yesterday looking over the sites offered by that county, no date was set for inspecting the Salt Lake county sites.

**LOCAL UNDERWRITERS.**

Utah Association for the Promotion of  
Life Insurance Interests in Utah.

The committee having in charge the drafting of a constitution for the new life insurance underwriters association, has completed its work and the document is now ready for adoption. The organization is to be known as the Utah Association of Life Underwriters, and the object stated is the advancement of interest in life insurance, and to bring those in the business into

## TWENTY YEARS AGO TODAY.

(DO YOU REMEMBER?)

The widow of Commodore Vanderbilt died in New York.  
President Cleveland and part of his cabinet visited the battlefield of Gettysburg.  
Brigadier-General Irwin McDowell died in San Francisco.  
Twenty-five persons lost their lives by the collapse of a building in Brooklyn.  
TEN YEARS AGO TODAY.  
Lady Kimberly, the last member of the line of the earl of Clare, died in England.  
The execution of Dr. Buchanan, the New York wife murderer, was postponed indefinitely.  
FIVE YEARS AGO TODAY.  
One hundred bodies of victims of the Schofield explosion arrived in Salt Lake.  
Major-General McArthur was appointed to succeed General Otis in the command of the Philippines.  
Thomas K. Gibson, a prominent old time Salt Laker, was found dead in his room.  
General Hart's command of British troops drove the Boers from Smithfield, South Africa, and occupied the town.  
Five freemen perished at a fire in New York.

more intimate, friendly, social and business-like relations. The meetings of the association are to be held on the second Tuesday in April, July, October and January, the annual meeting being in April. The initiation fee is set at \$5, and the annual dues at the same figure.

An article of general interest is the one relating to rebates, which says: "The members of the association pledge themselves not to pay, or allow to be offered, in any way, shape or manner, any rebate or premium or any other special benefit whatsoever to any person as an inducement for placing insurance or otherwise. Expulsion from the association is the penalty for violating this rule."

**A Positive Necessity.**

Having to lay upon my bed for 14 days from a severely bruised leg, I only found relief when I used a bottle of Ballard's Snow Liniment. I can cheerfully recommend it as the best medicine for bruises ever sent to the afflicted. It has now been used by me for several years. D. R. Byrnes, Merchant, Davenport, Iowa. Sold by Z. C. M. I. Drug Dept.

**BENEFICIAL RAINS.**

Weather Bureau Compiles Customary  
Weekly Report for Public Information.

Weekly crop bulletin for week ending Monday, May 1, 1900: Cloudy and unsettled weather with frequent showers prevailed during the fore and latter parts of the week. These showers were of great benefit as they soaked the ground thoroughly and placed it in fine condition to work. During the middle of the week, clear weather with warm days and cool nights prevailed. The growing crops, but also for the work of plowing and seeding that had been delayed by the inclement weather. High winds were damaging to crops, especially in the northern counties. Light frosts were reported in elevated districts, but no appreciable damage resulted.

Fall grain continued to make rapid growth. Early sown spring grain was coming up, but seeding was still in progress, though nearing completion. Alfalfa was also making rapid growth. One correspondent in the extreme southern portion of the section reported that it was blooming and being cut for hay. Sugar beets were coming up in excellent condition; seeding was still under way in headway. Fruit continued to bloom; most varieties with the exception of peaches and apricots were in good condition, though backward. Pastures and meadows were in fine condition and affording ample feed for stock. Sheep were being driven to the summer ranges. Shearing was nearly completed, and the clip was excellent.

Coast Markets Overstocked and Shipments Are Sent East.

Special Correspondence.

Kansas City, Mo., May 1.—E. H. Harlen, Jr., of Reno, Nev., arrived on the yards today with seven carloads of hay-fed steers. These cattle came from a point on the Nevada and California line, and had been on the way since April 22. They were brought around by Ogden, Salt Lake City and Denver, but despite the long trip they looked well and came through without any mishap.

"The Kansas City market has been getting a great many Nevada and Pacific coast cattle this spring," said Mr. Harlen. "We have all along depended on the Pacific coast markets to take

## NEWHOUSE MAKES PLAIN STATEMENT

Appears Before Council in Sup-  
port of His Application for  
Light Franchise.

### SALT LAKE'S COMING GREATNESS

Says that Within Two Years Immense  
Smelters Will be Erected in  
This Valley.

At the meeting of the city council committees on municipal laws and streets last night, the matter of granting a light and power franchise to Samuel Newhouse was discussed at considerable length, but action on the same was continued for two weeks as the council will leave for Los Angeles on Saturday evening, and will not have any meetings next week. In the course of the discussion on the proposition, Mr. Newhouse made some very important statements in regard to his proposed new enterprises for this city and also in regard to the city's promising future.

He said that in the next two years smelters would be in operation within 50 miles of this city which would treat 600,000 tons of ore a month, which is more than the entire output of the state of Colorado. With the advent of his proposed industry would be, he said, new stores, new homes, new factories and a greatly increased population for Salt Lake City, which he believed, would, within a few years, be the largest city between Chicago and San Francisco. Mr. Newhouse made it clear that he would not put \$10,000 into his light plant if he had anything to say in order that it may be as modern and up-to-date as it is possible to construct, and that he would take great pride in having the citizens of this city 13-14 per cent in their light bills and in launching such enterprises as would make Salt Lake a great city.

### FRANCHISE READ.

The proposed franchise was read, section by section, by City Recorder Critchlow, after which Mr. Newhouse was asked if he had anything to say in regard to the matter. In reply Mr. Newhouse said that the franchise was clear enough, but that he would gladly answer any questions or listen to suggestions made by any of the councilmen. In answer to Councilman Hartenstein, Lafayette Hanchett, stated that they would be glad to give a municipal ownership clause in the franchise, for the reason that the light and power plant would be needed by Mr. Newhouse for his other enterprises, and could not be turned over to the city.

### TAX ON GROSS RECEIPTS.

President Hewlett wanted to know what lights and power he would be given the city in exchange for the franchise. Mr. Newhouse replied that he had not thought of that matter particularly, but his idea was that the fairest proposition would be for the city to tax the company on its gross receipts. When asked as to what per cent of the gross receipts he would be willing to pay the city, he replied that from 10 to 1 per cent ought to be fair. Mr. Hanchett stated that 1 per cent of the gross receipts would be equivalent to 10 or 11 per cent of the net receipts. In addition to the tax on the gross receipts Mr. Newhouse stated that the company would of course have to pay the general tax on all improvements on its property. He said if the city would rather do it he would keep the 1 per cent and give the city free lights as the Utah Light & Railway company, but he thought the city should levy a tax on the gross receipts and then pay for the lights.

### CONCESSIONS TO CITY.

In answer to a question he said that he would gladly allow the city to string its wires for municipal purposes on his poles and that he would make any other concession within reason. It is his intention to cut off his supply over the entire city where lines could be run without any great loss. It was stated by Mr. Hanchett that the new company would exchange independent globes free of charge and would send an inspector to the houses to test them and make the exchange. This, he said, would be a business proposition, as it would save a great deal of power due to defective globes.

### NO FORFEITURE CLAUSE.

The matter of a forfeiture clause was considered and Mr. Newhouse said that he would not be willing to invest \$100,000 in a plant and then have it taken away from him at the caprice of councilmen who might be as fair as the present ones. He would be willing to have whatever protection for the city in that nature as is customary in other cities, provided, that the forfeiture could be reviewed by the courts and not left to the mere whim of the council. At the conclusion of the meeting an adjournment was taken for two weeks and the matter will be taken up by the city attorney and the attorney for Mr. Newhouse will draw up an amended franchise covering the points suggested at the meeting.

### FOR FIFTY YEARS.

The proposed franchise will extend for a period of 50 years and will provide for lights to consumers at 10 cents per kilowatt hour. The city will be given 1 per cent of the gross earnings of the company and will be allowed to string its wires on the company's poles. It was stated by Councilman Wey that perhaps the Utah Light and Railway company would accept a proposition of a tax of 1 per cent on its gross receipts instead of giving the city the free lights and power as at present.

### FISH FROM ALL WATERS.

They Will Swim in Aquaria at the  
Lewis and Clark Exposition.

Portland—In the fisheries building of the government group at the Lewis and Clark exposition are housed the exhibits of the bureau of commerce and labor, offering displays of the fish commission, coast and the geodetic survey. Most attention has been paid to the participation of the fisheries. Around the walls of the structure are located

large tanks, in which will swim various kinds of fresh and salt water vertebrates.

In a large pool, arranged to represent a bit of coast scenery, and located in the east end of the building, seals and other cold water denizens will display themselves. To the right of this will be shown a plastic model of the bed of the Chickamauga river, illustrating the manner in which the fish are captured for the taking of spawn. A model of the salmon wheels used on the Columbia river, showing the manner in which the south wall of the structure is located a small hatchery which will illustrate various methods of maturing the fish. This hatchery will be maintained in conjunction with the main hatchery located outside the fisheries building.

Handsome leaf-cabinets will be mounted on all center posts. In these will be displayed water-colored charts showing the markings of thousands of fresh and salt water vertebrates. Large show cases extend through the center of the building. One of these will contain the inboard profile of a typical east coast fishing schooner models of all types of fishing craft, from the small boat used by Italian shore fishers to the largest of steam trawlers, mackerel and cod boats. A model of the United States fish commission steamer Albatross, attached to the Pacific station, will be displayed, as well as one of the fish commission steamers used on the Atlantic and a government schooner assigned to the Maine coast. Another case will contain specimens of fish taxidermy while the remainder will show fish products and utensils and implements used by fishermen.

In standing cases will be shown every species of crustaceans and Mollusk found within the confines of the United States and their dependencies. A large model of a mollusk showing its anatomy will prove of great interest to the visitor.

The display of the coast and geodetic survey will consist principally of maps and models showing the work of this important department and illustrating the functions it performs.

Models of various lighthouses will be a part of the display of the lighthouse board contained in the main government building, but under the auspices of the bureau of commerce and labor. Samples of lenses will be shown, as well as a cross section of a perfect lighthouse and types of fog horns and bells used by the board.

Near the fisheries building will be located a large fish hatchery. Here will be shown the various methods of fish culture work, such as the removing of spawn, the retarding of the eggs maturing by cold storage and the mode of nurturing the small vertebrates until they mature. More than 50,000 eggs have been removed from steelhead salmon at the Yakima hatchery for participation in this part of the display.

### Exposure.

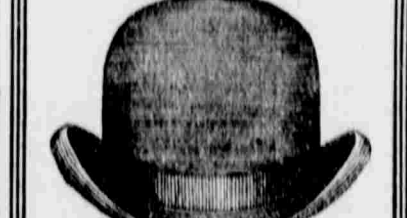

To cold draughts of air, to keen and cutting winds, sudden changes of temperature, scanty clothing, undue exposure of the throat and neck after public speaking and singing, bring on coughs and colds. Ballard's Horehound Syrup is the best cure.

Mrs. A. Barr, Houston, Texas, writes: "I had a cold and a very bad cough. It is very pleasant to take." 25c. Sold by Z. C. M. I. Drug Dept.

## VETERAN OF THREE WARS

Cured of Stomach Trouble By Pe-ru-na.

**Pe-ru-na Proves Infallible For  
Catarrh of the Stomach.**

Capt. W. W. Jackson, 705 G Street, N. W., Washington, D. C., writes: "I am eighty-three years old, a veteran of the Black Hawk, Mexican and Civil wars. I am by profession a physician, but long since abandoned the same."

"Some years ago I was seriously affected with catarrh of the stomach. My sufferings were protracted and severe."

"I tried every known remedy without obtaining relief. In desperation I began the use of Peru-na."

"I began to realize immediate, though gradual, improvement. After the use of three bottles, every appearance of my complaint was removed, and I have no hesitation in recommending it as an infallible remedy for that disorder."

"I have recommended the same to many of my friends, who, after moderate use, have realized the same result. I cannot speak too highly of its great remedial excellence."

A large army of men and women have been cured of dyspepsia and stomach troubles by Peru-na, after everything else failed them.

As a rule, people try doctors first. After trying doctors, they try household remedies. Finally they resort to patent medicines.

Thousands have gone through this same ordeal. At last they try Peru-na, when they get cured.

The reason for this is that they have had catarrh of the stomach all the time.

They have been doctored for almost everything else but catarrh of the stomach.

They have been given artificial digestants, such as the active principle of gastric juice and pancreatic juice. All this availed nothing. Peru-na alone afforded permanent relief.

In the case of Capt. Jackson we have a soldier, who was at one time a doctor, suffered from catarrh of the stomach. His sufferings were protracted. He tried Peru-na as a last resort.

He, like a multitude of others, found instant relief and permanent cure.
