## REVIEW OF WOOL MARKET

Boston, Mass., March 21.-The American Wool and Cotton Reporter will say tomorrow: "There has been more inquiry for wool during the week under review and the tone of the market is rather steadier. There has been no advance in price, but the downward tendency in values appears to be tem-porarily arrested at any rate. The market seems to have settled upon a basis on which actual business can be consummated to some extent, and the general feeling pervading the trade certainly shows more hopefulness and con-fidence. No great amount of business has been done, however, and if it were not for a large sale of a million pounds reported by a certain well known house, the business of the week would

foot up a pretty small total.

On the average there has been a dewool from the top edge touched by the market last November, but for the time being the market is in a steady

position as to prices.

The sales of the week in Boston amounted to 3,007,000 pounds domestic and \$85,000 pounds foreign, making a total of 2,595,000 pounds against a total of 1,997,000 pounds for the previous week, and a total of 2,390,300 pounds for the corresponding week last year. Sales since January 1st, amount to 25,003,000 pounds against 41.064,500

Raises Prices in Wall Street With a Vigorous

This is Followed by a Set-back-Latter Not Serious - Live Stock Higher-Produce Lower.

New York, March 22.-Wall Street: Heavy buying orders in the railroad department gave an upward impetus to prices at the opening. Bullish enthuslasm reached a high level in the railroad list, and all classes of stocks were absorbed heavily. The Pacifics were the best gainers. Declines in the tractions of 1 to 2 points were ignored and realizations in sugar, tobacco and People's gas had no perceptible effect on the upward rush of the railroads. The demand for standard stocks caused an average rise of over a point. Trunk line Issues were heavily taken, Pennsylvania rising to  $1.38\frac{1}{2}$ . Among the minor stocks handsome gains were made. Large blocks of the leading specialities were subsequently thrown on the market which caused a general set back, but the losses in the railroads did not extend beyond fractions. American ice broke 2%, Metropolitan 2%, Consolidated gas 3, and Brooklyn tran-

sit and Third avenue 2 points. The market continued active during final hour and rather irregular. Realizing ultimately affected the whole list, causing reductions from best prices. The closing was active and easy at the reaction but with striking net gains retained for a large number

The bond market was strong and ac-

LONDON WOOL AUCTION. London, March 21 .- At the wool auc-

tion sales 13,055 bales were offered. The attendance was good and there were fairly representative catalogues. A good selection of merinos and crossbreds were taken by the home trade. American representatives were the chief purchasers, continental buyers were cautious. There were large withdrawals of scoured locks and pieces, which attracted the attention of the French and German representatives and sold at slightly improved prices. Cape of Good Hope and Natal wools pounds for the corresponding time last were fairly competed for at a farthing

### BULLISH ENTHUSIASM UP. NEW PROCESS OF LEACHING COPPER

Robert Gardiner of Salt Lake Successful in Denver.

SILVER LODE IMPROVING.

Ore Dips Into the Gold Bust-Highland Boy Ore-Minerals of Canada -West Mountain Gold.

Robert Gardiner, of Salt Lake, who went to Denver several months ago at the request of Colorado capitalists to form the American Copper Mining and Extraction company, seems to be meeting with success in the operation of his copper leaching process, judging from an article appearing in the Denver Post. Mr. Gardiner, who has lived in this city for 31 years, experimented with his leaching process for six years before bringing it to the present degree of perfection. It has been tried in several places in Colorado as well as in Utah, and the following from the pen of e Post reporter, who visited Mr. Gardiner in the Lothrop block at the corner of Lawrence and Eighteenth streets, will be of interest locally. After referring to the vast quantities of copper ore which the smelters do not care to handle, the article quotes Mr. Gardiner as saying: "If you can wait thirty or forty minutes, I will treat the last sack of ore we have from start to finish, in your presence, and place the metallic contents ready for melting in-to ingots, before you. I won't describe the process, you shall see every stage and make your own deductions. Everything is rough and crude, but we shall manage it notwithstanding." There were two wooden tanks, say four feet in diameter, and three or four feet deep, but only one was used. He turned in about one-quarter full of clean water. He picked up a sack of crushed ore weighing 61 pounds, 30 mesh fine. Its appearance indicated extreme leanness. ater on, after the test was finished, Mr. Goody, the assayer next door, wholiy independent of the company, who had assayed it, told me it contained at the rate of 28-10 per cent copper. Having emptied the contents of the sack into the water, he inserted a twoinch rubber hose attached to a steam pipe, turned the valve, and the pulp and water began to sizzle in the liveliest manner. Presently he turned in a few pounds of sulphuric acid, and a little later a small quantity of reddish acid, and still later a like quantity of blue Meanwhile the steam injector had created strong heat, and in a few minutes the whole body of water turned a deep green. The only agitator used was a common hoe. In exactly twenty minutes from the time the charge was inserted the solution was ready to be drawn off into the precipitating tank, directly underneath in the base.

Waiting for it to cool and settle, ten minutes, perhaps, I went with him to the basement where stands a wooden tank of the same dimensions as the Suspended over it horizontally, iung a copper barrel perforated with holes an inch or so in diameter and in which were particles of scrap iron. The solution being drawn into this sec-ond tank the barrel revolved through tit for a short time until the precipita-tion of the copper had been thoroughly accomplished. In the absence of mechanical power it was turned by a crank. Tests were made from time to time and at last the solution drawn off into a receptacle provided for it and saved to be used again. The bottom of the tank was covered with bir layer of metallic copper, which was taken out, strained through a cloth, and the copper placed in my hand. Including delays here and there, exactly one hour had been consumed from the time the charge of ore was put in the first tank until I was placed in possession of its metallic con-tents. If the mineral contains any gold or sliver it was left behind in the tailings of the first stage to be treated

separately,
The cost of treating the low grade copper ores in the big mills at Ana-conda, Mont., is about 7½ per cent. Mr. Gardiner asserts in the most positive manner that with a suitable mill for which he showed me the plans and specifications, he can treat ores for 21/2 per cent of their contents, and in any quantity from 100 tons to 1,000 tons a day, saving all the copper, by his method of treating and precipitating. I am not a chemist, still less a metallurgist, but this process, crude and clumsy as it stands in its present form, interested me more than any other I have ever seen. I may be mistaken but it appears to be one of the most surprising advances that has been made, more especially as it is readily adaptable to all the grades of coppe ores produced here and in New Mexico It seems to me that both the old and new fields now so much talked about hew helds how so much taked about, can be rendered at once available and highly profitable by this method, suitably established. I would like to have it examined by mining men who have the class of ores herein mentioned, and also men who understand some-thing of chemistry, for it is a chemical method pure and simple, very cheap, rapid and effective. Then if they have time, tell The Post what they think of

### SILVER LODE ASSAYS.

Value of Assays from this Mercur Property Continue to Improve.

A letter received from Mercur today conveyed the information that the in-cline shaft which is being put down on the Sliver Lode group in that district is showing up some good ore. Assays from the top of the incline show \$5.30 in gold while the bottom of the incline assays \$4.20. The size of the vein has not been determined. The incline is in ore but the extent will not be known until some exploratory work is done.
This property adjoins the West Geyser
and the Gold Dust property in which
Messrs. McCornick and Pollock are interested. From present indications it is believed that the veins enters the Gold Dust property at no great depth, but there is without doubt a nice body of ore on the Silver Lode side of the side lines and the present effort to open it up will be watched with interest.

WEST MOUNTAIN GOLD.

George H. Davis Brings in About \$945 in Placer Metal.

Geo. H. Davis came in from Bingham yesterday with about 48 ounces of the yellow metal obtained from the sluicing of 100 mine cars of gravel last week.

bility." exhaustion." Not

Consult Free the CONSULT FREE.

Hudyan Doctors. Call or write to them.

Included in the shipment, which is valued at about \$945, is a small bottle containing some very nice gold nuggets. The gravel from which the gold was secured has been piled up in the course of the regular work. No attempt has been made to begin operations in good shape until today when the secretary

said the first gravel was to be hoisted through No. 1 incline. The West Mountain Placer has been operated since 1894, though not continuously. Since the consolidation of the Messrs, Watson's and Ireland's interests with those of the West Mountain in January, 1898, 34 cents a share or \$68,900 has been collected in assess-ments. A Cornish pump has been installed with a capacity of 1,500 gallons a minuteat the main shaft. Work has been pursued at several inclines and with the water difficulty, overcome to a great extent it now looks as if the West Mountain will soon pay its way.

#### MOUNTAIN LAUREL.

Capitalization Placed at \$25,000-Property Situated in Morgan Co.

The Mountain Laurel Mining company, whose property, consisting of the "Fourth of July" and five other claims, is situated in the Miller and Pine gulches, Argenta district, Morgan county, incorporated today, with a capitalization of \$25,000, and shares at 5 cents each The offers are Samuel. cents each. The officers are Samuel L. Brick, president: Thomas S. Wadsworth, vice president; John S. Lewis, secretary, and Charles H. Barton, treas-urer. These parties, together with Frank Troxler, also comprise the board of directors. The company's head office will be established in Ogden.

### HIGHLAND BOY ORE.

Something Over 200 Tons of Lead Ore Shipped This Week.

The Highland Boy, of Bingham, has made a shipment of something over-200 tons of lead ore this week. The ore will be turned over to the Germania smelter for treatment owing to the fact that the Highland Boy smelter, being built with reverbatory furnaces for copper ore, has no blast furnace for the treatment of lead ores. It may seem strange that a copper mine like the Highland Boy should be a lead pro-ducer. The fact is but little lead has been found in the mine and that exists in one crosscut, from which the ore is extracted occasionally when the supply of copper ore accumulates faster the smelter can handle it. The last shipment of lead ore was made last August, which may serve to show that the supply is not large enough to war-rant the erection of a blast furnace by the Highland Boy Company.

### At the Sacramento.

Glen R. Bothwell returned last even-ing from a visit to the Sacramento at Mercur which he reports to be in fair condition. The attempt to remove the debris from the top of the big cave-in reported some months ago will be delayed a little longer owing to the frost not being out of the ground. The ore covered by the cave-in is badly wanted in the mill just now to counteract the clayey ores now being leached from other parts of the mine. These ores refuse to yield a large percentage of their gold values. Hence the loss to the Sacramento company at present in the high tailings' values is no inconsidera-ble amount, running to \$1.50 a ton and even to \$2.50 a ton some days. Prepara. tions have been made to work the debris from the cave-in shortly when better results are expected in the mill

#### APPLICATIONS GRANTED. To Dredge Water Front at Cape Nome in Search for Gold.

Washington, March 22.-Secretary Root made a brief statement to the press today in regard to the action of the war department in granting licenses to prospectors to dredge the water front of Cape Nome, Alaska, in their search for gold. He admitted that one or two such licenses had been issued but to whom he did not remember, as it was in the regular routine of the department. There were about a dozen more applications of the kind on file and they will all be granted. The secretary explained that his authority in the matter was based upon the statutes

giving the war department jurisdiction over the navigable waters of the United Under the law no one could have done any dredging on the water front of Cape Nome within a three mile limit without the authority of the war department. This authority, the secretary said, had been granted in several in-stances because it was shown the pro-posed dredging of sand would not interfere with navigation of the riparian rights of owners of adjacent territory. The particular character of the sand to be dredged did not enter into the

mse at all The secretary further said that any one was privileged to dig for gold in the open sea, and the only question was whether such operations conducted within the three mile limit were an inerference with navigation or an fringement of the rights of others. When these conditions were complied with, the department was prepared to grant permission to any one to dig in the beach at Cape Nome or elsewhere at any point lying within three miles of law versus was a superstant of the conditions of the condi

miles of law water mark.
Although he did not go into detail Secretary Root made it clear that the privileges in question were free to all

responsible persons and no discrimination had been intended in the cases that had been acted upon.

Star Office Changed.

The refusal of James Moffatt, excompany of Pine Canyon, to bow to the decision of the stockholders as expressed at the recent election, caused the new officers to go to the office of the company last evening and take possession of the company's office property, which was hauled away to the office of Secretary Sam Williamson in the Jennings block on First South. Mr. Moffatt has been completely outgeneraled by the new board. The invoice of the last shipment of cyanides was turned over to him on Monday before the knowledge reached the sampling office of the change. The new officers next merning notified the banks and prevented Mr. Moffatt from securing the price of the shipment from the Kansas City office of the smelter company. Inquiry at the company's bank elicited the information that instead of funds the company had an overdraft At the same time the bank was notified against cashing any checks from the old officers. It looks now as if Mr. Moffatt has got to the length of his rope and will quietly bow to the in-

#### MINING NOTES.

The delinquent assessment sale of the New Klondike company is booked for

The Grand Central, of Tintic, reached town last evening with five carloads of

The delinquent sale on the Galena Mining company's 10 cent assessment takes place on Saturday next.

P. T. Farnsworth reached town today after a short visit to the Horn Silver, at which everything is moving along as

J. A. Beman, who is leasing some of the workings in the Star Con. at Tintic, was in town today looking after the disposal of another car of ore.

Operations were retarded at the Taylor-Brunton sampler last evening through the failure of the boiler pump

G. S. Hayes, who is sinking the shaft on the Silver Bow property in Tintle, writes to a friend that at a depth of 100 feet the ore has improved, and that a shipment will be made before long. It is stated on excellent authority that the Eagle and Blue Bell property at Eureka is not looking as well as it was some time back. Conditions are said to be rather unfavorable which may account for the depreciation of the

ock on the board. One who claims to know says it is extremely unlikely that the Daisy will The parties interesting themselves in the reorganization are a very Nothing can be heard small minority. from the big majority. The whole thing, it is said, will fall through and the property will be sold.

#### ······ BUSINESS NOTES.

Dr. August Rauscher, of South Cottonwood, has in view the erection of a \$5,000 annex to his residence to be used as a private sanitarium. The structure will be two stories high and contain ten rooms. Its area will be thirty-five by thirty-five feet. Architect Neuhausen is preparing the plans. Work upon the building it is here. sen is preparing the plans. the building is to be commenced soon.

To secure the payment of a note for \$3,500 the congregation of St. Marks, by George M. Scott and George Y. Wallace trustees, has given a trust deed to E. W. Genter, trustee, to lot 2 block 73 plat A, which comprises 421/2 feet by 10 rods of ground on which the church stands on east First South

Aaron Keysor and John Weir, Jr. have come into the possession of a part of the old Jennings estate on South Temple street near the Oregon Short Line depot. The piece of property bought has a frontage of ten rods on South Temple and extends twenty rods back. The purchase price is said to be about \$12,000.

A warranty deed has been filed for record with County Recorder Jensen conveying from Mary M. Chadwick, of Park Valley, to John Parson Turner, a house and 2½x10 rods of ground facing north on Second South street between Ninth and Tenth East. The consideration was \$4,000 and the assuming of a mortgage of \$1,500.

### DIVIDEND NOTICE.

UTAH SUGAR COMPANY,-Notice UTAH SUGAR COMPANY.—Notice is hereby given that the Board of Directors of the Utah SugarCompany have this day declared a dividend of 3 per cent (No. 17) on the capital stock of the company, payable at the office of the company, Deseret News Building, Salt Lake City, Utah, on March 31st, 1900. The transfer books of the company will close at 6 p. m. on March 27th, 1900, and re-open on April 2nd 1900. 1900, and re-open on April 2nd, 1900, HORACE G. WHITNEY, cretary.

Salt Lake City, March 15, 1909.

THE MISSION

OF SAN CURO AND SAN CURO CA-THARTIC TABLETS is to prevent and cure Rheumatism. Kidney, Bladder and all Uric Acid diseases.

For years I was tortured with rheumatism, I tried many remedies without getting relief. Some months ago I commenced laking what is known as California's Mission Remedies, I followed directions carefully, taking San Curo, applying Cala Cactus Laniment to my stiffened joints and using San Curo Catharite Tarlets to drain my system of impurities. At first J experienced little benefit but after giving the medicines a fair show I seem to be Permanentia, cured. Judging from my own experience these remedies will do for others what they have done for me, if given a fair trial.

# Burlington Houte

### The Art of Making People Comfortable.

Years of contact with the traveling public have taught Burlington em-ployes the art of making people comfortable-have taught them to do their work without "rubbing people the wrong way."
That's the principal reason why the

Burlington is the PREFERRED route from Colorado to the East—why it carries, actually carries, not claims to carry, more than 50 per cent of the travel between Denver and Chicago. Two trains a day from Denver to the East—the Chicago Special at 9.00 a. m.; the Vestibuled Flyer at 19.000 p. m.— Omaha, Chicago, Kansas City, Louis. Through sleepers daily, O to Chicago via Denver and the Burlington Route.

Tickets at offices of connecting lines. Ticket Office, 214 S. W. Temple Street, Salt Lake City.
