ing already made in the leased ground, Mr. Griffiths is very confident of a pros-perous year's work in the great Nevada gold camp. "Generally speaking," he said, yes-terday, "the camp and the district are looking fine, and it is believed there that the coming year will be one of unprecedented success and prosperity. "The Consolidated's big 100 stamp mill will be running by the first of the year, if not before, and they say there is enough ore in sight to keep it busy for years to come, without going out-side of is own ground. The power was turned on a few days ago and the

side of its own ground. The power was turned on a few days ago and the wheels turned over for several hours in a very successful preliminary test, and there was not a hitch. As Goldfield was developed, and proven, in the first place, by leasers, much of the real mining of the camp has been in the hands of leasers ever since, and such operations are watch-ed very closely by all interested, even more so than are those of the commore so than are those of the com hore so that are those of the com-panies who work their own ground, largely because there are many ways of knowing exactly what the leasers are really doing, which do not apply

to owners. Among one of the latter most suc-cessful leasing companies operating in Goldfield, is the company Known as the Engineers. This is a close corporation, practically owned in its stock, by H. P. Taylor, J. C. Niven and Lyt-tleton Price, with a few shares held by Salt Lake friends. The ground oporated by this company is of the Flor-ence property, and the lease has been working, now five months, of which four months have witnessed the pro-duction of ore, and \$55,000 has already

from a general tour of inspection of his company's plant in the Tintic dis-trict, and in company with Gen, Supt. J. C. Dick, is today inspecting things at Bingham. INSPECTING PROPERTIES.

General Manager C. W. Saxman of

he Yampa smelters returned Saturday

of fresh discoveries has become a mater of more interest. Prospective locators have been active AMERICAN FEDERATION OF LABOR CONVENTION Denver, Nov. 10 .- The American Fed-

Prospective locators have been active of late, the goal being a hitherto neg-lected section of the White Mountains, across the summit from Coldwater canyon, northeast of Bishop. The dis-covery was made by D. C. Adamson, who obtained an average assay of a few cents over \$547 per ton from 50 pounds of float picked up on a 3-foot ledge over a distance of 40 feet in ration of Labor opened the second day's session of its twenty-eighth an-nual convention by listening to the report of the executive councils. The ledge, over a distance of 10 feet in length, says the Inyo Register. This startling richness led to the immediate appointment of the committee on rules and order of business and the other usual committees followed the adop-tion of the report of the executive of which, owned by Mr. Adamson and John Beauregard, is named the Golden ouncil. The president then announced that the convention was opened for business and the reception of resolutions. Not a

John Beduregard, is named the obtain Siren: the other, adjoining it of Lunn, Vernon Jenkins and W. W. Watterson, is christened the Hazel Belle. Since then many prospectors have gone to the scene and important developments may be expected in the vicinity. The ledge is covered with an iron capping. The ledge matter is a decomposed umariz. is covered with an iron capping. The ledge matter is a decomposed quartz, and all its values are in gold, so far as shown by the float mentioned. It is traceable for fully three miles, and along its course there may be more than one bonanza waiting for the drill and pick. It is between granite and line walks walls

The location is across the White Mountain summit from Coldwater can.

Outside Money to Invest in Seven Troughs Custom Plant.

Bid. Asked Early last spring, when the wheelof the Seven Troughs and Mazuma mills first commenced to grind out the profits for those who had nailed their faith to the Seven Troughs district, it .24 3.0 was evident to all that the two ter .041 stamp mills would not be alone in .13 the field of milling operations in the district, as there was then enough or n any of the three or four principally developed properties to keep both the mills busy till they were worn out, and now comes the runner from there that 631 a large custom mill is about to be 3.571 contracted for the treatment of custons 1.8714 2.00 ores So far, as no arrangements of a definite character have yet been complet-ed, there is little definite information 5.40 15 concerning the project, which is said by the Lovelock Review, to be in course of promotion by English and California mine operators. The capacity of the proposed mill is given a from 50 to 60 tons, so built that this can be increased by slight alterations. .30

being found within several miles on the slope. The situation is on a low hill. Wood and water are conveniently near at hand.

gion

Many specimens of ore brought in have been well sprinkled with gold. Of the dozen or so of assays made, the lowest was in the vicinity of \$200 and the highest about \$600. They were from a territory four miles long. Many local people have gone to the scene. One of the best posted among local mining men says that if half of the reports he gets are true the discovery is the big-gest proposition ever found in that re-

INCREASED OUTPUT. Last month's output of copper by the Nevada Consolidated and Cumberland

Ely properties, through the reduction works of the Steptoe Valley Smelting & Mining company, as shown reports, only missed by a small margin

the 2,000,000-pound mark. It is estimat-ed that the output for the present month will greatly exceed that of last

month as the plant is being operated in a much more satisfactory manner, and will have, to hear from, another section, the fifth, into which the water was turned last week. This sectio be ready for continuous work some time during the present week.

Work in the mine is said to be only dependent upon the demands of the reduction works, as it is asserted that there is plenty of ore in sight and ready to take out to supply all the demands that are likely to be made by the smelters.

> AN ADDITIONAL LEASE. The Consolidated Red Top Lease, of Goldfield, a promotion of John Donnelin & Co., anounces the securing additional lease on the adjo of ar

adjoining ground known as the Hazel Queen also a Consolidated property. The of the lease is the usual time The life months, and is the last lease to be let by the Consolidated Mines company which announces its intention to deny further leases.

ANOTHER KNIGHT PROPERTY. According to a report from American Fork, Jesse Knight has completed the purchase of the Major Ribbon prop-erty control, and has organized a new company for its operation. Of

this new company the verteran opera-tor is president, with R. C. Allen sec-retary and treasurer with a circu-ate composed of J. Will Knight, J. J. Jackson and J. P. Jensen. The new acquisition is spoken of as

being a very promising property, and one which is likely to give a good account of itself among the older ones account of it coll of the district.

EDWARD L. BURTON 11 East First South. S. L. City.

taken and the decisions rendered by the council during the year. Fourteen disputes between different unoins were considered during the year and the report explained what disposition the uncil made of these controversies. Regarding the action of the council in -junction cases and the labor camalgn made before Congress the report practically is a repetition of that of President Gompers. For attorney hire and other legal expenses the council announced that \$19,474 had been exended

A large portion of the report was aken up with the details of the eforts made by the federation to secure the passage of favorable legislation by Congress and the failures resulting. Inese matters also had been referred to by President Gompers.

PHONOGRAPHS TO TAKE **MURDERERS' STATEMENTS**

Chicago, Nov. 10 .- That grewsome igure of speech-"Listening to a voice from the grave"-has become a startling reality.

Any unbeliever to verify this state-Any undenever to verify this state-ment has only to visit the office of Coroner Hoffman some time in the near future, and hear the voices of murderers, making their last denials or detailed confessions, after they have paid the penalty for their misdeeds. These voices of the dead are to be-come a portion of the county records. They will take their place among the musty files of the coroner's office and when necessary may be used in court. The verbal statement of a man who is dead seldom finds its way into courts, at present, except as repeated by an-other, but this is one of the promises of the new system.

The phonographs already have been used in one important murder case-that of Mrs. Fannle Thompson, who was strangled in a Michigan avenue roominghouse. The story of Luman C. Mann, ac-

cused of being the mysterious "Ray-mond" who rented the room in which the woman was nurdered, has been transfered to one of the records and may be heard among the other voice which the coroner is preserving in phonographs.

MINISTERS PROTEST AGAINST STRAUS' "SALOME"

Philadelphia, Nov. 10.-A vigorous protest was entered by the ministers of this city vestered by the ministers of this city vestered by the ministers of this city vestered by the produc-tion here of Richard Straus' opera. "Salome," by Oscar Hammerstein at the Philadelphin Opera House. The Baplist and Methodist pastors at the weekly ministerial meetings adopted resolutions protesting against the presentation of the opera and decided to appeal to Mr. Hammerstein. The Methodists adopted the following: "Resolved. That the presentation of sacred biblical themes with dramatic theatric and operatic accompaniments. especially the bloody tragedy of John the Baptist, who stood in a pre-emi-nent relation to the Lord Jesus Christ; as prof -> d by Mr. Hammerstein in the opera sciome' is distasteful and even offensive to the religious sentiments of the community, and we condemn it as prostively unwholesome to public mor-als." tchis
