

BRIEF SUMMARY
OF WEEK'S TRADEFeature That Causes Solitude
Among Bankers is Attitude
Of Labor Unions.

BUSINESS OUTLOOK IS GOOD.

Lumber Trade is Complicated on Ac-
count of the Railroads Affording
No Relief in Car Situation.

The past week has been of no special moment in the general business situation, and the business agencies report conditions progressive and satisfactory. In banking, there has been a good demand for money, with the supply sufficient for the volume of business demanding it. Rates continue about the same. The only special feature to occasion solitude in the money market, local bankers men say, is the attitude of the labor unions, which has been a wet blanket. But for that, conditions in Utah could not be bettered. Said one prominent banker today, "There is some slackening up in building due to uncertainty in the cost, which is leaving many men idle at a time of the year when working men should be laying up means for the coming winter. When work may be scarce. One contractor told me today that he could get all the men he wanted at the old rate of wages. Still the volume of general business is large, considerably more so than a year ago, though it is mainly of a character not calling for much money. Reports from the northern sections of the state indicate excellent crops. But I look for a further increase in the price of wheat on account of the wheat conditions of the world, which may not be able to raise its own bread this year from a wheat standpoint, and sources of food supply must be looked for in some other way. The Deseret National bank has just published its statement for May 20, in which the deposits are shown to be \$2,322,022.22, and the cash on hand, \$72,137.55.

REAL ESTATE QUIET.

According to statements from the real estate men themselves, it is "all quiet on the Potomac." Where are inquiries reported, but not of a stirring kind. Still there have been a number of transfers during the week. The main deal being the transfer of the lot at the corner of A and South Temple streets to the Salt Lake Security & Trust company for \$20,000. It is the intention of the purchaser in the not far distant future to erect there an apartment house, but no plans have as yet been prepared. Apartment houses are being built in Salt Lake, and as they are in Denver, but owing to the high prices of labor and material, a number of such establishments that were projected have been given up, for the present anyhow. Ex-United States Senator Rawlins was proposing to build a good sized apartment house on Avenue Hill, but it is hard to call for bids, he found it would cost 25 per cent more than he had anticipated, consequently the scheme was abandoned. At present, the only new apartment house in process of erection, the Sharp-Platts and the Brunswick. True, there is a good deal of building going on, but it is hard to compare with what it would be for the real estate men, but maintain a hopeful temper, which is well, for optimism tends to good digestion. The real estate men are pushing their annual excursion to Saltair, and are now holding weekly, instead of semi-monthly meetings at the Commercial club to talk things over.

The excavations of the two new house buildings are ready for the concrete footings, and the concrete men have been working at the first floor of the Railroad Exchange building. There is to be \$40,000 worth of plumbing and heating done on this structure, and it is to be 30 proof, the plumbing and heating plant must be installed at the same time as the concrete is done.

LUMBER SITUATION BAD.

In the lumber trade a phase of the situation for the week is the building of commercial warehouses. One is for the Salt Lake Lumber and Manufacturing company, and the other is for Bailey & Sons, while two new apartment houses are promised, but the names are withheld for the present on account of probable complications in a rush for sale of building material. The shortage is as bad as ever, if not worse, with no prospect of relief. This has so embarrassed the smaller country dealers that many are going out of business. The better class of work demands the hard work is reported in excess of any previous time. Outside business is quite weak, and from most sections reports of damage to crops are exaggerated. Through some telegraphic process, there is a very sympathetic connection between crop conditions and the lumber trade, so that the receipt of unfavorable reports from the agricultural districts, the lumber men conclude there will be no business for them. The lumber men are to get any shingles, which is proving a boon and a boom for the patent roofing men, and then there is a good deal of thing being done as this is now quite cheap.

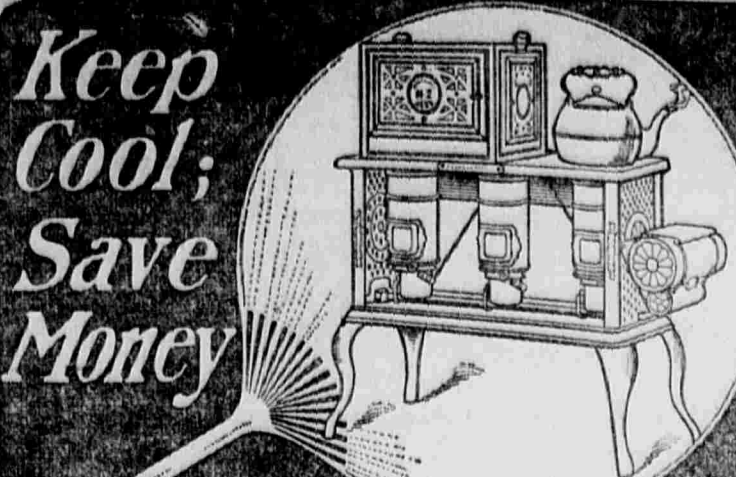

HARDWARE BRISK.

The hardware trade is in very good humor, over the fact that business with them is 10 per cent better than it was during May, 1896. The demand is for practically everything in the hardware line, so that in response to a request to enumerate the different articles called for, one might just as well publish the full catalog list of a large hardware establishment. It may be said, however, that the rare for roller skates, having abated, the demand for that class of goods on the hardware stores has practically ceased.

WHOLESALE DRY GOODS.

In the wholesale dry goods trade, the jobbers are about as good as summer goods, and are getting in stocks of heavy goods for next fall and winter consumption. These last include fleeces, backs, flannel, outing, and the like. Up to Thursday, the weather was favorable for putting out summer goods, but the sudden cold and rain reduced the demand for the present. Gingham

State of Ohio, City of Toledo, Lucas County, ss.
Frank J. Cheney makes oath that he is the senior partner of the firm of J. Cheney & Co., doing business in the City of Toledo, Ohio, and that said firm will pay the sum of ONE HUNDRED DOLLARS for each and every case of Chas. H. Allen's Catarrh Cure cured by the use of Allen's Catarrh Cure.

NEW PERFECTION
Wick Blue Flame Oil Cook-Stove

—the ideal stove for summer. Does everything that any other kind of stove will do. Any degree of heat instantly. Made in three sizes and fully warranted. At your dealer's, or write our nearest agency for descriptive circular.

The Rayo Lamp is the best lamp for all-round household use. Made of brass throughout and beautifully nickel-plated. Perfectly constructed; absolutely safe; unexcelled in light-giving power; an ornament to any room. Every lamp warranted. If not at your dealer's, write to our nearest agency.

CONTINENTAL OIL COMPANY
(Incorporated)

are reported all sold out—that is, what little stocks were on hand. The demand for sheetings is not specially heavy, but all are going, with prices rising. Hope bleachings that a year ago were selling at 7½ cents are now bringing 10½. Jobbers say the indications are that the remainder of the year will be easier and more reliable than the coming summer and fall than heretofore. Sales of print cloths have been very heavy lately, and the goods in the row goods being in demand at advancing prices. Nearly all kinds are exceptionally strong. Jobbers report a larger demand for fancy white goods in medium and fine count yarns, with no sign of relief from foreign mills, as mills abroad are just as independent as in this country on business for this year. The offerings of Jacquards are numerous, and some fine stripes, plaids, and checks are shown. Fine colored sheetings are so scarce that many houses are forced to buy abroad for early needs. Lines of colored goods such as checks, plaids, coarse chambrays, denims, tickings and chevrons are sold up for the remainder of the year, and the trade says that if the labor conditions of last year at the south are duplicated the coming summer, November will have been projected when work may be scarce. If no further business is booked. It is said there has never been a year in the American trade when similar conditions existed. Colored checks, denims, jeans, awning cloths, dockings and heavy checks and striped fabrics for clothing purposes are reported in such short supply with mills and agencies that only light lots can be had. Large eastern jobbers report their supply of awnings for the summer as entirely depleted.

RETAIL FLUCTUATIONS.

In the retail trade the week opened well and closed quiet, owing to the change in the weather. Some goods are making down to one-half and under on certain lines. Suits heretofore marked \$85 to \$95 are reduced one-half, in one case the reduction being from \$165 to \$80. Dealers are pushing to get rid of their summer stock. Silks and laces are proving very saleable with light lots can be had. Specialty strong. Summer silk gloves are selling well. Millinery is doing well, with the demand running to sailor hats.

CLOTHING OUTLOOK.

The clothing trade reports never better. The weather has been good along all lines. Sack coats seem to be the prevailing style of coat with wide, rooney pants. In men's wear the new line is light silk ties. They are very pretty and wash.

The shoe trade continues jubilant over the amount of business done, particularly in light shoes, notably white canvas and tan goods. There is also a great demand for patents.

BUSINESS NOTES

The news that the local stockholders of the Utah, Idaho, and Western Idaho Sugar companies had agreed on a plan for amalgamation had the effect of sending sugar upward several notches. Western Idaho continued to amply show its power, made high as \$19.50 without drawing forth any sellers. Utah common also stiffened to \$2.85 and Idaho Sugar reached the highest point of late months, \$9.15. Others in the list were somewhat inactive. The following are the latest quotations:

J. Ross Clark, who is in Salt Lake for the purpose of meeting his brother, Senator W. A. Clark, said to a "News" representative this morning, that the best sugar crop of southern California in which he is heavily interested, promises to be a good one, this season. Farther north in California the crop will be light, and around Salinas no beet planting whatever had been done this year, owing to the high waters which prevailed early in the season. Mr. Clark will leave tonight for Idaho on

WEATHER RETARDS
SPRING BUSINESSSeason is Very Backward and
Much Stock Will be Carried Over.

CONFIDENCE IS QUITE STRONG

Manufacturing Industries Have Not
Curtailed Operations—Many Encouraging Developments.

New York, May 24.—R. G. Dun & Co.'s Weekly Review of Trade tomorrow will say:

Further progress was made in the distribution of spring merchandise this week, but the season is still very backward, and much stock will be carried over. Confidence is not generally shaken, although some evidences of caution followed the violent rise in prices of wheat, and frequent rumors of crop disaster. Latest reports indicate that warm weather in some sections and much needed rains in other sections have given the tardy grain a better start. Leading manufacturing industries have not curtailed operations, several advances in output have occurred, and there are numerous encouraging developments to offset slow progress on the farms, including more prompt mercantile collections at many cities.

A conspicuous feature is the demand for bars from makers of agricultural implements. This business is larger than last year's, indicating that no anxiety regarding the crops is felt in this industry, although wholly dependent upon the prosperity of the farmer.

Business in steel rails includes large quantities for Japan and Panama. Structural steel mills have been busy in inquiries for office buildings, factories and railway bridges, most of the pressure coming from western cities.

All foreign hides are weaker, owing to the poor business of European buyers. Several grades are lower on the week, the stocks have accumulated, tanners buying less than the slaughterers.

George Austin, agricultural superintendent of the Utah Sugar company, is in town from Garland; he says it would be hard to imagine a more enthusiastic set of people than the farmers in the Bear River valley, whose crops have been so much benefited by the recent rains. The beet crops on both sides of the river are looking specially fine.

BRISK TRADE IN ALL
IMPLEMENT LINES.

The rains of the past week had a cheering effect on farmers everywhere and their jubilation is reflected in the orders they are pouring in for farm machinery and implements. At the headquarters for these wares, C. W. & M. Co. premises on State street, a visit this morning showed the force "fairly tumbling over itself" getting out the orders for machinery. The heaviest demand just now is for McCormick mowers, and rakes, for the purpose of handling the hay crop. There is also a good demand for wagons and buggies.

In the automobile department the rainy condition of the past week has interfered with several sales, but quite a number of buyers are investigating the merits of the Buicks and several good sales are pending. General Mgr. Geo. T. Odell is with the Salt Lake Commercial Club excursion in Idaho and reports from him indicate not only that the business men are meeting with a royal reception, but a wide field of new business will be opened up as a reward for Salt Lake enterprise. At the various branches of the C. W. & M. Co. in Idaho the local managers have joined the excursion party and gone with them from place to place.

WONDERFUL ECZEMA CURE.
"Our little boy had eczema for five years," writes N. A. Adams, Henriette, Minn. "I bought a box of Bucklen's Arnica Salve and that cured the dangerous wound." 25c at Z. C. M. I. Drug Dept., 112-114 Main St.

RIOTING ON THE RAND.

Police Forbid Gathering of More Than 6 Persons Within 300 Yards of Mines. Johannesburg, May 25.—With a view to checking rioting at the Rand mines, affected by the strike of 500 miners, the police issued a proclamation forbidding more than six persons to assemble within 300 yards of any mine. The strikers ignored the order yesterday, and marched on the Croesus mine with the supposed intention of attacking the mine working there. When the police ordered them to disperse they refused, whereupon the cavalry charged them and they fled. The action at Potchefstroom, has been ordered to hold itself in readiness to reinforce the troops on the Rand.

NATIONAL ASSOCIATION OF
TEACHERS OF SINGING.

New York, May 25.—About 40 music teachers held a meeting in Carnegie hall last night at 11 P. M. for the National Association of Teachers of Singing.

Mrs. Zeigler presided and after a short address introduced the speaker, Arthur DeGard, as the speaker of the evening. Mr. DeGard said that the object of the new association would be to do away with the many incompetent music teachers whom he declared are now flourishing and to get together in one organization the best members of the profession.

ERIE MACHINISTS CALLED OUT.

New York, May 24.—The 3,000 machinists and helpers along the Erie railroad, between New York and Chicago, were called out on strike today for an increase in pay and for the abolition of the piece work system.

COMMITTEE BACK
FROM MEXICOSent by Montezuma Orange and
Banana Company to Investigate
Their Holdings.TROPICAL FRUIT GROWING NOT
EXPERIMENTAL.Saw Oranges and Bananas in All
Stages of Growth and Development
—Labor and Transportation Cheap
And Easy of Access—Com-
mittee's Report.

Montezuma Orange & Banana Co., Salt Lake City, Utah.
Gentlemen:

Your Committee sent to inspect the Montezuma plantation at Tampico, Mexico, and to investigate the conditions relative to the growth and production of oranges and bananas, respectfully submit the following:

We left Salt Lake City, January 17th at 3:50 p. m., and arrived January 21st at 6:30 p. m. at

TAMPICO, THE GATEWAY TO THE
REPUBLIC.

Tampico, a few miles from our plantation, with a population of 20,000, has become the principal port of the Republic. The Custom House, Fiscal Wharf and Jetties, which have been constructed by the Government at a cost of \$5,000,000, are equal to anything elsewhere in the world. More than thirty steamship lines touch monthly at this port, giving us unlimited facilities for shipping our products to the markets of the world.

OUR PROPERTY.

The Montezuma plantation is located on the Tamesi river, which is navigable for 150 miles inland and is the only fresh water stream in the surrounding country. We spent two weeks on our land at Tampico and in the immediate vicinity, making a careful study of the climate, soil, rainfall and temperature, kinds of fruit most profitable, and the best methods of cultivating, harvesting and shipping the products. We have about 1,400 acres of land, wonderfully fertile and especially adapted to the growing of oranges, bananas and all citrus fruits; also pineapples, strawberries, cantaloupes, corn, beans, rice and all kinds of vegetables grown in northern and southern climates.

IRRIGATION.

The land is splendidly situated for irrigation. The fall back from the river averages 6½ feet to the mile, and the lift of the water to the highest point on the land is about 12 feet, making it practicable to locate a pumping plant and run a water main at small expense, as there is sufficient wood on the place for fuel, to run a pumping plant for many years.

RAINFALL AND TEMPERATURE.

Rainfall in Tampico and vicinity averages 44 inches; the temperature averages about 74 degrees the year around.

SHIPPING FACILITIES.

Our location on the Tamesi river is ideal for shipping. The present method of transportation down the river to Tampico where all ocean steamers and river steamboats, at a cost of about \$4.00 per car. In course of time the ocean steamers can come alongside our own wharf, where they will be loaded with but a trifling cost, for shipment to Europe and the United States. In addition to this advantage of water transportation, we are but a few miles from the Monterey branch of the Mexican Central Railroad, the nearest shipping point to the United States, where our products can be loaded at a small cost for shipment to interior cities as well as to the United States.

CLIMATE AND HEALTH.

The climate in our locality is perfectly adapted to the cultivation of all tropical products. The fertility of the soil is unlimited, rainfall is abundant, cheap labor plentiful, and there is no tropical region in the world so free from the malarial complaints peculiar to southern and well watered countries.

DEMAND AND SUPPLY.

The increased consumption and consequent demand in the United States for the banana as a fruit, and the many useful and necessary products into which it is now manufactured, place it among the staple articles of commerce. In Great Britain the banana is hardly known to most of the forty millions of people, and in Continental Europe a like condition prevails, as evidenced by the fact that a market is now being created in Germany. These districts are so extensive, that the production of banana cannot be easily overdone, when, too, we consider that only a small area of the Pacific surface is suitable for the banana, and of that area only a fraction is so located that banana growing can be made largely profitable, for necessarily large parts of the belt are high dry or sterile, others are sandy or rocky deserts, and an immense part is covered by oceans.

TRANSPORTATION.

Freight rates from Tampico to Denver, Kansas City, Chicago, New York and intermediate points, are \$1.15 and \$1.25 per car load. Water transportation to New Orleans is 20 cents per

hundred. By rail from New Orleans to the principal cities of the United States 45 cents per hundred.

MANAGEMENT.

A large force of Peons under the personal supervision of Mr. Alex. Smith, an old time resident of Tampico, thoroughly acquainted with the fruit growing industry, familiar with the language and customs of the natives, and of all the business, are clearing and planting the land, and building houses on a beautiful townsite selected on the bank of the river, where the company offices and homes for the laborers are permanently located.

TROPICAL FRUIT GROWERS
VISITED.

McDonald Brothers operate an extensive orange orchard near Tampico, and have been shipping oranges, lemons, grape fruit and winter vegetables in large quantities for a number of years.

The Tehuantepec Mutual Planters Company have 300 acres planted into bananas, and will plant 1,500 acres more in the near future.

The Chiquapas Rubber Company of California, are preparing to plant a large acreage in bananas in southern Mexico.

The Mexican Banana Company of Mexico City, with the well known banana dealer, Dr. Chas. M. Harrison as president, has been organized with a capital of \$120,000.00 gold, and will plant 500 acres in bananas near Tampico.

The International Lumber and Development Co., a Philadelphia corporation, will plant 2,500 acres of bananas on their plantation in southern Mexico.

The Comp. Development Company, of Chiquapas, Mexico, began planting of 300 acres of bananas February 1st.

Summing up all these facts, there is no doubt about the successful growing of oranges and bananas in our locality. The business is in no way experimental, but is an assured fact, as the climate is moist and warm the year around, the soil is rich and fertile, water is abundant, the land is level, easily cultivated and irrigated, with a rainfall sufficient to produce good crops most of the year even without irrigation, and all fruits grow luxuriantly when properly cultivated. Labor and transportation are cheap and right at our doors, markets are certain and unlimited, and prices are high. The only other factor essential to the success of this enterprise is the local management, which is now in the hands of a competent, untiring worker, thoroughly acquainted with the country, the skillful handling of labor, steady well with the commission and shipping companies who speak the Mexican language fluently, and is confident of the future success of the business.
