## THE DANFORTH

## Non-Explosive

## PETROLEUM FLUID!

THE terrible and fatal disasters, which are almost daily occurring by the careless use and explosions of kerosene oil, should call the serious attention of using it to its deadly qualities and induce them to procure a substitute for it.

Thousands have perished by using kerosene oil, and thousands more will be offered a sacrifice to its death-dealing properties without its use is discontinued or its destructive element done away. It is a fluid capable of a far more brilliant light.

## Cheaper, More Cleanly and Perfectly Free from the Danger of Explosion!

can be found, is it not perfectly suicidal to delay for a single day to use it? Such a fluid, by years of patient experiment and the expenditure of over fifty thousand dollars, has been provided by R. F. DANFORTH, of Cleveland, Ohio, and it has been introduced to the public with great success.

For the Danforth Non-Explosive Petroleum Fluid it is claimed:

1st. That it is Non-Explosive and perfectly safe in whatever form used.

2d. That it is entirely free from filth and grease, and will not stain silks or fabrics of the most delicate colors or tints.

3d. That it is entirely free from all disagreeable odor.

4th. That it gives a purer, more brilliant and at the same time a softer light than any oil or fluid in use, and is fully equal to gas light.

5th. That it is (except daylight) the cheapest light ever discovered.

Surely, if the fluid is as above represented kerosene oil should be discarded in every family where it is used, and the Danforth Fluid used in its stead. Not to use it would be trifling with the lives and property of every member of the family.

Which for Neatness of Design, Thoroughness of Combustion, Capacity of Oven, Economy in the Use of Fuel and Uniformity of operation, place them as the best Stoves in the market.

They have been constructed specially for the use of our Western Bituminous Coal (for which all stoves of Eastern manufacture are so ill adapted). Enlarged Flues insure a perfect draft; the plates that line the fire chamber are unusually heavy, and combine certain peculiarities in their construction which give these Stoves superiority over all others in the consumption of their smoke, thus saving a large per centage of fuel.
