SEWERAGE FOR SALT LAKE.

tem of sewerage established there will down where there are no shores and be no sanitary reason against this be- no boundaries. The seasons, we may ing one of the most healthful cities on rest assured, are following each other the globe. All, or nearly all of its in regular order as they always did and natural conditions contribute in that always will till time fades into eternity. Some time since, the investigation will continue to happen along and dis-

Lowrie, civil engineer for the He will do only at the last day. city of Deaver, whose services were procured, has completed his observations and within the next two weeks his plans and specifications, including an estimate of the probable cost, will be in the hands of the committee, who will then be prepared to report be adopted without much delay, it is probable that the matter of obtaining legislative permission to obtain the necessar fands to carry forward the enterprise will be laid before the Assem -

bly at an early date. The nature of the pives best adapted for the purpose is tile with a glazed surface-external and internat. The be in the vicinity of White Bridge, 1Mr. Lowrie expresses the opinion that it will take ten years at least for the discharge of the sewage to make any perceptible difference to the stream into which it is conveyed. It is not likely to be percaivable so far as the Lake is concerned for an age. Indeed it is a question as to wiether the chemical not act as a complete and effectual eclipse occurs, Satura will be west of properties of that body of water will

As a matter of course the location of the initial main will necessarily limit the system, so far as it is concerned, to a distance of one block southward to it from that threetlon's practicable As relating to that part of the city to the northward of the main, the limit will only be confined to the capacity for carriage of the pipe itself. UNDER a recent date "Emigrant" the line indicated would involve the as follows: introduction of another main,

As the introduction of sewerage must necessarily be a matter of gradual extension, owing to the enormous expense involved, especially in a city of magnificent distances like this, it wil be necessary to divide it into sewerage

In establishing and extending an improvement of this nature the priagenius of equilibrium, should never be lost sight of. It would be difficult to" establish a mere just method of inaugurating the system by the laying of the main then by using the general fit by an earlier use of the facilities afforded. But all should be contented if the drift of the measure is toward equalization, or it it sails as close to

In extending the system to the dis-

WEATHER PROBABILITIES AND CRETAINTIES

THE days have been growing longer gradual lengthening out has been imperceptible to the general public till within a few days past, and only then by comparison with some specific have to rise early have probably aothe slight change more! expressive this morning than yesterbut remains forever stationary while we cause him to seem to move by dippling or rising in the collection accordance with the season as we progress in our magnificent and inconceivably rapid sweep in the unvarying path of

that at this season of the year the sun is more remote than at any other time, and hence the coldness; in point of fact the nearer he is the colder is the weather, the converse being also the case. There is

ne essentially meteorelogical conditio to which the present "cold snap" attributable, however, it being merely a huge wave of Arctic temperature transported with but slight modification to more southerly latitudes through the action of the atmosphere, and according to all precedents I should now about Lave spent its violence, as this latitude is not the home of such frigid conditions and sooner or later they must yield and be assimilated with our own.

The idea was generated some time since that the solar system-the sun with our earth and all the rest of the planets-was constantly sinking deeper It is more than likely that during the and deeper into the abyss of space, and body will be asked by the municipal and warm seasons would be heightcorporation of Salt Lake City to pass ened in its particular characteristic. a measure giving it permission to while autumn and spring would thus negotiate a loan for the purpose of be measurably curtailed. A more providing money to establish a system baseless thought never entered the of sowerage. If the request shall be mind of the most accomplished day made it will undoubtedly be granted. dreamer. Not only does the history of The city has reached a point in its his- all times show that the mean variatory when sewerage is an absolute tions of temperature have changed necessity for the preservation of the so little that the seasons public health, the value of which is have become synonyms for confar in excess of say monetary con- staney, but the conditions pre-sideration that could be named. All sented are absurd. Suppose it were the objects for which loans have here - possible for our system to "sink" furtofore been procured by the corpora- ther and further into the chasm of tion have been highly Sensificial; such space, how could that affect our clifor instance as the catablish mates of conditions when it is considment of our waterworks system, ered that we occupy the same positions and the Sait Lake and Jor-with reference to each other and produce Ganal, both indispensable to ceed through the same evolutions conthe welfare and comfort of the people. stantis? Space is changeless, so it lars has been raised to carry on the Sewerage is not less so, and the legis - matters not at what particular point lation giving permission to borrow for | we may be, and as It is also illimitable the inauguration of this contemplated there can be no particular point except improvement may be taken as a fore- with reference to some other fixed obtect, hence, a'so, we cannot "sink" nor With a thorough and complete sys- "rise," there being neither up nor Our Arctic waves and our torrid blasts and consideration of the question of appear under the subduing influences sewerage was confided by the City of the temperate zone until there is a Council to the five aldermen, as a complete disappearance of existing committee. In their researches and laws and the Creator Himself sees fit deliberations Mayor Armstrong has to change all rules upon which we now been associated with them. Mr. rely by the force of experience, which

THE STELLAR WORLDS.

On the 28th day of this month the moon will be totally eclipsed; the people. There was no damage and phenomenon being visible throughout report to the Council. If their Asia and Africa. According to the Scientific American the moon will enter the earth's shadow before sunset, but when the total eclipse begins, at 5:38 p. m. (eastern standard time), it will be dark enough to watch its progress through the most interesting stages. The moon will not be entirely lost to by the fire department and by the sixth sight when totally immersed in the regiment as an armory. In the build-earth's dark shadow. She will shine ling were 20,000 rounds of cartridges, which kept up a constant fusilade, and surface—sxteenal and internat. The location of the initial main has not been fully determined, but will probably be either Fourth or Fitth South light is refracted into the shadow by Street, and the emptying point into the earth's atmosphere. It varies extinguished. The loss is estimated the River Jordan will likely greatly in different eclipses, depending at \$75,000. upon the quantity of clouds and vapor in that portion of the atmosphere where the sunlight must graze in order

An interesting phenomen will occur on the same day that the lunar eclipse takes place. The moon will be in con-Junction with Saturn on the 28th at 8 h. 28 m. A. M., being at that time 1 deg. 10 min. south of the planet. When the the moon and in her near vicinity, shluing brightly while her fair face is hidden from view. After the eclipse is over, the moon, with her full round face, and Saturn, the evening star, only six days after opposition, will make a picture fair to see,

MAY ENTER LAND.

The extension further southward than writes from Randolph, Rich County, Editor Deseret News:

Please answer the following question through the columns of your valuable. Can a married person (male) under the age of 21 years, enter land under the existing laws? You will confer a great favor by an-

Yes. The beneficent intent of Congress, in enacting the land laws, was to doubtless be kept in view. It families might obtain homes. A marprovide methods whereby heads of the laying of the corner stone of the ice Palace has been postponed until Saturday next. will probably be impracticable ried man is the head of a family maintain an exact equal- whether he have children or not, and ization, but when such is the case the the fact of his being married removes the bar of minority which would otherwise operate. A married man, though not twenty-one years old, may take advantage of the homestead, pre-emption or timber culture laws. fund for that purpose. Yet that is no He cannot, however, enter land under strictly equal, as one portion of the in- the desert act during his minority. habitants-those in close proximity to That law aims at the reclamation of the pipe-will receive the greater bene- barren lands, rather than the establishment of homes.

A dispatch dated Chicago, January 7, says: The Chicago Postal Telegraph Company, an Illinois corporation, tricts local taxation is the only | which took out a charter about a month just method, while local option should ago, has notified the Federal authorities at Washington of its acceptance of We congratulate the City government | the terms of the Act of Congress passed upon their determination to grapple July 24, 1883, by which any telegraph with the question of sewerage. We company giving preference to Governcannot but believe that they will have ment business dispatches, at a rate fixthe hearty sympathy and support, in ed by the Postmaster-General, has a pushing the measure, of the great bulk | right to build and operate wires on any post road-over which the United States mail is carried. Several routes have already been projected, one of them being from Chicago to Duluth, and another through Illinois and Iowa and trence via the Union Pacific road to San Francisco. The company will cosince the 22d of December, but the operate with the Mackay-Bonnett

A few days ago news was received of the successful mounting of the new Lick telescope, of which so much has been expected; but owing to the fact that the weather was unfavorable, the and one thousand rounds of cartridges time—say eight o'clock a. m.—
there is much more daylight now than at any time during the latter—part of the past month; no one has noticed that this condition was a little more.

The object of the capacity could at the time be made. [A dispatch dated San Jose, January 7, says: The first satisfactory observation through the Lick teles—which was consumed at \$50,000, all of which was consumed at \$50,000, all of which was consumed at \$50,000. heavens being obscured by clouds, no the past month; no one has noticed observation through the Lick telescope was made this evening, day or the day before or any time this dome, owing to freezing, could ginning at 9 o'clock, as the week, but it was nevertheless, and it not be made to work before that week, but it was nevertheless, and it will keep on increasing, the mornings growing "broader" and the evenings "wider" until the 21st of June next, when the order will be reversed again and the days go on shortening till the sun again resches his most southerly point, twenty-three degrees and a fraction south of the equator, when he will "call a halt" and immediately start upon his north-term to research to res and immediately start upon his north- used, as the astronomers were not ern journey. That is, he will seem to do so, for we all understand that he does not relatively to us move at all on the photographic lens will immediate

Pueblo, Colo., Jan. 7 .- This evening about susset three miles from Chico in the eastern part of the country, Chas. McClosky was struck by a freight train Tuere is a mistaken idea with some on the Santa Fe road and doubtless

"I have been occasionally troubled with Coughs, and in each case have used BROWN'S BRONCHIAL TROCHMS, which have never falled, and I must say they are second to none in the world."—Felix A. May, Cashier, St. Paul, Minn.

NOTICE. Whereas, certain parties are and have been trying to injure the business of the Utah Nursery Co., by certain false claims I publish the enclosed.

THE SKIN CAN BE REPTSOFT, White and free from taint of perspira-tion by adding Darbys Prophylactic Fiuld to the water used in bathing. It removes all offensive smell from the feet or any part of the body. Used as a tooth-wash it will barden the gums, preserve the teeth, cure the tooth-ache and make the breath pure and sweet. Cures chafing and inflammation, Piles, Scald Feet, Corns, etc.

All persons sfflicted with Dyspepsia, Diarrhea, Colle and all kinds of indigestions will find immediate relief and sure cure by using Augustura Bitters. The only genuine is manufactured by Dr. J. G. B. Slegert Sons.

SLEIGHING PARTIES

Are just the thing for January, but you can't enjoy the cold ride if feeble from deblifty. Paine's Celery Composite has made new men out of thousands whose brains and bodies, from overwork or dissipation, were failing them.

How they are loved! Keep them fat, healthy and happy, by using Lactated Food. It is easily digested, and, when prepared for use, is identical with healthy mother's milk. It is both the best and most economical food. Perhaps no local disease has puz-zled and taffled the medical profession more than nasal catarrh. While not immediately fatal it is among the most

distressing, nanseous and disgusticills the flesh is heir to, and the record show very few or no cases of radic cures of chronic catarrh by any of it multitude of modes of treatment unthe introduction of Ely's Cream Bal a few years ago. The success of the preparation has been most gratifying and surprising. SALT LAKE, Dec. 24, 1887.
