bronchitls,

"And so I prefer to think of that

"With the exception of the mainten.

The cut herewith given shows the motor of Alfred G. Vanderbilt's latest racing freak. The machine is intended to cover two miles and a half in a minute and to beat all records. Thus far it has not fulfilled expectation. The principal working parts of the machinery are of special nickel steel, and aluminium has been used whenever possible. A specially designed carbureter supplies the necessary explosive mixture. Fifty skilled French mechanics have been work-

sent are concerned, we are not willing to accept any share of the responsibil-ily this action entails. We believe that "Judging from the language employed in your answer to us, it is perfectly evident that we failed to make clear or that you failed to understand the we should strive earnestly and con-scientiously to reconcile our differences. While it may be true that on the part of the operators there has been no serious cause for complaint during real import of the propositions submitt part by us. We wish to assure you that we are

the past three years, we wish to assure you that in expressing this opinion you do not reflect our views. Not only has not unmindful of the great public in-terests involved in this controversy as to our future relations, neither are wa en criticism among the miners, unappreciative of the splendid efforts made by the anthracite coal strike combut, what is more important, there exists much ground for criticism and complaint. To such an extent is this true, that we feel it incumbent upon us tween us that would insure a just and permanent peace; but if you will refer to the award of that commission you to say that we cannot with any degree of contentment or satisfaction continue will find that the commission itself was in doubt as to the permanency of its to work under present conditions. However, we repeat that the interests However, we repeat that the interests involved are so vast, that we are not willing to break off negotiations with-out first making further efforts to rec-oncile our differences. We, therefore, propose that further conference or conferences be held between now and the bet de bott findings and expressed the hope that at the expiration of the award, the reat the expiration of the award, the re-lations of operator and employe would have so far improved as to make im-possible such a condition as existed throughout the country in consequence of the strike in the anthracite region. We had certainly the hope that our adherence to the letter and the spirit of the award and the absence of local memoral sticks during the next of April.

fiery speech aroused the meeting to an unusual pitch of enthusiasm. Her speech was followed by others equally as flery and enthusiastic. M. E. Ehguelich, the "group's" philosopher and writer, delivered what was regnrd-ed as Most's eulogy. August Lott, who is said to be slated to succeed. Most as the chieftain, also spoke in clowing terms

glowing terms. Resolutions were adopted that Most's body should be brought to this city at any cost. Later in the day a telegram was received from the "group" in Cin-

body should be observed a telegram was received from the "group" in Cin-cifinati, saying that the authorities ad-vised against removing the body. Following out Most's command, it was announced, the body would be cremated in Cincinnati. The ashes will be brought to this city, probobly on Thursday. The meeting decided that every member of the organization, which numbers 10,000, should meet the ashes at the Grand Central station and convey them with great solemnity to the headquarters at No. 325 East Sev-enty-fifth street, where anarchistic rites will be held.

that no sheriff can be re-elected until a term of service has elapsed. The theory is, and it applies equally to a trustee of a life insurance company, that the sheriff exercises such an im-mense power that he could always command his re-election. So with these trustees. They are in a position which would enable them by favoring one and presenting another, to command

would enable them by ravering one and persecuting another, to command proxies to secure their re-election if they see fit. This should be prevented by making re-election illegal. "I note that some of these gentlemen in New York say they do not know me. It cortainly seems strange that any

It certainly seems strange that any man should be in a position to spend very large sums of money of which they are the legal guardians during a long term of years and yet be totally unknown to them."

Are the People Entitled to Know the Composition of Remedies?

There is one man who stands out honestly and squarely upon the merits of his well-known remedies. Dr. R. V. PIERCE, who is author of one of the best-known medical books, the "People's Common Sense Medical Adviser," which has reached its 66th Edition, over Two Million One Hundred Thousand Copies having been printed, and who is head of one of the best Sanitariums and Surgical Institutes in the country, was the first physician to use pure, triple-refined glycerine in the preparation of his vegetable compounds instead of alcohol.

Nearly Forty Years Ago,

Dr. Pierce discovered that chemically pure glycerine of proper strength is a better solvent and preservative of the active medicinal principles residing in most of our indigenous or native medicinal plants than is alcohol. As its use is entirely unobjectionable, while alcohol as is wellknown when used even in small portions, for a protracted period, does lasting injury to the human system, especially in the case of delicate women and children. He found that the glycerine, besides being entirely harmless, possesses intrinsic medicinal properties, of great value. Its nutritive properties, Dr. Pierce believes, far surpass those of cod-liver oil, entitling it to favorable consideration in all cases of incipient consumption, especially when it is combined with the active medicinal principles extracted from Black Cherrybark, Queen's root, Stone root, Golden Seal root and Bloodroot, as in his ready put-up medicine the "Golden Medical Discovery." Besides its superior nutritive properties, glycerine is a very valuable demulcent and thereby greatly enhances the remedial action of all the foregoing roots in the cure of severe coughs, bronchial, throat, laryngeal and other kindred affections of the air-passages and lungs. In all "wasting diseases," where there is loss of flesh and gradual "running-down" of the system, the glycerine certainly plays an important part in lessening the breaking - down and wasting of tissue, and in promoting assimilation and increase of bodily weight. It is, in Dr. Pierce's estimation, a powerful reconstructive agent in all cases of impaired vitality and especially valuable when associated and combined with such superior alteratives and tonics as in "Golden Medical Discovery." Its wonderful solvent properties also play an important part in the cure of gall-stones, severe constipation, with dry and almost impacted stools. Glycerine is also one of the very best anti-ferments and as such counteracts the excessive fermentation of foods in the stomach, present in most cases of indigestion or dyspepsia. Thus the pain, belching of noxious gas, bloating and other disagreeable symptoms are overcome and the Stone root, Golden Seal root, Bloodroot and other ingredients of "Golden Medical Discovery" are greatly assisted in their action in completing a cure. As will be seen from the writings of Drs. Bartholow, King, Scudder, Coe, Ellingwood and other high authorities, these agents can confidently be depended upon for the most positive, curative action in all atonic, or weak, states of the stomach, accompanied with distressing indigestion or dyspepsia. Read from the writings of the authorities quoted, under headings of Golden Seal root, Stone root, Black Cherrybark, Bloodroot, Queen's root and Mandrake root and you will find that all these ingredients are recommended as remedies for indigestion or dyspepsia. All are ingredients of "Golden Medical Discovery," combined in such porportions that each enhances the curative action of all the others.

GOLDEN SEAL ROOT (Hydrastis).

Professor Roberts Bartholow, M. D., was the first of the old school of medicine to publicly recommend (in 1887) Hydrastis-or Golden Seal root. At that time Dr. Pierce had used this preparation as a principal ingredient in his "Golden Medical Discovery" for over twenty years. Since then Hydrastis has, become of National reputation as a remedy for mucous membrane diseases, especially in throat ailments and in inflammatory conditions of the lining membranes.

GOLDEN SEAL ROOT

(Hydrastis Canadensis).

Dr. Roberts Bartholow, Jefferson Medical College of Philadel-

phia, a recognized authority on Materia Medica and Therapeutics, says of Hydrastis (Golden Seal): "Very useful as a stom-achic tonic (stomach tonic) and in atonic dyspepsia. Cures gastric catarrh (catarrh -of stomach) and headaches accompanying same. In catarrh of the gall duct and jaundice, it is of especial utility. Constipation, dependent upon different deficient secretions, with hard and dry stools, may be

overcome by the remedy. Chronic catarrh of the intestines, even if it has proceeded to ulceration, is re-markably benefited by Hydrastis."

The foregoing is certainly a wonderfully strong endorsement of one of Dr. Pierce's chief ingredients used in his "Golden Medical Discovery."

From "Organic Medicines," by Grover Coe, M. D., of New York, we extract the following: "Hydrastis (Goiden Seal) exercises an especial influence over mucous surfaces. Upon the liver it acts with equal certainty and efficacy. As a cholagogue (liver invigorator), it has few equals. In affections of the spl and abdominal viscera generally, it is an efficient and reliable remedy. Also in scrofula, glandular diseases generally, cutaneous eruptions, indigestion, debility, diarrhoa and dysentery, constipation, piles and all morbid and critical discharges."

QUEEN'S ROOT

(Stillingia Sylvatica).

unsurpassed by few if any other of the known alteratives; most successful in skin and scrofulous affections. Beneficial in bronchial affections - permanently cures bronchitis-relieves irritations-an important cough remedy-coughs of years' stand-ing being cured. Aids in blood-making and nutrition, and may be taken without harm for long periods." R. Bartholow, M. D., L. L. D., says:

"Stillingia has long been in repute as an alterative and employed for scrofula in its various forms. Most satisfactory results have been obtained from its use in syphilitie Recommended in habitual constipation, torpidity of affections. liver, jaundice, piles, ascites (dropsy), due to hepatic (liver) changes or obstructions."

STONE ROOT (Collinsonia Canadensis).

"Alterative, tonic, stimulant. Valuable in laryngitis-' ministers' sore throat.' In diseases of stomach and intestines-improves appetite, promotes flow of gastric

uice; tonic effect upon organs involved. A good remedy in indigestion, dyspepsia, chronic gastritis, increasing the secretion from kidneys and skin."-American Dispensatory.

"There is no doubt of Collinsonia's action on the urinary organs. It has cured dis-orders supposed to be due to gravel, ca-tarrh of the bladder and dropsy from defi-STONE ROOT cient action of the kidneys. Cures irritation

of the cardiac (heart) nerves, with rapid, regular or irregular beating. Useful in valvular diseases."-Edwin M. Hale, M. D., prof. Materia Medica in Hahnemann Medical College, Chicago.

Wm. Paine, M. D., Author of Paine's Epitome of Medicine, New School Practice of Medicine and of the Medical Properties and uses of Concentrated Medicines, writing of Collinsonin (the active medicinal principle residing in Collinsonia Canadensis, or Stone root), says: "I, not long since, had a patient who was so much oppressed with a valvular disease of the heart that his friends were obliged to carry him up-stairs. He, however, gradually recovered under the influence of Collinsonin, and is now attending to his buisness. Heretofore physicians knew of no remedy for the removal of so distressing and so dangerous a malady. With them it was all guess-work, and it fearfully warned the afflicted that death was near at hand. Collinsonin unquestionably affords relief in such cases, and in most instances effects a cure." He further says: "In a case of persistent ascites (dropsy), where the ordinary remedies fail to afford anything more than a temporary relief, Collinsonin produced a permanent cure.

Prof. John M. Scudder, M. D., in his treatise entitled "Specific Medication," says: "Collinsonia (Stone root), is a specific in 'ministers' sore throat' (chronic laryngitis)." He continues: "It proves beneficial in other cases of chronic laryngitis, in chronic bronchitis and phthisis (consumption), allaying irrita-tion and checking cough. It also exerts a favorable influence upon the digestive processes, improving the appetite, facilitating digestion and acting as a general tonic. It passes off through the kidneys and exerts a tonic influence upon the entire extent of the urinary tract. I fegard it as one of the most direct and valuable agents of the Materia Medica and one that will give satisfaction to whoever employs it."

The above are strong endorsements of one of the most valu-able ingredients contained in "Golden Medical Discovery," viz., Collinsonia, or Stone root. Its virtues, however are not overextolled, as we can attest from our experience and observation in watching the beneficial action of the "Discovery" in heart affections, laryngitis, bronghitis, incipient consumption and other ailments noted above.

"Collinsonia stimulates the stomach, acts as a tonic to enfeebled muscular structure of the heart and has a direct influence apon atonic (weak) and dilated or otherwise impaired conditions of the veins. It is a specific remedy in piles. In catarrhal gas-tritis, where the circulation is defective, it, either alone or combined with hydrastis, is of first importance. They increase the appetite and greatly improve the digestion and assimilation of food. Good for rectal pains and piles of the pregnant woman. Is a heart tonic of direct and permanent influence. Excellent in the bicycle heart, in rheumatic inflammation and clergyman's sore throat."-F. Ellingwood, M. D.

REMARKS. We can not refrain, at this point, from calling attention to the wonderfully beneficial effects produced by Stone root in valvular and other diseases of the heart, as described by Drs. Paine, Hale and Ellingwood. The latter, it will be noted, says of it, "is a heart tonic of direct and permanent influence." He especially recommends it for the so-called "bicycle heart "

or, in other words, for all those cases of irregular heart action caused by over exertion. The wonderful regulating and strength-ening effect produced upon the heart by "Golden Medical Dis-covery" is accounted for by the presence in it of the activa medicinal principle of Stone root, and is also partly to be credited to the Golden Seal root contained in it. The Golden Seal root is a most valuable heart tonic, and in fact exerts a tonic effect upon all of the muscular tissues of the system, and, naturally it follows that the heart, being mostly composed of muscular tissue, is favorably affected and strengthened thereby.

BLACK CHERRYBARK (Prunus Virginiana).

Roberts Bartholow says: "Wild Cherrybark is an excellent stomach tonic; it has long been held in great esteem in domestic practice as a remedy in catarrhal states of

the bronchial mucous membrane and in phthisis (consumption)." "The sirup is much used as an ingredient in cough mixtures." "The tonic influence of this agent is more

markedly apparent when it is administered in disease of the respiratory apparatus threathing organs) of a subacute (mild) or (lingering) chronic character. A common

remedy for chronic coughs, the cough of nervous patients without apparent cause; is popular in the treat-ment of mild cases of palpitation. Palpitation from disturbed condition of the stomach is directly relieved by it."-F. Ellingwood, M. D.

BLOODROOT (Sanguinaria Canadensis).

"Stimulates digestive organs, increases action of heart and arteries-stimulant and tonic. Very valu-

"Overcomes congestion of the lungs, after severe cold in the chest from exposure. Given in bronchial coughs, in membrane-ous croup. It equalizes the circulation of the entire system, inducing warmth in the skin and in the extremities. It will assist in concerning the extremities (colidification)

of lung structure and restoring normal tone and normal func-tional action."-F. Ellingwood, M. D.

"Has most frequently been employed in incipient phthisis, bronchitis, influenza, pneumonia, croup, asthma, diphtheria, in scarlatina, dyspnœa (short breath), dyspepsia, hydrothoray (dropsy of the chest) and jaundice."—Edwin M. Hale, M. D.

"Its most important therepeutical effects are witnessed in diseases of the respiratory (breathing) organs. Used in croup, in functional amenorrhœa (absence of menses), chronic nasal ca-tarrh and nasal polypi."-R. Bartholow, M. D.

MANDRAKE ROOT (Podophyllum Peltatum).

"Certain, sure cathartic; leaves bowels in improved condition A gentle stimulant tonic; improves the ap-

petite. Particularly valuable in dyspepsia, gastric and intestinal catarrh. Beneficial in some affections of bladder."-American S.W Dispensatory. "Recommended in billousness with mark MANDRAKE

ed inactivity of the liver, sallow skin and conjunctiva (eyes), constipation, dry stools and bloated bowels, highly colored urine piles; is an alterative in plethoric (full blooded) conditions, in skin diseases and in scrofula and syphilis."-F. Ellingwood, M. D.
