Big Cottonwood Water Supply.

Commercial Club Committee Will Report Recommending The Absolute Acquisition of the Waters by Salt Lake City; Also Favoring Proposition to Make Utah Lake A Permanent Reservoir.

The reports from the different sub- | ter's precipitation for summer use, committees of the general water committee of the Commercial club will prove interesting reading when given out for publication. One thing that will be shown up is what is regarded in some quarters as a very foolish performance by the city council when Judge Easkin was mayor. The council was offered the railroad lands in City 'reck canyon by the Union Pacific at \$1.24 per acre outright, but at \$1.20 with only the agricultural rights. This left the railroad company the right to build through the canyon, to mine for coal or mineral or rock, and to run teams or cars in and out at the com-pany's pleasure. The council accepted the \$1.10 proposition which was prompt-ly turned down by the mayor, who gave the council a good scoring. However, that astute body passed the measure over his veto, and the matter was shortly forgotten. But after these years, as the Commercial club investi-gators turned over the leaves of back build through the canyon, to mine for gators turned over the leaves of bau history, they ran up against this snag, and remarks made by the investigators are not at all complimentary to the understanding of the old city council. It is understood that an absolute acqui-sition of these lands in City Creek can-yon will be recommended. It is also understood that a strong recommenda-tion will be made in favor of an absol-

ter is perfectly pure and wholesome and of abundant quantity. Furthermore, the Commercial club general committee will, it is held, advise the iegisla-ture to establish a water commission into whose hands the entire handling of into whose hands the entire handling of the water question as affecting this city and valley will be placed. This will take it entirely out of politics which in the past has been the source of a deal of confusion, trouble, and loss to the community. It trouble, and less to the community. It is believed by the different committee-men that with proper and intelligent attention, the water question that has for so long vexed he people can be for-ever settled, and that there is enough water within reach to provide the city water within reach to provide the city with all the water needed. Col. Holmes has, it is reported, a very comprehensive and intelligent scheme for financing the water question, in-volving the issuing of a series of water

QUARTERMASTER GENERAL'S REPORT

Washington, Nov. 7 .- The annual report of Gen, Ludington, quartermaster-general, is a review of the work done by his department during the year. The ost interesting feature is what he has to say regarding the transports, in view of the desire in some quarters to dispose of them. He says that the ships are fitted up in the best possible shape for the transportation of troops and that representatives of foreign nations have asked for the plans of the fittings with a view of improving their

transports. The report continues: "Nearly every ship sailing from Ma-nila had on board about 100 sick who were provided with every attention and comfort in the transport hospitals that would be found in any well regulated bospital ashore.

Of the many thousands of persons who have been transported on the vessels of the army transport service since its inception, not one life has been sacrificed by reason of any fault in the fittings or accommodations upon the army transports. ly \$50,000

In view of this excellent record, and of the experience of the department in its futile efforts to secure suitable commercial ships for the transportation o armies during the war with Spain and the further fact that when withdrawn from active service transports canno advantageously disposed of by sale I am firmly convinced that, even though circumstances should permit the with drawal of the transports from regular line service to the Philippine Islands, it would be wise policy to retain a suffi-cient number of transports as part of the quipment of the army to be econ omically cared for and kept in such condition as to be promptly available for any emergency which may arise requiring the transportation of troops on the ocean."
